

Operator Simulation Station at Hydropolis Water Institute

Piotr Słomianny, Michał Słószarz, Krzysztof Czupryński

APOSTROPHE

Agenda

- MPWiK Wroclaw
- Hydropolis Institute
- MPWiK PI System
- PI System in Hydropolis Institute
- New Challenges and Road forward

Established in 1871

700 employees

Turnover: 100 mil euro

2 water treatment plants

1 wastewater treatment plant

**New Technologies Center
and 2 research stations**

Hydropolis Institute

WATER DISTRIBUTION

2000 km

Water production:
45 mil m³ per year

48 000 water meters

Grey cast/ductile iron, steel,
PEHD, PCV

80 mm – 1200 mm

Na Grobli
WTP

Mokry Dwór
WTP

WWTP

WASTEWATER COLLECTION

2000 km

Wastewater:
51 mil m³ per year

77 wastewater pumping
stations

Bricks, stoneware,
concrete, PCV, GRP

Diameters

- up to 3,5 m

Agenda

- MPWiK Wroclaw
- Hydropolis Institute
- MPWiK PI System
- PI System in Hydropolis Institute
- New Challenges and Road forward

HYDROPOLIS

Education center

4 000 m²

8 unique zones

300 000 visitors per year

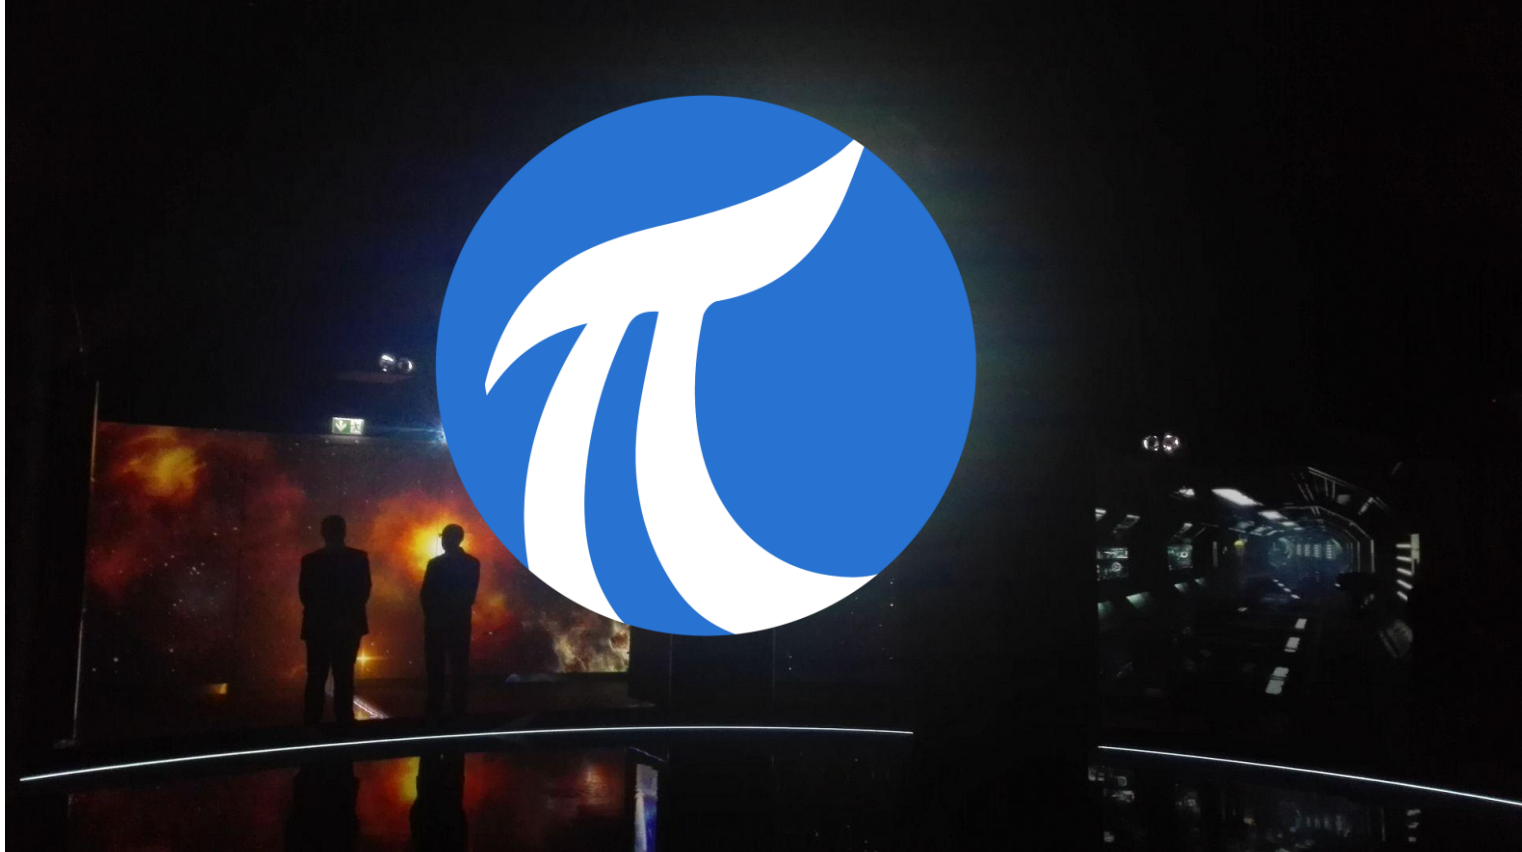

Prestigious awards

DEMO

HYDROPOLIS

Hydropolis Institute – PI System

Agenda

- MPWiK Wroclaw
- Hydropolis Institute
- MPWiK PI System
- PI System in Hydropolis Institute
- New Challenges and Road forward

PI System to connect all real-time data sources

- Water Production - Siemens SCADA
- Water Network – Flow Meters
- Pressure Meters
- Noise loggers
- Weather Station
- Sewage well level sensors
- Piezometers

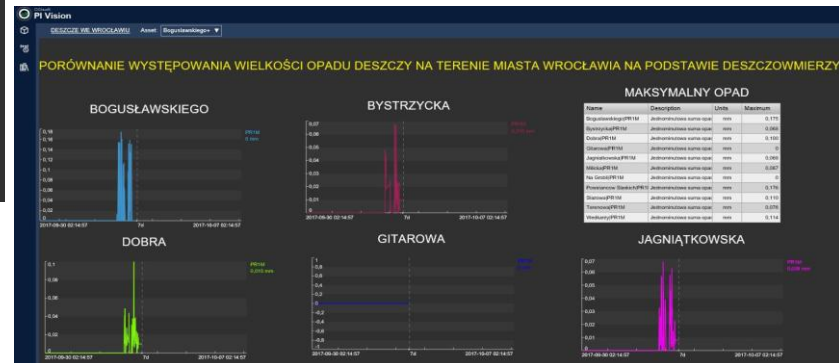

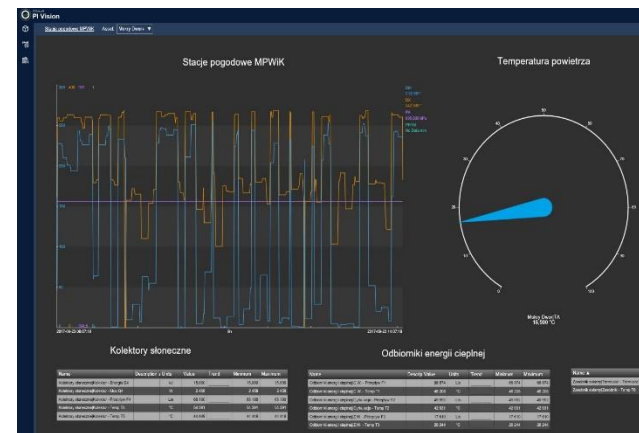

**Connect
Point**

OSIsoft®

PI System Visualization

Red Carpet Incubation Program

The Red Carpet Incubation Program (RCIP) from Microsoft and OSIsoft helped MPWiK to connect production and customer

