

# Pervasive Data Collection at the Edge

Chris Felts

Sr. Strategic Product Manager

# Agenda

Introduction

Edge Data Store

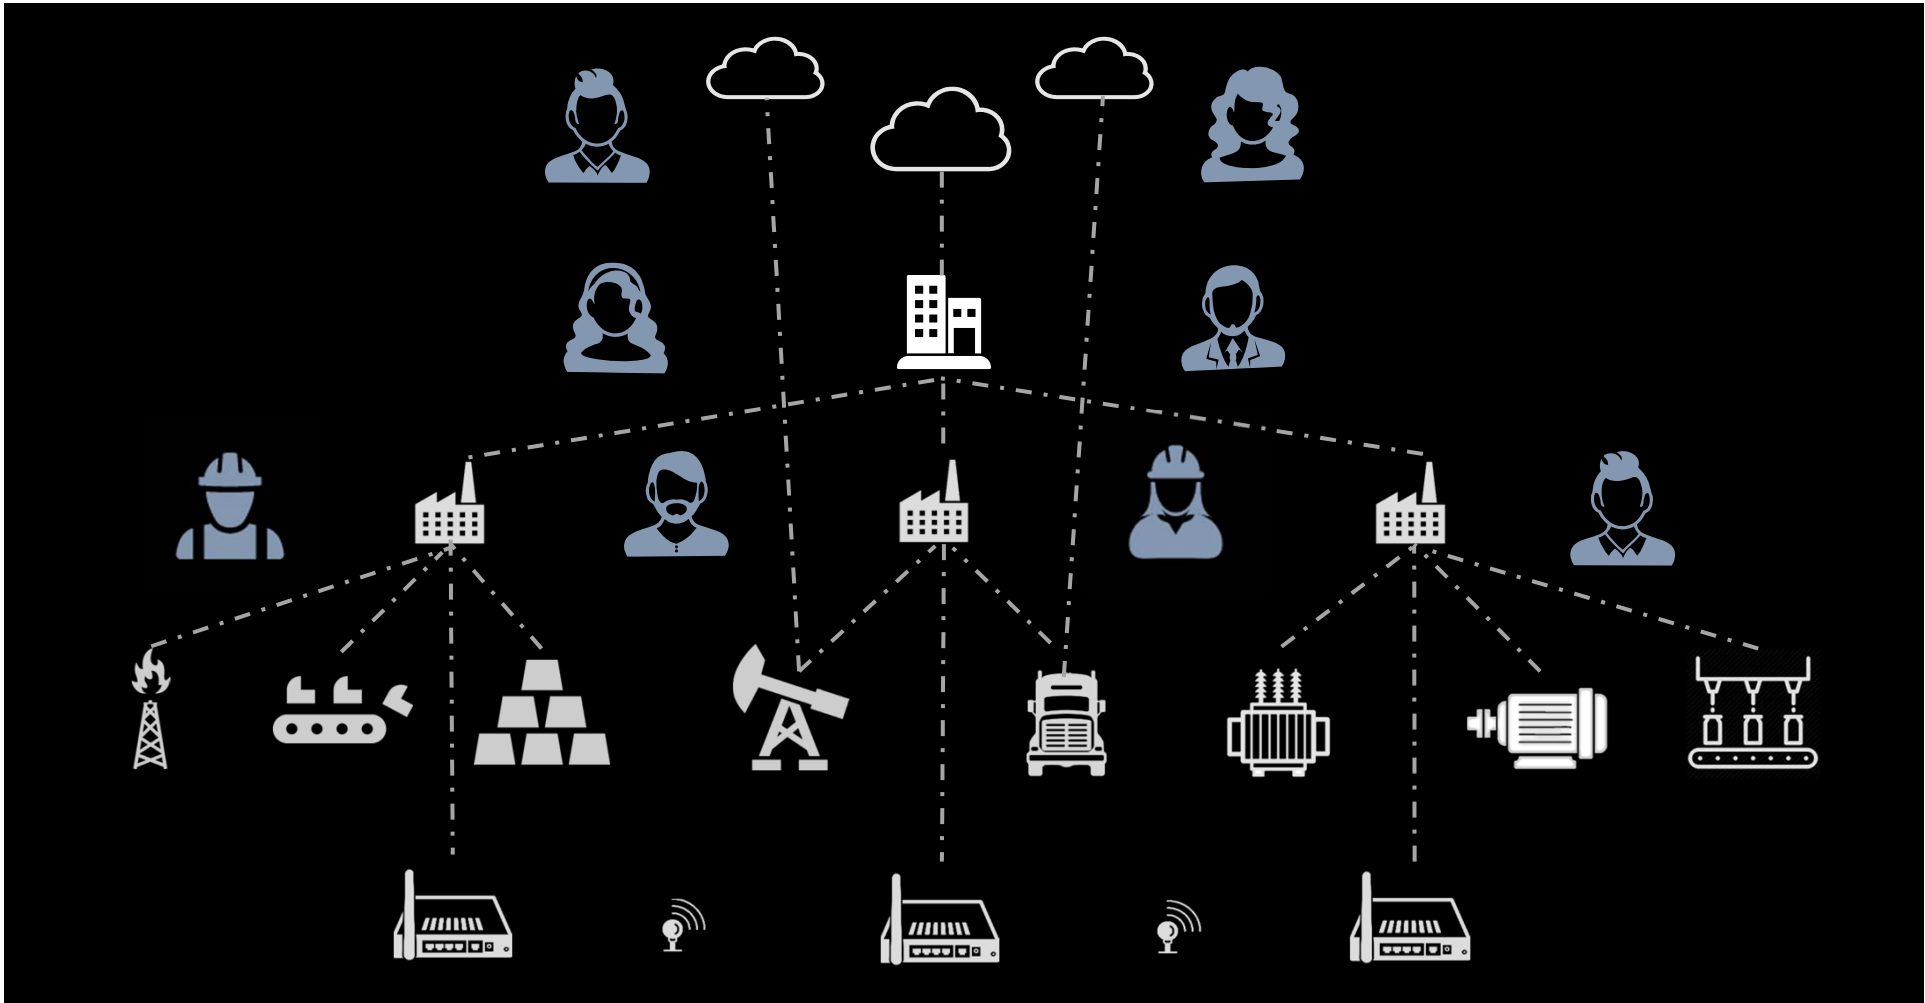

Lighthouse Program

OSIsoft Adapters

Conclusion

# Seamless Infrastructure

# Edge

- Expanding operational datasets
- Enabling asset intelligence at the edge

# Glossary (TLA = Three Letter Acronyms)

- EDS = Edge Data Store
  - Learn more in this presentation!
- OCS = OSIsoft Cloud Services
  - A managed set of platform as a service (PaaS) and software as a service (SaaS) functionalities that extends OSIsoft's operational data infrastructure to the cloud.
  - Learn more about OCS in these PI World SF 2020 presentations:
    - *OSIsoft Cloud Services PaaS & Partner Applications*
    - *Enabling Data Science for the Enterprise with OSIsoft Cloud Services*
    - *Enable Remote Operations Monitoring with OSIsoft Cloud Services Visualization*
- OMF = OSIsoft Message Format
  - A specification that defines a message structure that is used to generate and send data to OSIsoft systems (EDS, OCS and PI Servers)

# Edge Data Store

Persistent Storage  
Self-Healing Capabilities

Application Platform

- Cross Platform (Windows, Linux)
- Multiple Data Ingress Options
- Analytics Ready
- Egress to PI Server and OSIsoft Cloud Services
- Developed, Sold, and Supported by OSIsoft

## EDS is unlike a PI Interface / PI Connector

- **Persistent data** available for visualization and edge analytics
- Data transfer options to **optimize bandwidth**

## EDS is unlike a PI Server

- Runs **lean**: lightweight, minimal installation and configuration
- Provides **temporary storage**, not a system of record

## EDS is

- Supported on **small** hardware and **multiple platforms** e.g. *Linux OS*
- **Resilient**: Self-heals and resumes operations after disruptions

