

The background of the entire image is a dark blue gradient. On the left side, there is a faint, stylized illustration of a suspension bridge, likely the Golden Gate Bridge. On the right side, there is a faint silhouette of a city skyline, including the Transamerica Pyramid. The OSIsoft logo is positioned at the top center.

OSIsoft®

USERS CONFERENCE 2016

April 4-8, 2016 | San Francisco

TRANSFORM
YOURWORLD

WELCOME

Facilities, Water, and Energy

Presented by **David Doll, Industry Principal**
Gary Wong, Industry Principal

Agenda

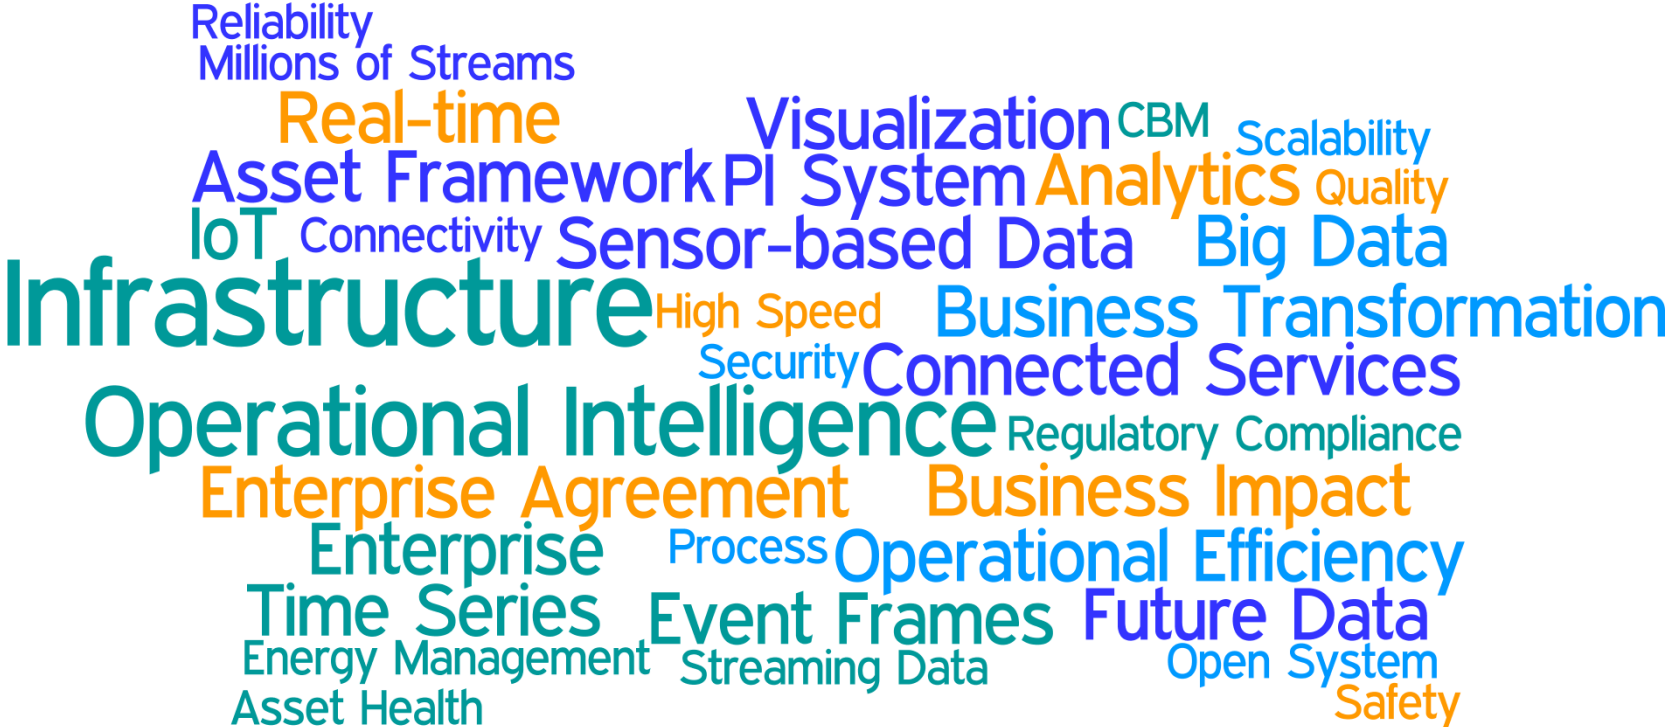

- Welcome
- Business Challenges
 - Energy
 - Water
 - Facilities
- Summary for the day

WELCOME to Day Two

Conference Theme and Keywords

Day One – Did you see...

