osisoft USERS CONFERENCE 2015

Analytics and Big Data with the Pl System - Visual Analytics

Presented by John Baier – Director of Integration Technologies, OSIsoft

Don Morrison – Real Time Data Integration, Devon Energy

Plant Enterprise Operations

- Small # Assets
- Diverse / Complicated
- Optimization
- Mostly On-premise

Distributed Asset Monitoring

- Medium # Assets
- Similar / Dispersed
- Remote Monitoring
- Enterprise / Cloud

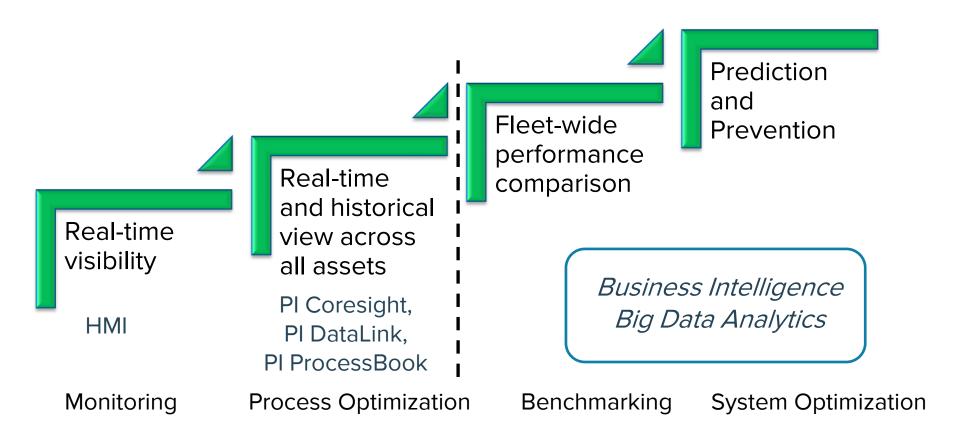

Internet of Things and M2M

- Massive # Assets
- Relatively Simple
- Analytics / Big Data
- Mostly Cloud

Hybrid / Cloud Environment – *OSIsoft Focus*

Evolving Data Goals

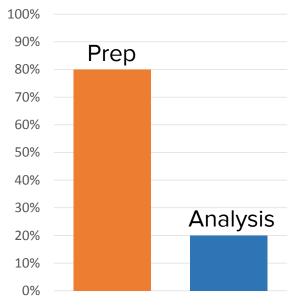

Big Expectations

64% of large enterprises plan to implement a big data project. 85% will be unsuccessful.

Data cleansing and preparation tasks can take 50-80% of the development time and cost.

https://hbr.org/2014/04/the-sexiest-job-of-the-21st-century-is-tedious-and-that-needs-to-change/

Why has this vision been elusive?

What we hear our customers saying

What we hear our customers saying

"We're looking to get the data into tools like Spotfire."

"We want to mix the data from the PI System and other systems in Hadoop."

"Our company has standardized on Teradata and Tableau for our business intelligence visualization."

"Accessing the data in a relational database opens up the data to new users."

1. Access the data in tools familiar to the end users

What we hear our customers saying

"It took us 40 days to get the data out of the PI System"

"Writing code and supporting it is just not an option."

2. It has to Scale (without code)

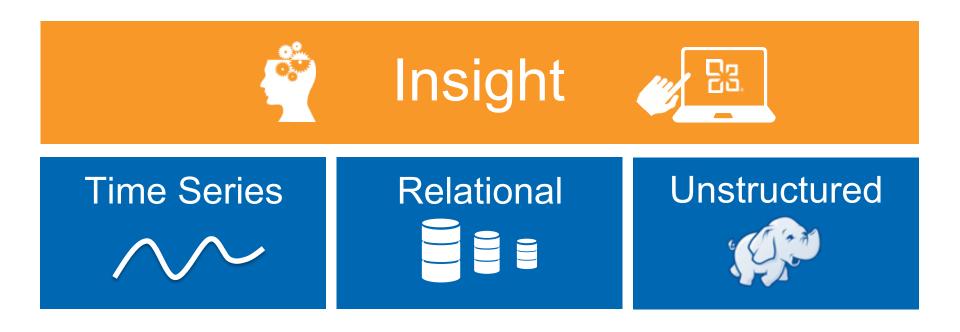

What we hear our customers saying

"My job is to provide one version of the truth to the whole organization so I have to be able to trust the data and have a repeatable process."