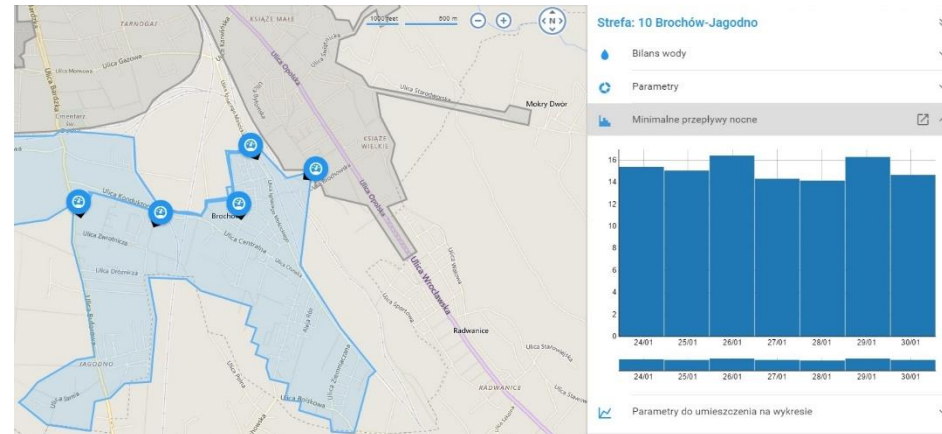

Data, we operate with Azure Machine Learning in:

- Forecast water demands for future scheduling (next 24 hours)
- Provide data relations allowing for the creation of predictive analytics models
- Schedule better pump and production planning

PI System connection to business intelligence and SmartFlow Prediction System

- Data from water production is visualized in the Tableau System  + a b l e a u
- PI system is a part of big data service infrastructure for delivering information about water leaks
 - Transfer data for Service
 - Notification about data transfer status
 - Maintain quality for DB connection

