

From Digital Oilfield to Digital Transformation to Full Field Analytics

Presented by: Denise Sherrod

Occidental Petroleum

Topics

- About Oxy
- Business Challenge
- Digital Oilfield
- Digital Transformation
- Full Field Analytics
- Field Mobility
- Conclusion

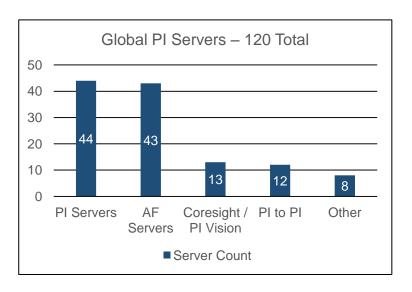

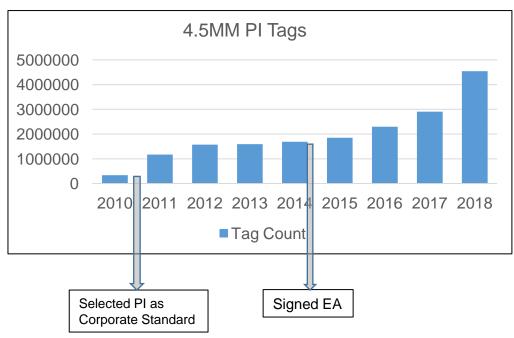

Company Overview

PI Statistics

Business Challenge

Turning 4.5 MM
 PI tags into
 useful
 information

Digital Oilfield

Digital Transformation

 Using the data to improve processes Using analytics to drive change

Full Field Analytics

The Digital Oilfield – Where Are We Today

- Massive amounts of data stored in systems such as PI
- Hours/days spent gathering and analyzing the data
- Field personnel carry out manual operations

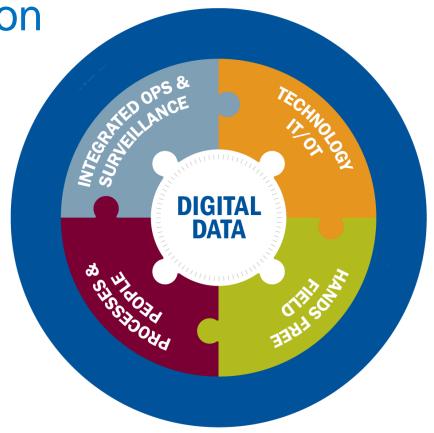

Digital Transformation

 Using data to drive change

Digital Data

Data is the Driver of Digital Transformation

- The right data is collected at the correct frequency
- Access to data must be seamless and fast
- Data must be converted into useful information

Integrated Ops and Surveillance

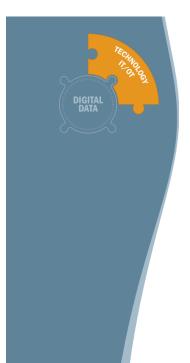

Apply Manufacturing Plant Methodology to Manage the Field

- End to end, real time view of the entire field ecosystem
- Integrated, planned, proactive maintenance
- Video surveillance provides remote surveillance

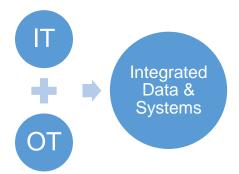

Information Technology / Operational Technology

Convergence of IT and OT

- Real-time operational data are ingested by advanced IT systems
- Advanced Analytics and Machine Learning provide solutions
- Smart devices to talk to the cloud (Internet of Things)

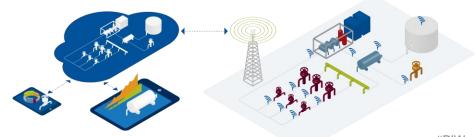

Hands Free Field

- Instrumentation and automation throughout the field
- Self-adjusting devices
- Mobility provides virtual control rooms from anywhere

Processes & People

Process Transformation is Critical

- Advanced collaboration requires new processes / skills
- Requires a paradigm shift
- New skills will be required to operate in a more technical environment