- Transforming Your World
- Roadmap: Integrators and Coresight 2016
- Robert Ballard and finding the Titanic
- Discussion forums
- IoT, IoT, IoT

Do not miss the IoT Zone

Located outside industry tracks on Wednesday April 6th

 ELEMENT ANALYTICS™

MONICO
SIMPLE SOLUTIONS. POWERFUL MONITORING.™

NETWORKS
olea™

Stratus *IoT* Solutions

 **Southwire**®

Check out our exhibitors!

Facilities and Water PI User Groups

Join to discuss best practices, white papers, share news, and exchange ideas.

Objectives:

- **Identify Best Practices**
- **Share knowledge and ideas across our industry**
- **Foster communication regarding our industry Needs**

This is NOT an avenue for sales presentations or marketing

Customer run,
customer led,
OSIsoft assisted

Want to opt in?

<https://pisquare.osisoft.com/groups/facilities>
<https://pisquare.osisoft.com/groups/water>

Or contact jsirois@osisoft.com

Have questions?

- jsirois@osisoft.com – any user group
- ddoll@osisoft.com – Facilities Group
- gwong@osisoft.com – Water Group
- Visit the PI Square Booth

Energy

Energy Market Overview:

- 50% of all electricity in the US goes to building operations
- 25% goes to industrial uses
- An estimate 30% is wasted

(1) “Center for Sustainable Systems, University of Michigan. 2014. “Commercial Buildings Factsheet.” Pub. No. CSS05-0

Energy Intensity and Potential for Improvement by Industry

INDUSTRY	ENERGY INTENSITY	IMPROVEMENT POTENTIAL	IMPROVEMENT POTENTIAL
	Energy Cost as Percentage of Total Product Cost	OECD Countries	Non-OECD Countries
Chemical and Petrol Chemical	50%-85%	9%-25%	14%-30%
Petroleum Refining	50%-60%	10%-25%	40%-45%
Non-Ferrous Metals	30%-50%	5%-35%	5%-50%
Iron and Steel	10%-30%	10%	30%
Cement	25%-50%	20%	25%
Glass	7%-20%	30%-35%	40%
Pulp and Paper	15%-35%	25%	20%
Textile	5%-25%	10%	20%
Food and Beverage	1-10%	25%	40%
Automotive	1-10%	10%-15%	25%-30%

Are you treating energy
like a fixed cost
or a variable cost?

