PI Notifications 1.1

Tim Drews, QA Developer
David Moler, Developer

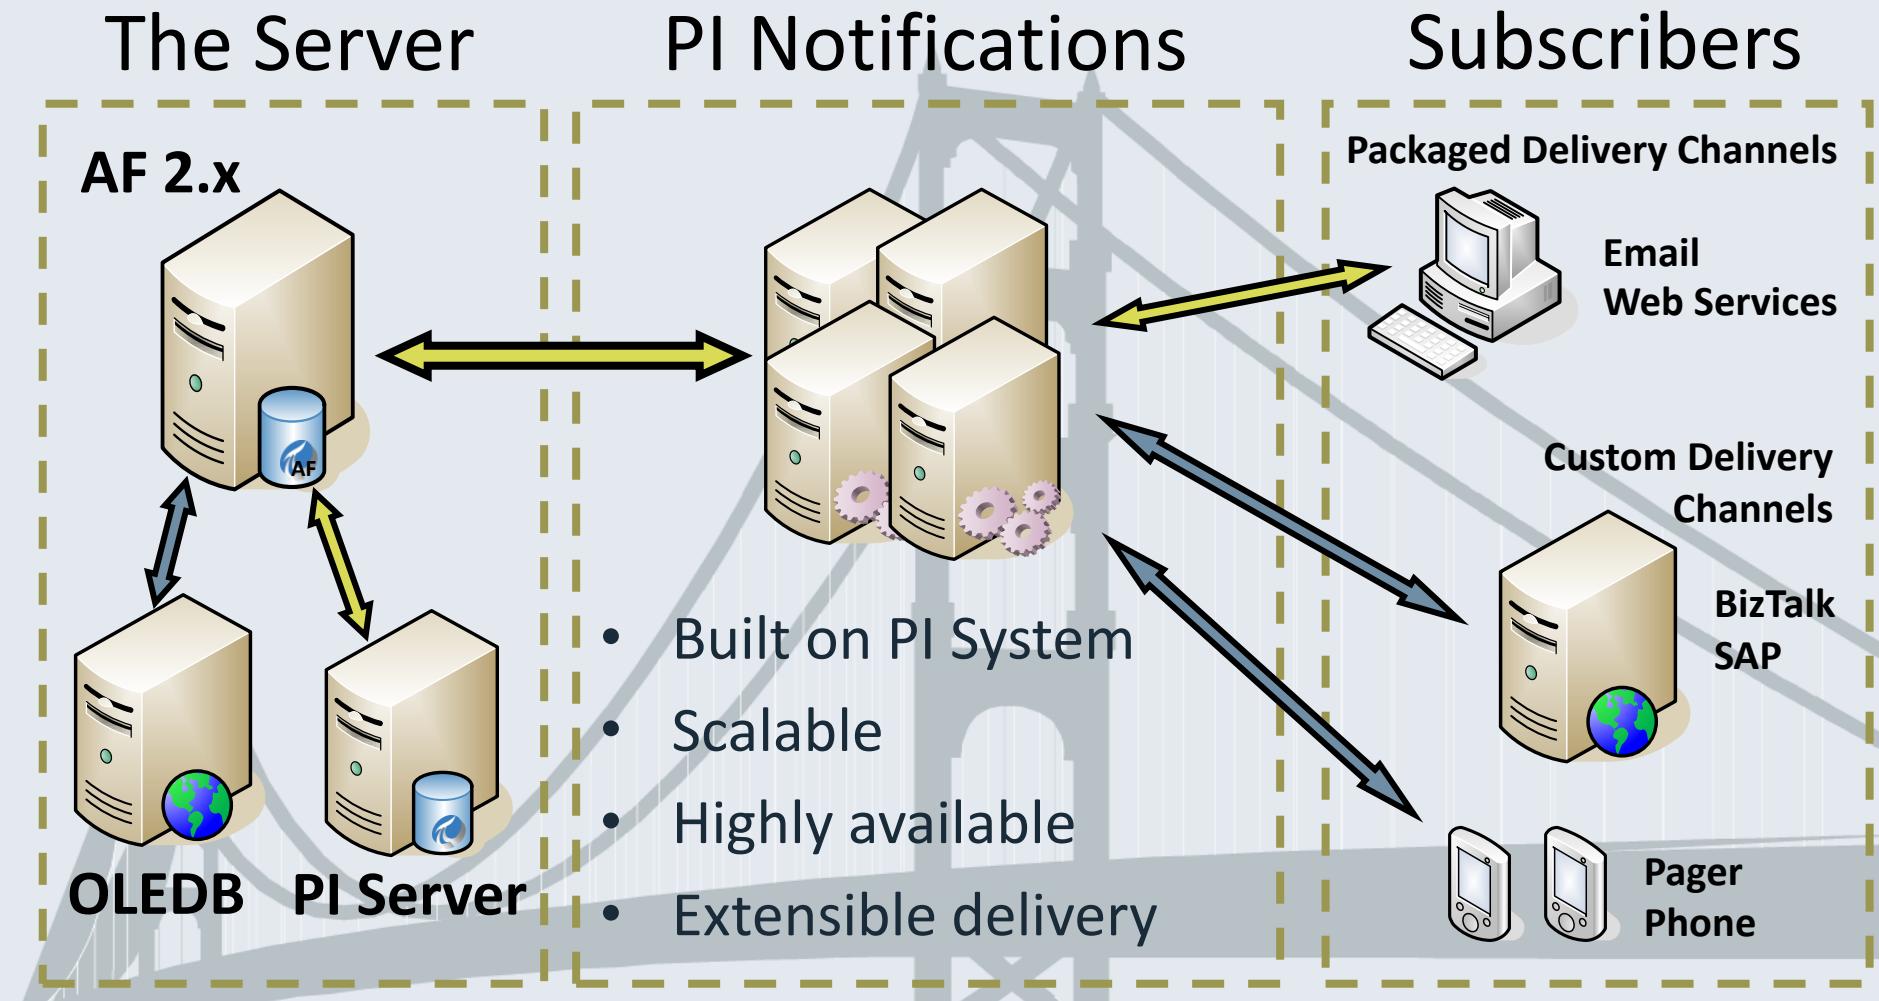

Empowering Business in Real Time
PI Infrastructure for the Enterprise

What is PI Notifications?

