Software for the Agile Business

What Is A Portal?

- ❖ **Unified place that connects people to contextually relevant information, services and applications**
 - ◆ **Delivered by a framework, not a single product**
 - ◆ **Collection of services and applications**
 - ◇ **Distinct needs**
 - ◇ **Shared services**

Portal Scenarios and Goals

- ❖ **Internet Commerce**
 - ◆ Transactional site for direct selling to customers or partners
- ❖ **Internet Presence**
 - ◆ Corporate site delivering information to customers
- ❖ **Information Aggregation**
 - ◆ Employee or partner facing site aggregating information and applications
- ❖ **Collaboration**
 - ◆ Employee or partner facing site facilitating collaboration around information
- ❖ **Personal and Team**
 - ◆ Employee facing site for sharing information with coworkers

Microsoft .NET Framework

- ❖ Connecting people, applications and information in seamless and secure ways
 - ◆ .NET framework and server control model
 - ◆ Aggregates services and applications
 - ◆ Broad platform value
- ❖ Portal capabilities converge in the .NET framework

Microsoft Portal Elements

- ❖ **Portal Products and Technologies**
 - ◆ **BizTalk Server**
 - ◆ **Commerce Server**
 - ◆ **Content Management Server**
 - ◆ **Office SharePoint Portal Server**
 - ◆ **Windows SharePoint Services**
- ❖ **Built using the .NET Framework on the Windows Platform**
- ❖ **Ongoing integration delivers “better together” value**

Sharepoint Technologies

❖ **Focus on improving**

- ◆ The quality of information stored
- ◆ The ability to find that information
- ◆ The ability to learn from what is found

