Seeking Value in a Sea of Buzz and Jargon

The Importance of Data (and Sensor Data) is Increasing

Sensor Data Occupies a Key Role in (Big) Data Projects

Insight

Time Series

Relational

Unstructured

Approaches to Getting Value from this (Big) Data

Data Warehousing

- **Centralizing data** from **different** business systems

Visual Correlations

- **Visualizing data sets** across **multiple** variables

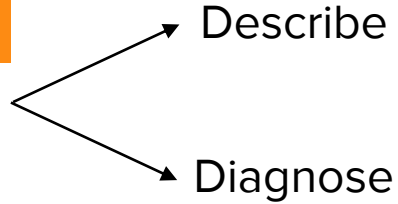

Statistical Analytics

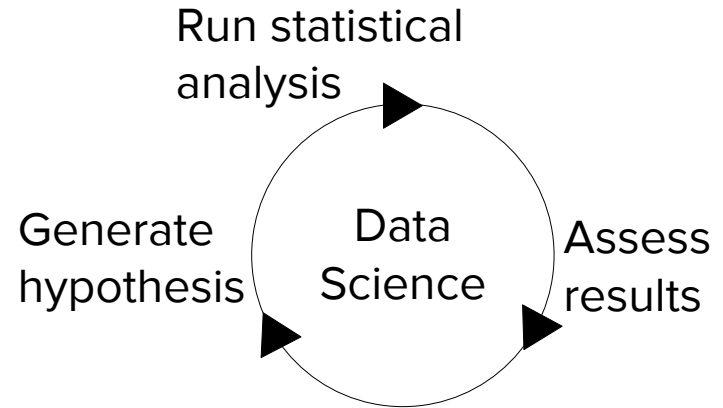

- **Identifying patterns** through statistical methods that require **large** and **diverse** datasets

Approaches to Getting Value from this (Big) Data

Visual Correlations

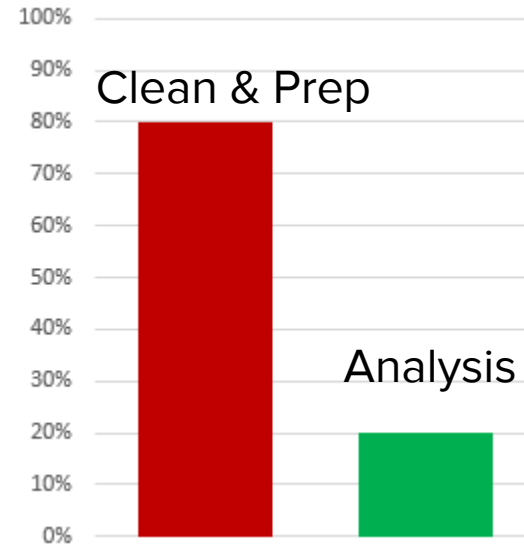

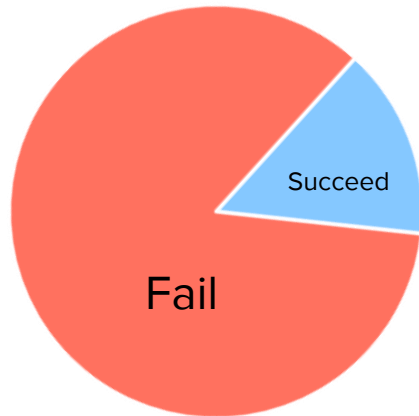

Statistical Analytics

(Big) Data Projects: Sound Attractive ... But There are Challenges

64% of large enterprises plan to implement a big data project.
85% will be unsuccessful.

Data cleansing and preparation tasks can take 50-80% of the development time and funds.