- Real-time alarming infrastructure
- Leverages strong foundation of PI System
- Configurable and Extensible
- Configuration and authoring using
PI System Explorer
- Exposed in DataLink and ProcessBook

PI Notifications Architecture

PI Notifications: Present and Future

v1.0: Flexibility
Jan 2008

v1.1: Scalability
Q2 2009

- Built on AF 2.0
- Plug-in infrastructure
 - Analysis Rules
 - Time Rules
 - Delivery Channels

- Performance
 - Improvements in **startup time** and **throughput**
- Configuration
 - Templates enable **rapid** creation of **maintainable** notifications

Scalability: PERFORMANCE

More Notifications Supported

- Notifications start up 3 times faster
- Throughput increase up to a factor of 30
- Less load on the PI Server
- Faster history retrieval in Client Products

Demo: Machine Configuration

Virtual Machine Server

Machine 1

Machine 2

Machine 3

Machine 4

Virtual Machines

PI Server 3.4.375.80

Windows Server 2003

2 x 500 MHz, 2.5 GB RAM

PI Notifications 1.0 Service

Windows Server 2003

2 x 1.0 GHz, 2.5 GB RAM

PI Server 3.4.375.80

Windows Server 2003

2 x 500 MHz, 2.5 GB RAM

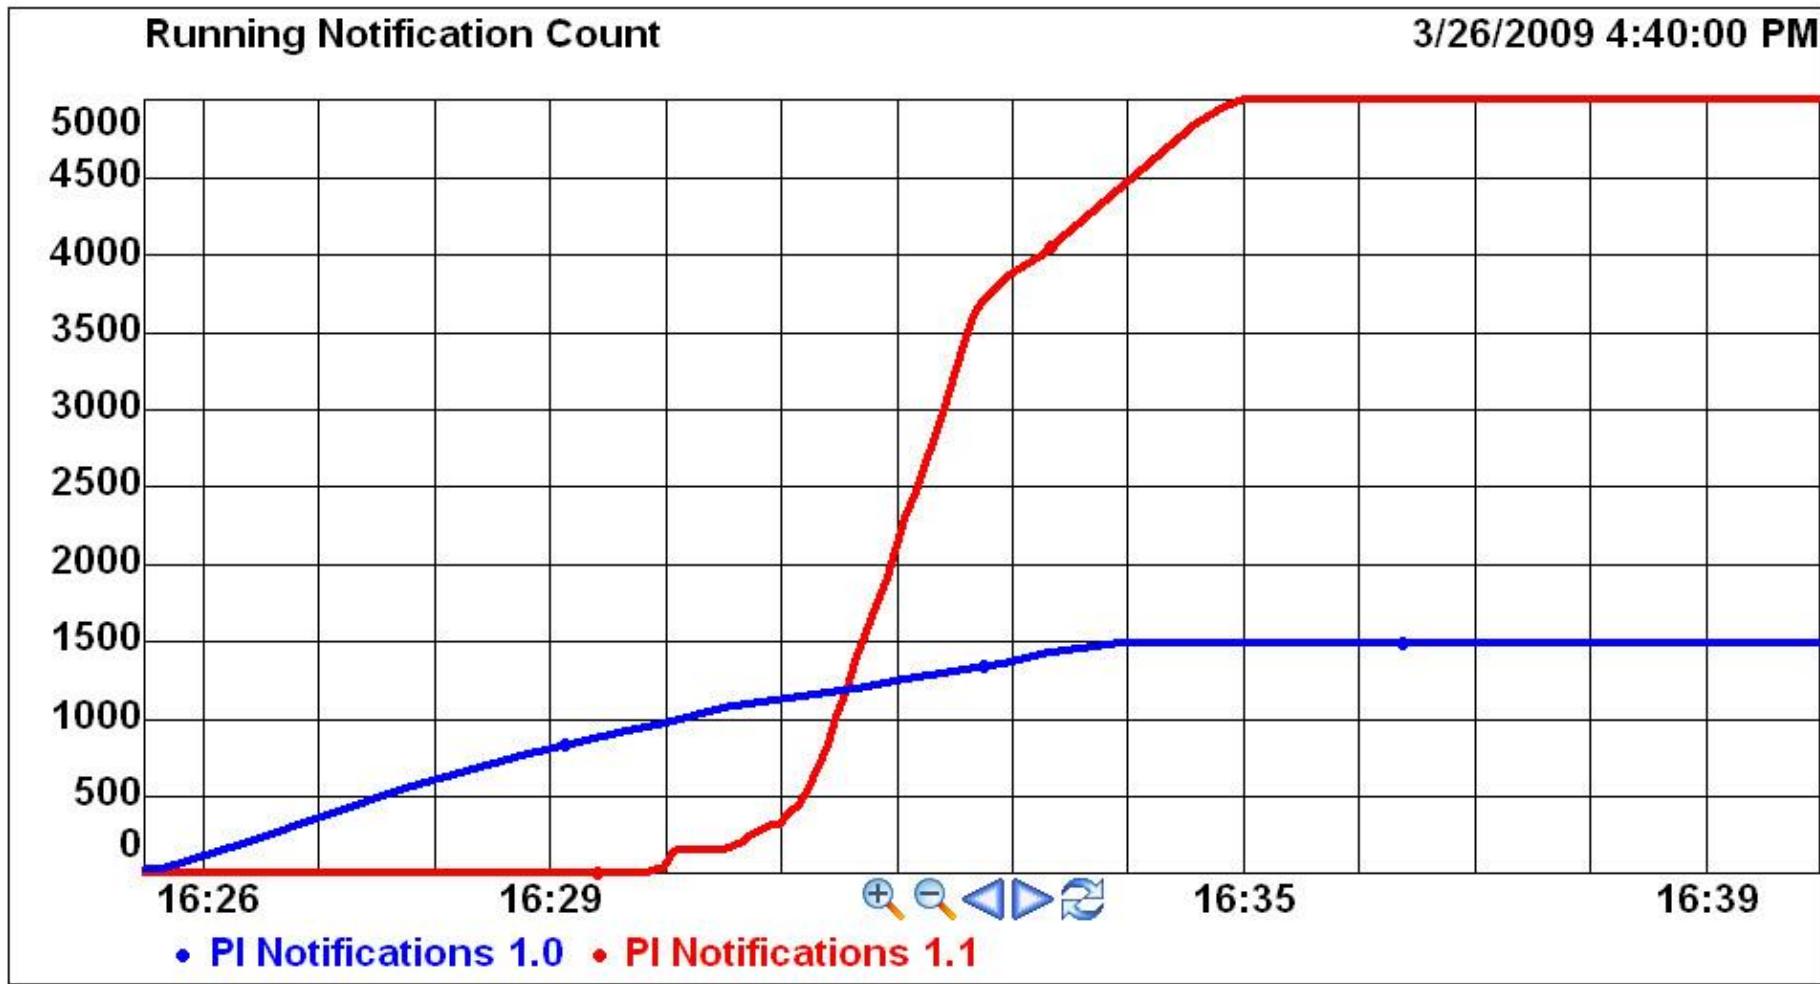

PI Notifications 1.1 Service

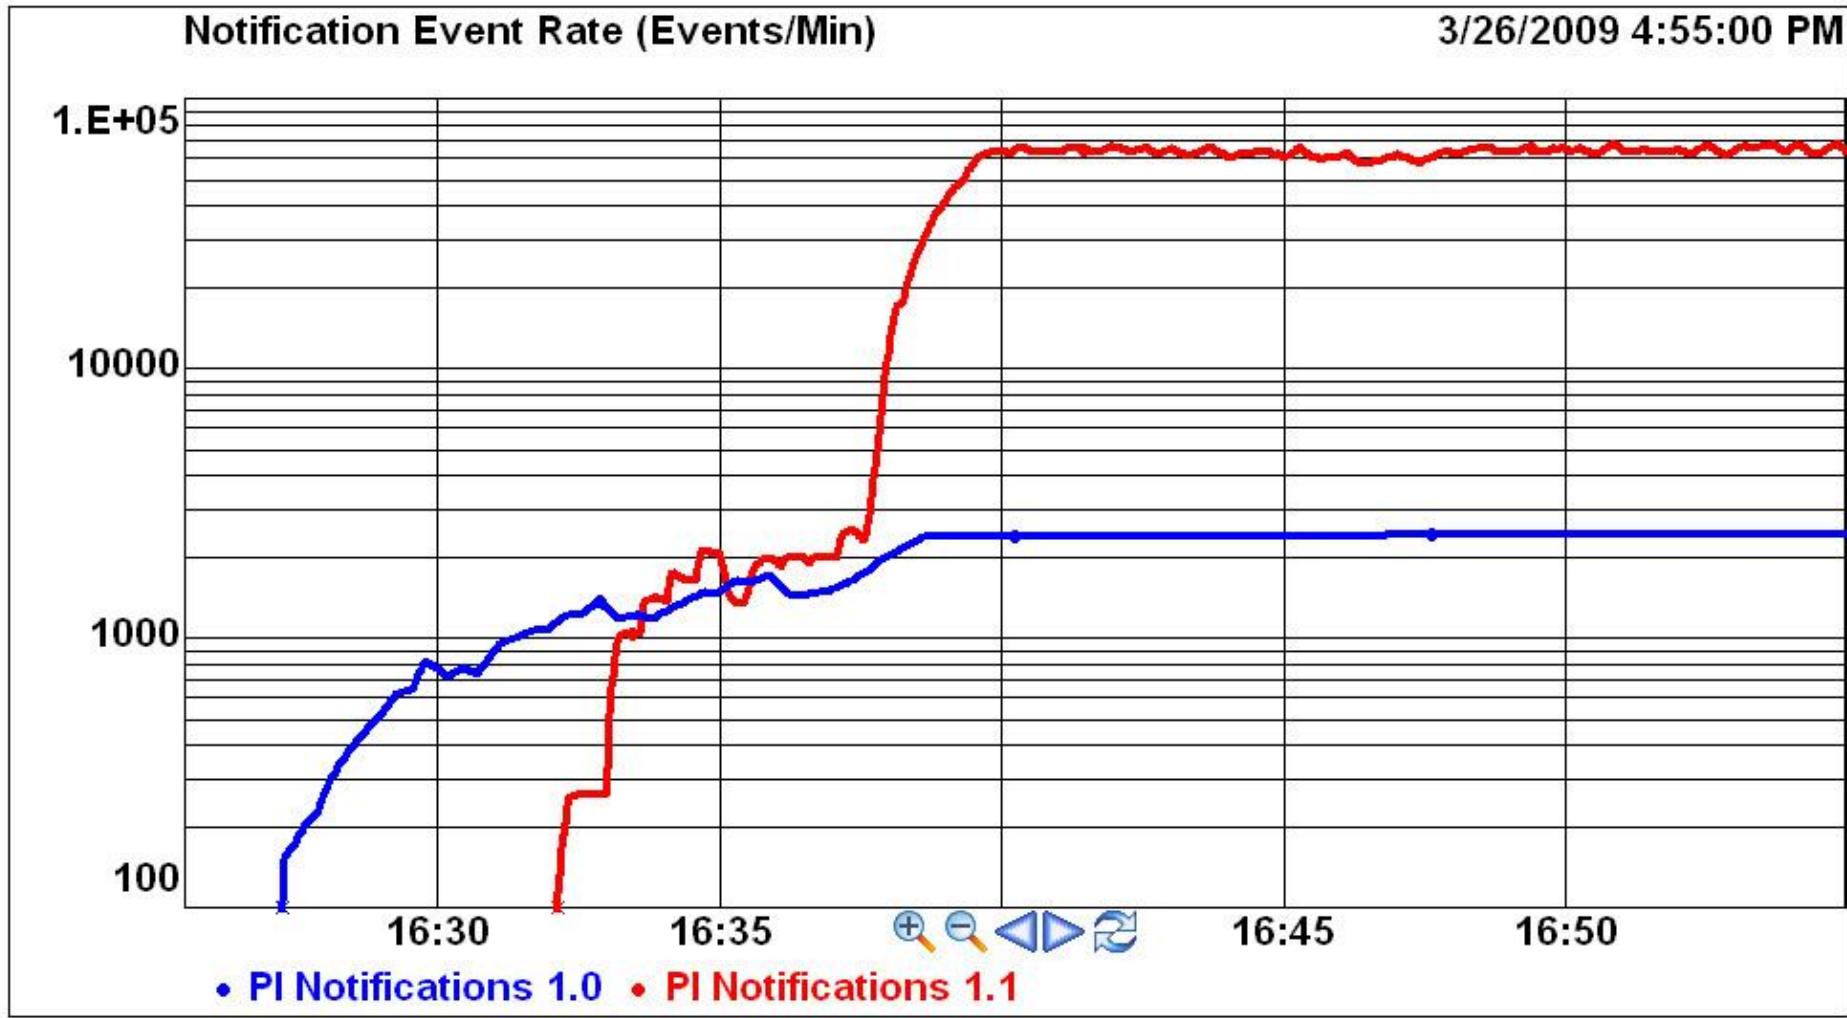

Windows Server 2003

2 x 1.0 GHz, 2.5 GB RAM

Running Notification Count

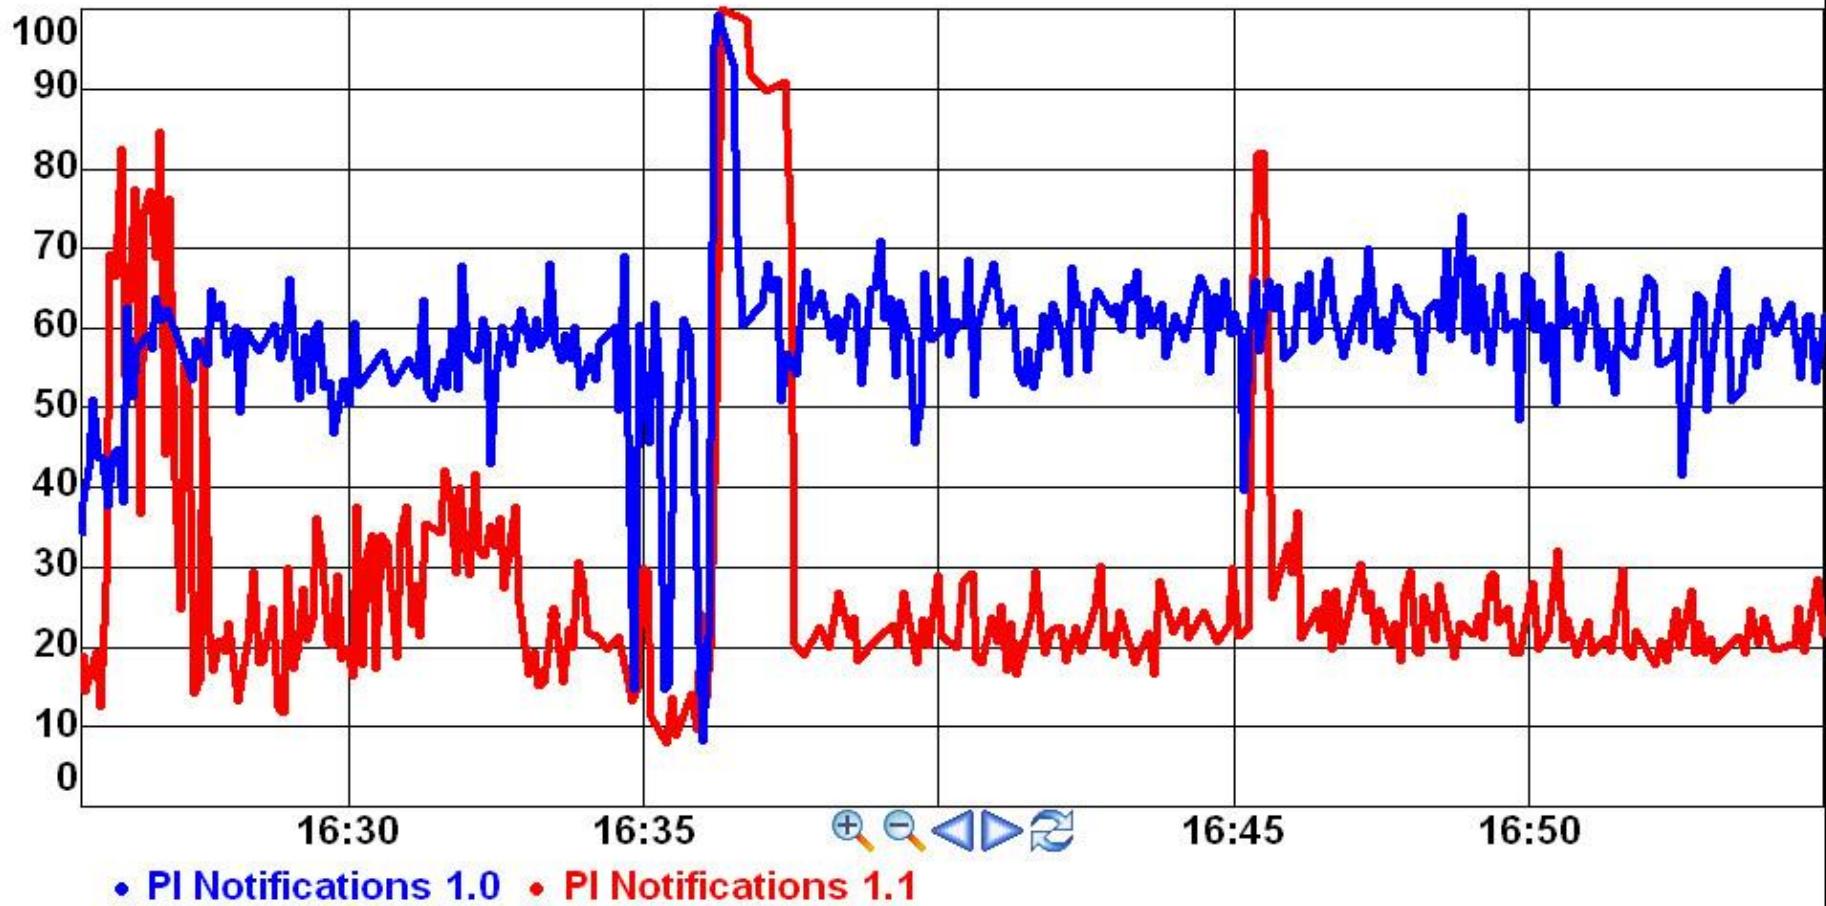

Notification Event Rate

