Value Now with OSIsoft

“There is nothing permanent except change”
Heraclitus 6th Century BC.

Evolving Shift from Industrial Age to Information Age

- Telcom industry change - cell phones, VOIP, SMS, Web 2.0, SaaS, DaaS
- Smart Grid is an Enabling Technology
- Rise of Microgrid - knowledge of applying power to manufacturing process - MaaS
- New Ideas

New Business Models : Shai Agassi company “Better Place”

- Distributed manufacturing of vehicle
- New infrastructure for operation, infrastructure owns battery
- Environment driving force in new business model

Something Old Something New: Minnesota Bridge

Bridge Performance - Sensors for bridge movements, expansion, contraction, corrosion, icing

Bridge Operation - sensors and cameras for traffic flow, speed, disruptions, accidents, stalls and other disruptions, security

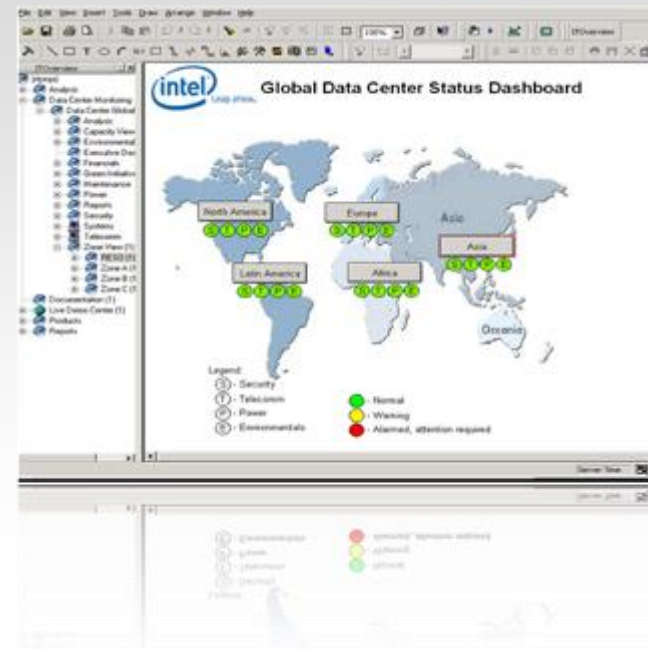

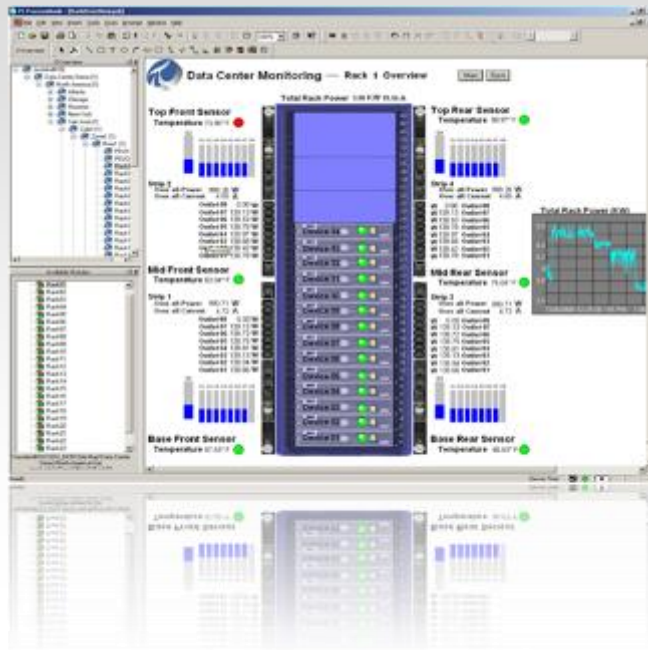

Real Time Needed - Summary of Accidents not useful for Operation - like getting Summary of House Fires at end of Month

New Business - e.g. Data Center

- Consume more energy annually than Sweden
- New NC Facilities - Google for Search, Apple for iPhone Apps
- Expansion of Existing - Bing Search of Twitter, Messaging
- Cloud based Storage - Flickr, Data Storage
- Business - Amazon, E-Bay, Craig's List
- Web 2.0 Sites - Facebook

Industry - Data Centers, IT & Telecom

Largest Distributed Plant: Smart Grid

- Plant: Power Generation, Distribution and Transmission, Consumption
- Technology: Smart Equipment, Storage of renewable energy, AMI (Demand response pricing), Energy improvements
- Environment: Conservation, Renewables, Carbon Foot Print
- Techniques: Reliability, Energy Monitoring, Efficiency Studies

The image displays three screenshots of the Plant Energy Management System (PEMS) software interface, which is used for monitoring and controlling industrial processes.