10 Billion IoT devices in Smart Cities by 2020

The tug of war

Efficiency

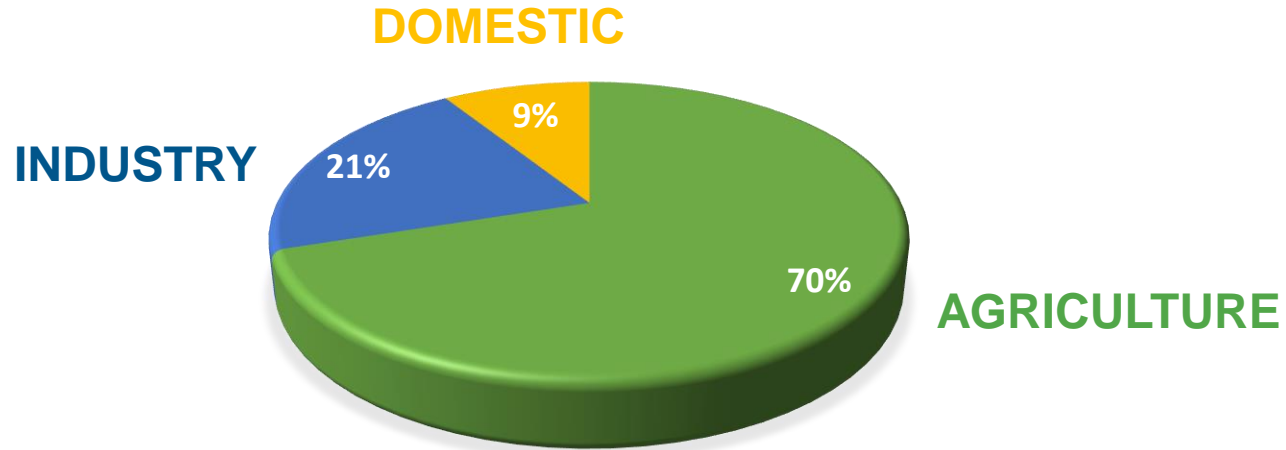

Consumption

Water

Water Industry Overview

- ~70% of water consumed by agriculture
- What's the impact of water scarcity in your business (mining, food & beverage, oil & gas)?
- Up to 50% water leakage

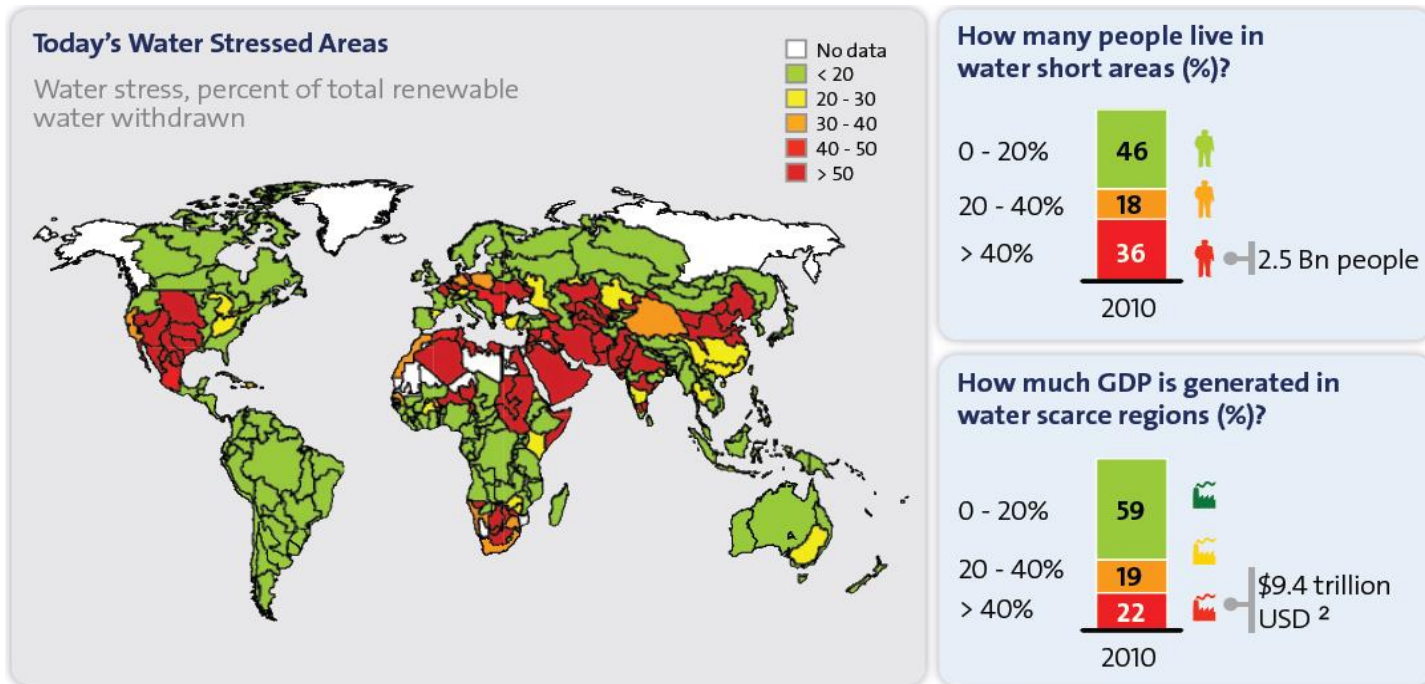

The Water Energy Nexus

- 30% of a water utility's operating cost attributed to energy
- 3% of America's energy consumption attributed to water
- 4 gallons of Water / KWh consumed

