

# Customizing Content and Delivering Information

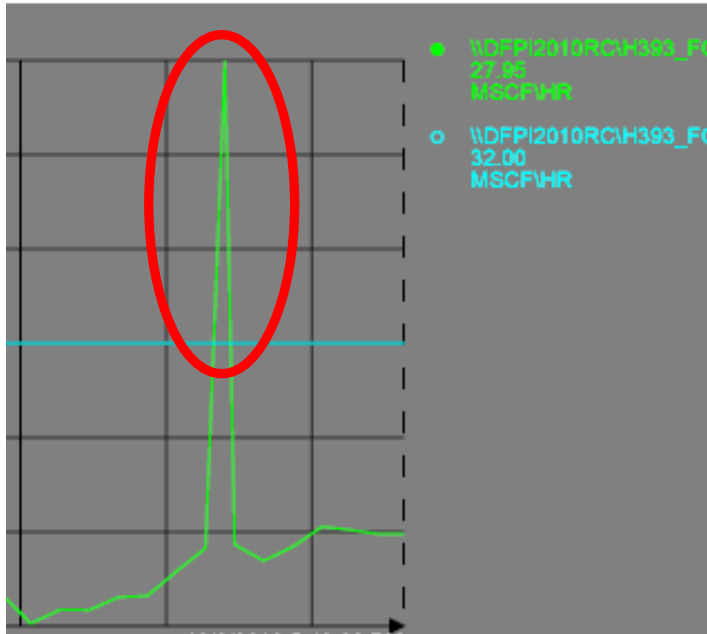

PI Notifications 2010 R2

Presented by

Chris Nelson, *Software Development Lead, OS/soft*

Lingli Zheng, *Software Engineer, OS/soft*

# Not always watching your data

# Receive information about key events

Web Services

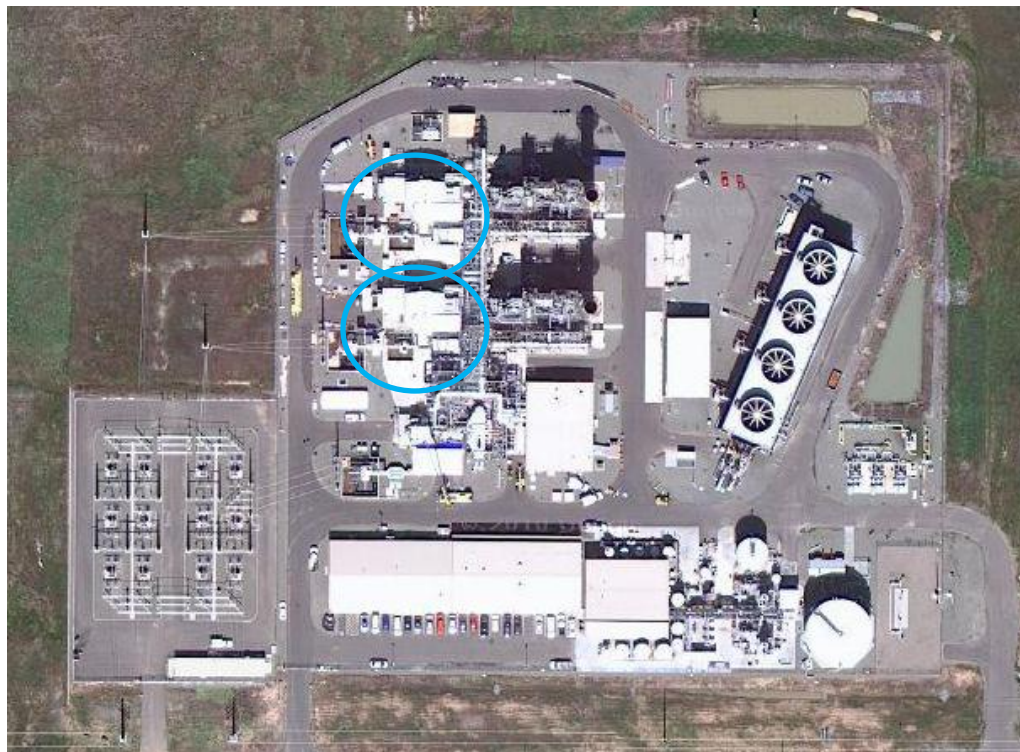

Other  
Applications

## PI Notifications - purpose

- Identify insight that requires action
- Specify information to be delivered
- Deliver to recipients, applications or systems