OSIsoft has Listened to Your Needs

"We're looking to get the data into tools like Spotfire"

"Writing custom code and supporting it indefinitely is just not an option"

"I need to be able to look at data across similar and different assets at the same time"

Summary of Needs:

Familiar tools

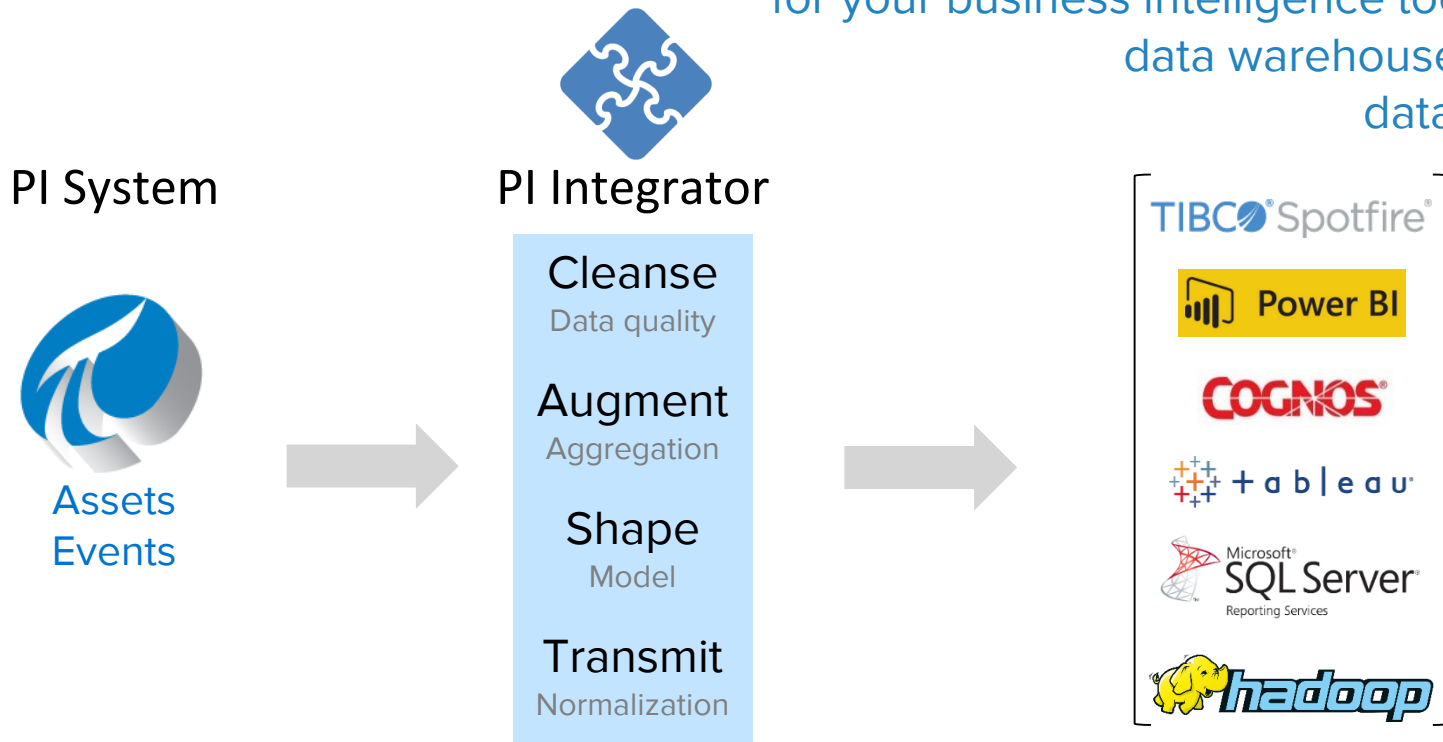

Scalability without code

Flexibility and trust

PI Integrators Let You Clean and Prepare PI System Data

for your business intelligence tools,
data warehouses, and
data lakes

Let's See This in Action!

