

Lean validation as part of standard PI System deployments at J&J

Presented by **Carl Van Laer**

Standardized PI System deployment

“The use of the software delivery lifecycle (SDLC) and the electronic tools made it possible to roll out the regional instance for the Americas in a significantly shorter time than in the past. Never before did we execute an OSIsoft PI System project without any wet signatures”

Nikunj Dani, PDMS Proj. Man.

Vision

One PI System

One reliable source of integrated data used to drive the business, available anywhere, anytime, to anyone

Business Challenge

- How to implement Enterprise wide PI System fast and cost effective?

Solution

- Standardize deployment & validation approach
- Reuse documents / test scripts
- Use electronic tools instead of paper

Results and Benefits

- Significant cheaper and faster PI System deployments
- Foundation for 1 global PI System for Janssen

Topics

- Johnson State College (JSC) in Johnson & Johnson
- PI System at JSC
- SPIRIT – standardization of the PI System World at JSC
- SPIRIT – Deployment – Validation approach
- SPIRIT – Deployment – Validation approach – roadmap
- SPIRIT – Deployment – Validation approach – benefits
- Q&A

- SPIRIT – Deployment – Validation approach – benefits
- Q&A

Johnson & Johnson

A world map where the landmasses are colored light blue. The map is centered on the Atlantic Ocean. Overlaid on the map are three lines of large red text with black outlines, providing global statistics for Johnson & Johnson.

+/- 250 companies in 57 countries

+/- 128.000 employees

Total sales (2013) 71.3 billion USD

Johnson & Johnson

- ✓ JSC Pharmaceutical Medicines
(on prescription)