Left Screenshot: Plant Energy Management System - Home Unit 1

This dashboard provides an overview of the plant's energy management. It includes sections for:

- Fuel Data:** Displays fuel definitions, fuel cost, and fuel price calculator.
- Operating Unit Data:** Shows the status of various operating units, including fuel consumption and production rates.
- Fuel Price Calculator:** A tool for calculating the cost of fuel based on different parameters.

Middle Screenshot: Equipment Dashboard

This section provides a detailed view of the plant's equipment. It includes:

- Equipment Information:** Details about the equipment, including its name, location, and status.
- Equipment Performance:** A circular gauge showing the equipment's performance relative to its design capacity.
- Equipment Data:** A table of data points for the equipment, including fuel consumption, production rates, and other key metrics.

Right Screenshot: Data Overview

This section provides a high-level overview of the plant's data. It includes:

- Data Overview:** A large pie chart showing the distribution of data across different categories.
- Data Table:** A table of data points for the plant, including fuel consumption, production rates, and other key metrics.

AMI

Drivers

- We are BROKE, CA - \$21B deficit (Stimulus will be much more)
- Healthcare 18% GMP Today, 40% by 2050
- Manufacturing Steep Decline
- Business w/Try, Fail, Succeed, not just small companies
- Increase Speed of Execution/Continuous Improvement