PI Server CPU Usage

% CPU Usage

3/26/2009 4:55:00 PM

Scalability: CONFIGURATION

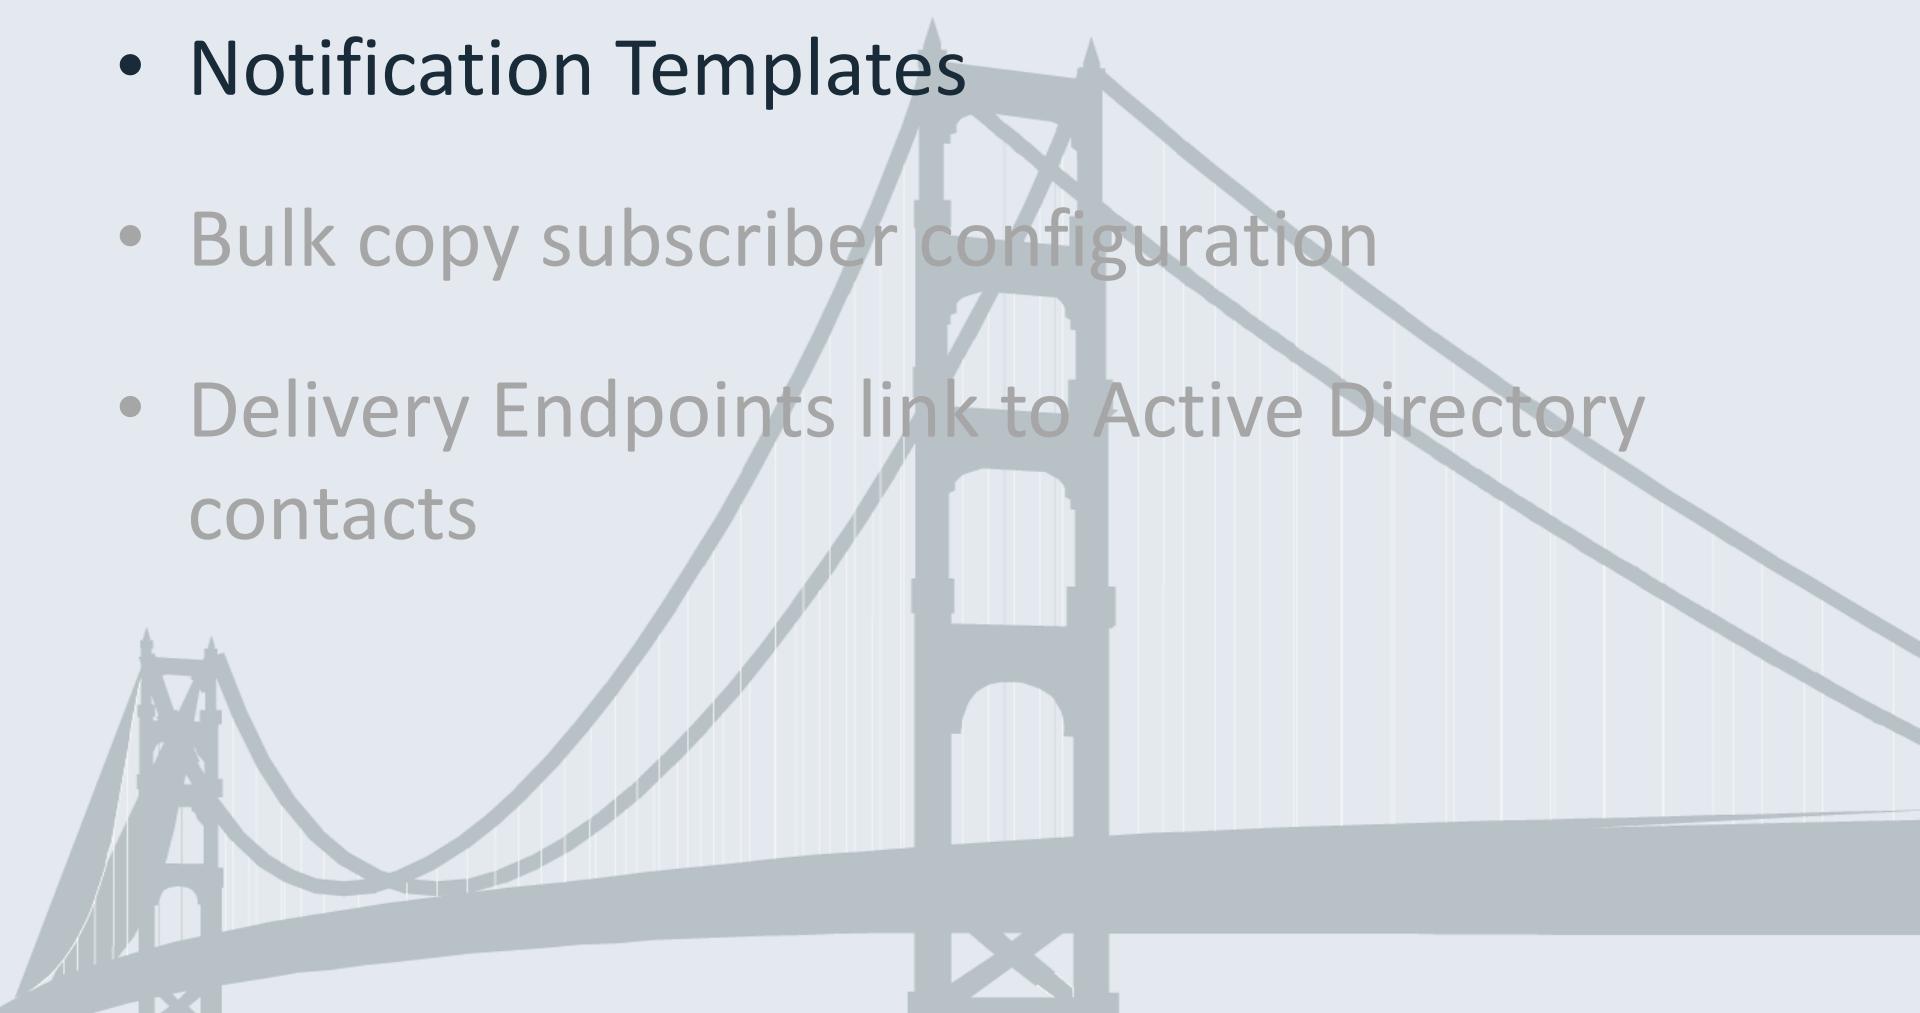

Usability Improvements

- Notification Templates
- Bulk copy subscriber configuration
- Delivery Endpoints link to Active Directory contacts

Automation of repetitive actions

Usability Improvements

- Notification Templates
- Bulk copy subscriber configuration
- Delivery Endpoints link to Active Directory contacts