"Seeing the data in terms of wells and pumps makes it much easier for my end users." 3. Flexibility and trust

"It's great that I can look at data across similar and different assets together." "Zeroing in on just the necessary data by using events for my application keeps things simple."

Modern Information Architecture

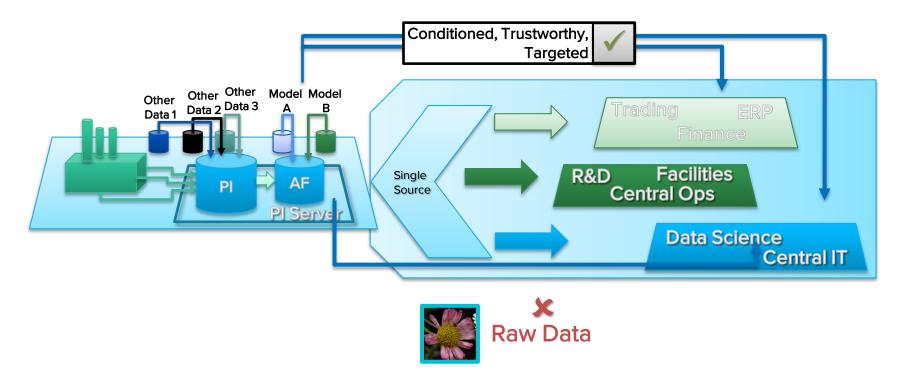

Real-time Data isn't perfect

The Truth about Real-time Data

- Naturally incomplete (delays, shutdowns)
- Not evenly spaced
- Doesn't look and behave like SQL (RDBMS)
- Subject to errors in measurement
- Varies in fidelity
- Needs Context (Assets, Events)
- Hard to Collect effectively

Decision-Ready Data

Integration with Analytics

System of Record

- Guaranteed Delivery & Storage
- Full Fidelity of Sensor
- **Optimized for Real-Time**
- Backup/Restore
- HA
- Security

Cleanse

Augment

Shape

Transmit

Analytics Packages

Visual Analytics

TIBC Spotfire

Statistical Analytics

- Designed to Analyze Large Sets
- Expects that the Data Exists
- Problem Defines Data Shape
- Typically Evenly Spaced in Time

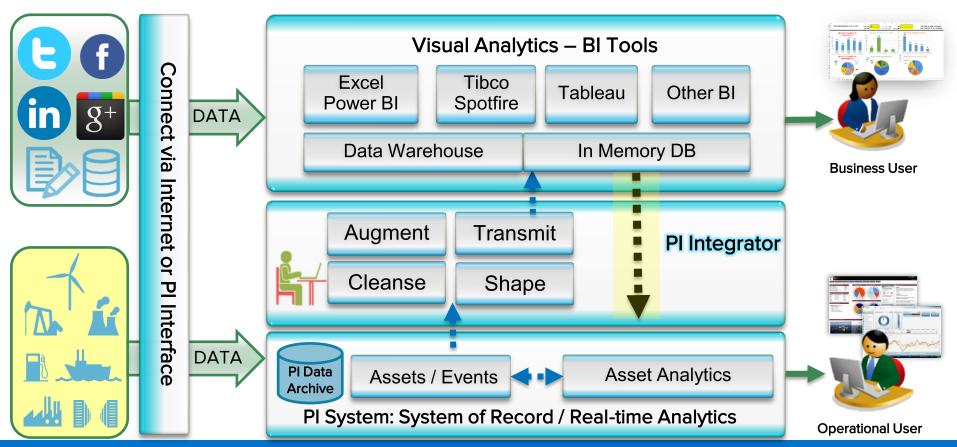

PI Integrators

PI Integrators reduce the complexity of analyzing real world industrial data

All Pl System data delivered on your terms, in your language, to the tools you use, and to the people that can make a difference.

