

IloT Data Readiness with the PI System

Presented by
Scott Grubbs, Systems Engineer
October 5th, 2017

You've Collected All That IIoT Data...

...Now What?

The Three Biggest Barriers to Adopting IoT

1. Lack of interoperability or standards

2. Security concerns

3. Uncertain ROI

Q: What are the greatest barriers inhibiting business from adopting the industrial Internet?

In This Talk, We Will Show How to Overcome Those Barriers

1. Lack of interoperability or standards

- Asset Framework

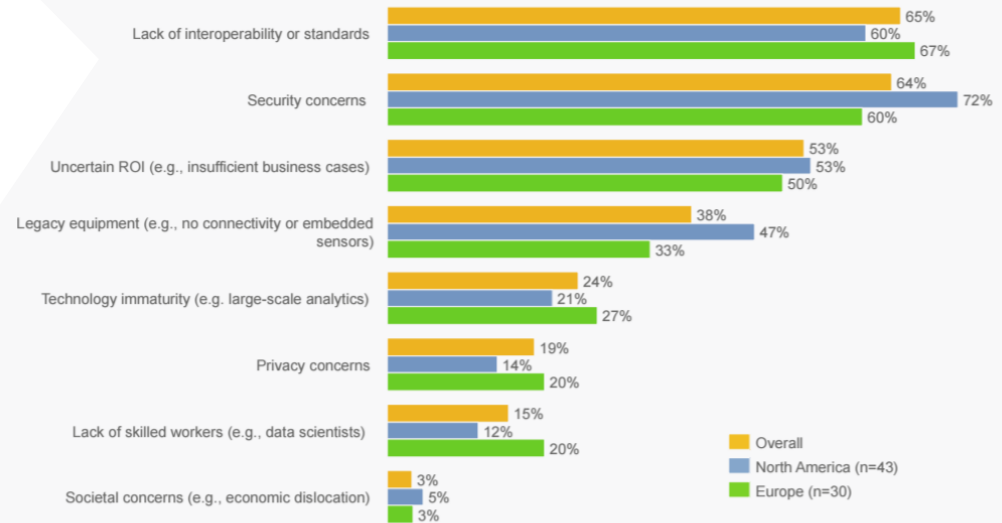

2. Security concerns

- Mitigation and best practices

3. Uncertain ROI

- Asset analytics, event frames, infrastructure approach

Q: What are the greatest barriers inhibiting business from adopting the industrial Internet?

Symptoms of Poor Interoperability or Standards

I have to visit 5 groups just to get what I need!

Each team reports in a completely different way!

Just ignore it. It's outdated.

Asset Framework: Bridge the Physical & Digital World

Time series data

- Pressure data
- Vibration data
- Pulse counters

Asset details

- Name
- Model
- Manufacturer

External data

- Performance curves
- Maintenance records

Analyses

- Efficiency analyses
- Key Performance Indicators (KPIs)

Events

- Downtimes
- Startups
- Failures

Notifications

- High torque alerts
- Rotor failure alerts

Capture Asset Information in Configurable Templates

Discharge Pressure	539.342651367188 psi
Electricity Cost Factor	0.162879550235334 US\$
Flow Rate	141.52 gpm
Impeler Size	3
LCL	92.5
Liquid Gravity	1 SG
Minimum Efficiency	90 %
Model Number	G11
Pump Curve Head	0.616988159999998 psi
Pump Downtime During Last Shift %	0.346886343426175 %

- Reference data (without replicating it) from **external databases** with **AF linked tables**