Publishing Building Energy Consumption
for 67 Buildings to SAP HANA

History and Background

- Located in Bend, OR
- Founded in 1988
- Pub opened in Portland, OR in 2007

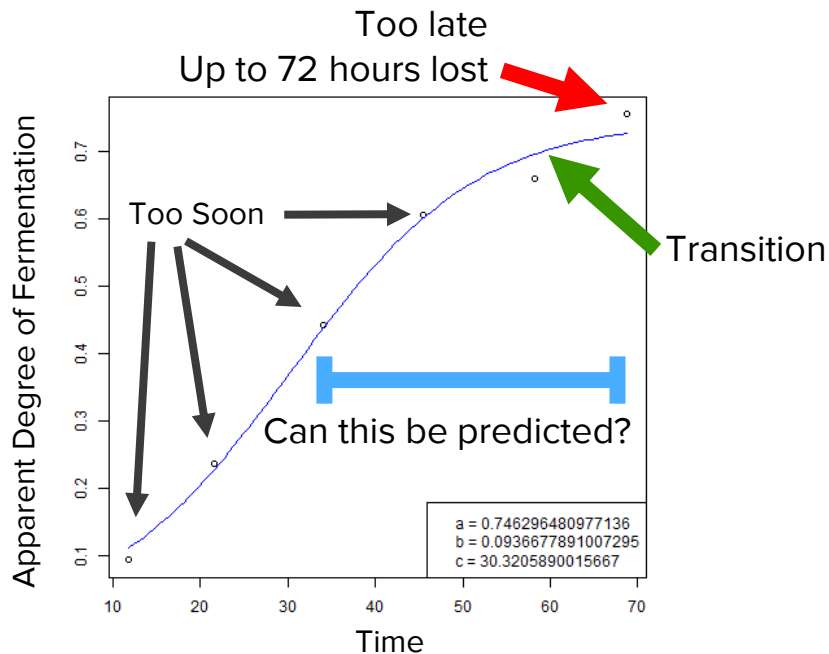

- 2 brewhouses
- 50+ vessels
- Bottling and kegging
- 7th largest craft brewer in the U.S.

Production Challenges

Filing ► Fermentation ► Free Rise ► ...

Options

- Invest \$750k into inline density meters
- Manually predict transition in spreadsheets

Constraints

- CAPEX not an option
- Only one manual density measurement per vessel every 8-10 hours

Challenge

- Transition occurs between manual density measurements
- Prepare data for each batch prediction
- Automate & operationalize predictions
- Continuously improve accuracy of predictions

Leveraging the PI System and Cortana Intelligence to Increase Process Efficiency

COMPANY and GOAL

Deschutes Brewery is the 7th largest craft brewery in US, and wanted to maximize production with its existing infrastructure to fund construction of a third brewery in Roanoke, VA

CHALLENGE

Batch's phase transition happens between manual density measurements occurring every 8-10 hours

Impact: Losing up to 72 hours in production process

SOLUTION

Used the PI Integrator for Microsoft Azure to prepare operating, asset, and event data for each batch in the PI System for use by Azure Machine Learning to train a predictive model and inform when a phase transition occurs

OUTCOME

Ability to eliminate production time losses and increase production capacity

Accurate predictions of when a batch's phase transitions from fermentation to free rise