Water Stress: Today & 2050

- Today: 2.5B people and 22% of the world's GDP under water stressed regions

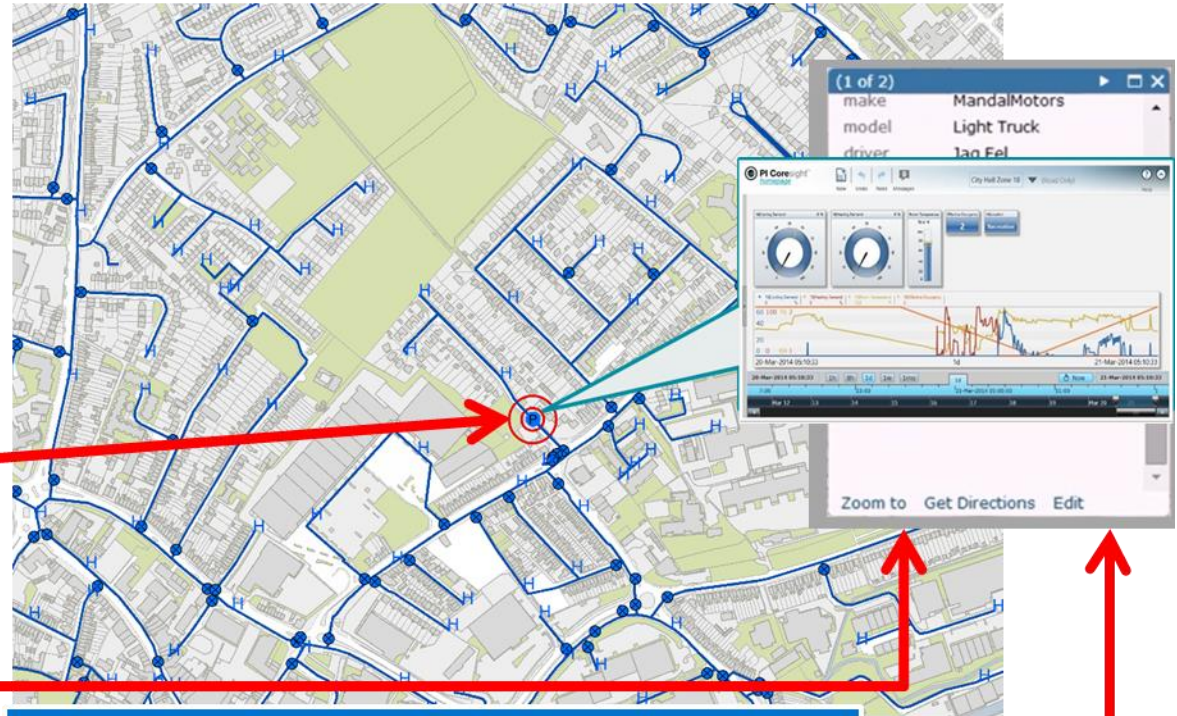

Reference: International Food Policy Research Institute, 2010

Real-time, Asset, and Geospatial Data

Facilities

Building Control Systems

- Any Control System is myopic
 - Only knows about assets it controls
 - Only knows it's programming
 - Doesn't include energy usage
- What should it be doing?
 - How to validating programming?
 - How to compare to other systems or sites?
 - Limited history and analytics
 - How to “normalize” data?

The inevitability of failure

Going Beyond the BAS

- Systems tied to BMS/BAS typically represent <50% of the power consumed
- Other systems
 - Water
 - Manufacturing assets, ICS
 - Exterior systems
 - Elevators
 - Data Center assets
- Smart Grid integration
 - Generation / Solar
 - Demand response
 - Microgrid

Energy Consumption

Helpful content

- Public microsite
 - www.osisoft.com/corporate/facilities
 - Webinars
 - Case Studies
 - Papers
- Customer presentations
 - 2015 Users Conference
 - Coming soon – this UC
- PI Square Community
 - Facilities Users Group

Today's Breakout Sessions

QUALCOMM

Keith Ward

Creating a smarter campus

- *Uptime is #1*
- *80 Data Centers, 29 countries, 65 cities*
- *Rack power monitoring, heat maps, to phase balancing*
- *Scalability is important*