Create Flexible Views with Asset Building Blocks

Pump

Heat Exchanger

Boiler

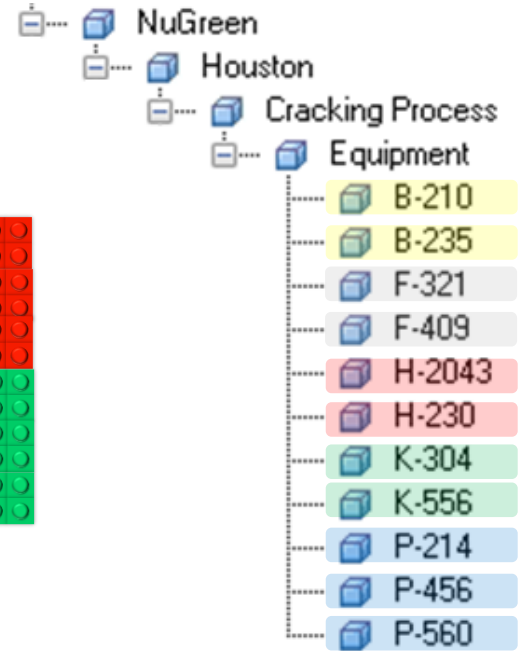

Compressor

Asset View

Process View

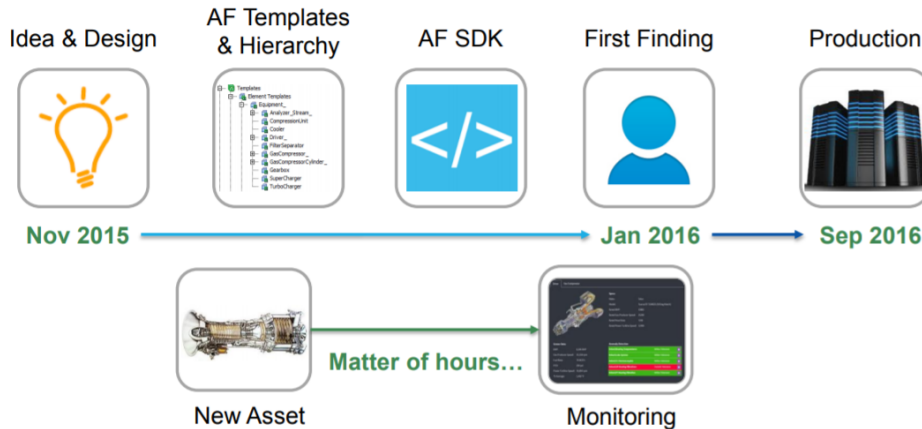

Support Ongoing Standardization with Asset Framework

- **Update** templates over time
 - Start simple, add attributes as needed
- **Facilitate** asset management
 - Centrally push updates to all assets
- **Available** to visualization tools
 - Consistent displays for similar assets

TransCanada uses AF to Achieve 98% Availability of their Compression Assets

Results - Implementation Time & Scalability

“We were able to build out our entire AF hierarchy and we had our first finding within a couple months.

As [new assets] come online, they get built in AF in a matter of hours and automatically go into monitoring.”

Brendan Bell, TransCanada

In This Talk, We Will Show How to Overcome Those Barriers

1. Lack of interoperability or standards

- Asset Framework

2. Security concerns

- Mitigation and best practices

3. Uncertain ROI

- AF, event frames, infrastructure

Q: What are the greatest barriers inhibiting business from adopting the industrial Internet?

Internet of Things...

