

# PI Vision 2017

Presented by **Chris Nelson, Director of Visualization Products**  
**Tom LeBay, Product Manager**  
**Jason Golla, Software Development Team Lead**

# Our commitment to YOUR needs

You told us...

**Where** Control center, Desktop, Mobile

**When** Real-time: Past, Present, Future

**How** Operational Intelligence  
Advanced Analytics  
Business Intelligence  
Enterprise Reporting

## Requirements

### SEAMLESS

Unified experience

### UBIQUITOUS

Empower all Operations users

### ON – DEMAND

Intuitive, self-service, off the shelf

# PI Vision

We are embarking on a **unified visualization infrastructure** to deliver a seamless, powerful, extensible experience.

Create  
Beautiful  
Information  
Displays &  
Dashboards

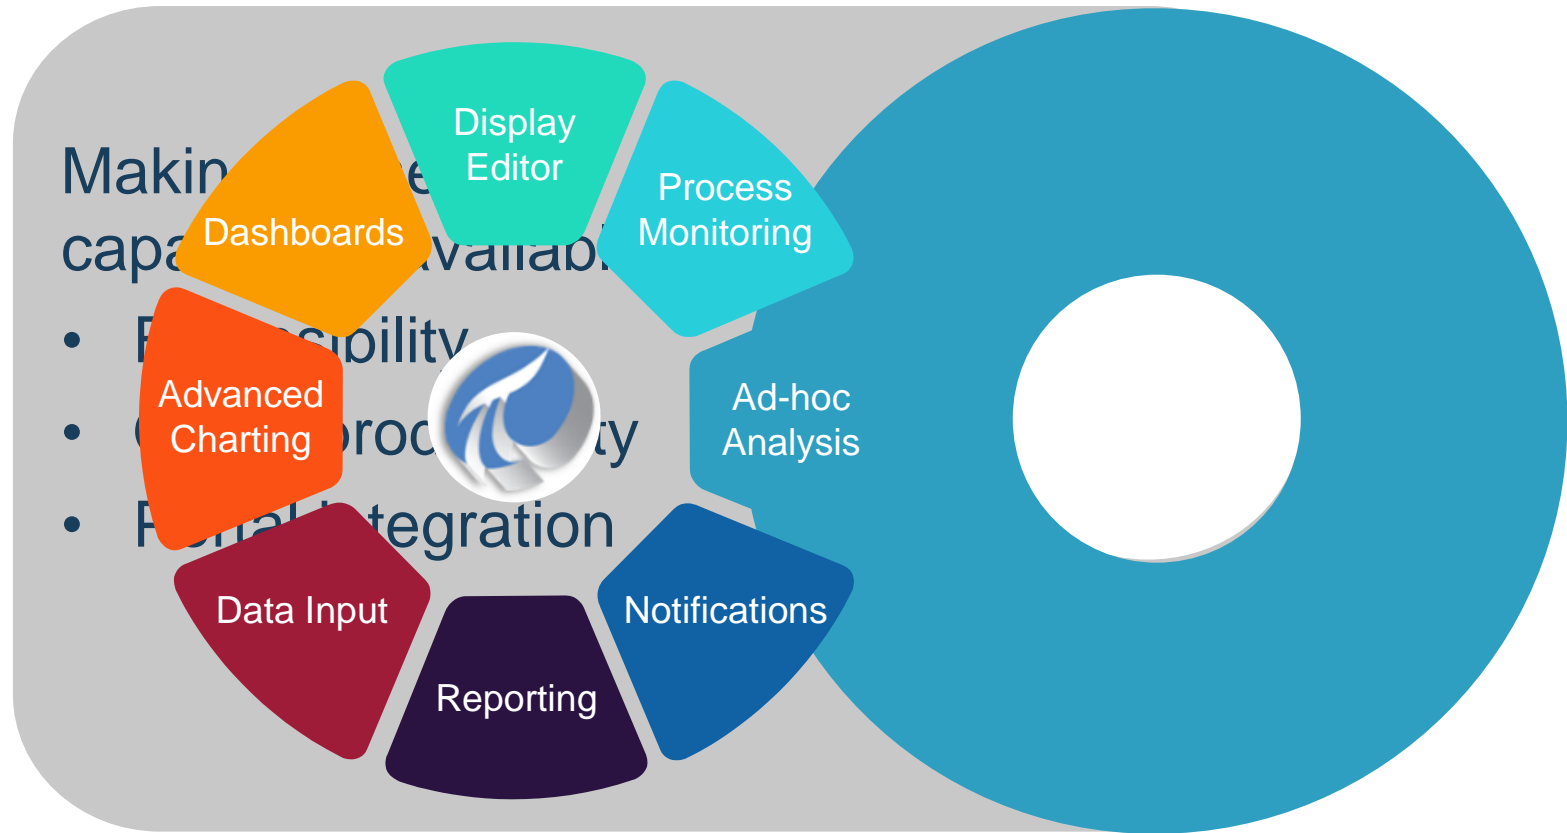

Monitor and  
Optimize  
Complex  
Processes

Analyze and  
Compare  
Important  
Events

Input Critical  
Data in  
Context

Your window into operational intelligence

# Unified visualization infrastructure: core capabilities

# Visualization Execution Strategy – Focus & Goals

## Modern architecture

Leverage latest technology to stay relevant

## Value-add features

Enable customers to solve new problems and derive more value

## Process Graphics

Provide PI ProcessBook customers a path forward

## Partner enablement

Actively support partners to develop solutions on our platform