SAN FRANCISCO PUC

Paul Bonitz – SFPUC

Lisa Slaughter – DST Controls

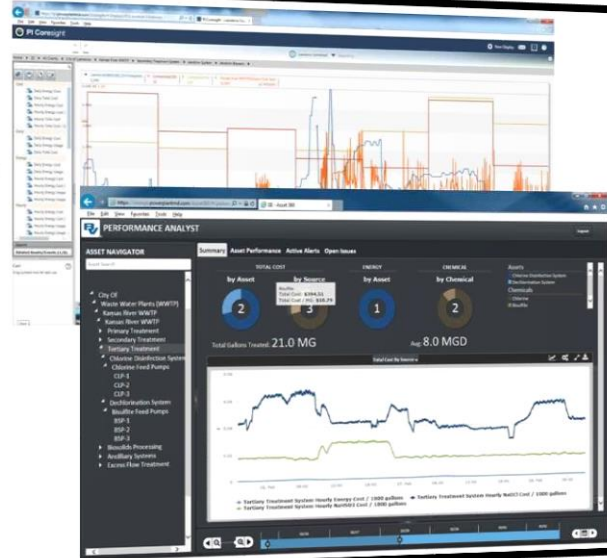

Getting the Most out of your Assets

- 325,000 Assets
- *Moving from scheduled based to condition base maintenance*
- *Annual savings of \$71K on four assets*
- *Top 100 assets equates to \$1.77M in annual savings*

Key Benefits

- Increases visibility and awareness across the utility
- Faster, easier access to all data sources
- Facilitates more informed decisions
- Expandable
- Remote monitoring of plant performance by B&V technology experts

CITY OF LAWRENCE:

Paul Youk – City of Lawrence
Steve Wortendyke – Black & Veatch
Pat Schlotzhauer – Black & Veatch

Using Data Analytics to Monitor and Reduce Energy Consumption

- *Provides drinking water and treats waste water for about 100,000 people*
- *Optimize energy consumption especially during rain / storm events*
- *Analyzes SCADA, lab, and weather data with context for an informed operational decisions*

CRITIGEN: Marshal Worthy

Enterprise Level Situational Awareness for Assets and Infrastructure

- Connecting real-time energy data and Geospatial visualization
- *Providing an executive view of energy performance by organization*
- *'At-a-glance' enterprise view with drill-down capabilities for improved decision making*

PI ProcessBook

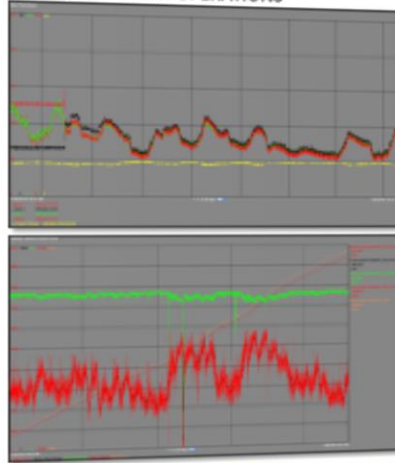

SYSTEM OVERVIEW

CUSTOMER TELEMETRY

PLANT OPERATIONS

NRG

Ramya Winstead

Driving operational excellence at NRG Energy Center Minneapolis

- *NRG Energy Center Minneapolis*
- *District energy facility serving downtown Minneapolis*
- *Improving efficiency and optimizing operations*