Consumer
Products for hair & skin care, baby care,
OTC

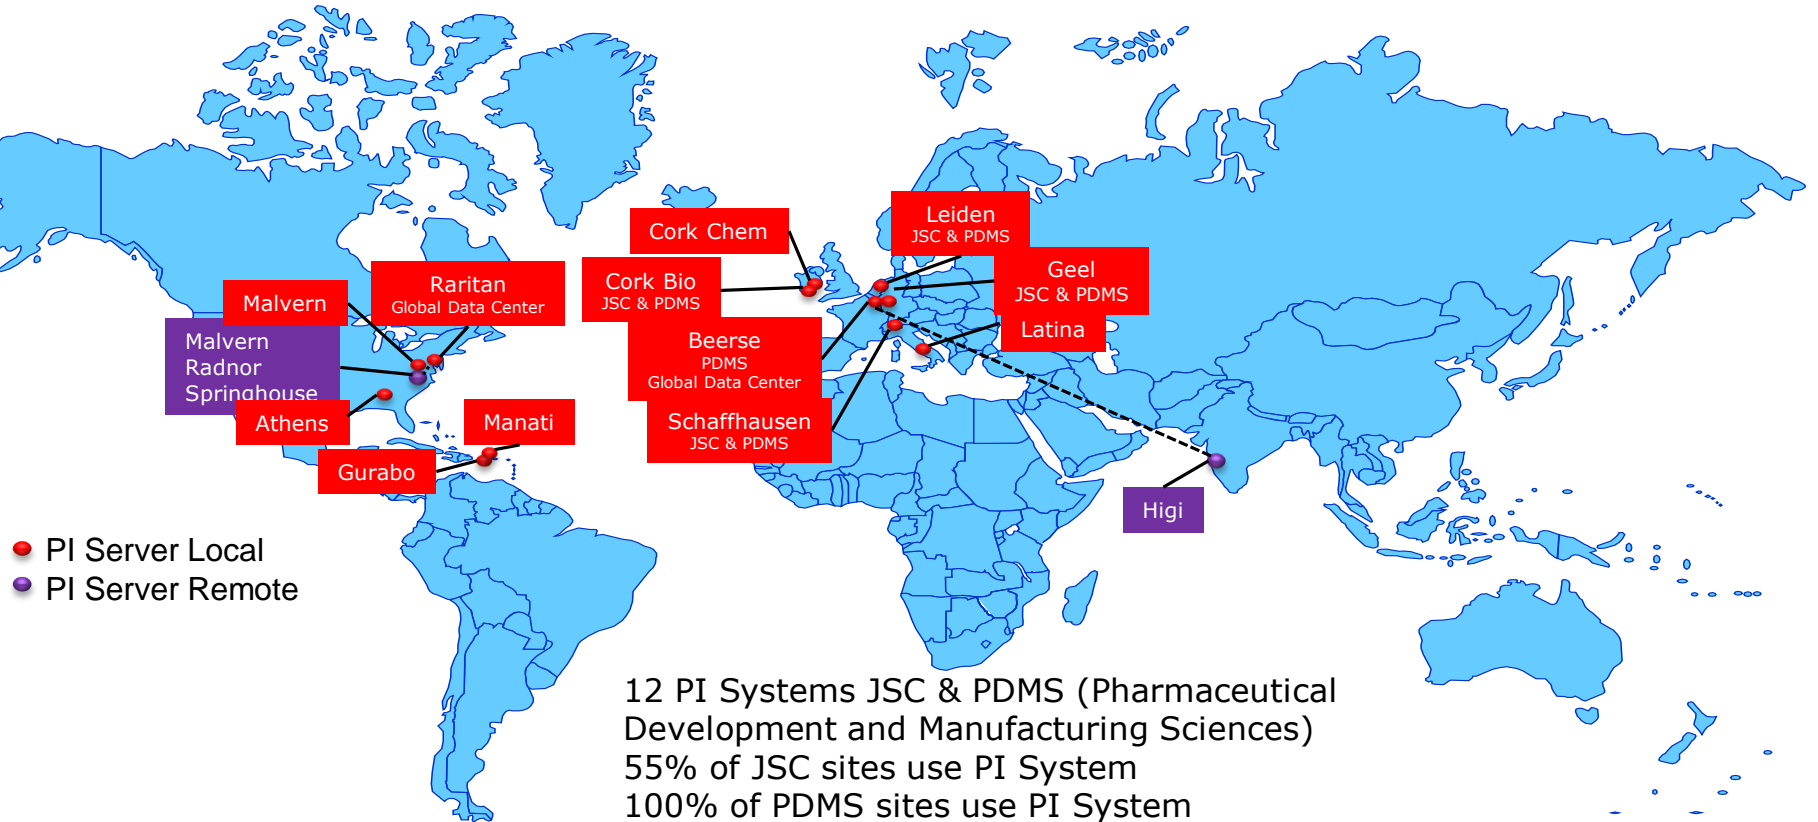

- ✓ MD&D
Products for hospitals, clinics and doctors'
practices (sterile products, blood tests, ...)

Topics

- JSC in Johnson & Johnson

Topics

- JSC in Johnson & Johnson
- PI System at JSC
- SPIRIT – standardization of the PI System World at JSC
- **SPIRIT – Deployment – Validation approach**
- SPIRIT – Deployment – Validation approach – roadmap
- SPIRIT – Deployment – Validation approach – benefits
- Q&A

Standards

Deployment

Deployment – Validation

- **Business objectives of SPIRIT**
 - Make data of different sites / organizations available in 1 virtual PI System platform
 - Standardize on
 - Content
 - **Deployment**
 - Visualization
 - Reporting
 - Make PI System deployments
 - Faster
 - Cheaper

Deployment

Deployment – Validation: How was it in the past?

- **No standardization (different setup, functionality, tools)**
 - Content
 - Deployment
 - Visualization
 - Reporting
- **Local validation procedures**
- **On paper**

=> No LEAN PI System deployments

Deployment – Validation

- **What's wrong with the current validation approach?**
 - Not supporting business objectives of SPIRIT
 - Paper documents (in local language) not suitable for regional/global instances
 - Cannot have different validation approaches for parts of regional/global instances
 - Not LEAN
 - Re-invent wheel
 - Not cost effective
 - COTS system with different validation approach ⇔ inspections?