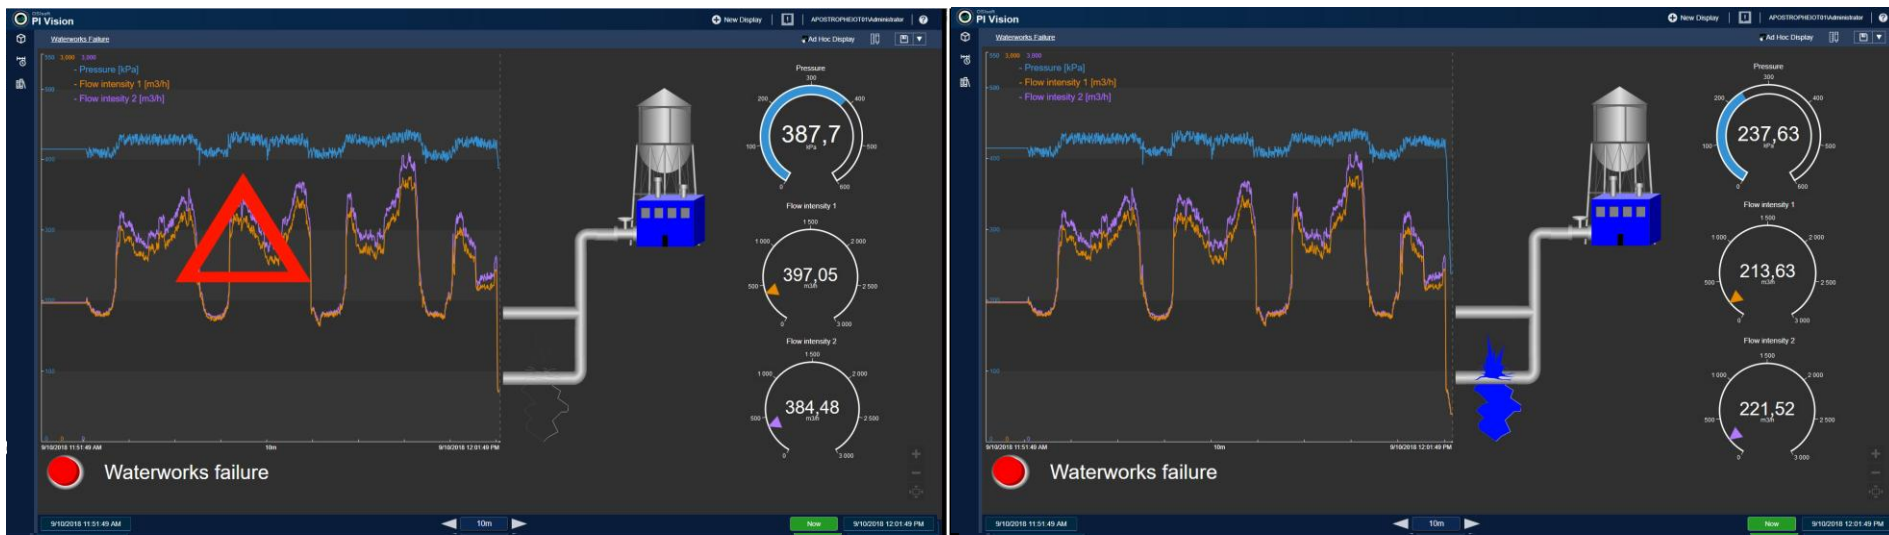

Agenda

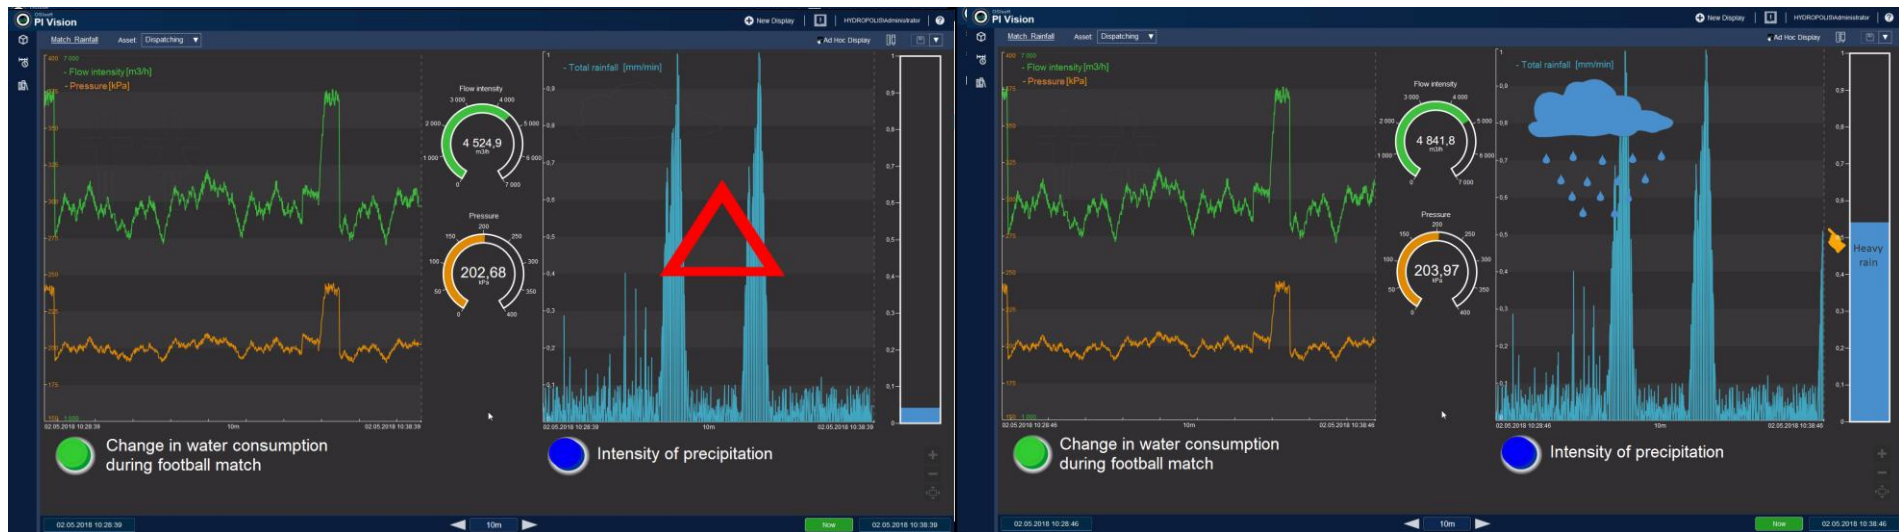

- MPWiK Wroclaw
- Hydropolis Institute
- MPWiK PI System
- PI System in Hydropolis Institute
- New Challenges and Road forward

The Solution: PI System based simulation station showing real case events as viewed and resolved by MPWiK operators

Press the red Button to simulate a pipe break
First the operator sees a warning (prediction) and then sees the event happen

The Solution: PI System based simulation station showing real case events as viewed and resolved by MPWiK operators

Press the green to simulate a football match OR Press the Blue Button to simulate intense Rain Fall
First the operator sees a warning (prediction) and then sees the event happen