# PI Notifications by example

## Elements

- Big Creek Power Plant
  - Condenser
  - Gas Turbine 1
  - Gas Turbine 2
  - HRSG 1
  - HRSG 2
  - Steam Turbine

# Demo

- Create a new notification
- Monitor and alert on data quality of suspect sensor

# Define key Events

- Comparisons
- Performance Equations
- Statistical Quality Control

# Provide information

- Customize for the recipient
  - Email, phone, pager
- Provide links to content

# Deliver the notification

- Specify Contacts from PI AF contacts or
- Support for email, web service and Microsoft Office Communicator

- Extensible with custom delivery channels
  - OSIssoft vCampus XML delivery channel example

# Ensure key events are acted upon

- Acknowledge

If no response

- Escalate

## **Actions:**

[Acknowledge](#)

[Acknowledge with comment](#)

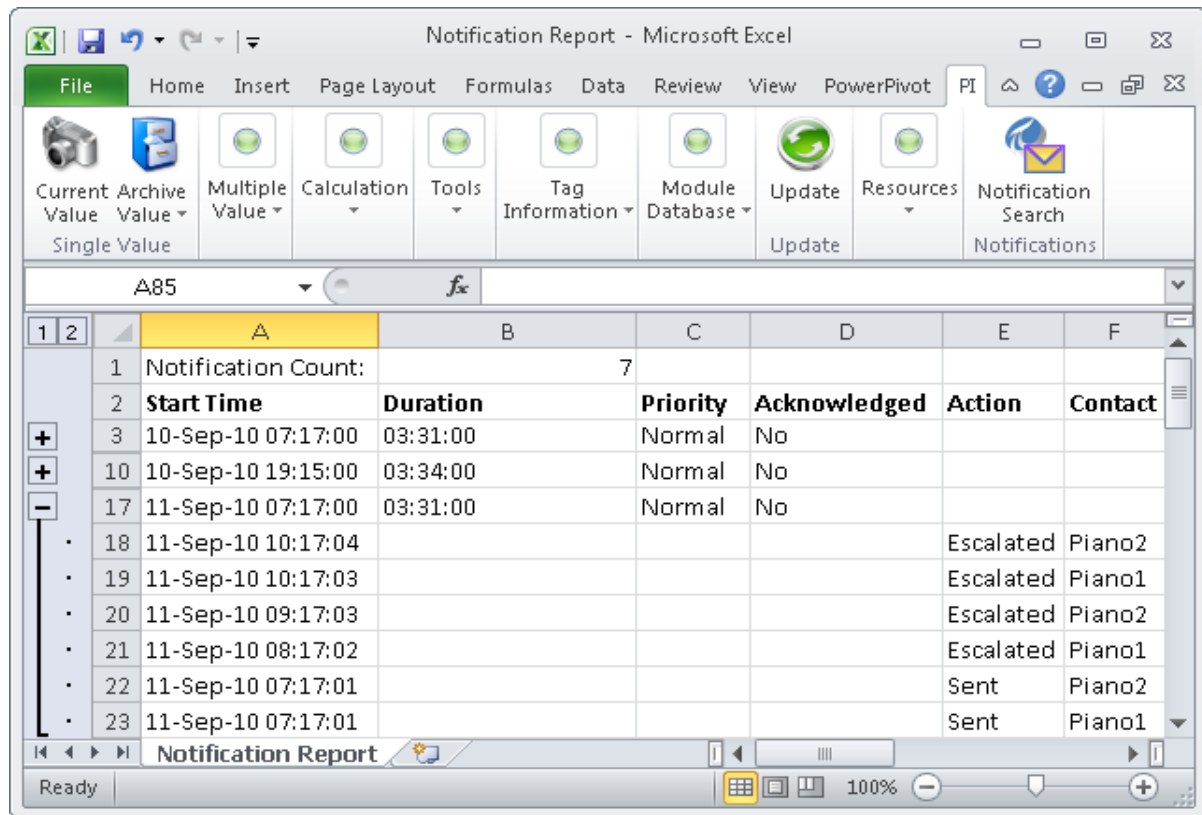

A screenshot of a notification interface showing a hierarchy of subscriptions and escalation steps. The top level is 'Subscriptions (1 Required acknowledgments)'. Below it is 'ISORreactor (Escalation period: 00:15:00)'. Underneath are four email-based escalation steps: 'Supervisor - Email', 'Manager - Email', 'VP - Email', and 'President - Email'. Each step is preceded by a small envelope icon.

# Review notifications

- PI ProcessBook
- PI DataLink
- Desktop App