PI Integrator for Business Intelligence

New Persona: Information Architect

- Works in an IT or OPs IT role
- Responsible for integrating many data systems to achieve business goals
- Data Lifecycle Management
 - Access Policies & Distribution
 - Logical and Physical Architecture
 - Creation and Receipt (Trust)
 - Maintenance & Disposition
- PI System is just 1 system
- Business Expert / Business Enabler / Not subject matter expert (engineer)

Business Intelligence at Devon Energy

Presented by Don Morrison

About **devon**

- One of North America's leading independent producers of natural gas and oil
- Engaged in exploration and production
- Corporate headquarters in Oklahoma City
- More than 5,500 employees
- Member of the S&P 500
- On Fortune magazine's 100 Best Companies to Work For list each year since 2008
- New to PI in 2013 and Enjoying the Benefits of EA

A Leading North American E&P

Focused and balanced asset portfolio

Proved reserves: 2.8 billion BOE

Net production: 664 MBOED

Upstream revenue: 60% oil

Deep inventory of opportunities

- Prolific Eagle Ford assets
- High-quality Permian Basin position
- World-class heavy oil projects
- Top-tier liquids-rich gas plays
- Positioned to deliver visible, low-risk production growth

Note: All figures represent Devon's retained asset portfolio.

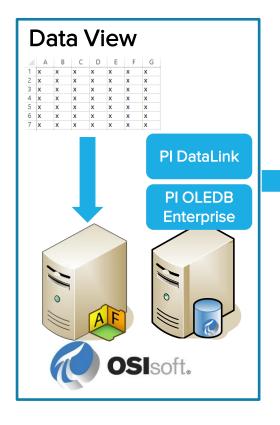

What we hear our business saying

How we deliver data to the business

Analytics\Visualization

PULL

TIBC Spotfire

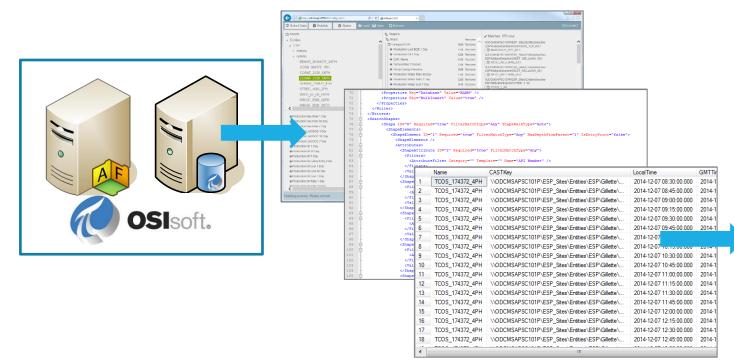

Excellent for "small" datasets

Hours, days, 1-2 months

Does not scale to "large" datasets

• 6 months, 3 yrs...

PI Integrator for Business Intelligence

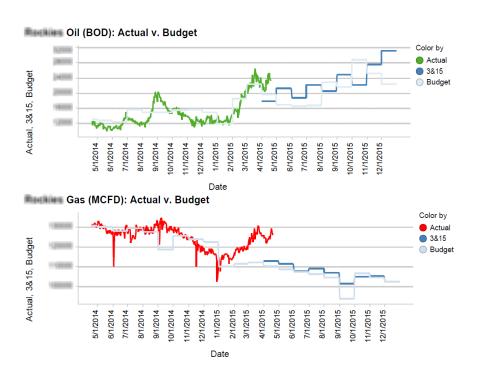

What do we gain?

- BI tools become more responsive (Spotfire)
- Users can build queries ad hoc (SQL)
- Scheduled and ad-hoc reporting (SSRS)
- Historical data available to existing BI tools
- Real-time data in Hadoop
- Align data for BI within a common time scheme
- Enable unique uses for real-time data