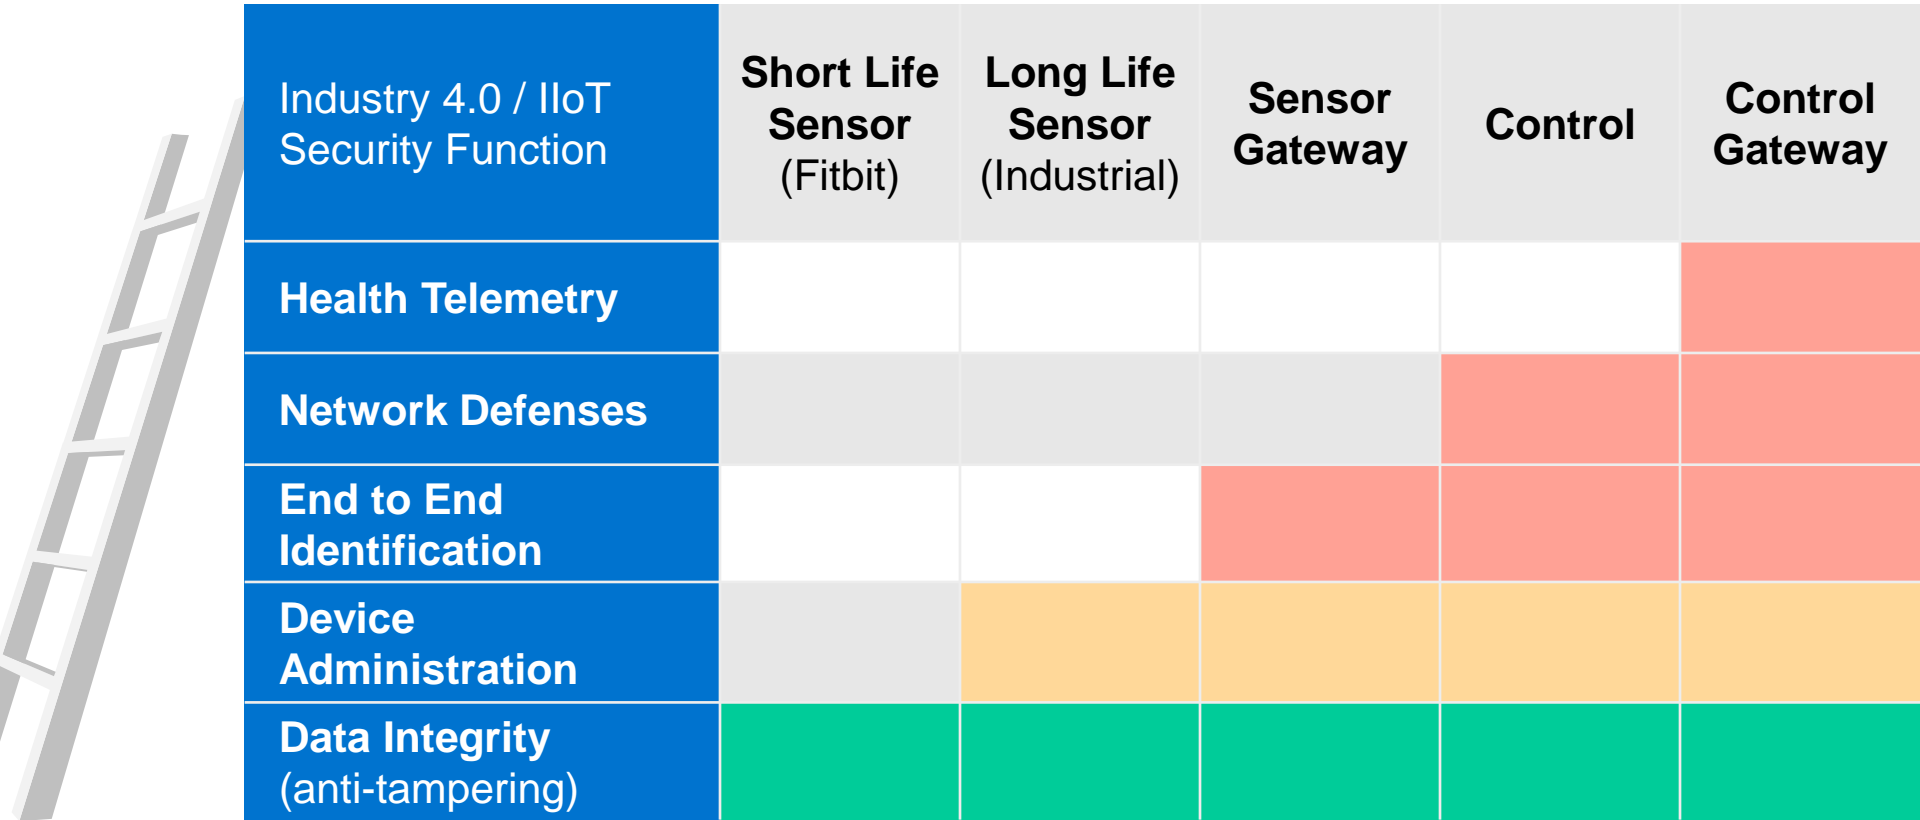

Or Threats?

