One Infrastructure Fuel to Meter

Generation

- | Increase Asset Reliability
- | Optimize Market Operations
- | Reduce O&M Costs, while improving HSE
- | Manage Carbon, Environment, and Regulatory

Transmission

- | Operational Data Management
- | Non-Operational Data Management (IED & DFR)
- | Asset management with CBM
- | Synchrophasor and fast sampling WAMS

Distribution

- | Operational Data Management
- | Continuous outage, voltage and power quality event analysis
- | System Efficiency and Loss Analysis
- | Transformer load management
- | Transformer to Customer Operational Data

Smart Grid

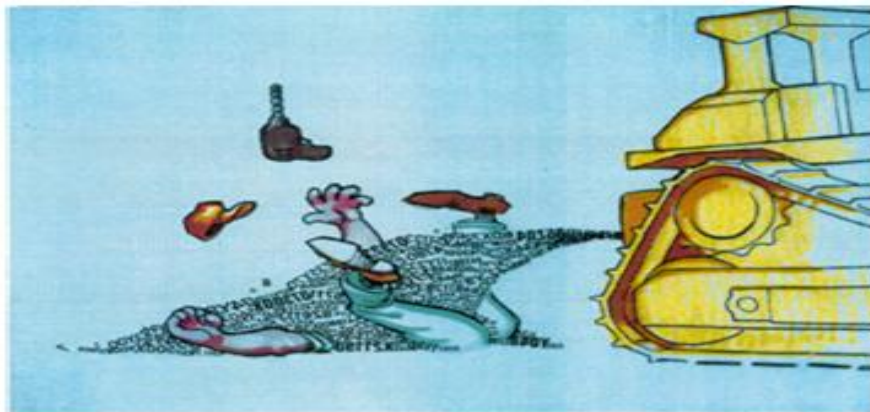

- Meter Data
- Transformer loading
- Fault Detection
- Volt/VAR Optimization
- Energy Storage
- Renewables

What does data Infrastructure mean to your company?

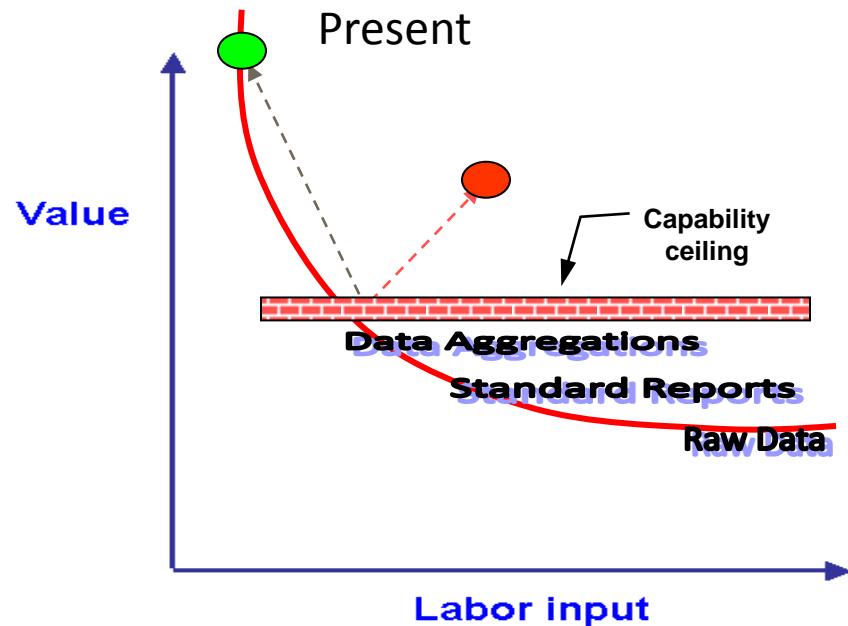

What trends do you see in your industry?

- OEM Remote Condition Monitoring
- CBM, Availability, ERP integration

Past

Information overload.....

.....To actionable intelligence