## Extensibility

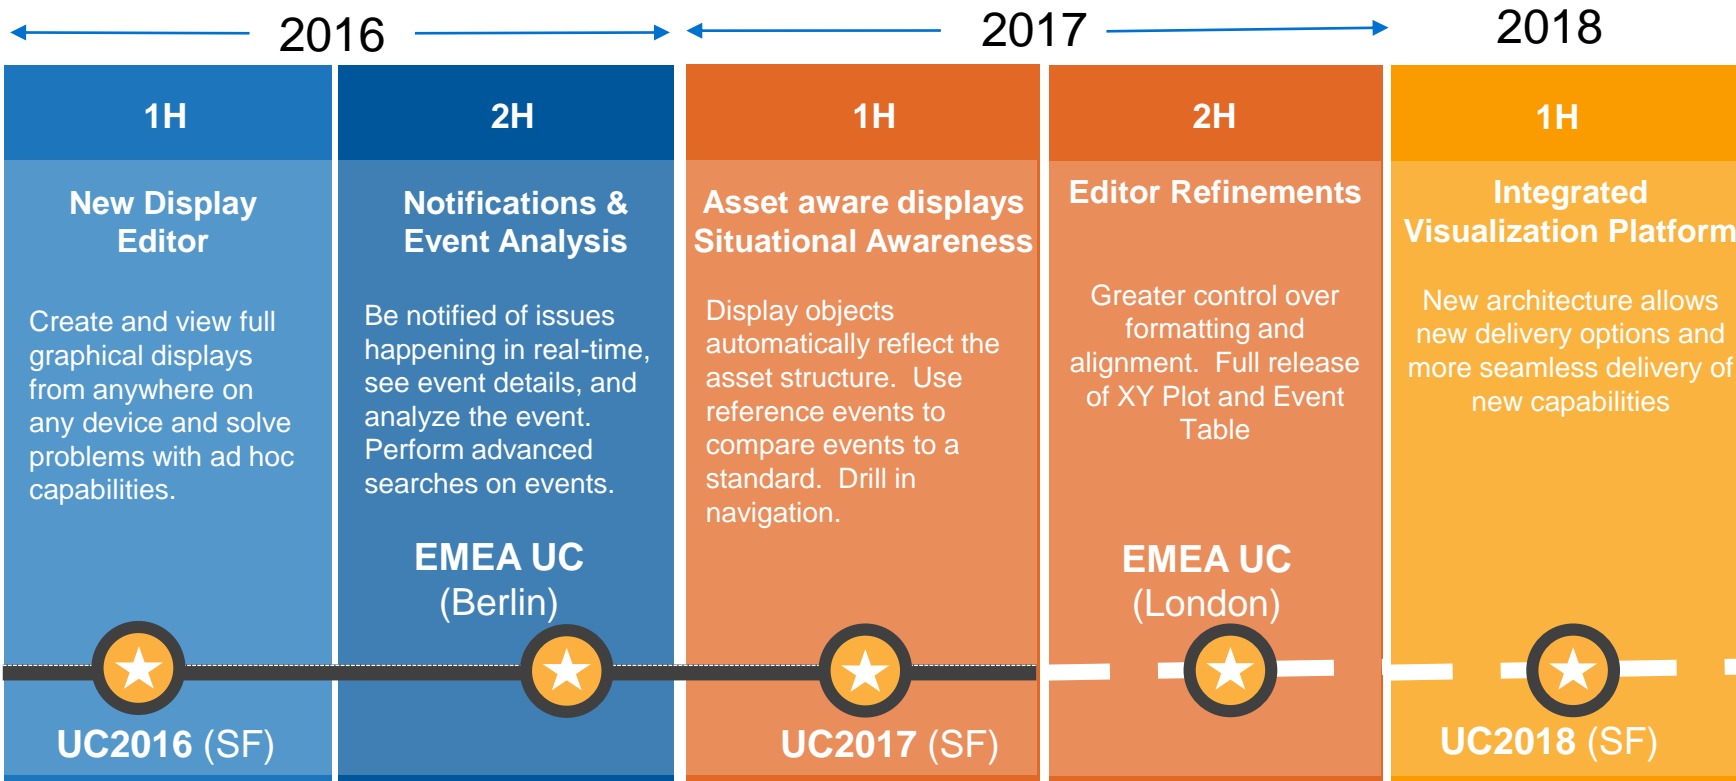

Enable the community-at-large to build customizations & extensions

## Superior data access

Ensure PI Web API is focused to meet the service layer needs

# Visualization Roadmap

PI Vision 2017

Unified  
Visualization  
Infrastructure

# PI Vision 2017

- Collections
- New Asset and Event table
- New User Types
  - Publisher
  - Explorer
- XY Plot Symbol
- Pinned Events
- Graphic Library
- Drill-in Display Navigation

# Collection – Spend less time manually updating displays

Group one or more symbols as a “collection” then add a context filter so the display reflects the assets you are interested in

- The collection automatically reflects when equipment is added or removed from the system.
- Results can be filtered by live data values

# Asset and Events Table

Asset Table- Easily view and compare asset performance in a table format.

Asset	CIP Acid Tank Level	CIP Caustic Tank Level	CIP Supply Tank Level	recirculation EPWash State
CIP_123_SKID	31.82	63.221	0	non recirc
CIP_124_SKID	88.382	36.977	0.013409	non recirc
CIP_422_SKID	39.44	22.573	-0.0062218	non recirc
CIP_432_SKID	No Data	No Data	-0.0081825	non recirc

Event Table- Always see the most important and relevant events.

- Use search criteria to show events based on asset type, severity, hierarchy, and more.