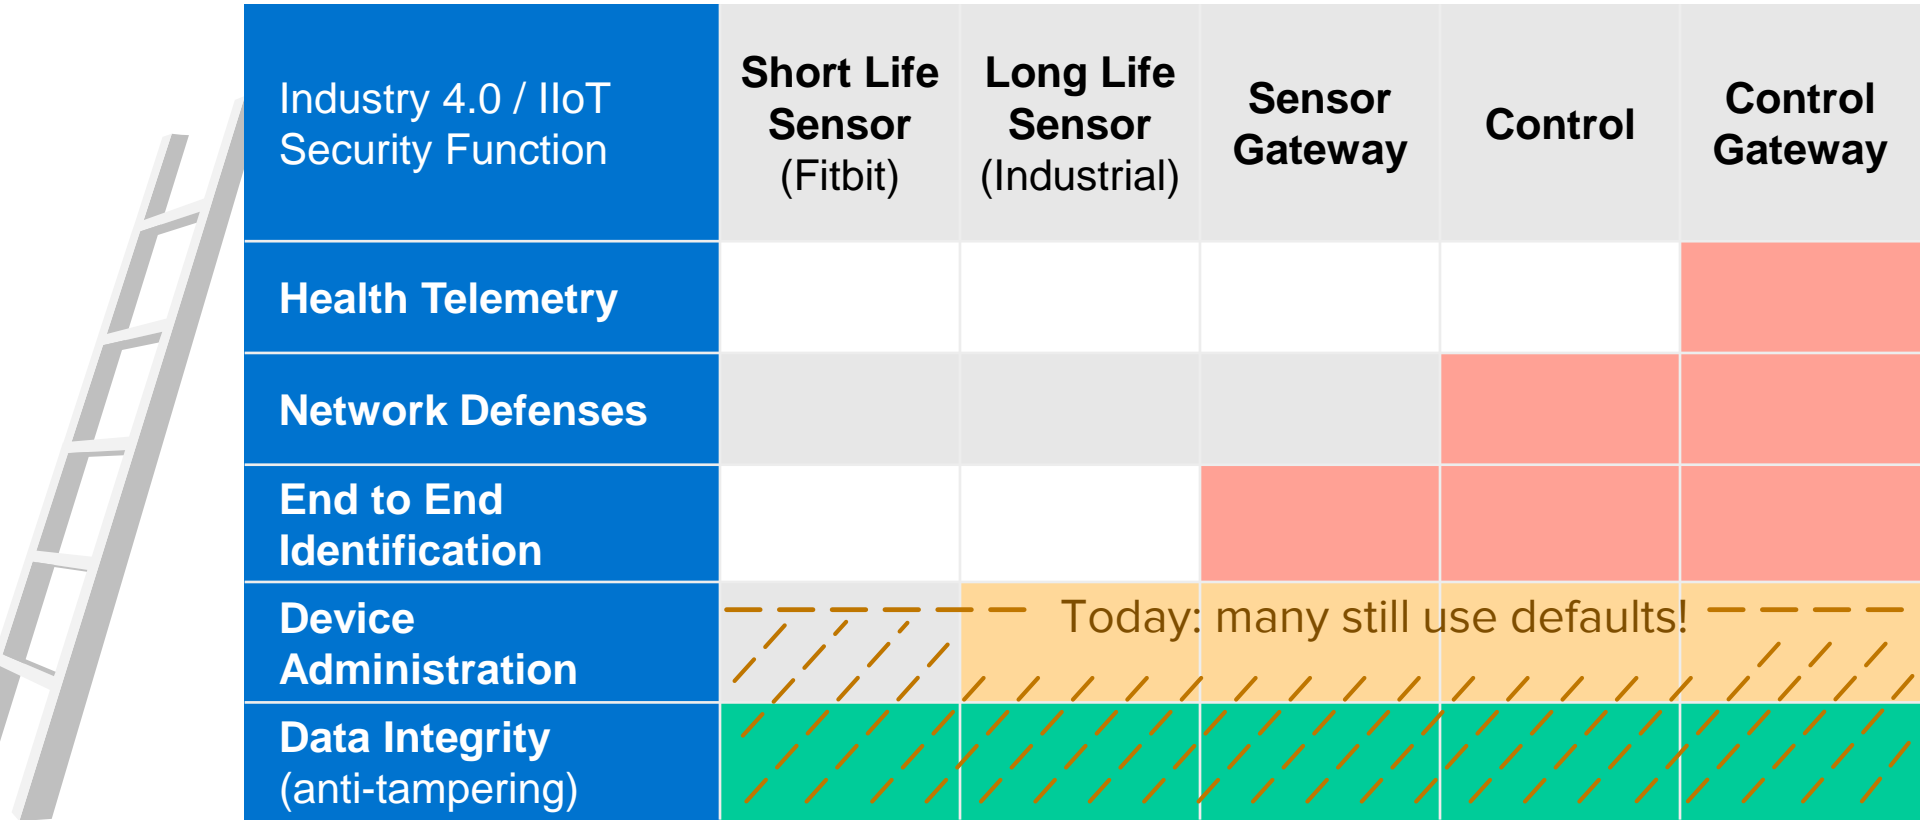

- Example: Mirai malware looks for IP addresses that use **default login names and passwords**
- **Controlled remotely**
- High-profile 2016 attacks: Twitter, Netflix, Reddit & others