University of California, Davis

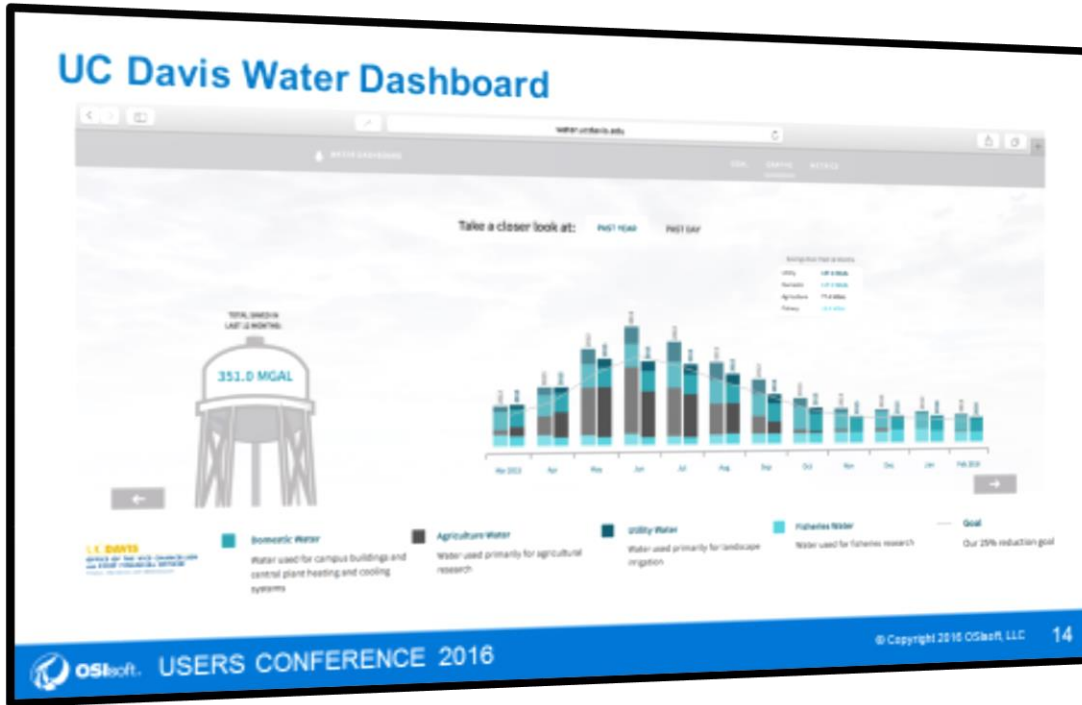

Elena Thomsen

Dan Colvin

Sweta Agarwal

Multiple Challenges, Multiple Solutions, Multiple Results, One PI System

- *25% reduction in water consumption in 6 months*
- *Visualizing energy consumption across the campus*
- *Ongoing commissioning through automated fault detection*