Event Name	Asset	Start Time	End Time	Acknowledgement
Engine Temperature High 2017-01-07 03:56:21.000	Sp6	1/7/2017 3:56:21 AM	In Progress	<a href="#">Acknowledge</a>
Engine Temperature High 2017-01-07 10:45:51.000	Sp5	1/7/2017 10:45:51 AM	In Progress	<a href="#">Acknowledge</a>
Gas Tank Level Low 2017- 03-09 06:49:13.000	Sp4	3/9/2017 6:49:13 AM	3/9/2017 9:24:13 AM	<a href="#">Acknowledge</a>
Gas Tank Level Low 2017- 03-09 06:49:13.000	Sp4	3/9/2017 6:49:13 AM	3/9/2017 9:24:13 AM	<a href="#">Acknowledge</a>

# Asset Table- Easily view and compare asset performance

Asset	Manufacturer	Driver	Engine RPM	Load	Status
Mine Truck 6	Komatsu	Steve Kwan	1,744.9	194.14	Running
Mine Truck 3	Komatsu	Thompson	1,682.6	159.87	Running
Mine Truck 8	Volvo	Bob Bonkers	1,719.7	157.74	Running
Mine Truck 4	Caterpillar	Reville Swivel	0	0	Stopped
Mine Truck 5	Volvo	John Sintilas	0	0	Stopped
Mine Truck 6	Komatsu	Steve Kwan	1,744.9	194.14	Running
Mine Truck 7	Volvo	Brian Bostwick	0	0	Running
Mine Truck 8	Caterpillar	Steve Kwan	0	0	Running
Mine Truck 9	Caterpillar	Justin Brown	0	0	Running
Mine Truck 10	Volvo	Bob Bonkers	1,719.7	157.74	Running

Add search and filter options to make the content of the table dynamic

Asset Type  
Mining\_Mine Truck

Asset Attribute  
Status = Running  
Load > 100

Now the table shows only the mine trucks that are running and have a load.

