Empowering Business in Real-time.

© Copyright 2010, OSIsoft LLC. All rights Reserved.

The screenshot shows the OSIsoft website homepage. At the top left is the OSIsoft logo. To its right, a red circle highlights the links "Worldwide Locations", "Tech Support", "Training", and "OSIsoft vCampus". Below these is a navigation bar with links for "Software & Support", "Value", "Partnering", "Events", "Resources", and "Company". A search bar with a "Go" button is on the right. The main content area features a large graphic of the OSIsoft logo with the text "WHAT IS THE PI SYSTEM?" and "The PI System, the industry standard in enterprise infrastructure, for management of real-time data and events." Below this is "Empowering Business in Real-time." and a "More Information" link. To the right are three buttons: "VISUALIZE", "WHAT IS THE PI SYSTEM?", and "COLLECT". A banner for the "seminário regional OSIsoft do Brasil 2010" is below the main content. The footer contains three columns: "Upcoming Events" with a list of seminars, "Latest News" with a list of announcements, and "Featured Links" with a video titled "A Message from the CEO" by Dr. J. Patrick Kennedy.

5 Ways to Learn

Welcome

5 WAYS TO LEARN **Classes**

- Public Courses
- Computer Based Training
- Private On-site Classes
- Training Webinars
- Self-Paced Study

OSIsoft currently features a wide range of classes available at training locations throughout the US and Canada. Many of our classes have equivalents in our Computer Based Training (CBT) Series. We also offer training on-site at your location.

[Class Descriptions](#)

To see a list of classes OSIsoft offers check out the class list and descriptions.

[Training Webinars](#)

These interactive seminars given over the web allow users to learn topics that they might not otherwise get exposed to. Each of the training webinars will focus on a specific topic, and will guide you through that topic in an interactive environment.

[Courses on CD](#)

We currently offer a series of Computer Based Training discs that cover both the PI Server and common Client applications. The discs feature voice and video demonstrations.

[On-site Training](#)

Onsite training is available from OSIsoft. The same team who provide OSIsoft PI Server system installation and consulting services also performs onsite training.

[Self-Paced Study](#)

Here you can find the materials used in class for review at your own pace. Included are current versions of the presentation, exercise, and example files used in the live course.

5 ways to learn at OSIsoft

1. Instructor-led Classroom training
2. On-site Training
- 3. Computer-Based Training (CBT) /
On-Demand Streaming training**
4. Webinars
5. Self-study

Learn anywhere with **CD/DVD-based** training.

Which Class Should I Take?

It is the most common question we get. And it's a good one. If you are new to the PI System or just unsure of which class you should take first or next, check out the [Training Paths page](#) (the link is also in the right margin of each page).

WHAT IS OSISOFT VIRTUAL CAMPUS?

OSIsoft vCampus is a **subscription-based**, online offering that consists of providing everything people need to **develop applications** on the PI System. Focusing on 'doing it right', this **community-oriented** program provides each of its subscribers with:

- Personal development **PI System**
- **Community** experience with discussion **forums** and **blogs**
- Online **library** and **courses**
- Technical, interactive **webinars**

OSIsoft vCampus is intended to facilitate and encourage communication around PI programming and integration between

Virtual Campus Library

Welcome to the vCampus Library, great source of information for PI System developers! The Library contains different types of documents including documentation, user and programmer guides on all the PI products provided with vCampus. To find what you want you can simply browse the hierarchical index on the left, or perform a search with the desired keywords (located at the top-right corner of the page).

While the Library already contains some architectural guidelines – the "OBA Accelerators" series for instance –, the vCampus team will be working at increasing the number and type of such documents: how-to's, best practices, guidelines, tutorials, etc. In the mean time, check out these OBA (Office Business Applications) Accelerators, designed to make easier development/integration of PI in Microsoft Office applications, notably Microsoft SharePoint.

Also keep in mind that as a member of vCampus, you can play a big role in how the Library evolves: your feedback on the current contents, especially suggestions on potential topics and articles are more than welcome! We encourage you to forward any ideas or feedback you have to the vCampus team, at vCampus@osisoft.com Happy reading!

This is the recording for the vCampus-exclusive webinar titled "**PI OLEDB Enterprise 2010**" (part of the "**Builders' Café**" **webinar series**) that was held on July 28th, 2010.

