

Streamlining Air Compliance Reporting with Asset Framework

Presented by **Felicia Douglas**

Project Summary

“One Version of the Truth”

Agenda

1 Introduction

- Barrick Gold Corporation
- Goldstrike Operations
- Air Quality Program

2 Business Challenge

- Preparation of Monthly Logs
- Compliance Evaluations

3 Business Solution

- Asset Framework, Notifications, PI DataLink and PI Coresight
- Automated Reports

4 Results & Future Work

- Automated Monthly Logs
- PI Manual Logger
- Other Divisions and Sites

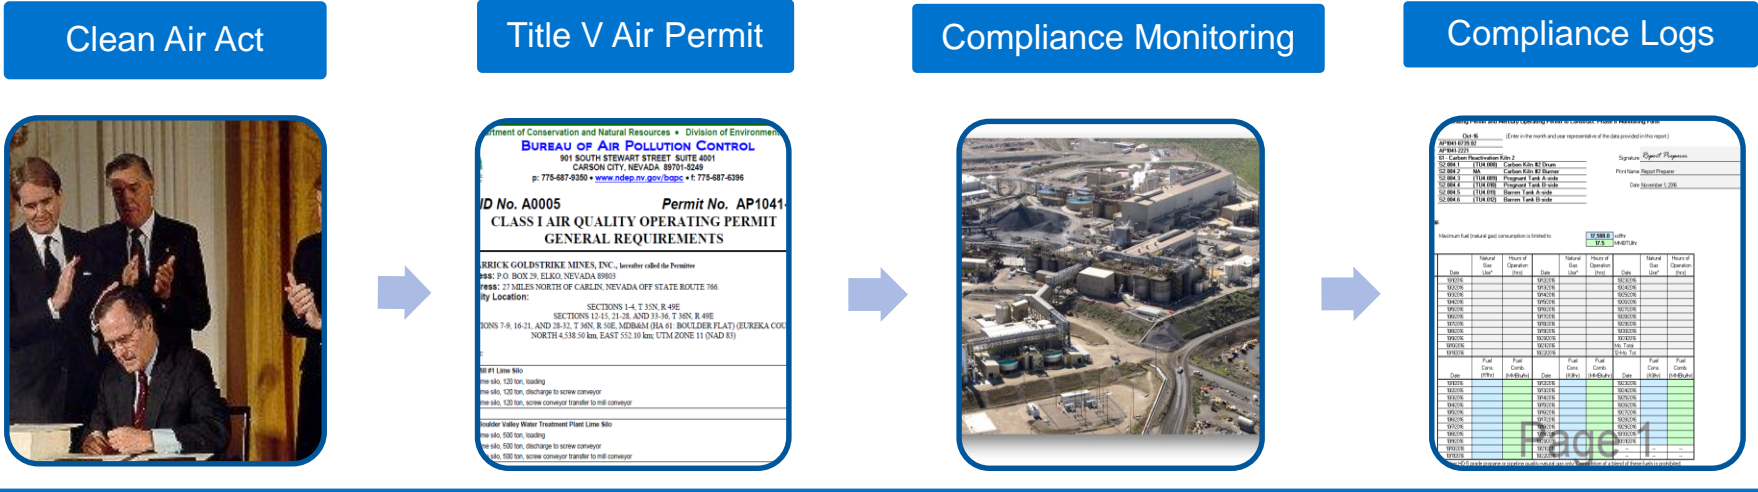

Barrick Gold Corporation

Barrick Nevada – Goldstrike Operations

Thousands of Compliance Points in the Title V Air Permit

shall be maintained at or above **2 amps** for the A side and **1 amp** for the B side, the secondary voltage for both sides shall be maintained at or above **7 kilovolts** for the A side and **3 kilovolts** for the B side, and the secondary current for both sides shall be maintained at or above **8 milliamps** for the A side and **3 milliamps** for the B side. **Excursions shall be defined as anytime the control parameters, based on a one-hour period, fall outside these indicator ranges.**

