Magnitude's Mission

To foster the next generation of scientists and engineers.

Problem

By 2018, McKinsey forecasts a 50% - 60% gap between the supply and demand of people with deep analytical talent.

K-12 education has not fully addressed this projected gap in data scientists.

Solution

Science and engineering practice in a project-based experience.

Next Steps

Air Quality Network built and managed by students

Fall 2016, San Leandro Unified School District

Q & A

Thank you!