Surviving the new reality: Takes Brains not Brawn

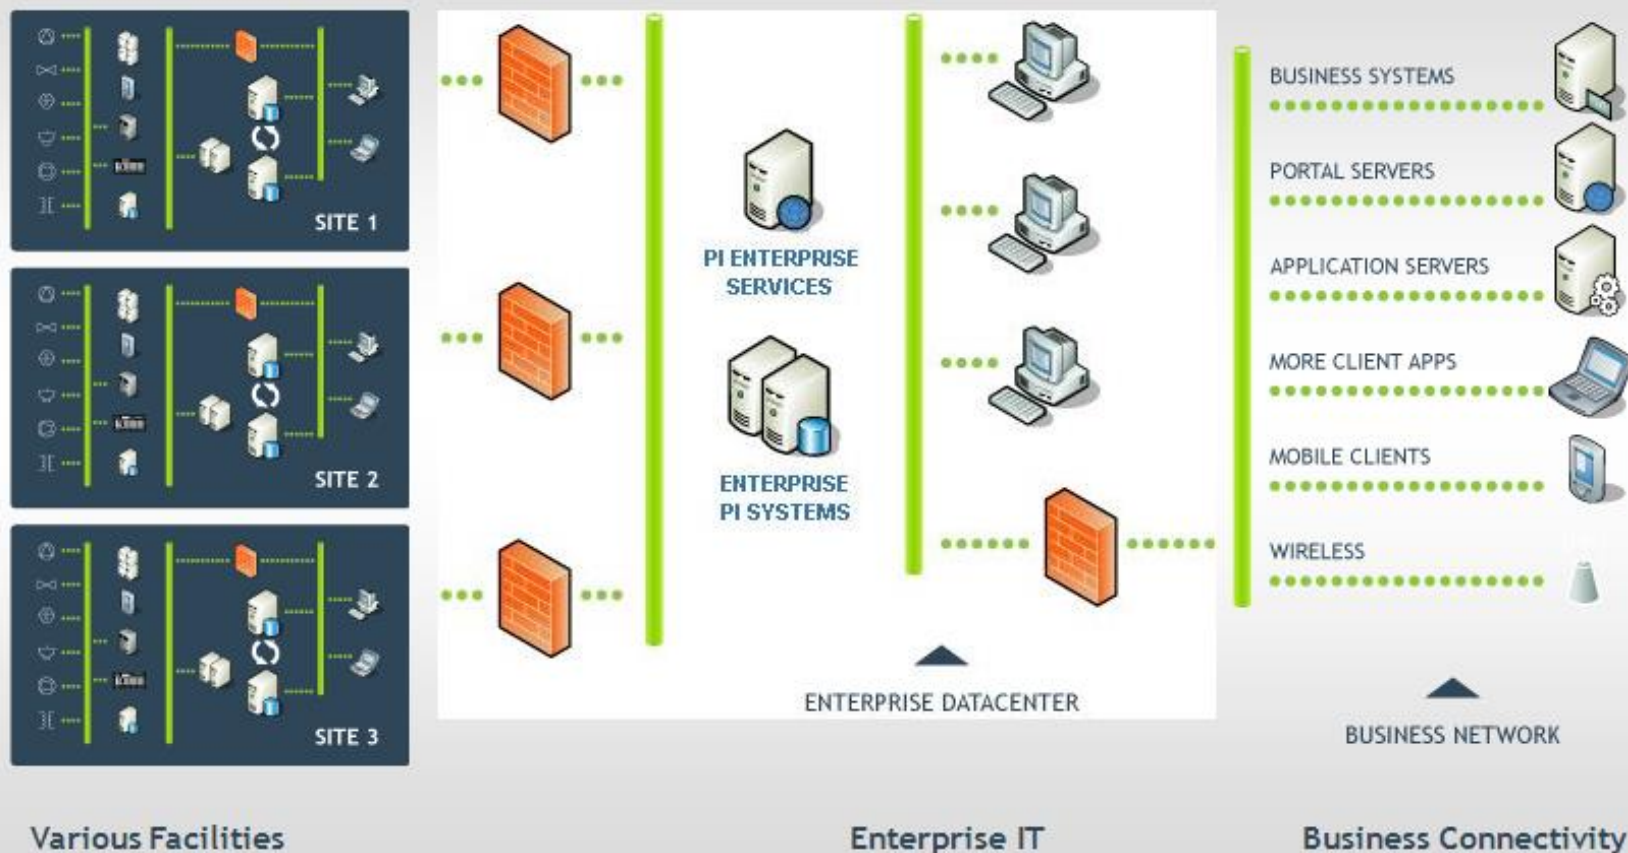

- Innovation needs Information
- Virtual and Actual Collaboration
- Big Companies Hunker and Slash
- Small Companies Cannot
- Example - DaaS, Remote Support

Role of the PI System:

- Data Capture and Storage
- Distribute to Virtual Collaborative environment
- Event, exception based alerts - work by exception
- Aggregation and Communication of Info to Business
- Goal Zero Maintenance, Rapid Deployment