Agenda

1 Introduction

- Barrick Gold Corporation
- Goldstrike Operations
- Air Quality Program

2 Business Challenge

- Preparation of Monthly Logs
- Compliance Evaluations

3 Business Solution

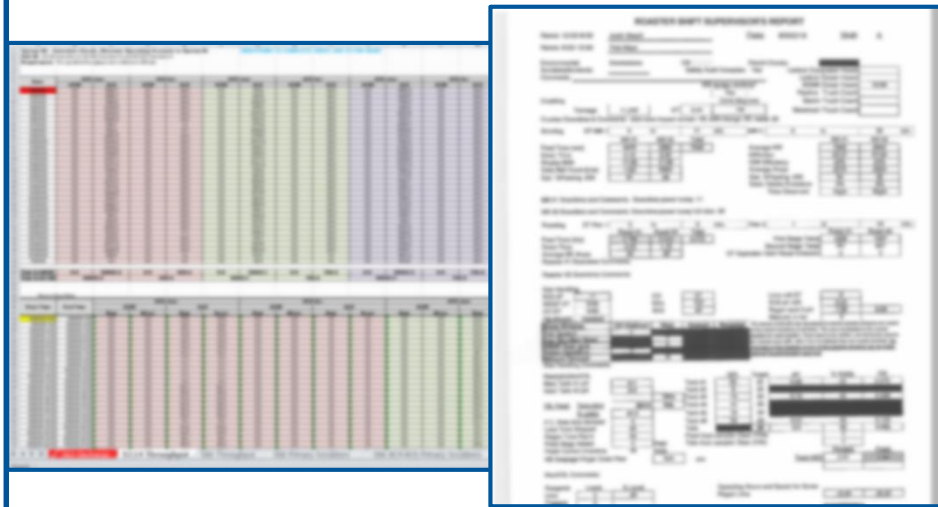

- Asset Framework, Notifications, PI DataLink and PI Coresight
- Automated Reports