Notification Configuration in v1.0

- Updating Elements easy
- Notification creation and updating done manually

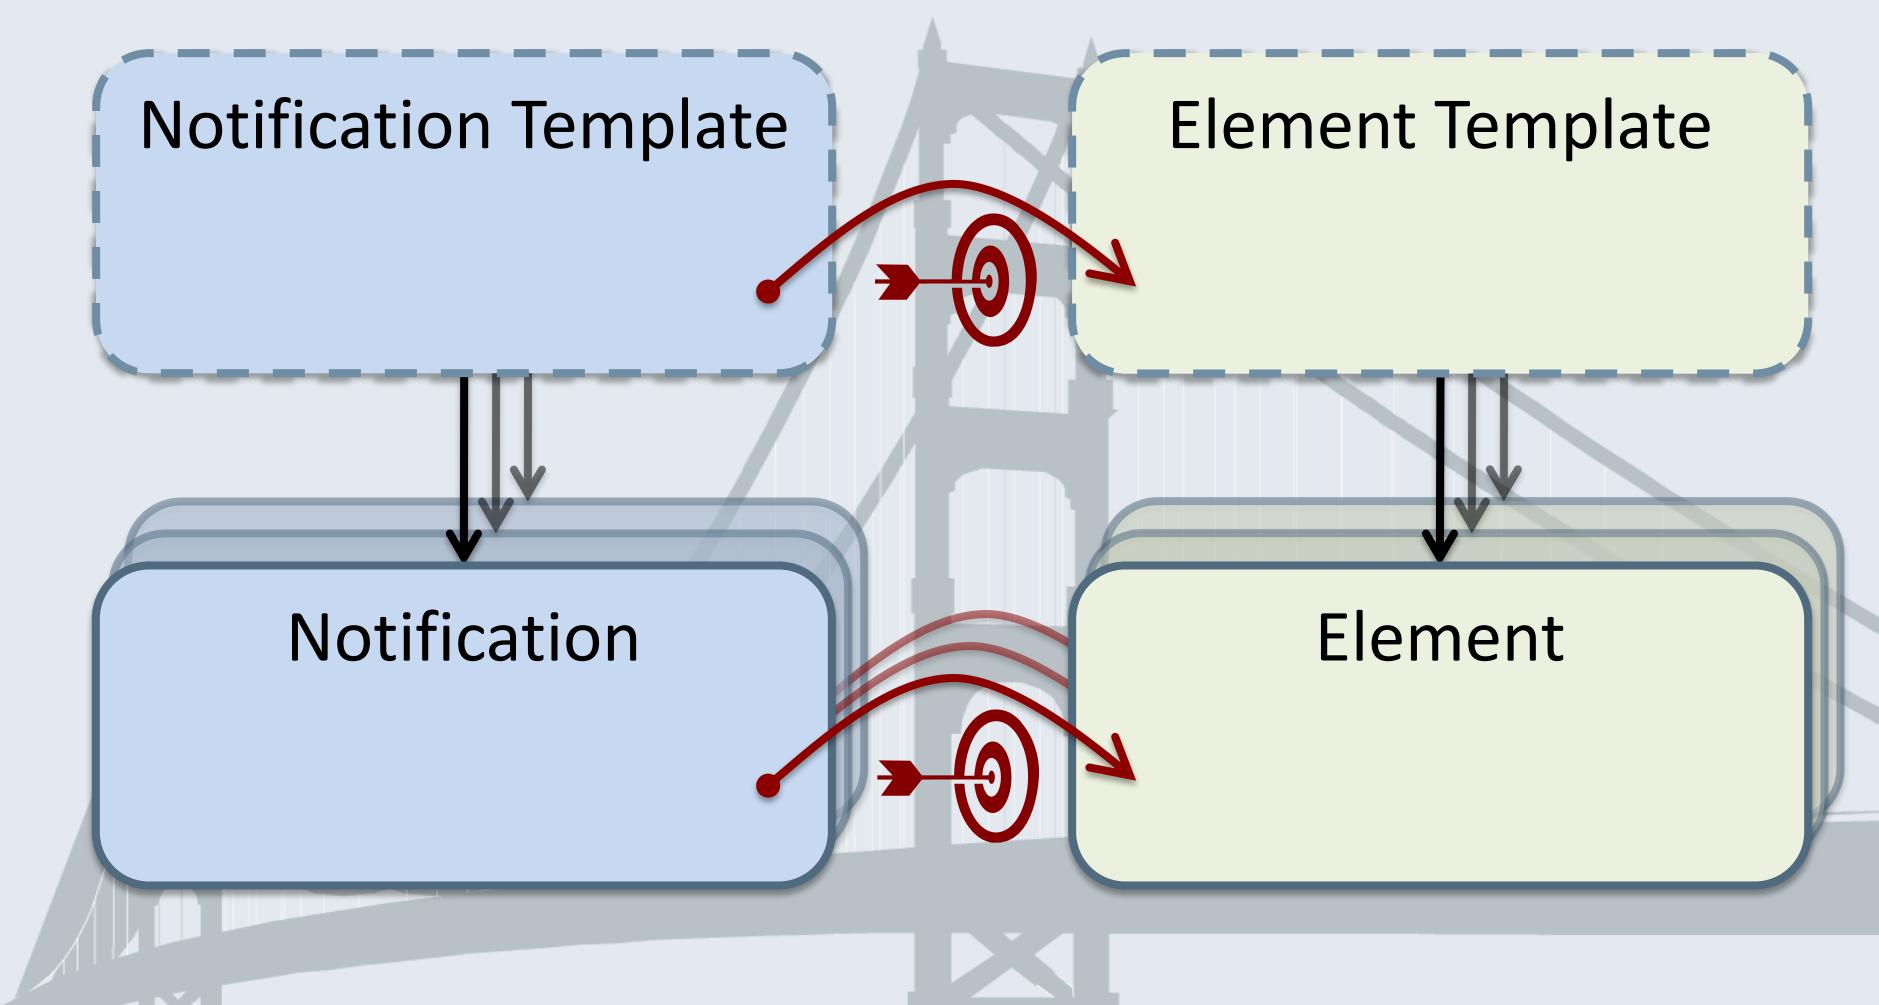

```
graph TD; ET[Element Template] --> E[Element]; E --> N[Notification]
```