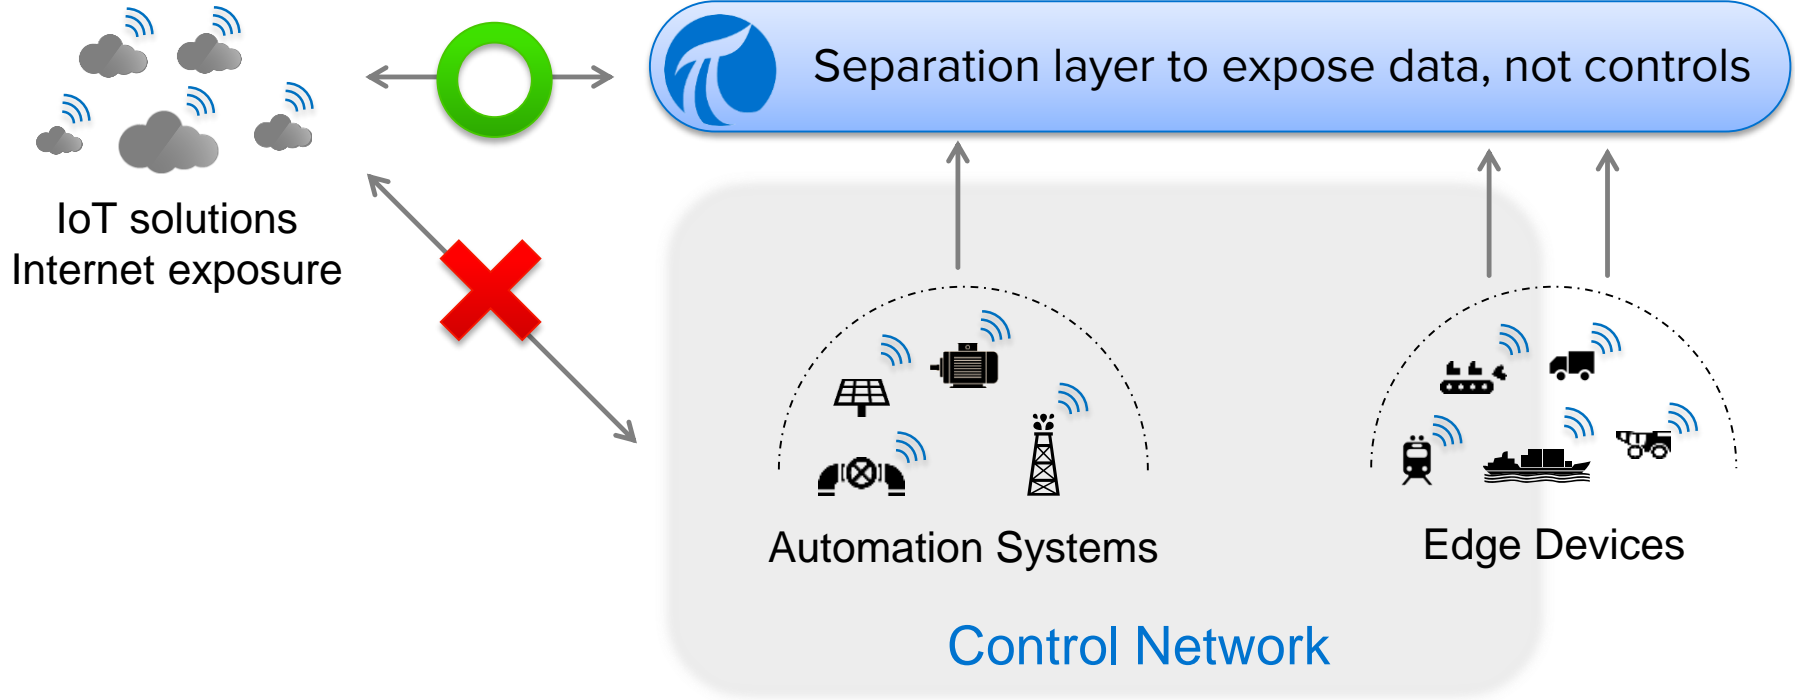

Many IIoT Devices Are Still Climbing the Internet Security Ladder

Many IIoT Devices Are Still Climbing the Internet Security Ladder

Protecting the Control Network is More Important Than Ever

In This Talk, We Will Show How to Overcome Those Barriers

1. Lack of interoperability or standards

- Asset Framework

2. Security concerns

- Mitigation and best practices

3. Uncertain ROI

- Asset analytics, event frames, infrastructure approach

Q: What are the greatest barriers inhibiting business from adopting the industrial Internet?