4 Results & Future Work

- Automated Monthly Logs
- PI Manual Logger
- Other Divisions and Sites

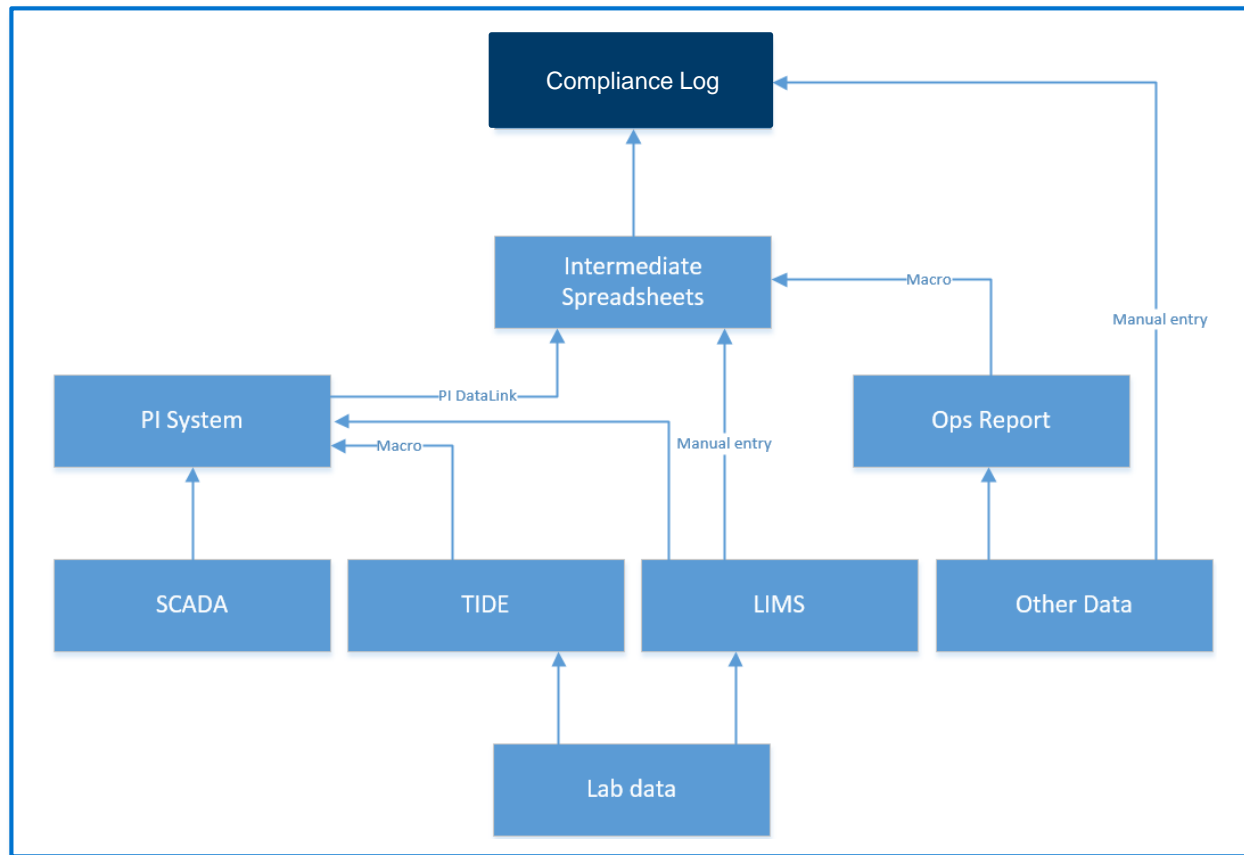

Current Report Preparation is Extensive and Inefficient

1. **140+ Systems** in the Title V Permit
2. Numerous complex interdependent, **intermediate spreadsheets** currently used to generate compliance logs

- Preparation of monthly compliance logs requires one full-time position

Multiple Data Sources Prevents Real-Time Compliance Evaluations

Agenda

1 Introduction

- Barrick Gold Corporation
- Goldstrike Operations
- Air Quality Program

2 Business Challenge

- Preparation of Monthly Logs
- Compliance Evaluations

3 Business Solution

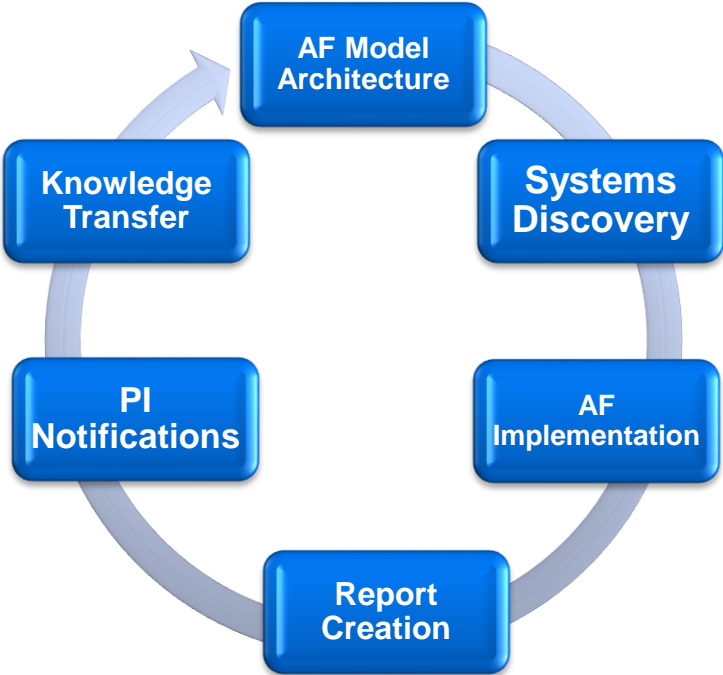

- Asset Framework, Notifications, PI DataLink and PI Coresight
- Automated Reports

4 Results & Future Work

- Automated Monthly Logs
- PI Manual Logger
- Other Divisions and Sites

Finding a Solution with Asset Framework

Enterprise Agreement Services	
AF Model Architecture	Build templates and hierarchy design
Systems Discovery	Understand data needs, analyses, and general requirements
AF Implementation	Elements, tables, attributes, formulas, analyses, output tags
Report Creation	Automated report and verification of data
Notifications	Real-time compliance notifications
Knowledge Transfer	Documentation, maintenance instructions

Compliance Alerts and Email Notifications

From: Service PI Global (North America)
Sent: Thursday, February 09, 2017 10:00 PM
To: Lacaille, Isabelle
Subject: Air Compliance Alert - System 018: Roaster Circuit: Ore Roasting Process

A potential environmental compliance deviation has occurred involving System 018: Roaster Circuit: Ore Roasting Process. Some details of the event are provided below.