Machine Learning Model

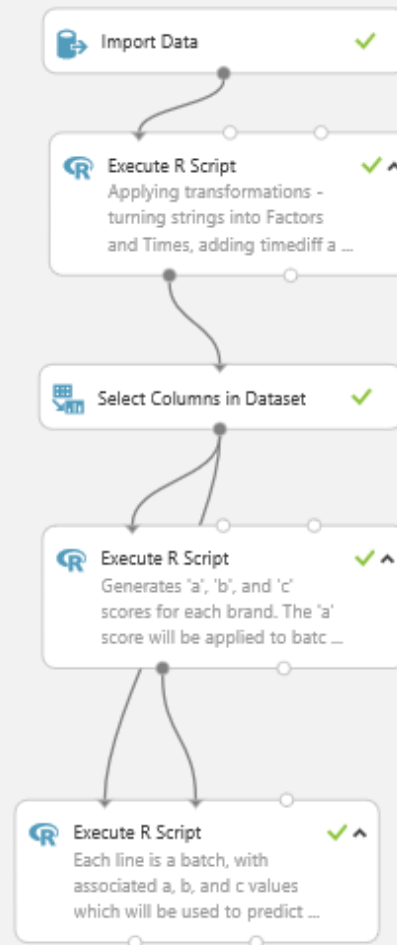

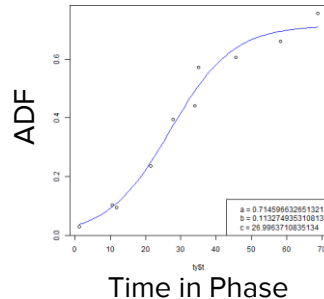

Proposal

Early Density Readings → Transition Time

Hypothesis

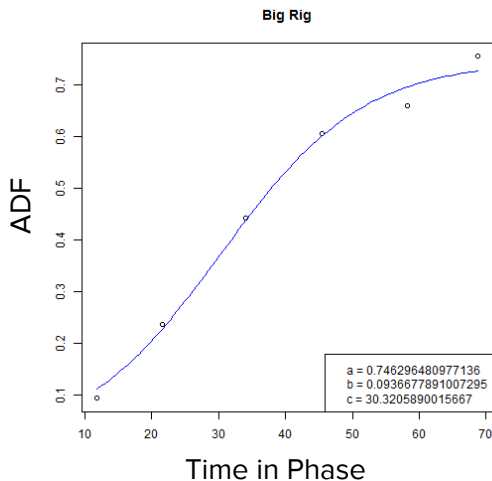

Transition Time influenced by

- Brand of beer
- Fermentation dynamics (temperatures, pressures, etc)
- Vessel's dimensions & volume

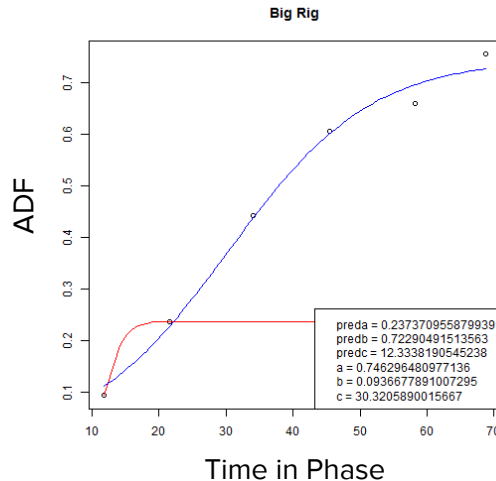

Azure ML Predicts Accurate Transition Time

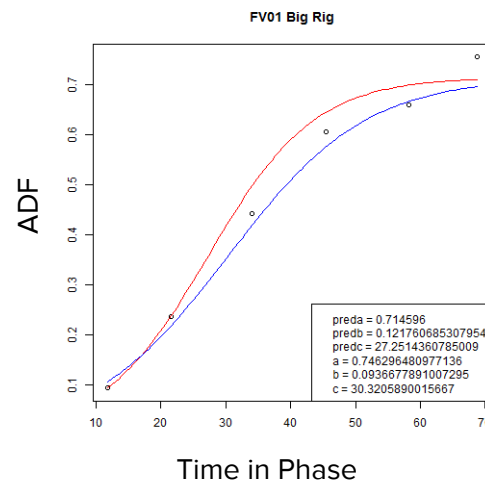

Benchmark: Measure accuracy against a standard (based on historical data)