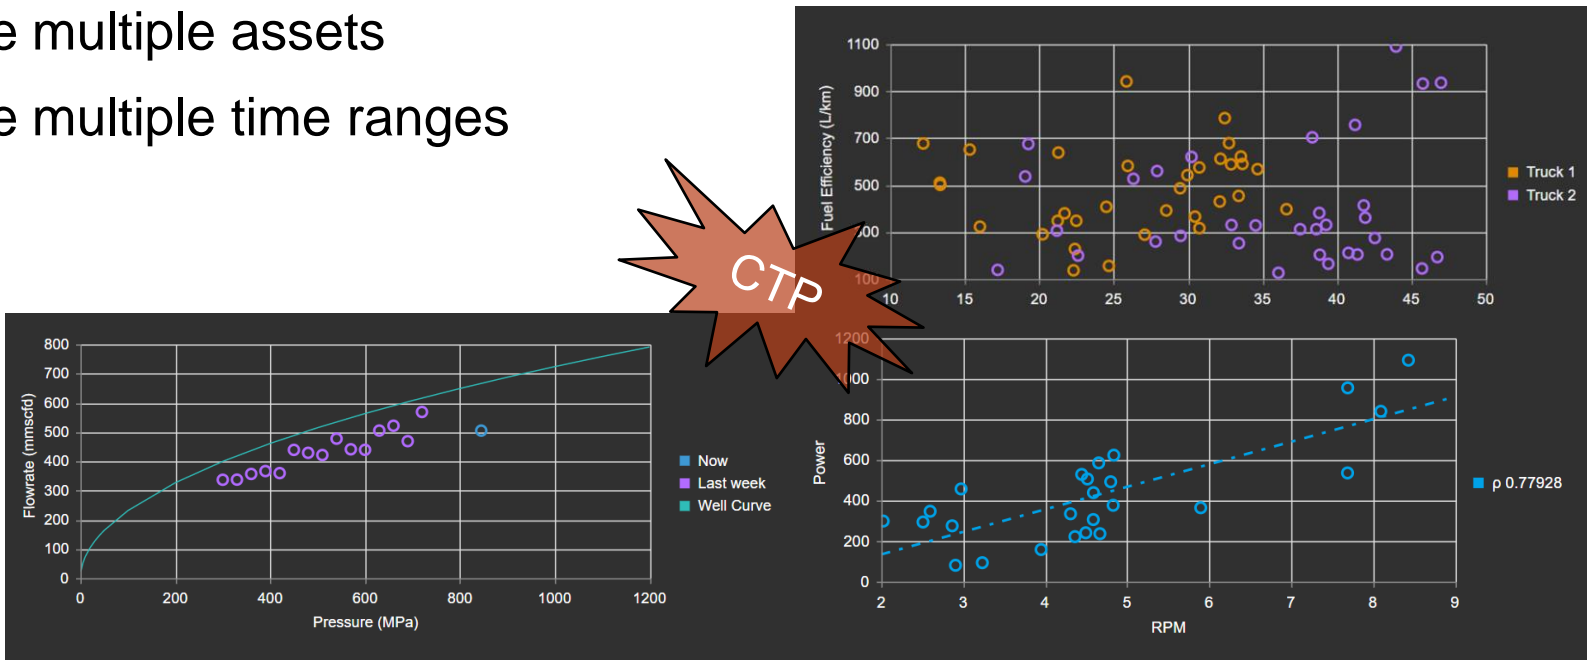

# User Types- Assign varying levels of capabilities

- **Publisher**
  - Targeted for content creators who need the ability to create and save new dashboards and analysis views.
  - The Publisher user type is equivalent to the traditional PI Coresight user that has existed in all previous versions of the product.
- **Explorer**
  - The Explorer user type can not save any new displays or changes to existing displays.
  - An Explorer can use the full power of existing displays to switch context, adjust time and investigate events. Explorers can even create ad-hoc displays but they do not have the ability to save any of this work.

# XY Plot – Correlated data

- Correlations between attributes
- Compare multiple assets
- Compare multiple time ranges

# Pinned Events- Reference or “Golden” event

- Identify batch process deviation by comparing to a reference
  - “Pin” one or more events, to be used as a reference
  - Pinned events are saved with the display

The screenshot shows the 'Events' interface with a list of events. A context menu is open over the event 'OSIsoft\_201581202655 (CLEANING)'. The menu options are: Hide Event, Event Details, Compare Similar Events by Name, Compare Similar Events by Type, and Pin Event. The 'Pin Event' option is highlighted.

Event ID	Event Name	Start Time	End Time
OSIsoft_201581181621	(CLEANING)	8/11/2015 4:16:21 AM	8/11/2015 6:46:49 AM
OSIsoft_201585185135	(CLEANING)		
OSIsoft_201581202655	(CLEANING)	8/11/2015 8:26:55 AM	
OSIsoft_201581202655	(CLEANING)		
OSIsoft_201581202655	(CLEANING)		
OSIsoft_201581202655	(CLEANING)		
OSIsoft_201584104839	(CLEANING)		
OSIsoft_201584103941	(CLEANING)		

# Graphics Library- Standard library of industrial graphics

- Use an extensive library of graphic symbols to enhance a display

# Drill-in Navigation- Dashboarding

Overview display

Truck1

Truck2

Truck2 Brakes

Truck2 Frame

- Configure a URL link on any symbol
  - Link to another display or another website.
  - When connecting to another display the context (time and/or selected asset) can be passed as part of the link

- OSIsoft\_201584104839 (CLEANING)
- OSIsoft\_201584103941 (CLEANING)

## Drill-in Navigation

## XY Plot

# What's coming next...

- Refinements for XY Plot and Events Table
- Server side enhancements for PI Web API
  - Performance and Scalability
  - Groundwork for client side data access
- Editor improvements
  - Snap to Grid
  - Display printing
  - Improved font size control
  - Display level number format