❖ **It's not just about documents**

- ◆ Information and knowledge is held in all sorts of repositories

❖ **Technology is just an enabler...**

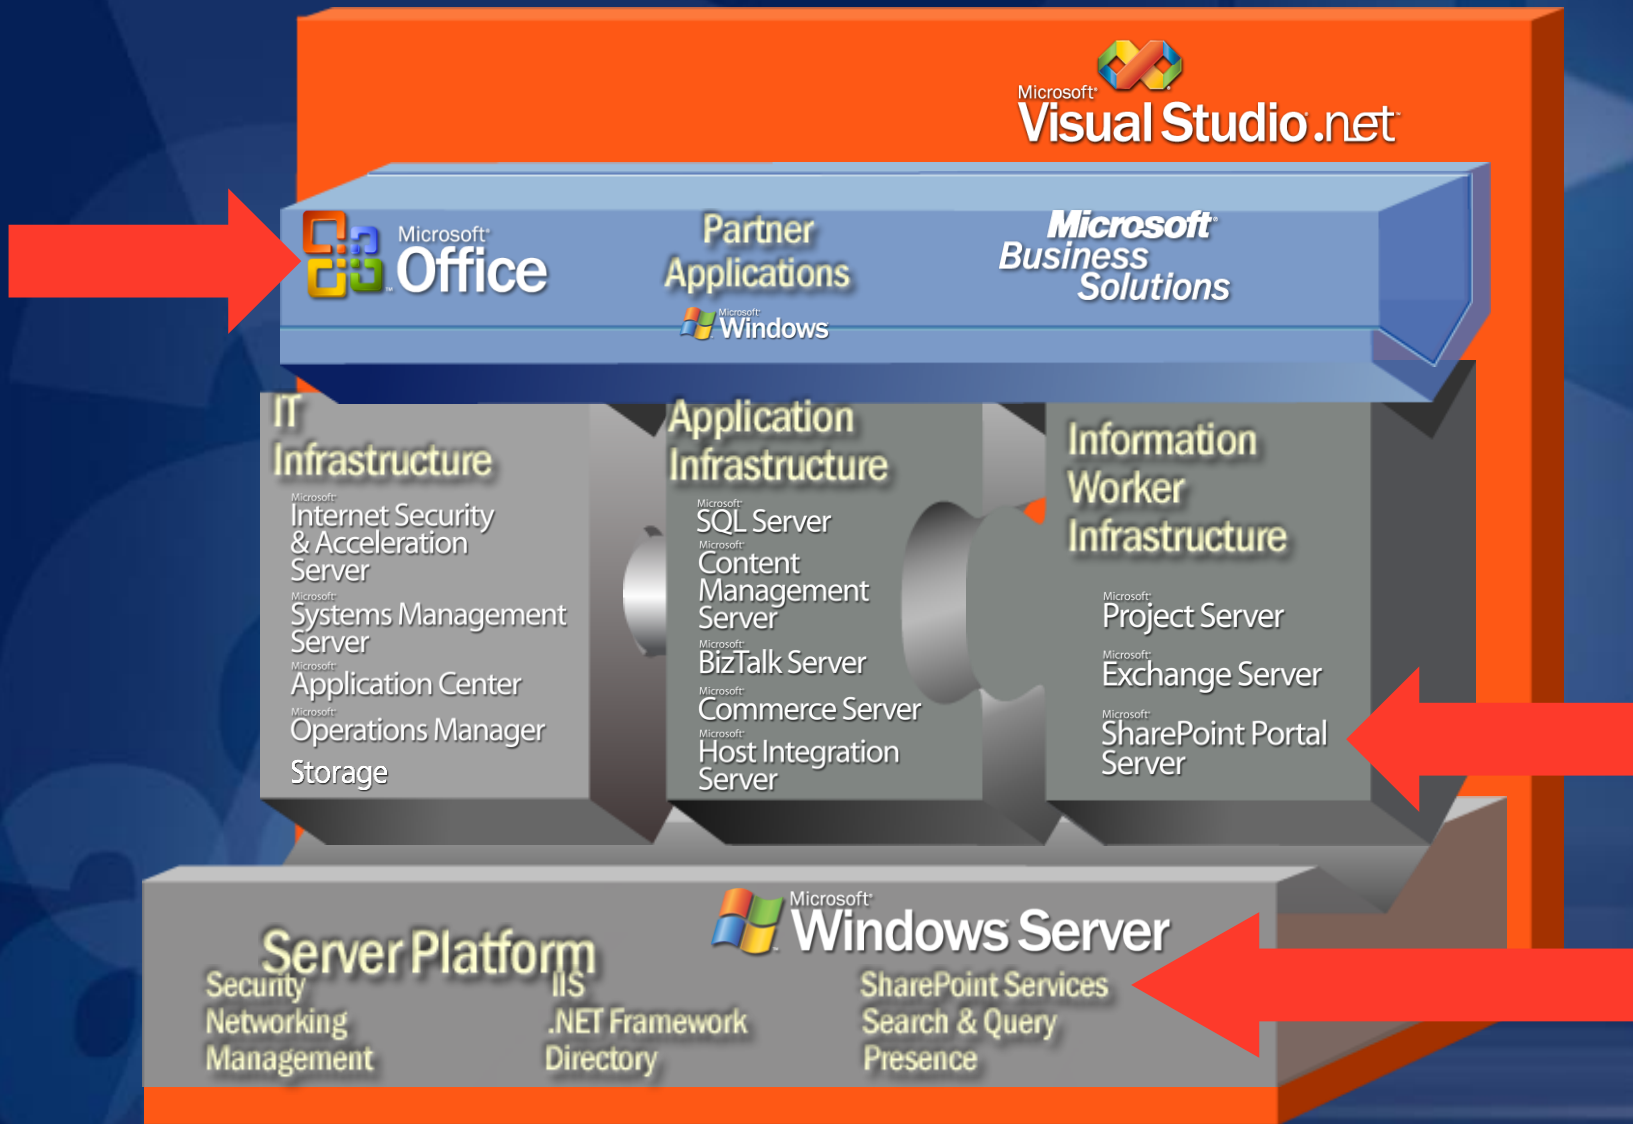

- ◆ ...but new improvements are more enabling than old methods

Functional basis for SPS benefits:

❖ **New technologies:**

- ◆ XML standards
- ◆ Web services
- ◆ Smart devices
- ◆ Intelligent networks