Deployment – Validation – WE NEED

- To make it **LEAN** to support business
 - Agile
 - Cost effective
- To comply to same legislation:
 - Align our view on what this means
 - Agree on the way forward how to do this
- To define roadmap on how to ‘migrate’ to unified validation approach

Deployment – Validation approach (1)

- **IT unified approach**
 - ⇒ J&J IT SDLC
- **No paper**
 - **Electronic documents – Docspace (Documentum)**
 - Including approval workflows
 - **Electronic test scripts – HP/QC**
 - Including approval workflows, execution, review
- **Usable for all type of implementations**
 - Local / Regional / Global

Deployment – test cockpit

PIMS_RARITAN PE Tests (Production) (incl. Test Set Reviews)			
TS_EXEC_STATUS	(All)	▼	
TS_STATUS	(All)	▼	
CY_STATUS	(All)	▼	
TC_EXEC_DATE	(All)	▼	
Count of TS_NAME	TC_STATUS	▼	
CY_CYCLE			
PIMS_RARITAN00000001-PE-AIS-DM-PI_Archive_Reprocessing	Not Completed	Passed	Grand Total
PIMS_RARITAN00000001-PE-AIS-DM-PI_Batch_Context_Migration	1	1	2
PIMS_RARITAN00000001-PE-AIS-DM-PI_Data_Migration		3	3
PIMS_RARITAN00000001-PE-AIS-DM-PI_RtReports_Migration		4	4
PIMS_RARITAN00000001-PE-AIS-DM-PI_RtReports_Migration		3	3
PIMS_RARITAN00000001-PE-AIS-DM-PI_WebParts_Migration		3	3
Grand Total	1	14	15

Deployment – Validation approach (2)

- LEAN (1)
 - **Product** dependent documents – create/approve once
 - Regional dependent documents (**basic infrastructure**) – create/approve once for each instance (EMEA, NA, ASPAC)
 - Local (**site**) dependent documents – create/approve once for each site connected to regional instance using standard templates

Deployment – Validation approach (3)

- **LEAN (2)**
 - JSC wide SOP/WI - create/approve once
 - Reusable test scripts (create/approve once: execute many)
 - Risk based approach (GAMP 5) for PI System object validation
 - PI Tags
 - PI AF elements
 - PI Interfaces
 - ...

Topics

- JSC in Johnson & Johnson
- PI System at JSC
- SPIRIT – standardization of the PI System World at JSC
- SPIRIT – Deployment – Validation approach
- **SPIRIT – Deployment – Validation approach – roadmap**
- SPIRIT – Deployment – Validation approach – benefits
- Q&A

Deployment – Validation Business Case

- **Business cases identified during validation workshop to start using new validation approach**
 - “Regionalization” - mandatory
 - HW/SW upgrade - evaluation
 - New implementations - mandatory
 - High support from global organization Center of Excellence (CoE) during full lifecycle of system (installation, operation, decommissioning)

Topics

- JSC in Johnson & Johnson
- PI System at JSC
- SPIRIT – standardization of the PI System World at JSC
- SPIRIT – Deployment – Validation approach
- SPIRIT – Deployment – Validation approach – roadmap
- **SPIRIT – Deployment – Validation approach – benefits**
- Q&A

Deployment – Validation – Benefits

- **Re-use of documents: Less creation/review/approval**

Benefits - less man-days needed		
Implementation	Min	Max
Local	10	15
Regional	20	30
Global	20	30

- **Re-usable test scripts**

Benefits - less man-days needed		
Implementation	Min	Max
Creation / approval	40	50
Execution / Review / Follow up	10	20

- **Exploit Enterprise Agreement (EA)**
- OSIssoft ⇔ SI – 10-20 mandays

Deployment – Validation – benefits

- Inspections
 - Uniform validation of PI System across Enterprise = No Surprises
 - No paper
 - All documents readily available
 - All executed test scripts / reviews readily available
