Partnership

EMERSON

- Many common Customers
- Customers that demand a global reach
- Emerson's Pervasive Sensing is a fundamental data source
- Emerson provides Applications and Consulting expertise leveraging value from the OSI data

- Enterprise Data Infrastructure
- Real-time data access
- Initially a Technology Provider, now Global Encompass™ Partner
- Enterprise selling – value of data driven decision making

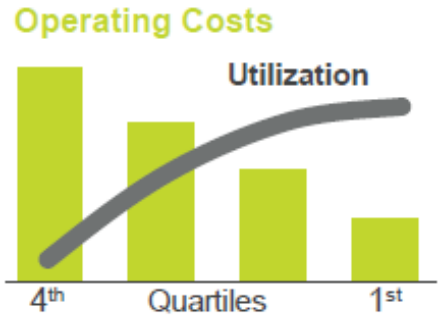
Emerson Proprietary

Emerson Focus: Industry Benchmarks Reveal Significant Business Improvement Opportunities from Average to Top Quartile Performers

Production

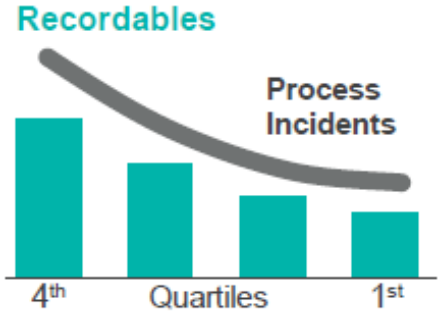
20% lower operating costs

10% higher Utilization Rate



Safety

3X fewer recordables and process incidents

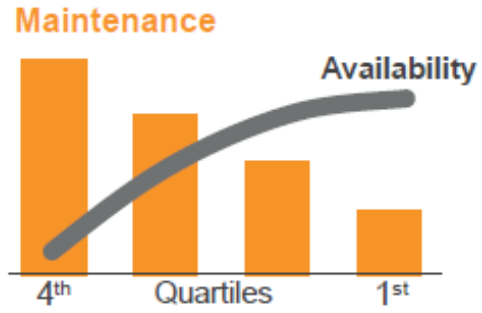


Sources: Refining and Petrochemical Benchmarks, API, Solomon, OSHA, IHS Markit and Company Reports

Reliability

4% higher availability

Half the maintenance costs



Emissions

30% lower emissions

30% less energy use

Video: Advisor for Mining

Emerson Proprietary

Final remarks

- The Advisor Suite presented is the highest Emerson IIoT Application and it is based on PI System.
- Preconfigured Applications which combine Process and Asset data to enable remote management of Overall Asset Health and Performance.
- Available on-premise and in the Cloud for Customer use or Connected Services.
- Incorporates Predictive Intelligence: Advanced Analytics and Machine Learning.
- PlantwebTM Advisor Applications are IP protected and Emerson proprietary.