Use Case: Management Summary

Automated Daily Reports

Management Overview

KPI / Metrics

Rollup to Bus. Unit

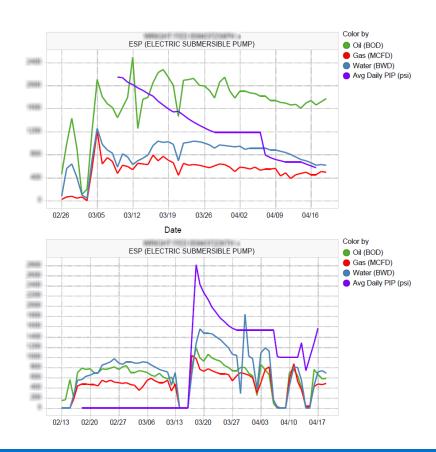

Use Case: Daily Reports

Automated Daily Reports

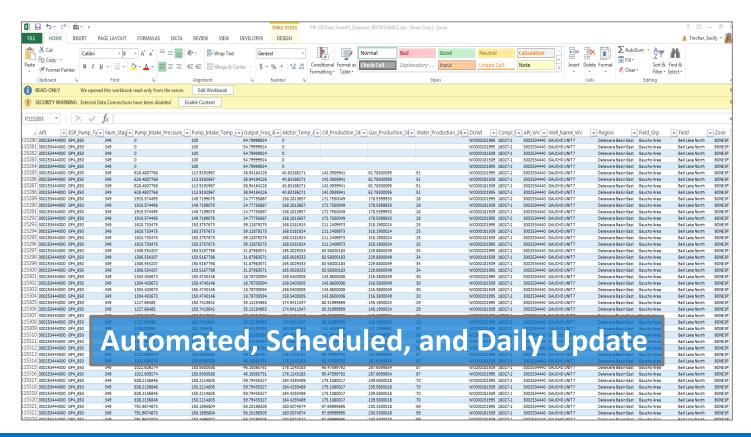

Technical Overview

KPI / Metrics

Well by Well

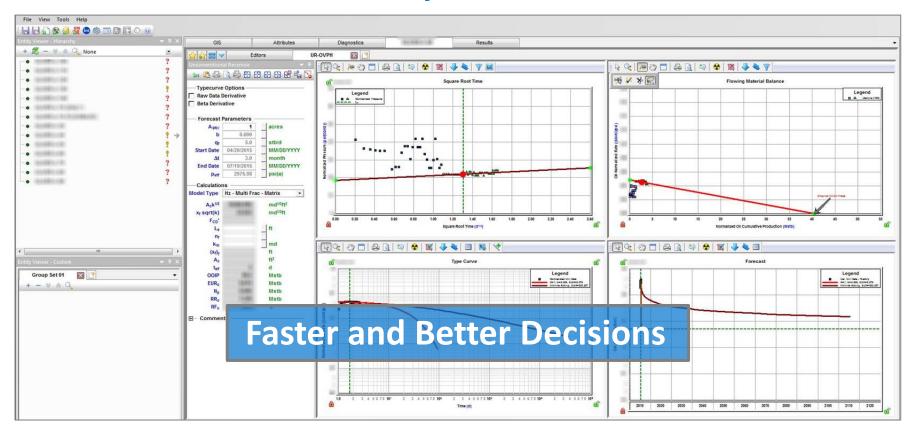

Use Case: SharePoint / Pivot Tables

Use Case: Reservoir Analysis

The Power of the Shape

- Find nested elements
- Find "buried" attributes
- Require specific structure
- Filter on Categories
- Filter on Event Frames
- Translate to new relations

```
<Properties Kev="Database" Value="BADM" />
      <Properties Kev="BulkInsert" Value="true" />
    </Properties>

                  <a href="AttributeFilter Category="" Template="" Name="Pump Intake Pressure" />
                </Filters>
                <ValueFilters />
              </ShapeAttribute>
              <ShapeAttribute ID="26" Required="true" FilterMatchType="Any">
```

"Google for AF"

We're leveraging more data

managers and engineers are able to get a better idea of how the asset is performing.

enables us to make faster and better decisions regarding asset performance, which should lead to better production and lower costs!

66

...spending less time copying and pasting and more time analyzing the data.

PI Integrator for Business Intelligence

- Beta Q2 2015, Release Q3 2015
 - Data Designer UI
 - Data Extraction, Shaping, Cleansing
 - PI Views stored in AF
 - Pull Data from PI System using ODBC
 - Compatible with most off the shelf BI Tools
 - Microsoft PowerBl and Excel, Tibco Spotfire,
 Tableau, Datawatch, SAP BusinessObjects, Cognos

Tangible Benefits

- Easy to deploy, easy to explore, easy to iterate
- Explore PI System Data in tools that business users are already comfortable using
- Identify correlations across fleets of assets
- Tap into the most valuable data set in the world

Call to Action

- Stay for the Next Talk
 - Demo of Data Designer
 - Integration with Hadoop and Statistical Analytics
- Come see us at Product/Partner Expo
 - PI Integrator for SAP HANA
- Friday 10am Big Data and Business Intelligence
- Sign up for Interest in Beta Q2