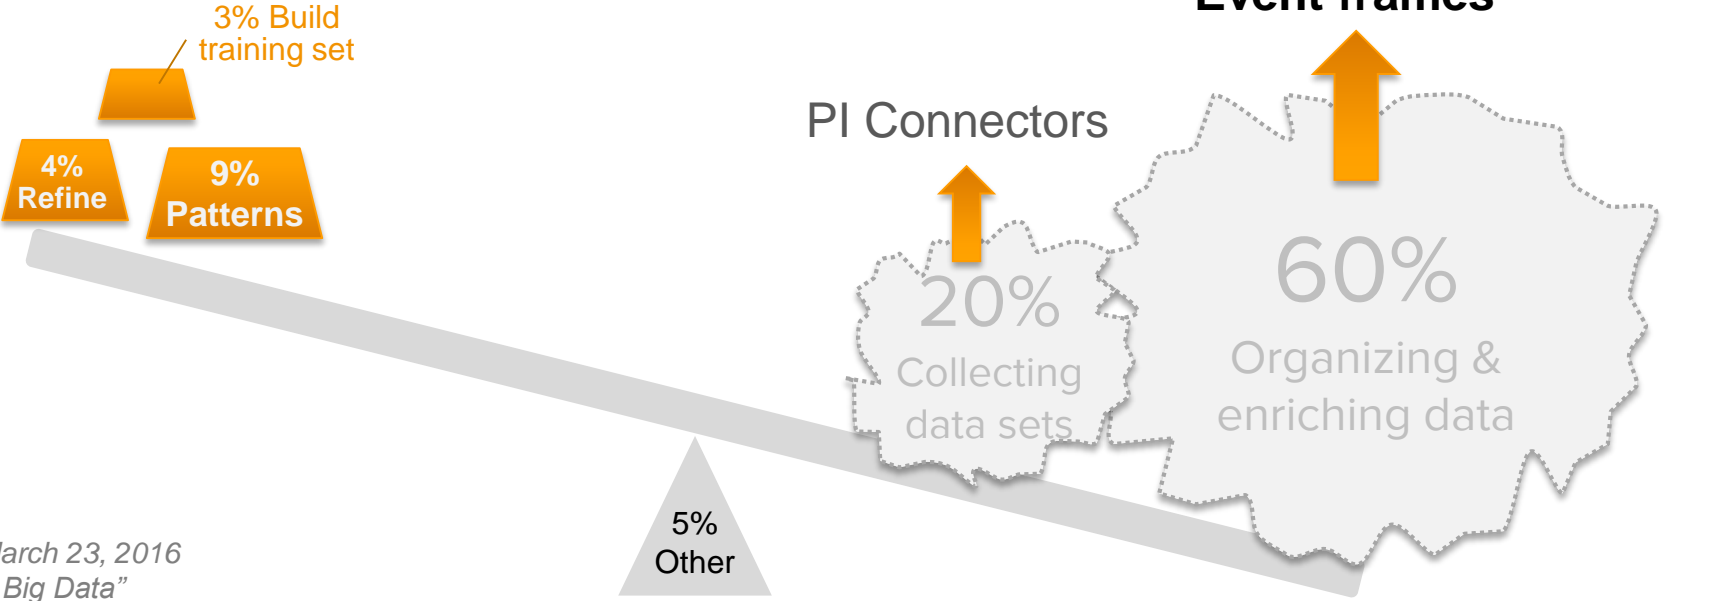

80% of the investment lost to data-prep can be automated

Description:

Categories:

Analysis Type: Expression Rollup

Rollup attributes from

Child elements of Well Pad 035

This element - Well Pad 035

To select attributes set criteria below

Attribute Name: Oil Flow Rate

Attribute Category:

Attributes

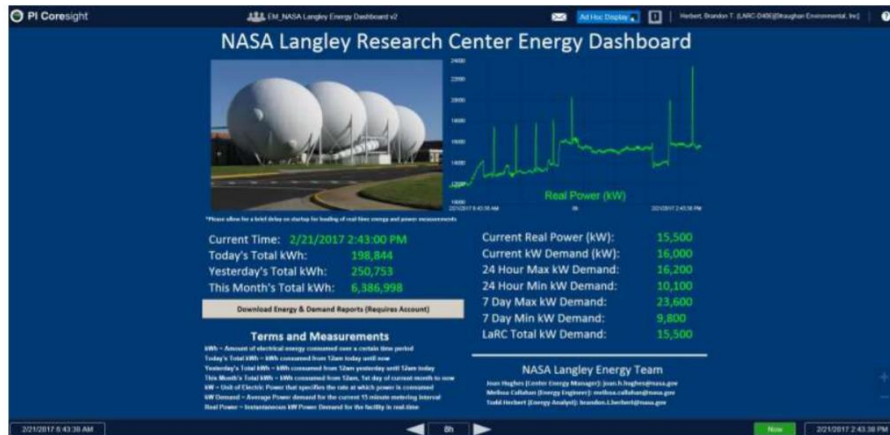

Name	Parent Element
✓ Oil Flow Rate	OW-259
✓ Oil Flow Rate	OW-262
✓ Oil Flow Rate	OW-258
✓ Oil Flow Rate	OW-261
✓ Oil Flow Rate	OW-260