Transforming The Way We Think and How We Work

Anecdotal Data d

Data driven decisions

Reactive Proactive actions plans

Segregated Collaborative Work

Fire Fighting Preventative Maintenance

Hands-on Automated Control

Historical Review Real-time Analytics

Routine Work Continuous Improvement

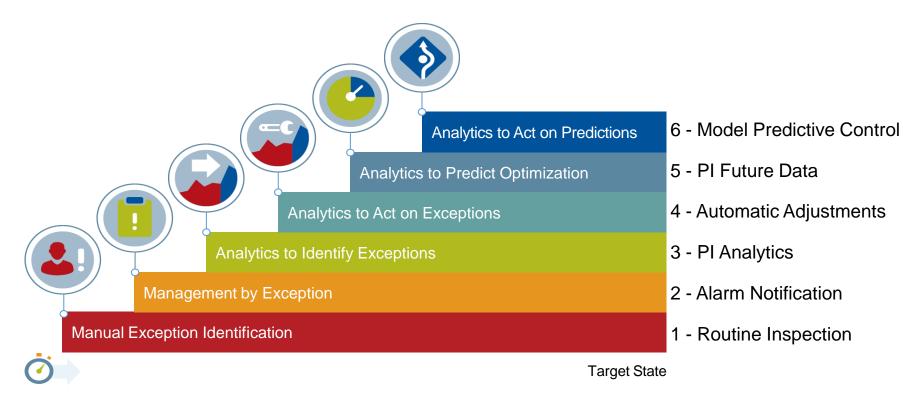

Treating Symptoms Developing Cures

Cost Containment Value Creation

Cumbersome Agile Operations

From Digital Transformation to Full Field Analytics

1 – Manual Exception Identification

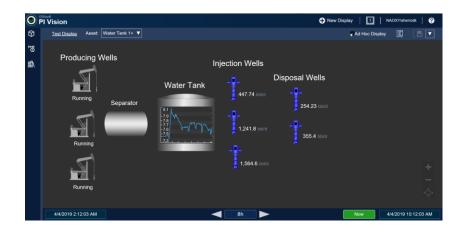

Analytics to Predict
Optimization

4 Analytics to Act on Exceptions

Analytics to Identify Exceptions

2 Management by Exception

1 Manual Exception Identification

Manual high tank level identified on daily route

2 – Management by Exception

Analytics to Predict
Optimization

Analytics to Act on Exceptions

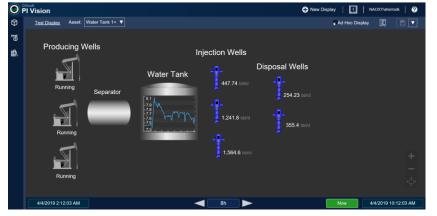

Analytics to Identify Exceptions

2 ! Management by Exception

Manual Exception Identification

Operator receives a high tank level alarm and goes to this facility first

3 – Analytics to Identify Exceptions

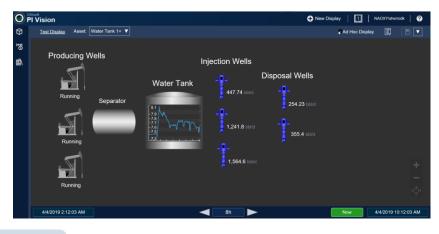

Analytics to Predict Optimization

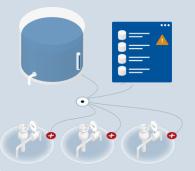

4 Analytics to Act on Exceptions

3 Analytics to Identify Exceptions

2 Management by Exception

Manual Exception Identification

PI Analytics identifies an exception - High water tank level & disposal wells not 100% open

4 – Analytics to Act on Exceptions

5 Analytics to Predict Optimization

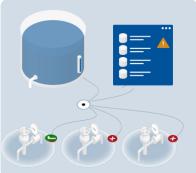

3 Analytics to Identify Exceptions

2 Management by Exception

Manual Exception Identification

Automatic adjustment of disposal wells to reduce high tank level

5 – Analytics to Predict Optimization

6 Analytics to Act on Predictions

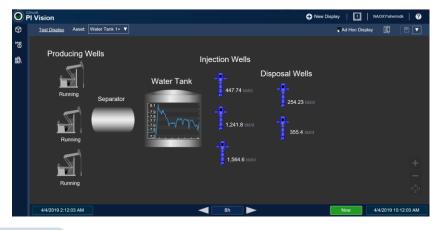

5 Analytics to Predict Optimization

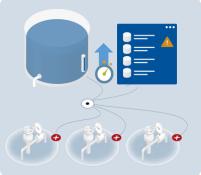

4 Analytics to Act on Exceptions

3 Analytics to Identify Exceptions

2 Management by Exception

Manual Exception Identification

PI Future Data predicts a high level, providing more time to respond

6 – Analytics to Act on Predictions

1 Manual Exception Identification

Automatic adjustment of disposal and producing wells to maintain optimal tank level

Changing The Way We Work

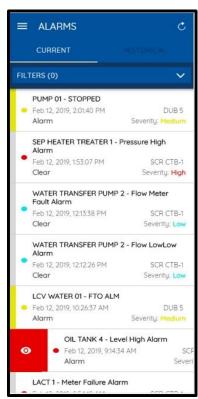

Field Mobility

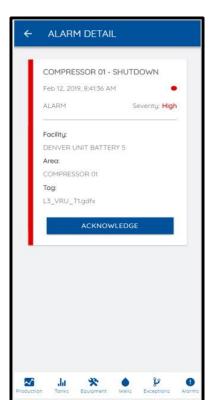

- Provides alarms, real-time, and historical surveillance data to the operators in the field
- Internally developed application
- Displays real-time data from PI
- Uses Asset Frame (AF) for navigational hierarchies

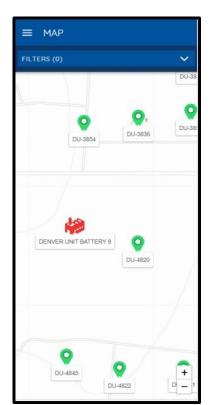

Field Mobility – Virtual Control Room for Entire Field

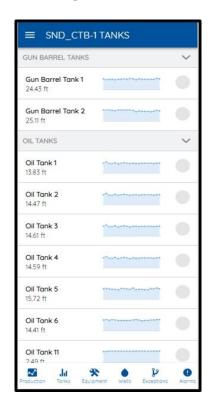

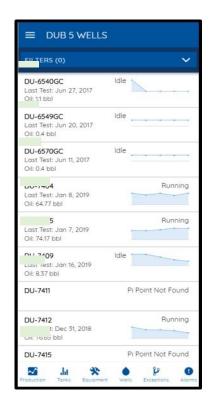

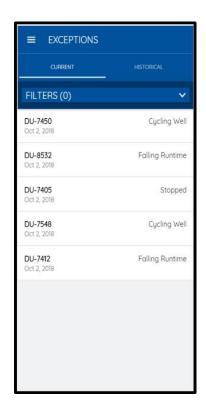

Field Mobility – Operations Dashboard

Occidental Petroleum Levering the PI System to Drive Change

CHALLENGE

Transform the way we work

 Take advantage of the massive amounts of data we have in our PI systems to change our work processes

SOLUTION

Operate our fields more like a manufacturing plant using full field analytics

 Use PI data to be able to predict and prevent upset conditions

RESULTS

Increasing operational efficiency

 We're still early in the game, but we're making progress in transforming our operations from reactive to predictive and preventative
