# Announcements

TIME	CUSTOMER	TITLE
9:30-10:00		<i>Developing Power System Operations: Combining Visualization and Online Analysis Using the PI System</i> – Antti-Juhani Nikkilä
10:15-10:45		<i>Intuitive Interpretation of Big Data Using Esri ArcGIS and the PI System</i> – Jan F.X. Urbanus
11:00-11:30		<i>Value of Realtime Data for Improved Grid Performance</i> – Robin Hagemans
11:45-12:15		<i>Data Acquisition from Distributed Power Plants and Integration into the Business Intelligence System</i> – Zijad Lemeš
14:15-14:45		<i>PI System as Part of An Existing TSO Infrastructure</i> – Martin Tauer, Lukas Sedlacek
15:00-15:30		<i>Achieving Operational Efficiency at PowerStream</i> – Vince Polsoni

### **Learn More: Real-Time Asset Monitoring for Power Generation**

The PI System provides power generators with a universal data infrastructure that is capable of collecting, managing and analyzing information from multiple isolated sources across the enterprise and presenting that data in a way that allows management, engineering, operations and maintenance staff to share information and solve problems faster.

#### **Implementing Condition-Based Maintenance Using Real-time PI System Data**

A practical guide to getting more value from real-time data  
by supporting asset management systems

#### **Condition-Based Maintenance Bolsters the Bottom Line in Power Generation**

# PowerGen and T&D PI User Groups

Join to discuss best practices, white papers, share news, and exchange ideas.

## Objectives:

- Identify Best Practices
- Share knowledge and ideas across our industry
- Foster communication with OSIsoft regarding our industry needs

This is NOT an avenue for sales presentations or marketing

Customer run,  
customer led,  
OSIsoft assisted