Total
Production

NASA Monitors Real-Time Facility Power Demand and Consumption

Using the PI System to Monitor Real-Time Energy Data at the Building Level

“I’m able to go into AF and make a bunch of calculated attributes.

24 hour max demand, 7 day max demand, they are meaningful to us because at a glance, we can see how that building is doing.”

Todd Herbert, NASA

Event Frames: Out of Years of Data, Bookmark the One Minute that Matters

Downtime
Excursion
Batch

Event Attribute	Value
Name	Excur. 1215-002
Start	15-Dec-2013 10:35:02
End	15-Dec-2015 10:47:26
Asset	Boiler-352
Excursion Type	High Violation
Fuel Gas Flow.Avg	37.12 k sft3/h
myKPI.Max	47.19 bbl/d

Simplify Data Analysis

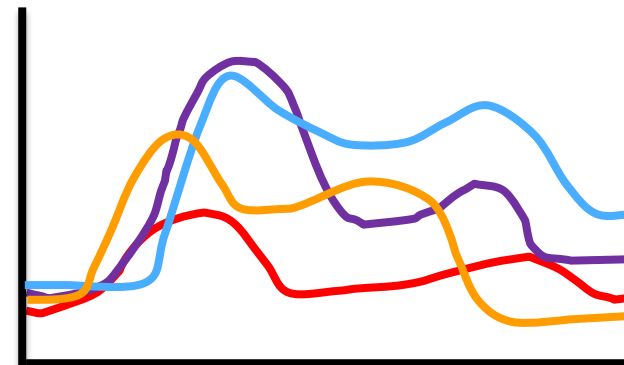

Compare Assets

Next: an example!

Compare Events

Name	Max
EF1	122.47
EF2	112.73
EF3	98.61
EF4	125.24

Discover Event Interrelationships

What Can This Look Like?

Example application:
Investigating electricity
usage anomalies

Multiple buildings
at a site all use
electricity, ideally
in a similar
pattern

Meter readings are
streamed in real-
time to an OSIsoft
PI System and
compared with
utility bills

1. Each week, buildings should consume electricity in a fairly consistent pattern
2. The PI System collects, manages, and enhances that data
3. **Our goal:** discover why electricity costs were so high in a given week

Solution: PI Event Frames allows easily investigating a particular week's data!

OSIsoft. REGIONAL SEMINAR
Safeco Field – Seattle, WA – September 20, 2016

Evaluation Form

Name: _____ Company: _____
Email: _____

Quality of presentations

	Poor	Good	Excellent	N/A
1. Digital Transformation with Today's PI System – OSIsoft	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. PI Coresight 2016: New Vision, New Display Editor, New Look and Feel – OSIsoft	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Monitoring Health and Performance of Grid-Scale Energy Storage Systems – UniEnergy Technologies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Using PI Integrators to Improve the Value of your PI Data – OSIsoft	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. PI Asset Framework Ties Together Enterprise OEE for Clearwater Paper – Clearwater Paper	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Solving Business Initiatives with the PI System – OSIsoft	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. PI Analytics and Coresight for Business Process Improvement – Arista	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Seq helps customers get even more value from their OSIsoft PI System – Seq Inc.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. What's Really Going on with your Beer's Fermentation? – Deschutes Brewery	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Quality of seminar

	Poor	Good	Excellent	N/A
1. Presentation topics meeting your needs or interests	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Time allowed for lunch/breaks/discussions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Pace and time allocated to the presentations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
