- KUC Process

The Pit

[General Information](#)

Kennecott Annual Production Revenue

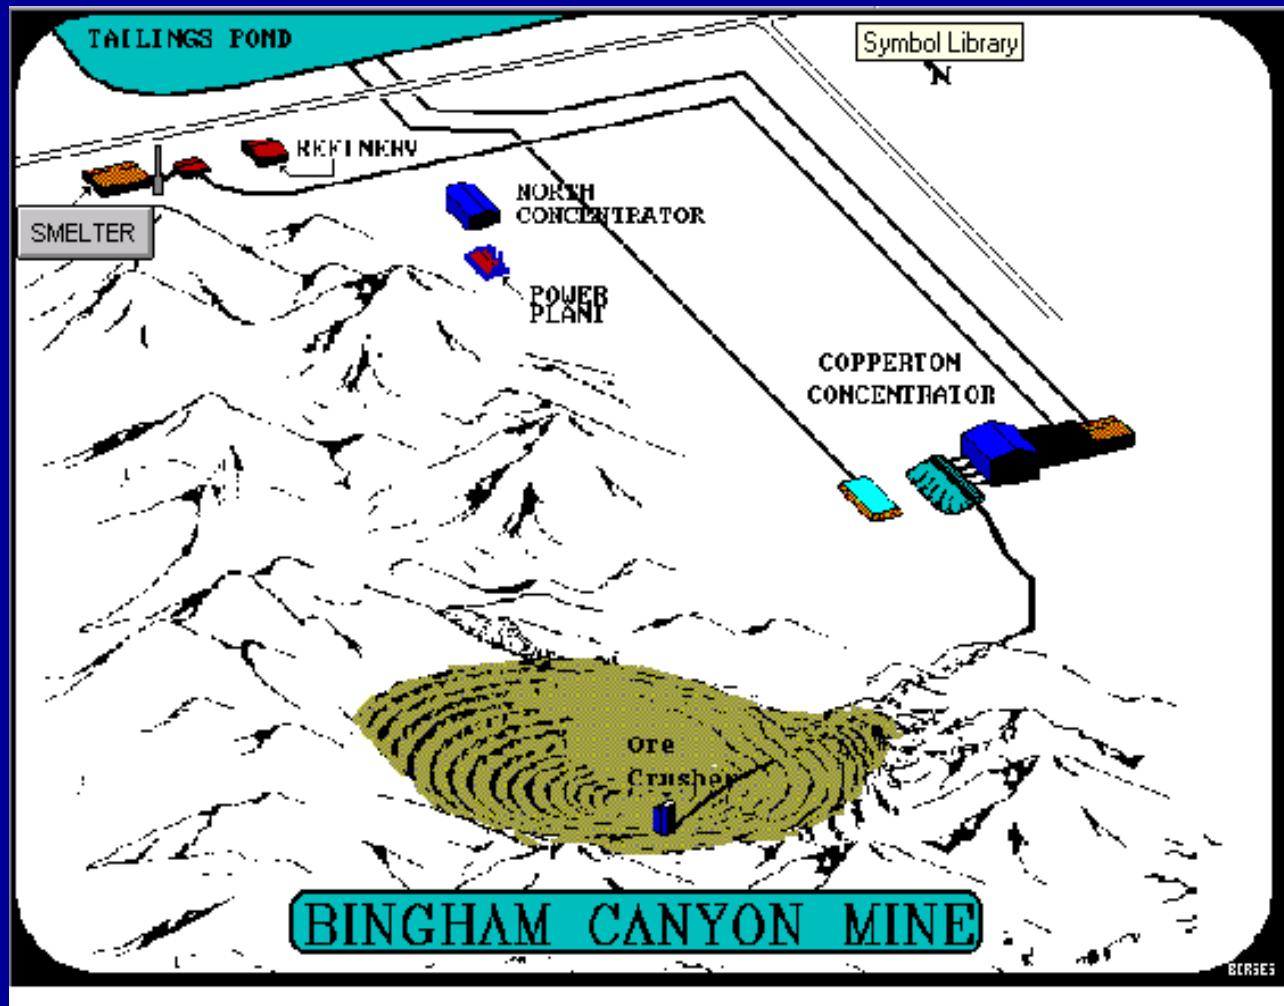

General Information

- Historical (The Hill)
- Current (The Pit)
- KUC Process

KUC Process

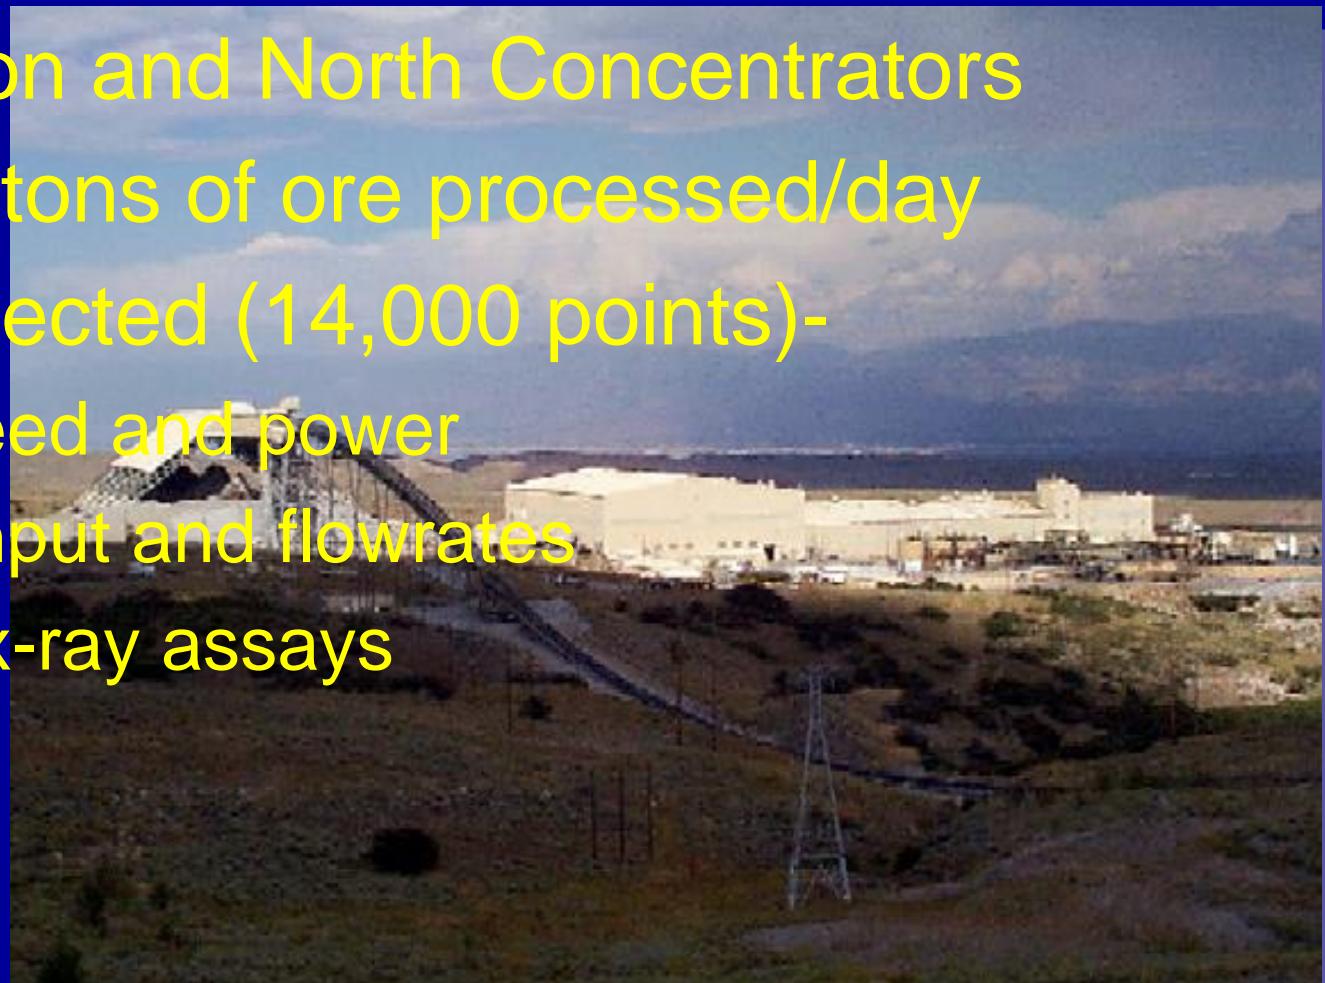

The Bingham Canyon Mine

- Move 300,000+ tons/day
- Data collected-
 - truck movements
 - tons hauled per truck
 - crusher parameters

The Concentrators

- Copperton and North Concentrators
- 172,000 tons of ore processed/day
- Data collected (14,000 points)-
 - mill speed and power
 - throughput and flowrates
 - online x-ray assays