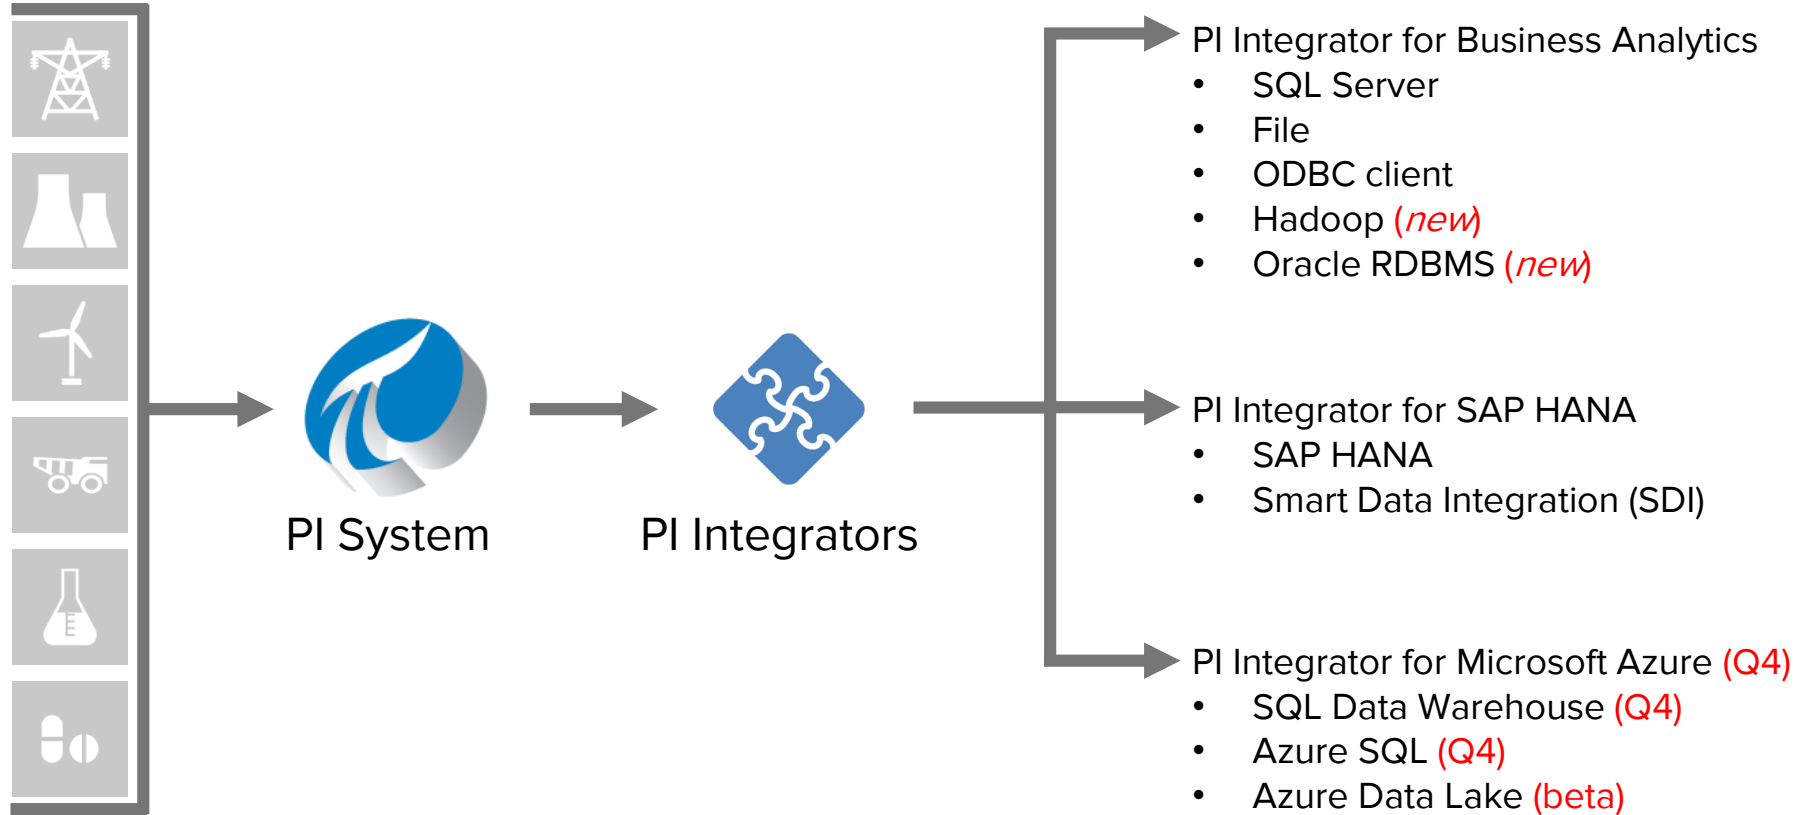

Predict: Use 2 early densities to estimate transition time

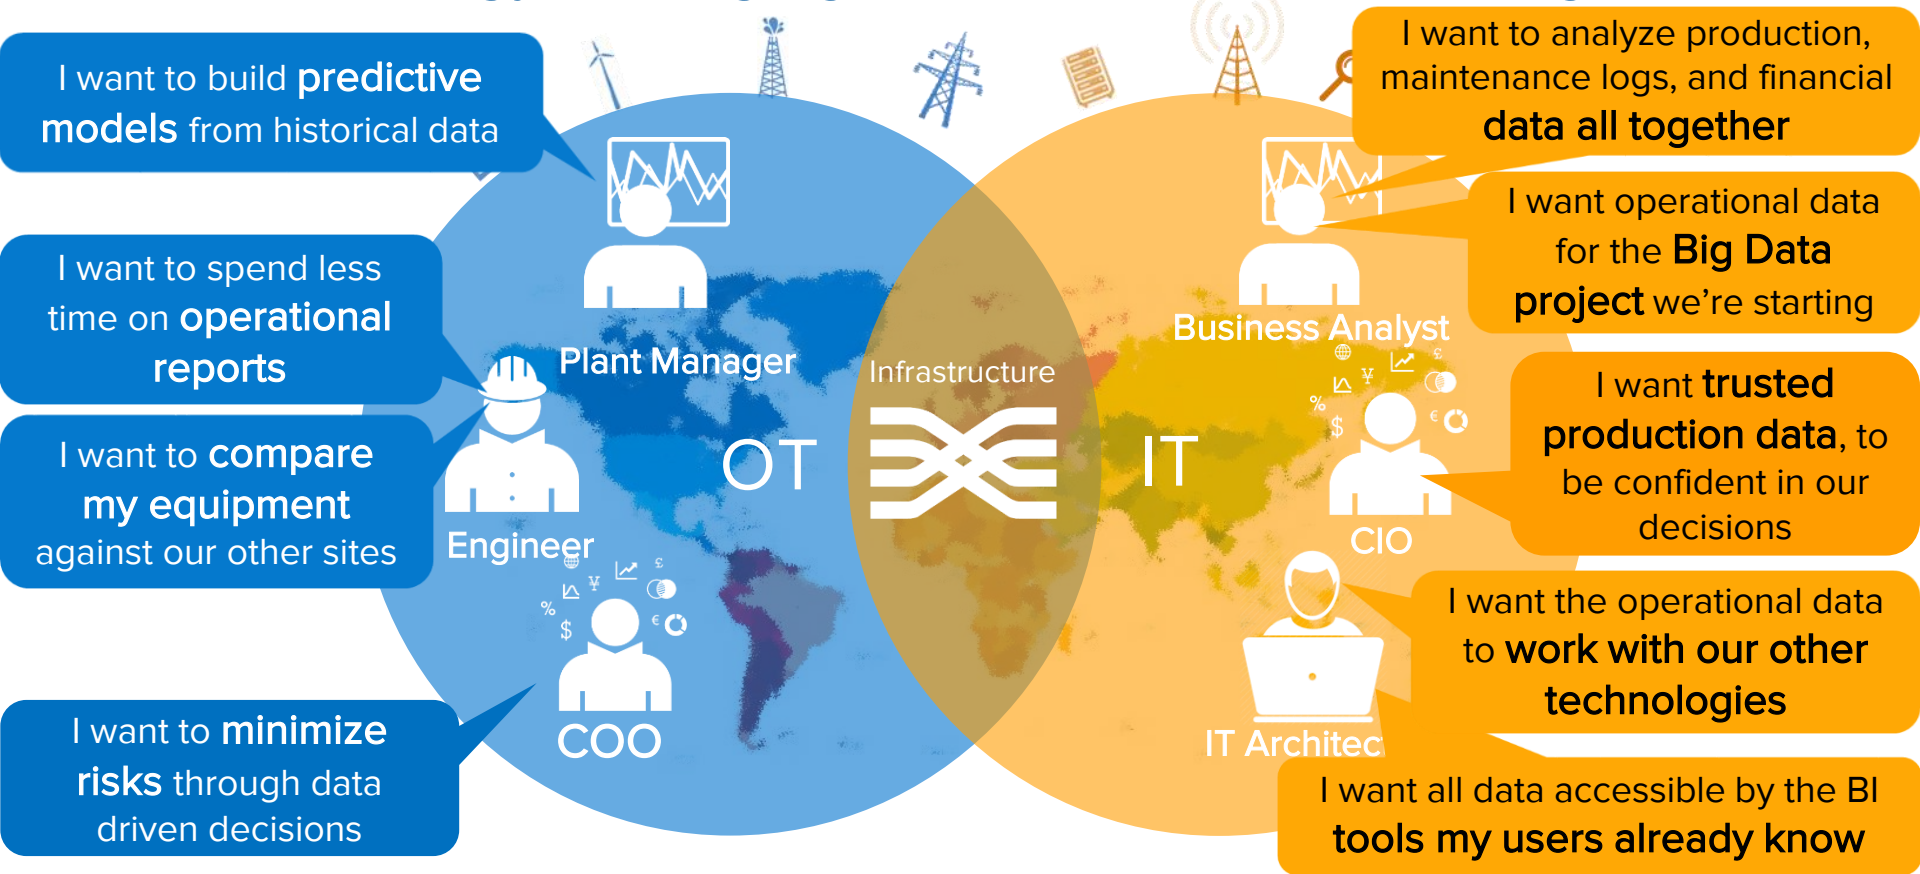

Refine: Base predictions on brand for greater accuracy

PI Integrators

New Technology is bringing the IT and OT Worlds Together

Oil and Gas

Drilling and production comparisons
Information distribution

Mining

Route optimization
Energy reduction