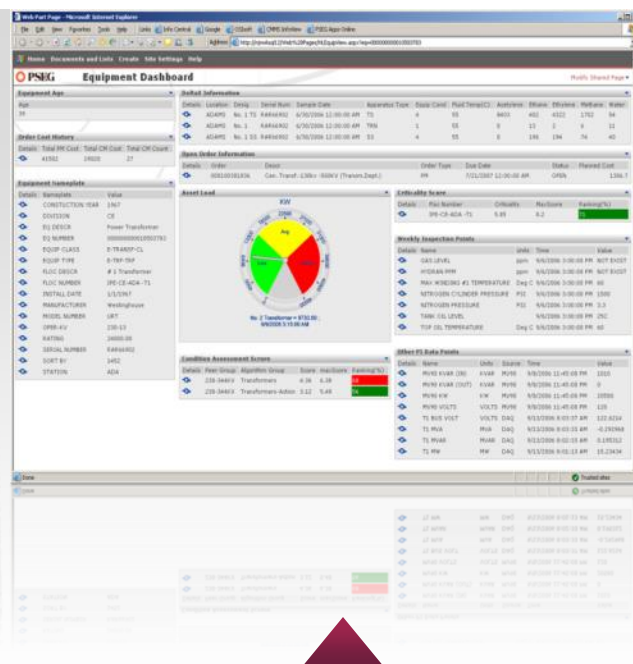

PI Systems across the Enterprise

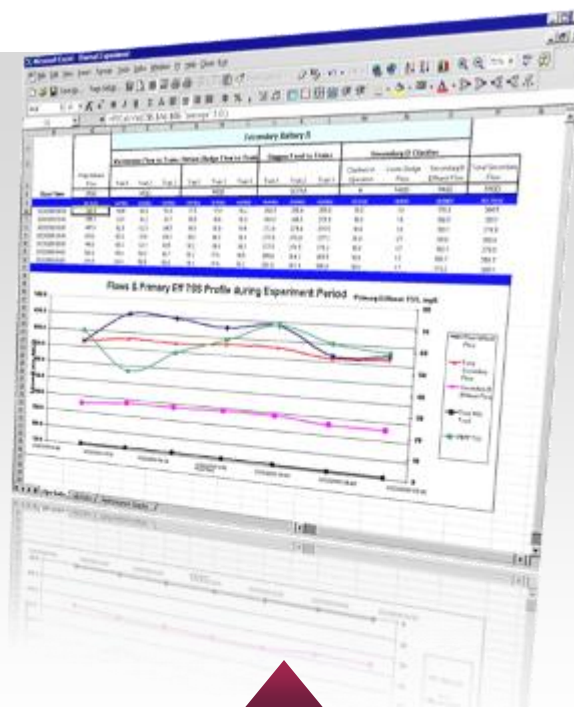

Clarity in Visualization and Collaboration

PI ProcessBook

Web

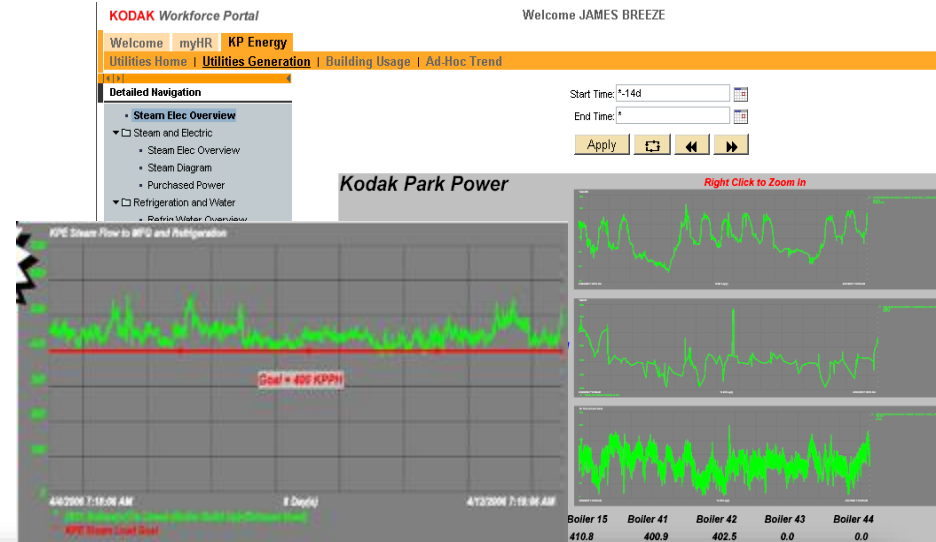

Excel

Kodak: Collaboration enables optimized energy consumption

“There was no ‘Big Bang.’ Rather, there were 1,000 little bangs. Collectively these efforts have yielded savings into the millions of dollars and established a culture of continuous process improvement.”

James Breeze | Energy Engineer / Project Leader
Worldwide

Customer Business Challenge

- Conservation, optimization of resources, and cost control is imperative
- Merge real-time energy management data with business processes.

Solution

- Implemented a new Energy Information System without buying a new application
- Used OSIsoft Business Package for SAP Portal with the PI System
- View and manage their Enterprise energy demand across the enterprise with standard OSIsoft interfaces.

Customer Results / Benefits

- Increased ROI on improved demand side management and optimization of power generation assets, saving millions of Dollars, annually
- Opportunities in manufacturing to implement an energy conservation mode between product runs.