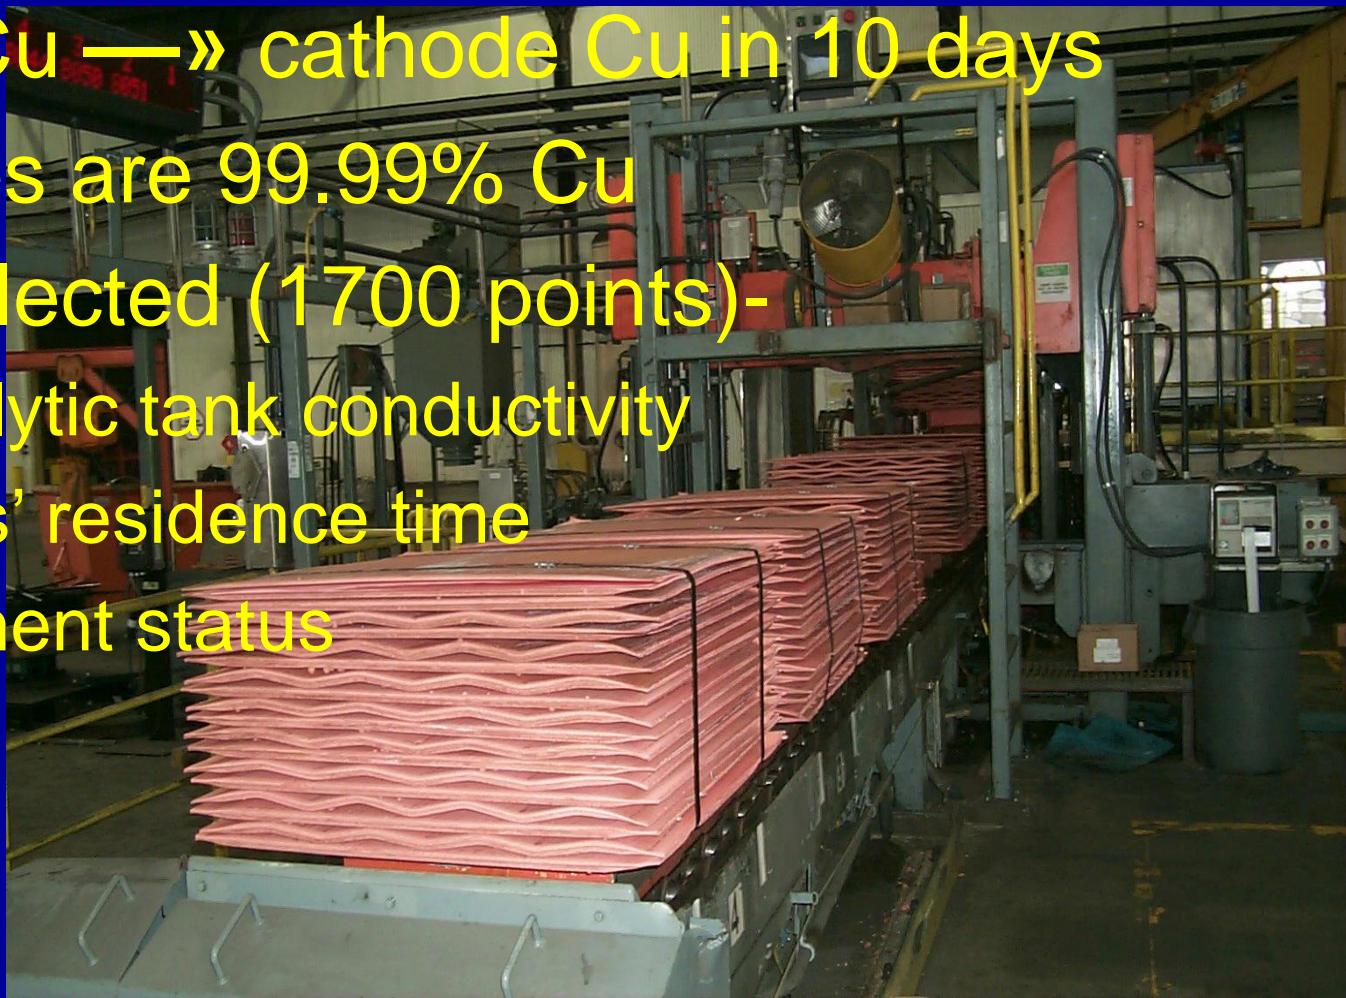

The Smelter

- Flash smelting, flash converting technology
- 720-lb, 99.5% Cu anodes
- Data collected (13,000 points)-
 - furnace temperatures
 - flowrates
 - assays

The Refinery

- Anode Cu —» cathode Cu in 10 days
- Cathodes are 99.99% Cu
- Data collected (1700 points)-
 - electrolytic tank conductivity
 - anodes' residence time
 - equipment status

KUC Information System

General Information
PI System
Uses

PI System

- Instrument Interface
- Compression Algorithm
- User Interface
- Plants Operating With PI

KUC Information System

General Information
PI System
Uses

Uses

- Operations / Maintenance Troubleshooting
- Process Optimization
- Process Online Monitoring
- Creating Production Reports
- Maintenance Scheduling