(across fleets of haul trucks)

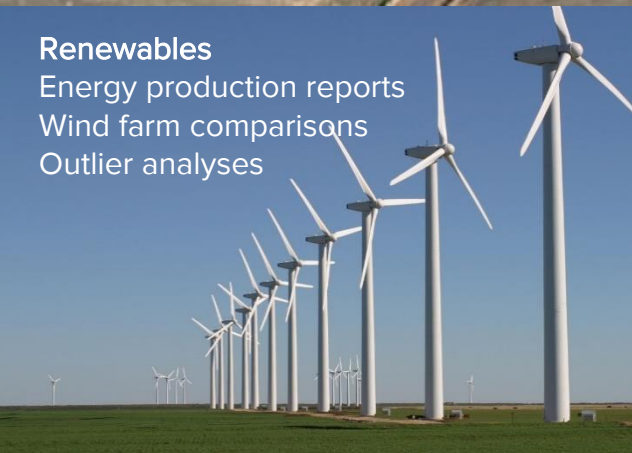

Life Sciences

Reactor comparisons
Process scale-ups
(1L, 3L, 10L, 1kL, 10kL)

Renewables

Energy production reports
Wind farm comparisons
Outlier analyses

PI Integrator for Business Analytics is in use today!

- ✓ IT/ OT integration
- ✓ Business intelligence and reporting
- ✓ Data warehouse integration
- ✓ Support for cross-platform projects

Food and Beverage

Utility usages
Process analytics

Move the Needle with PI Integrators

- Start the conversation!
 - Could a colleague make a **better decision** with **data you see daily**?
 - What **business intelligence tools** could you leverage further?
- Visit **YouTube** or [osisoft.com](https://www.osisoft.com) to see which PI Integrator works for you