The webinar presents PI OLEDB Enterprise 2010, a brand new product which exposes PI Asset Framework (AF) data in a relational way, making it accessible through SQL queries and in any OLE DB consumer application.

TRAINING CENTER

Online Courses

You can now access our traditional **Computer Based Trainings (CBTs) online!** Cost- and time-efficient, these are a great way to learn: just like an instructor-led training, they offer several hours of "speech over presentation", with quizzes and exercises.

A [discussion forum](#) is also available to provide feedback or ask questions to the Training Department.

PI Application Development Training Course

This **instructor-led training** course is part of our standard training catalog and is scheduled to take place in various OSIsoft training facilities. It teaches the participants how to make use of the Data Access technologies available through OSIsoft vCampus. Whether you want to develop custom PI applications or integrate PI with other systems, this class will show you how to do so and what the best practices are.

Should you wish to go through the course yourself, you can download the material [here](#). If you would like to provide feedback to the Training department, you can use the "[Training & Online Courses](#)" [discussion forum](#). And do not hesitate to post technical questions on the other [discussion forums](#).

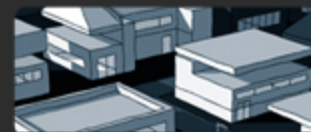

If you wish to find out more about this course or attend the instructor-led version, please consult the [course description page on our the Training website](#) for additional information on the course, the schedule and to register.

PI PROCESSBOOK, PI DATALINK AND RTWEBPARTS

Audience:

This course is for beginning users of PI, and is often an individual's first look at OSIsoft's products. These include System managers of the PI system, members of a PI project team, or system integrators who work with OSIsoft customers. These individuals may be engineers, production managers, process operators, instrument technicians, PI project team members, information system analysts and computer support personnel. This is also an excellent course to take if you are considering buying PI and want to eventually implement all of its features.

[Launch Course](#)
[Course Materials](#)
[Course Discussion](#)

Prerequisites:

This class is taught in a Windows XP / Office 2007 environment, and is designed for students who have a good understanding of that environment. Knowing how to work in Excel is a prerequisite for this course, however no specific knowledge of PI software is required.

Class Outline:

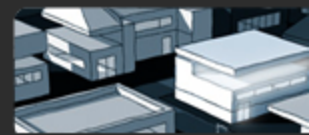

- Chapter 1.0: Introduction to PI
- Chapter 2.0: Common Dialog Windows
- Chapter 3.1: PI ProcessBook - Run Mode
- Chapter 3.2: PI ProcessBook - Build Mode
- Chapter 3.3: PI ProcessBook - Advanced
- Chapter 4.0: PI Datalink
- Chapter 5.0: PI Module Database
- Chapter 6.0: RtWebParts
- Chapter 7.0: ActiveView
- Chapter 8.0: PI Analysis Framework

COURSE RESOURCES

For comments on the content of the online courses, please contact **D'Orazio**. For technical questions, if CBTs are not working properly, please contact >>

CBT SOFTWARE REQUIREMENTS

The video content presented in this course requires **JavaScript** to be enabled and a recent version of the **Macromedia Flash** player. If you are using a browser with JavaScript disabled please enable it now. For more information, click here >>

[Home](#) > [Download Center](#)

DOWNLOAD CENTER

Provided with the vCampus membership is a complete set of PI Products to install and use as your personal development PI System. At this time, the **vCampus PI Products Kit** is available as a **DVD image**, under the form of an .ISO file. To make use of this .ISO file, one can:

- Burn it as an image to a writable DVD using any DVD burning software;
- Load it in a CD/DVD emulation software such as Daemon Tools (see links on the right-hand side).

Every new release of the vCampus PI Products Kit includes the latest versions of the included PI products at that time. Between the releases of the kit, every new version of a PI product is made available as separate download in the table below.

Just like any other regular PI System, a **PI Server License file** is required to install the PI Server component. While the kit comes with a 30-day temporary license, you will need to download the appropriate PI Server License File to use the software for the full length of your subscription (please see **the links on the right-hand side**).

Category

Software

Name	Version	Size
» vCampus PI Products Kit (DVD Image)	May 2010	0.98 GB
» Machine Signature File (MSF) Generator	1.0.0.1	588 KB