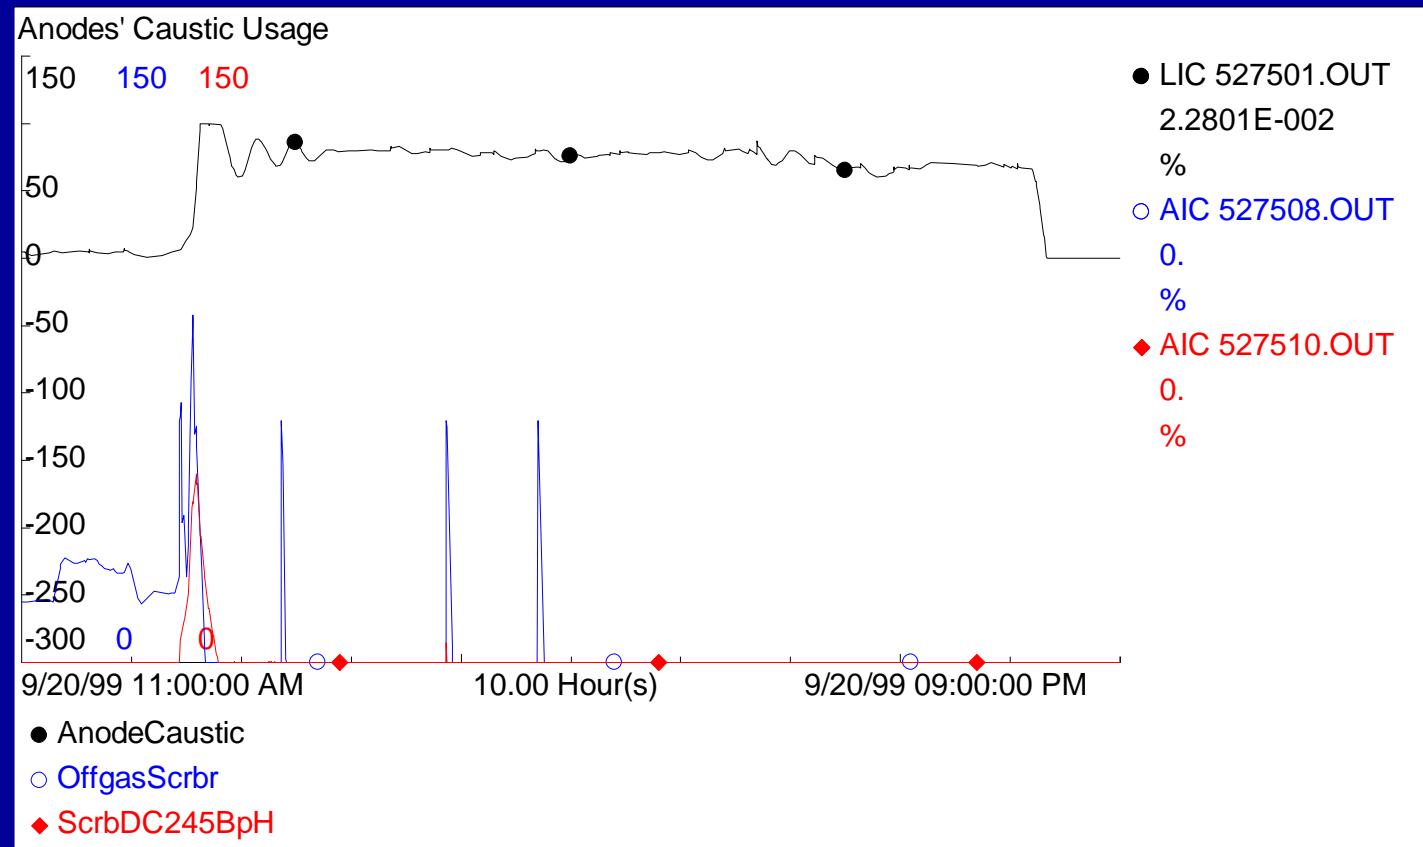

Operations / Maintenance Troubleshooting

- Unusual Caustic Usage
- Oxidation-Reduction Potential (ORP) Control Problem

Caustic Valve Operation

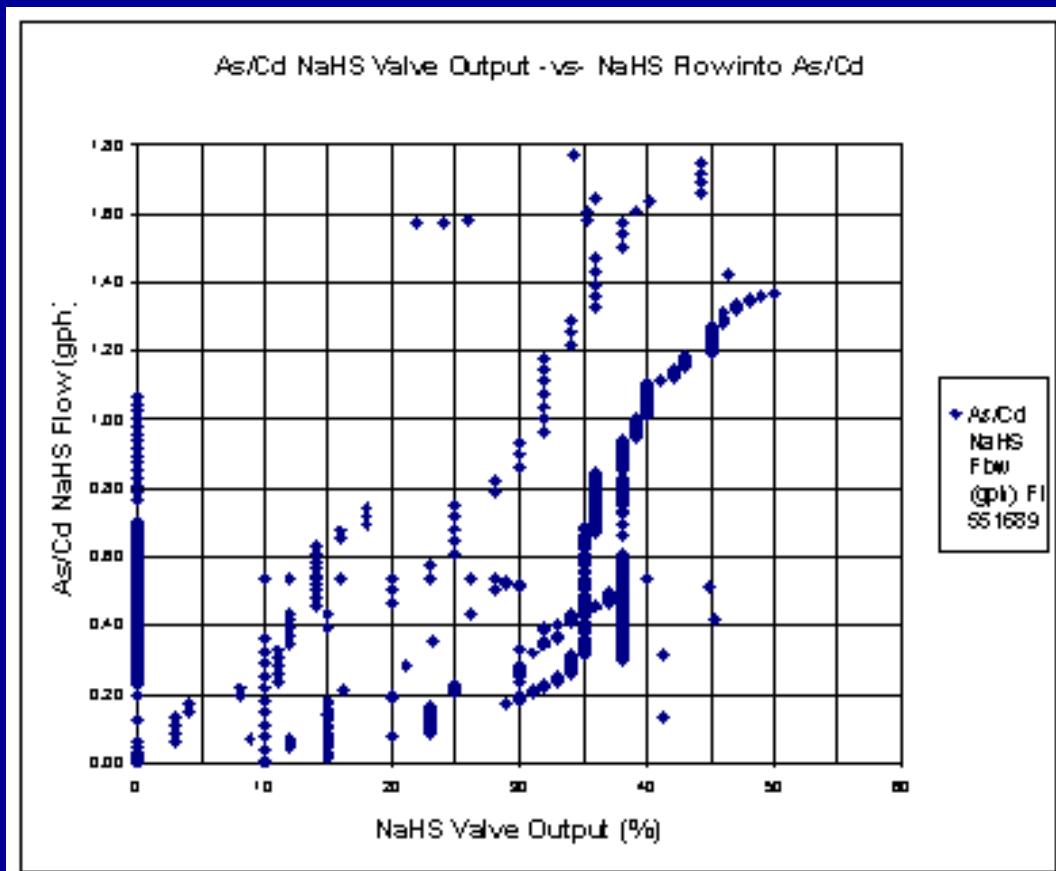

Operations / Maintenance Troubleshooting

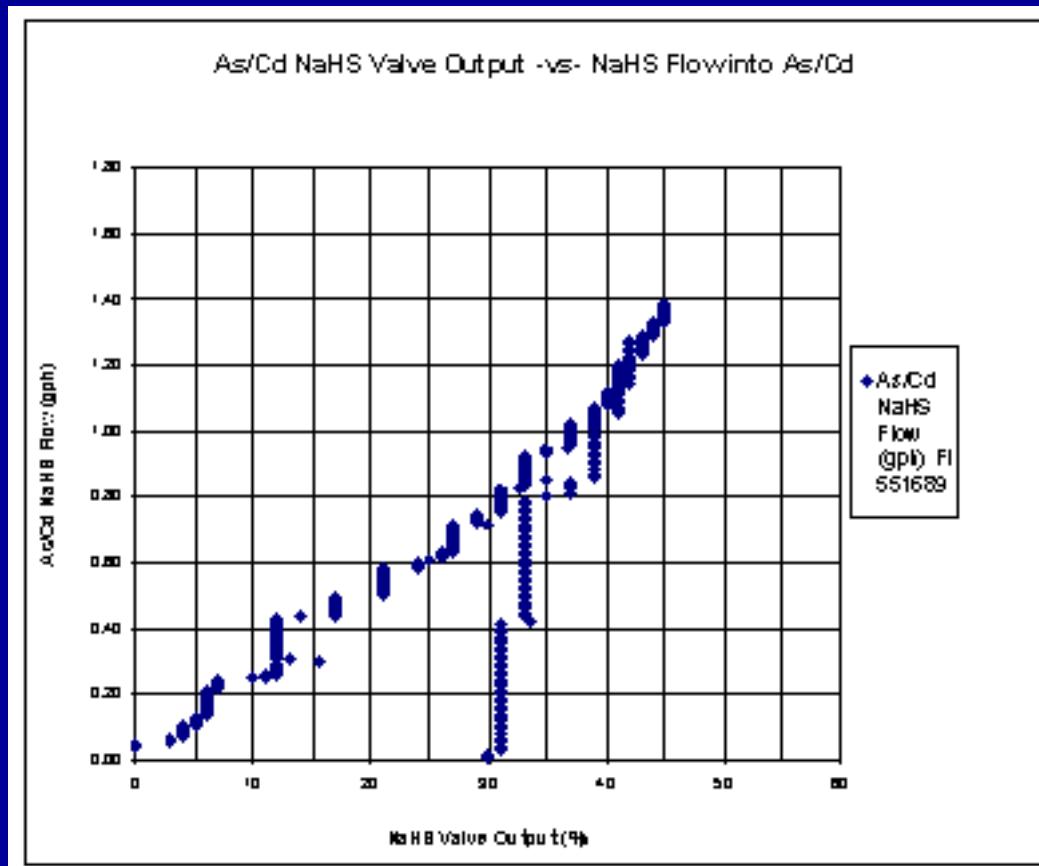

- Unusual Caustic Usage
- Oxidation-Reduction Potential (ORP) Control Problem

Faulty Reagent Valve

Working Reagent Valve

Uses

- Operations / Maintenance Troubleshooting
- Process Optimization
- Process Online Monitoring
- Creating Production Reports
- Maintenance Scheduling