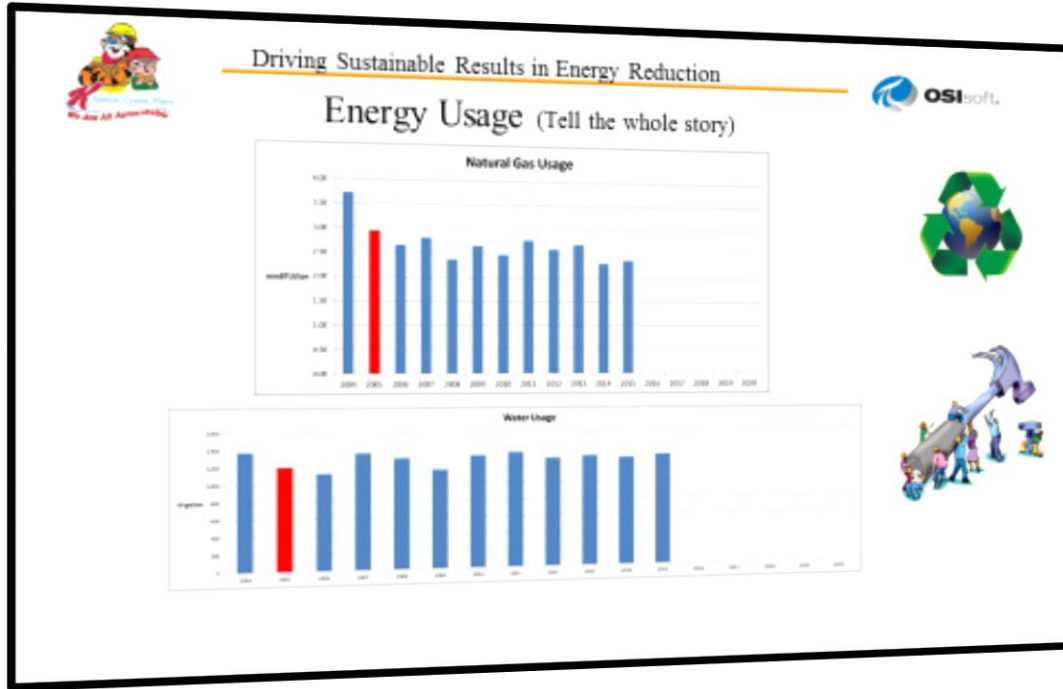

Kellogg

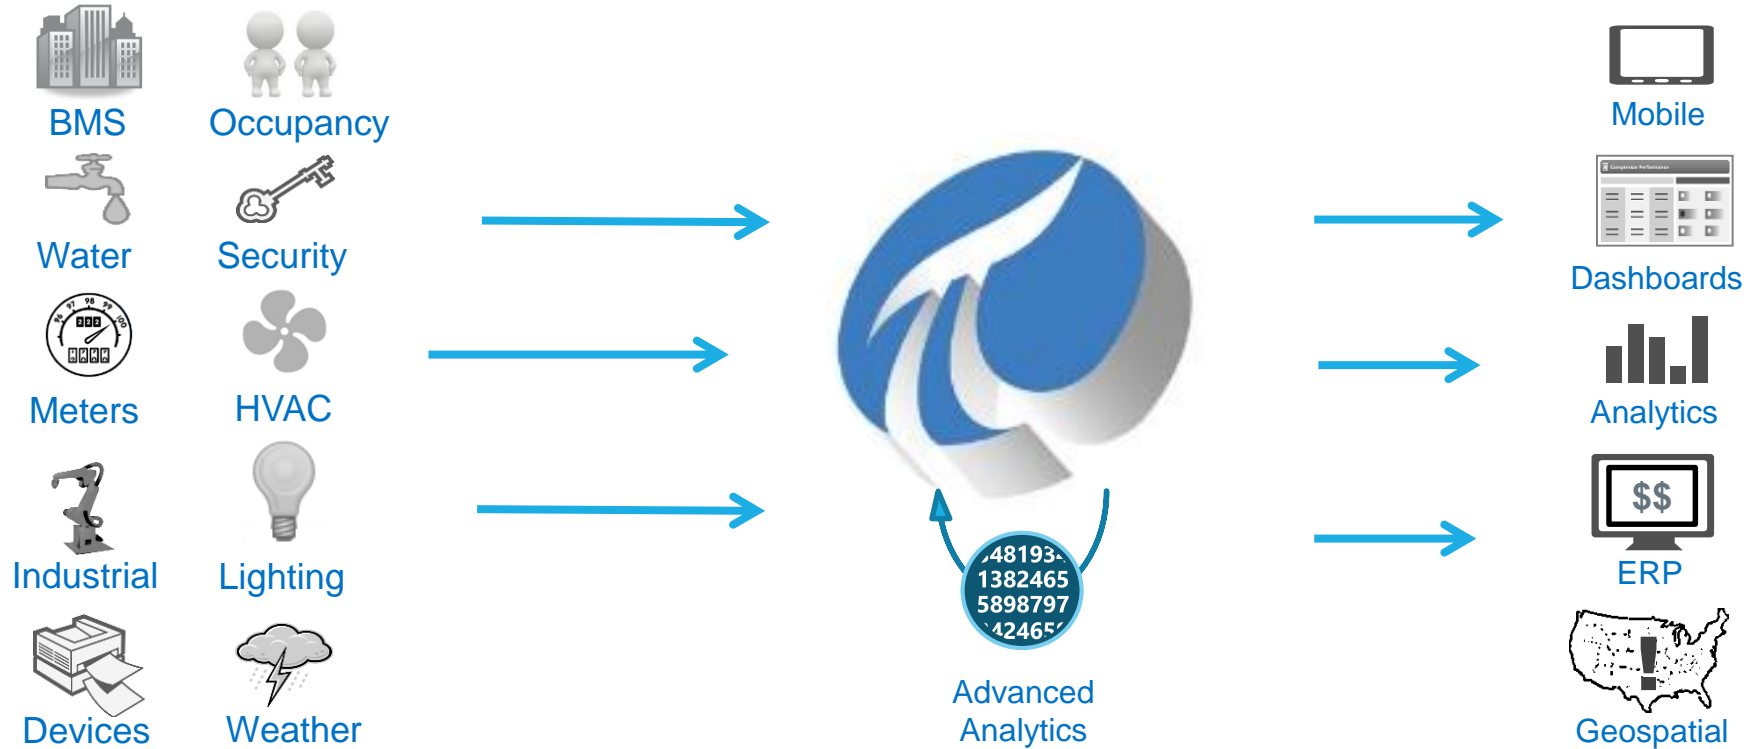

John Gothberg

Driving Sustainable Results in Energy Reduction

- *Measure, Execute, Validate, Repeat*
- *HVAC savings of \$40,000 in one week*
- *Cumulative savings over \$700,000 in boiler heat recovery*

The PI System as the Common Infrastructure