Event Management

Improve yields from existing assets
(cycle time reduction)

Increase energy efficiency
(company wide energy program)

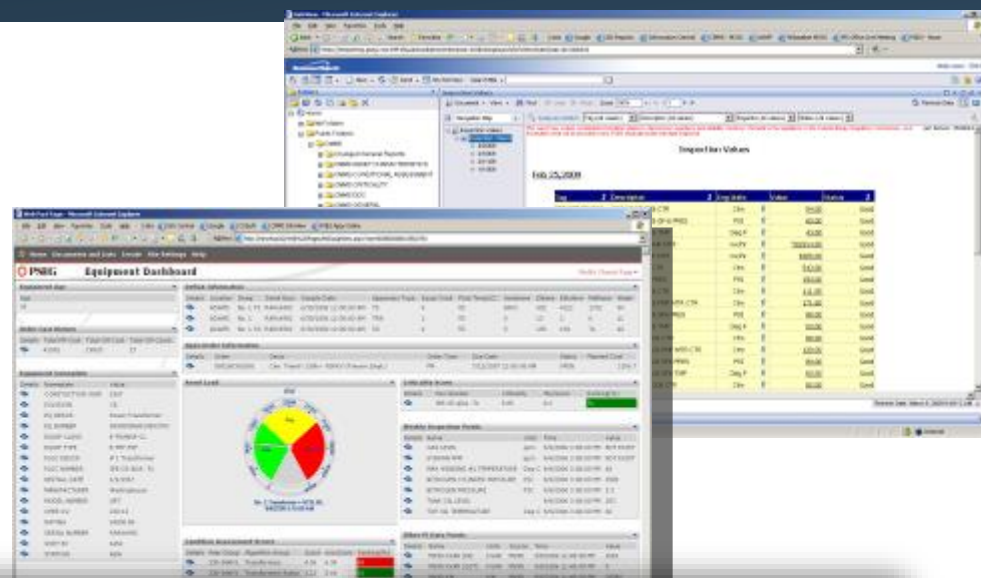

Executive
Dashboard

PSE&G: Condition Based Maintenance

"We get a detailed breakdown on equipment costs and man/hours to service that gives us important business benefits. Without the use of the PI System, it would have taken us several months to gather and analyze the information."

Angela Rothweiler, Principal Engineer

Customer Business Challenge

- Providing the highest reliability Power Distribution is requirement
- Minimize Maintenance Costs

Solution

- Implemented automatic data collection and notifications to SAP PM
- Set up standard business rules for condition based maintenance using PI - Analytics
- Provided focused view into equipment using Portal.
- Provides Financial access to data by Business Objects query

Customer Results / Benefits

- Holds Reliability award for Mid Atlantic States for last 7 years
- Named most reliable Power Company in America
- Focused maintenance expenditures on needed targets

Value Now with OSIsoft

- Understand the Importance of the infrastructure
- Develop plan to build strategically but act tactically, measure results
- Understand the nature of pressure, take clear action to address, innovate and find new opportunities

Value Now Across Industries

POWER & UTILITIES

- OSIsoft is ranked 1st in the power industry
- DTE Energy, PSE&G, Entergy, British Energy, Iberdrola

OIL & GAS

- 100% of the global Top 10 producers use the PI System
- BP, Shell, Chevron, ExxonMobil, Pemex, Total, Petrobras

CHEMICALS & PETROCHEMICALS

- 40 of top 50 Chemical Companies rely on the PI System
- Dow Corning, Eastman Kodak, Cytec, Rhodia

PHARMACEUTICALS, FOOD & LIFE SCIENCES

- Nine of the Top 10 pharmaceuticals use the PI System
- Amgen, Bayer, PDL, Allergan, Johnson & Johnson, Roche

MATERIALS, MINES, METALS & METALLURGY

- The PI System is installed in the world's largest mining companies.
- Cemex, Cargill, BHP Billiton Yabulu, Codelco

PULP & PAPER

- 400 sites from worldwide leaders use OSIsoft to manage their mills
- Abitibi, Cascades, Inc., International Paper, MeadWestvaco

CRITICAL FACILITIES, DATA CENTERS & IT

- Innovative use of PI System to monitor complex IT environments
- Microsoft, US Army, Cisco Systems

Thank you