Process Optimization

- Monitoring Boiler Pressure Increase
- Furnace Process Control Issues

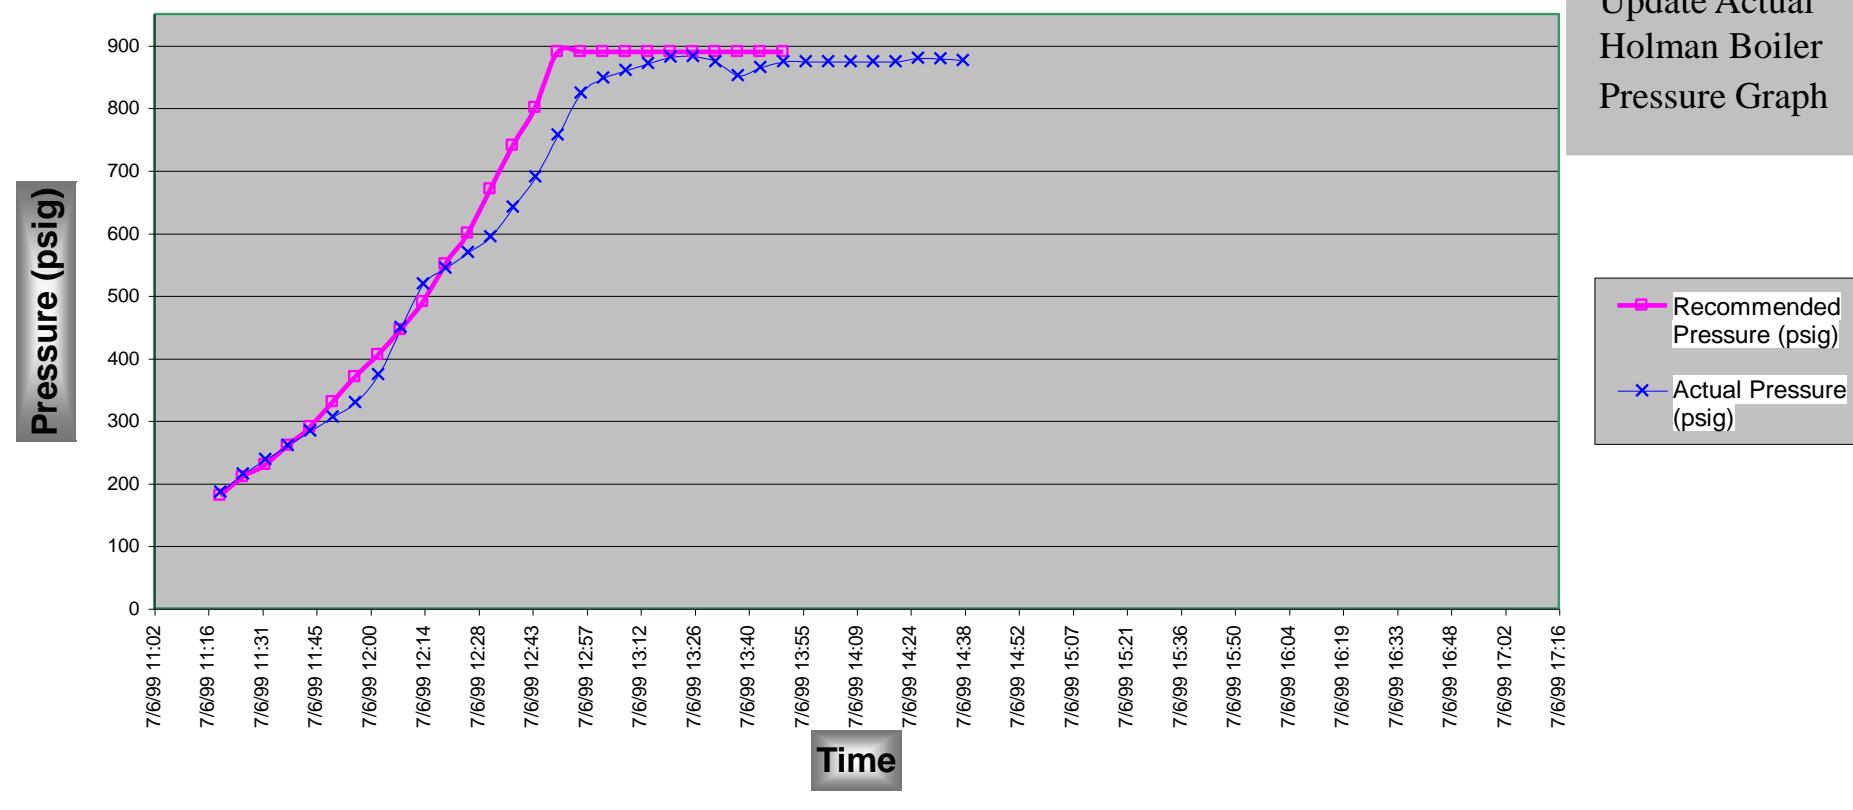

Holman Boiler Warm-up Curve

Enter Starting Date:

7/6/99

Enter Starting Time:

11:20

Holman Boiler Pressure - Warm Up Curve

Process Optimization

- Monitoring Boiler Pressure Increase
- Furnace Process Control Issues

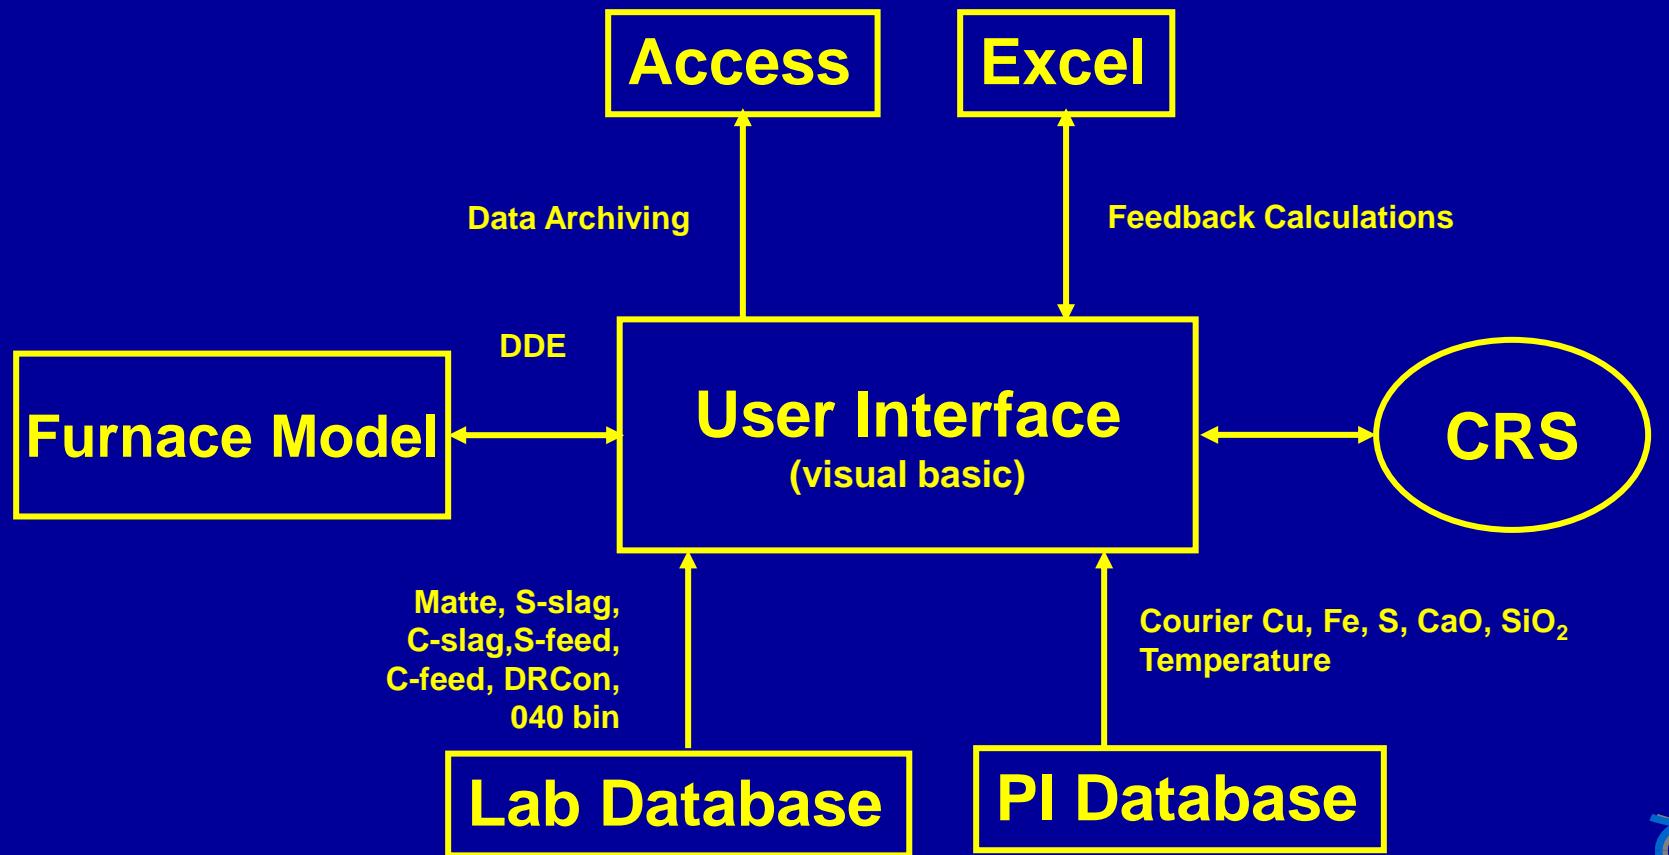

FSF/FCF Process Control Issues

- Sampling and Process Data Availability
- Lack of Feedback Control on both furnaces
- Concentrate & Matte Grade Variations to the FSF/FCF

Furnace Interface Logic

Uses

- Operations / Maintenance Troubleshooting
- Process Optimization
- Process Online Monitoring
- Creating Production Reports
- Maintenance Scheduling