DEMO

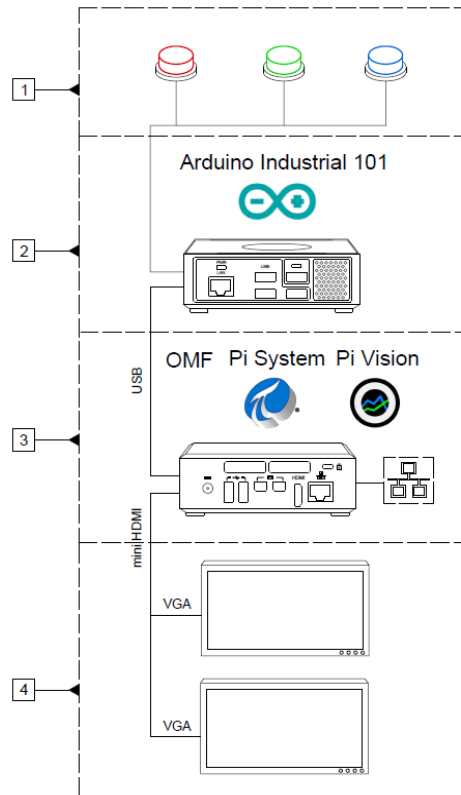

Football match demo

The Solution: PI System based simulation station showing real case events as viewed and resolved by MPWiK operators

APOSTROPHE

Operator Simulation using:

- **OMF** to integrate simulated data inputs from **Industrial Arduino**
- **PSA** used to initiate proper Video simulation played in unison
- **PI Event Frames** which captured specific events (football match, flooding or pipe break)
- **Automation** work to bring mechanical control buttons to Arduino

Agenda

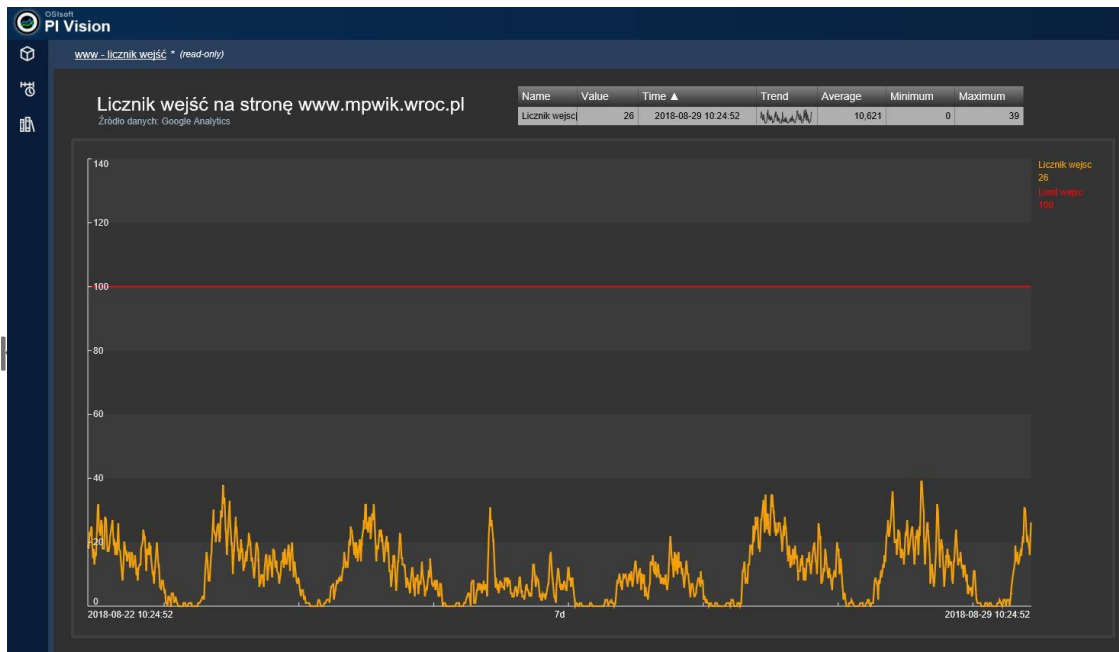

- MPWiK Wroclaw
- Hydropolis Institute
- MPWiK PI System
- PI System in Hydropolis Institute
- New Challenges and Road forward