System 018: Roaster Circuit: Ore Roasting Process

Item: Emissions SO2

Permit Limit: must remain below 44.9 lbs/hr based on 3-hour rolling average

Average over the last hour: 56.96149

Current Value: 102.5416

Date & Time: 02/09/2017 21:00:00

Crew: C

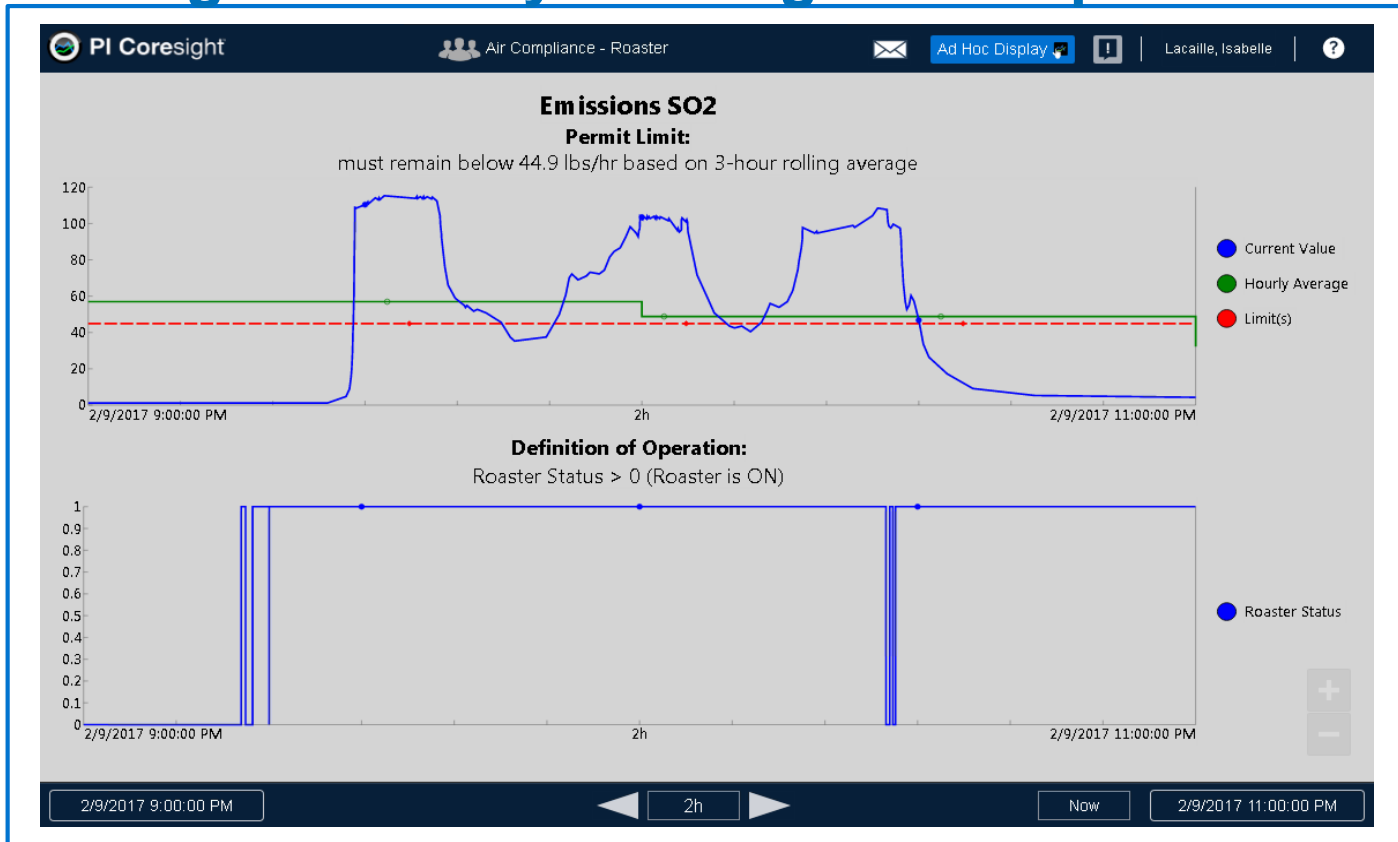

This potential deviation should be investigated further to determine its legitimacy. Further actions may be required.

The link to the environmental reporting forms on the intranet is [here](#).