Process Online Monitoring

- Smelter Hot Metals Operation
- Powerhouse Operating Parameters

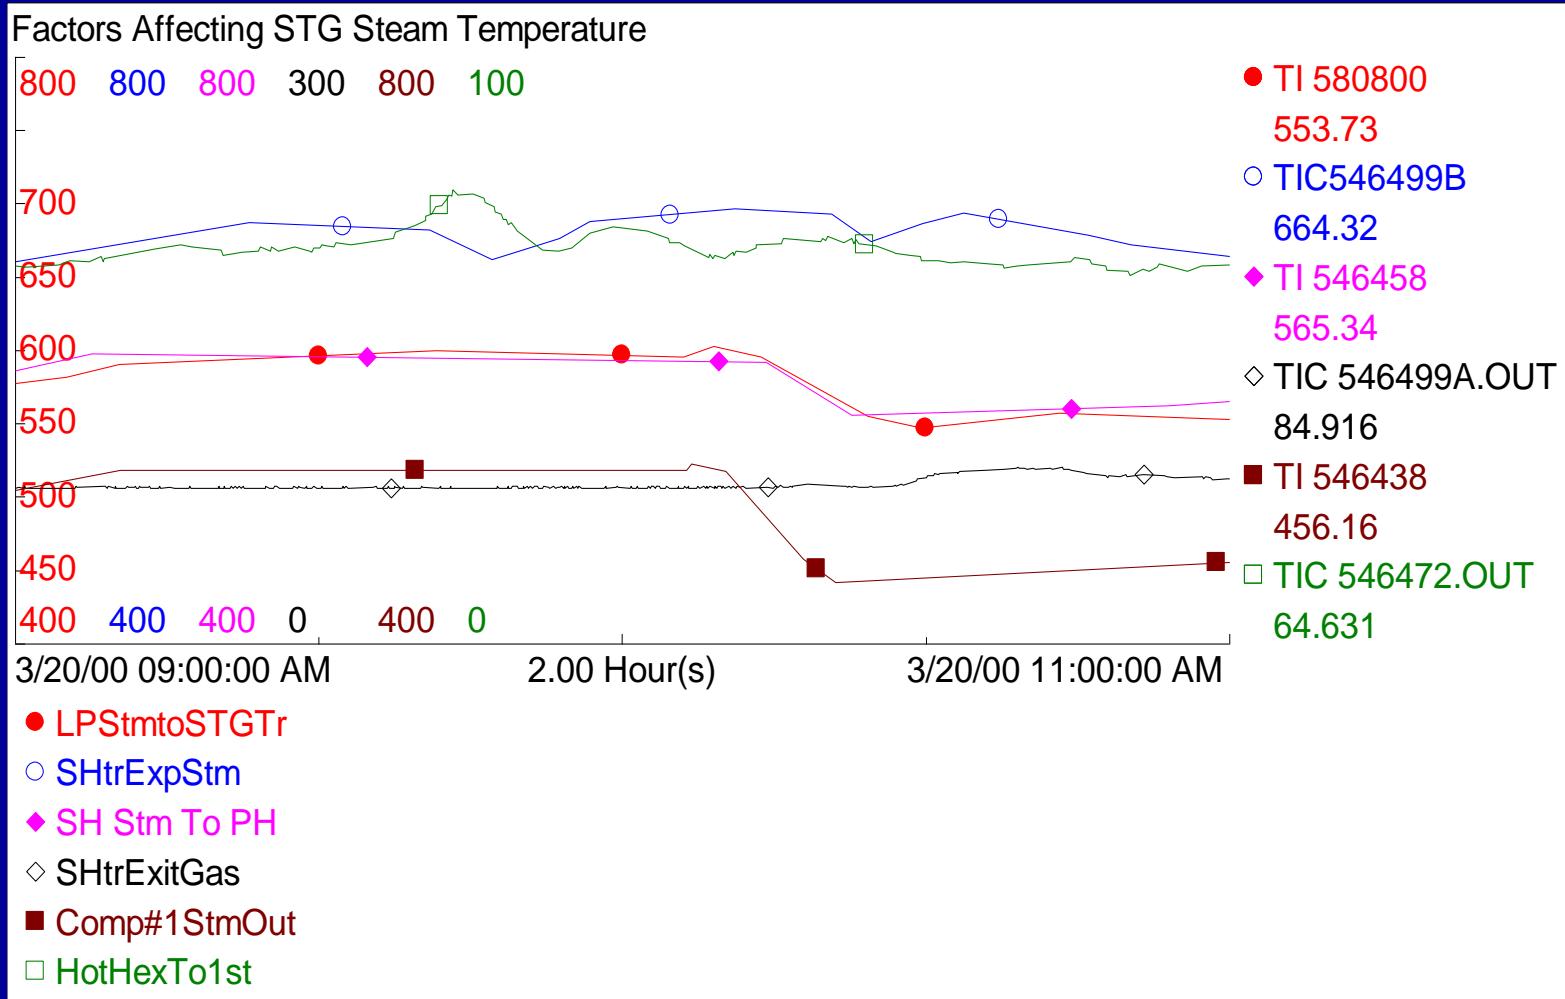

Process Online Monitoring

- Smelter Hot Metals Operation
- Powerhouse Operating Parameters

Powerhouse Operating Parameters

Uses

- Operations / Maintenance Troubleshooting
- Process Optimization
- Process Online Monitoring
- Creating Production Reports
- Maintenance Scheduling

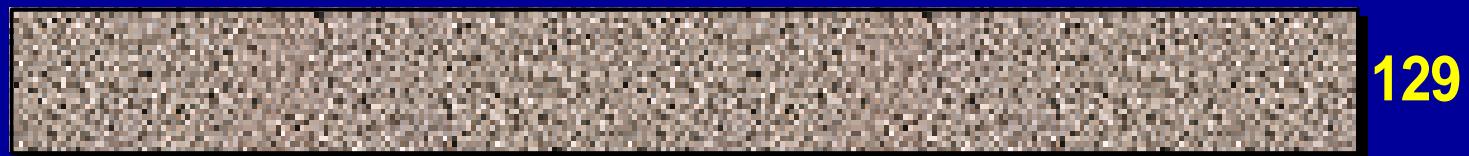

Creating Production Reports

- Efficient Use of Manpower
- Timely Decision Making

Kennecott Productivity Increase Since 1981 (Tons Copper Produced/Employee)

Current

1981

Creating Production Reports

- Efficient Use of Manpower
- Timely Decision Making

Uses

- Operations / Maintenance Troubleshooting
- Process Optimization
- Process Online Monitoring
- Creating Production Reports
- Maintenance Scheduling