Notification

Notification Templates in v1.1

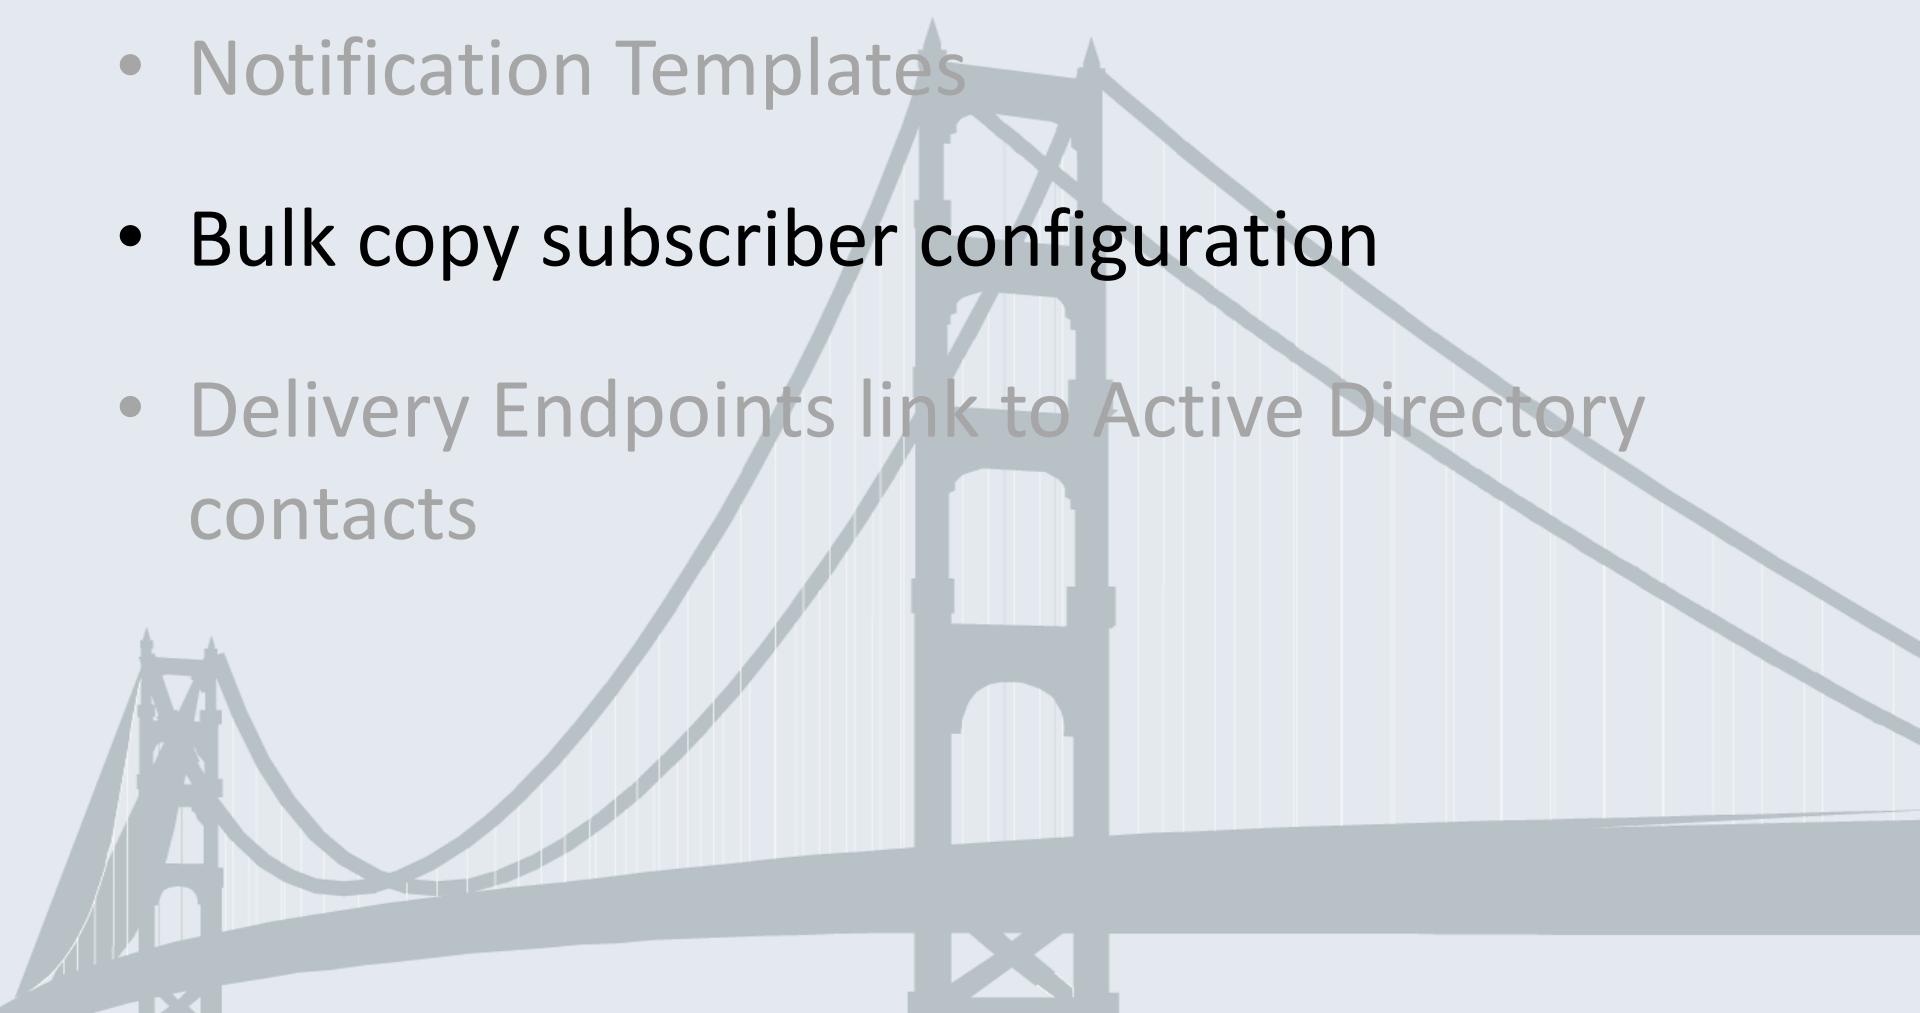

Configuration Demonstration: Notification Templates

PI NOTIFICATIONS

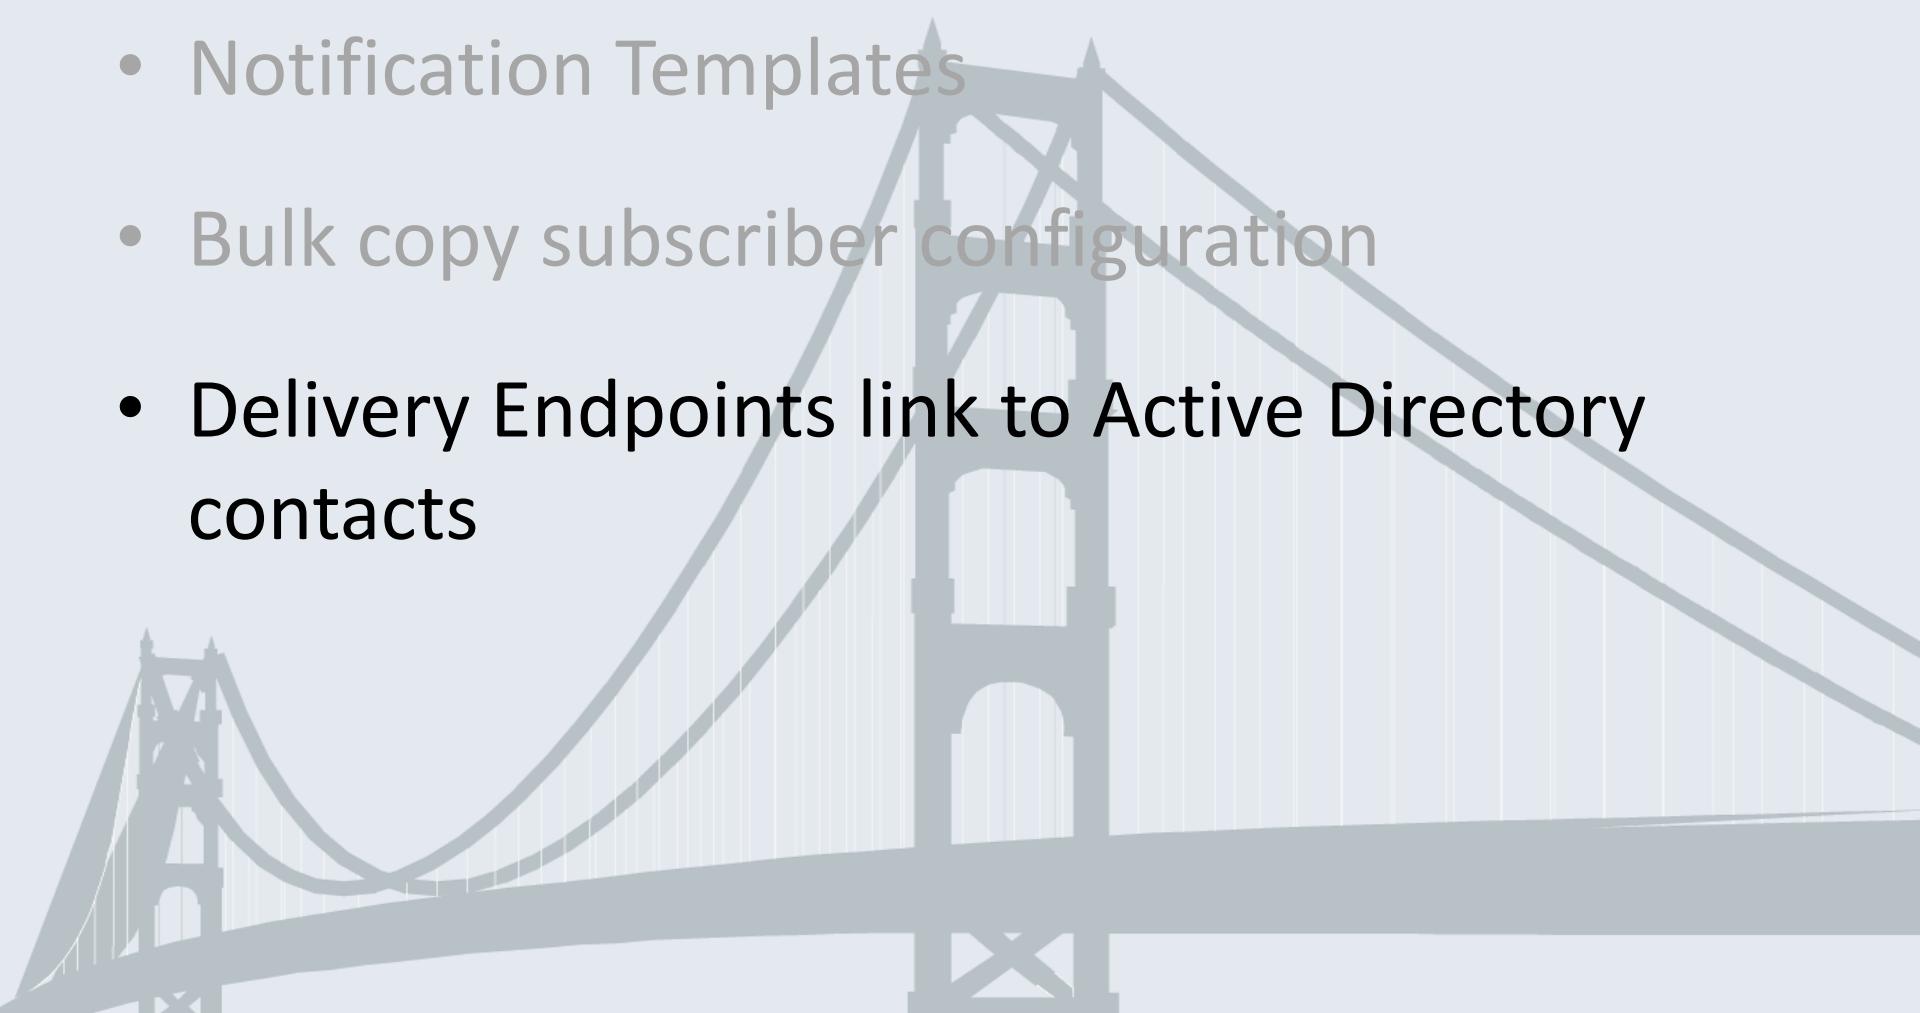

Usability Improvements

- Notification Templates
- Bulk copy subscriber configuration
- Delivery Endpoints link to Active Directory contacts

Usability Improvements

- Notification Templates
- Bulk copy subscriber configuration
- Delivery Endpoints link to Active Directory contacts

Conclusions

- Faster
- More capable
- Easier to build and maintain

Bottom Line:

Same Investment = More Value