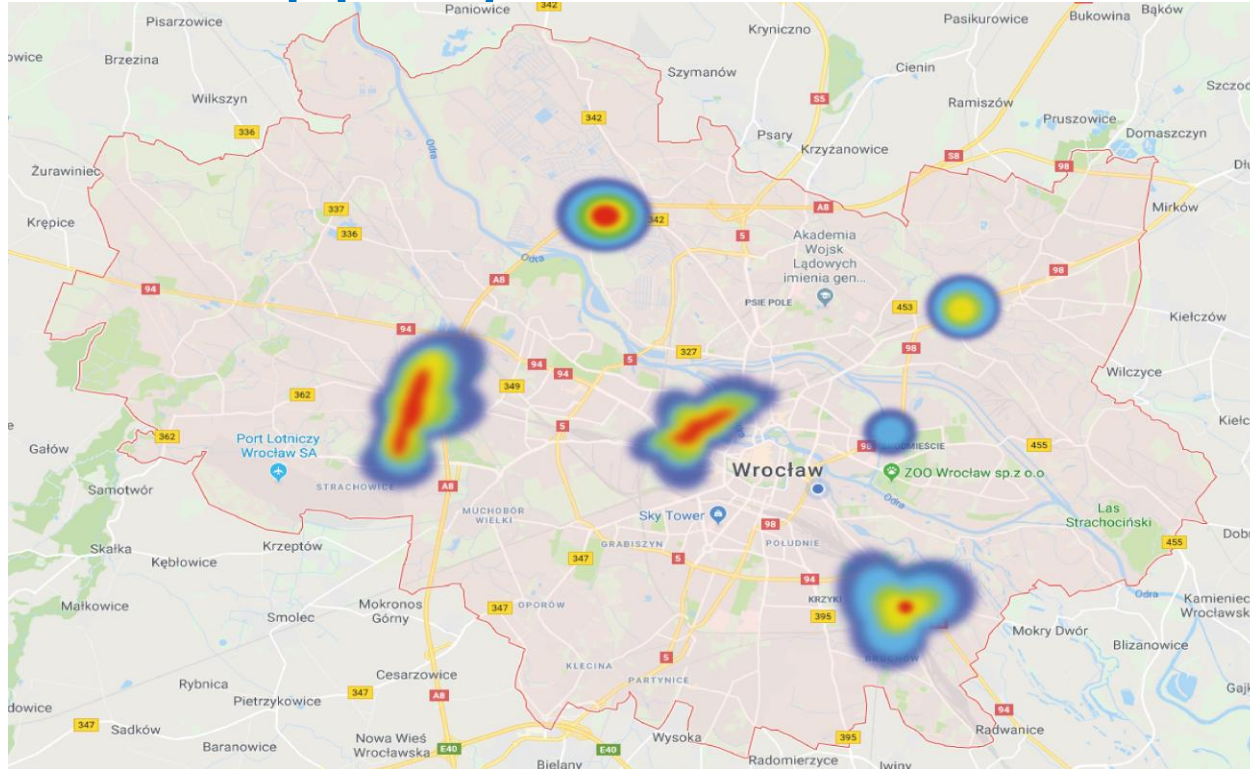

The Solution: PI System alert based on Google Analytics stats

PI system is a part of communication system

- Connection to Google Analytics platform
- Verification of number of users logged on the MPWiK website and alerting MPWiK support after exceeding 100 sessions
- Quick response to breakdowns

Quick definition of breakdowns location by mapping customer calls

Operator Simulation Station at Hydropolis Water Institute

APOSTROPHE

CHALLENGE

One of MPWiK's task in the city is to educate and inform the people of Wrocław about how important water is and what MPWiK does

- Teach people how certain events impact water production
- Show how people can save water
- Achieve our strategic goals

SOLUTION

The PI System infrastructure used in MPWiK shows specific events on the Operator Simulation Station.

- The Hydrpolis started the partnership with OsiSoft – educational license
- The exhibit was created to show how water impacts society
- We launched this exhibit for visitors.

RESULTS

Hydropolis Operator Simulation Station is one of the most popular exhibits in the Institute.

- Every year, over 300 000 visitors can see this exhibit
- People visiting Hydropolis know more about how we function now

Speakers

- **Piotr Słomianny**
- piotr.slomianny@mpwik.wroc.pl
- CFO/CIO
- MPWiK Wrocław

- **Michał Ślósarz**
- michal.slosarz@mpwik.wroc.pl
- IT Manager
- MPWiK Wrocław

- **Krzysztof Czupryński**
- Krzysztof.czuprynski@apostropheiot.com
- CTO
- Apostrophe IT Sp. z o.o.

Questions?

Please wait for
the **microphone**

State your
name & company