**This is not a real event. The notification was triggered purposely for this demonstration*

Use PI Coresight to easily Investigate Compliance Alerts

**This is not a real event. It was generated purposely for this demonstration*

Agenda

1 Introduction

- Barrick Gold Corporation
- Goldstrike Mine
- Air Quality Program

2 Business Challenge

- Preparation of Monthly Logs
- Compliance Evaluations

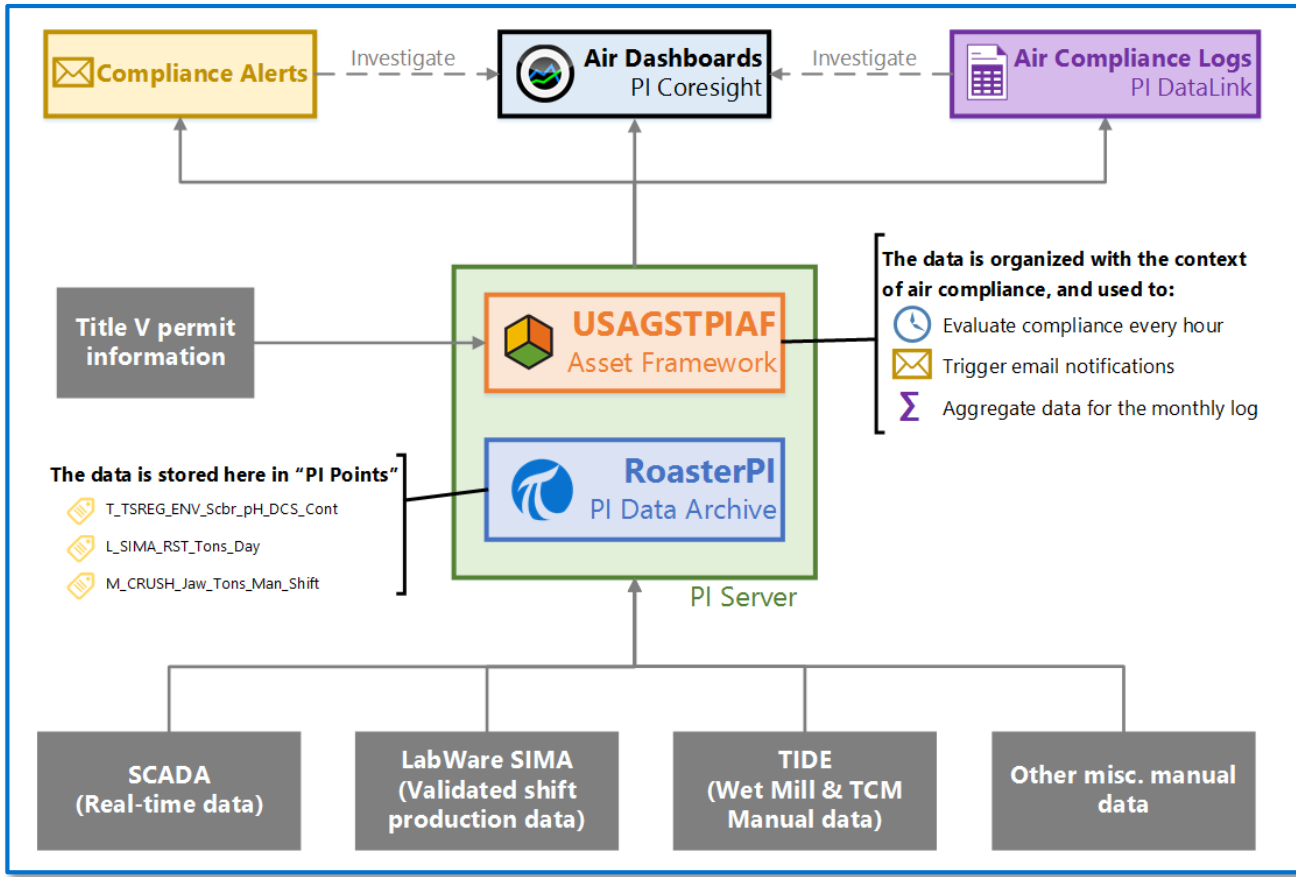

3 Business Solution

- Asset Framework, Notifications, PI Datalink and PI Coresight
- Automated Reports

4 Results & Future Work

- Automated Monthly Logs
- PI Manual Logger
- Other Divisions and Sites

Overall Architecture of the Streamlined Air Compliance System

Automatically Generate Monthly Compliance Logs in Minutes

Next Steps...

- 1 Automate remaining Process Division systems

- 2 Implement PI Manual Logger

- 3 Streamline other reporting requirements

- 4 Deploy automation capabilities at other Goldstrike Divisions and Barrick Sites

Streamlining Air Compliance Reporting with Asset Framework

COMPANY and GOAL

Barrick Goldstrike operates one of the largest Title V Air Permits in Nevada and needed a more efficient way to generate compliance reports.

CHALLENGE

Existing reporting framework was complex, redundant, and time-consuming.

- Delays in data collection
- Difficult to track or make changes
- Numerous interdependent spreadsheets

SOLUTION

Leverage the real-time data infrastructure and implement AF and Analytics to automate the reports.

- **Asset Analytics**
- Data Archive
- Notifications
- PI DataLink
- PI Coresight
- PI System Explorer

RESULTS

Centralized data and analytics allows decisions to be made with greater speed, precision, and productivity.

- Added real value to the company; able to analyze data
- Intermediate spreadsheets eliminated
- AF model returns the max or min hourly average
