What You've Told us

"People want their data **where they are**, not where the system is."

"I have a tough time selling ProcessBook internally because it's **powerful** but to the end users **it looks heavy and old** and other tools have **5% of the functionality but look better and work over the web** and they win."

"... that ability for an **end user** to be able to go in and configure it and get an **integrated experience** has **not been there**."