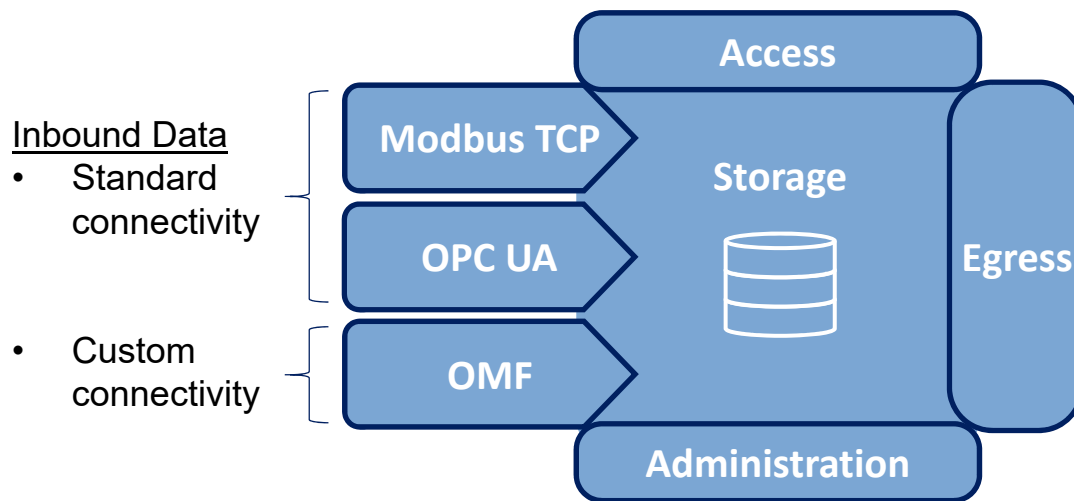

# EDS Capabilities (initial release)

## Storage

- Inbound data persisted in data store
- Configurable data stream limits

## Access

- Read / write access via EDS API

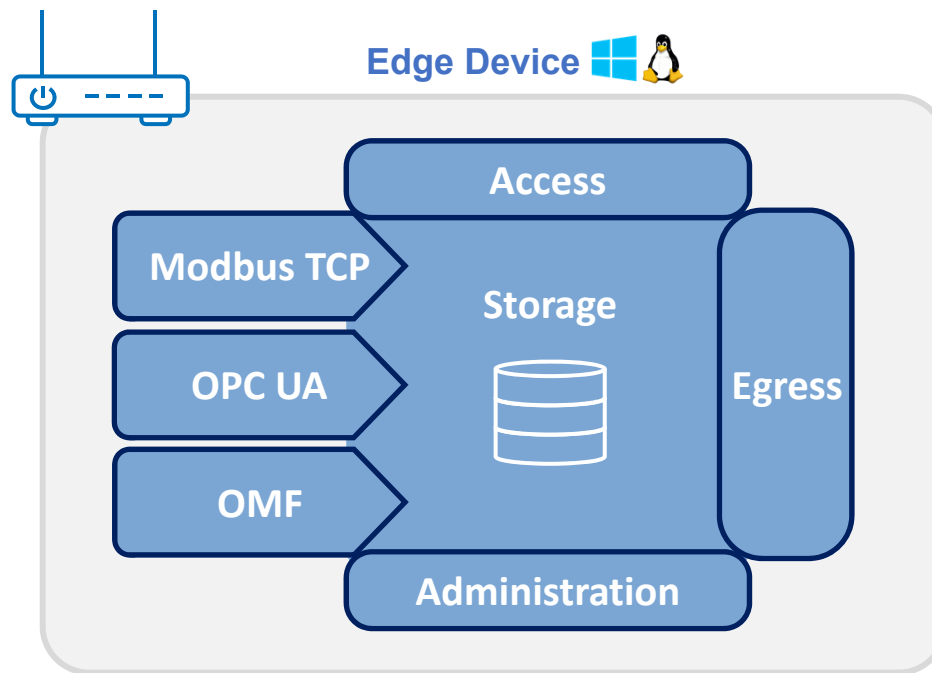

## Egress

- Data transfer to PI Server and OCS
- Configurable data selection and transfer rates
- Data compression on transfer

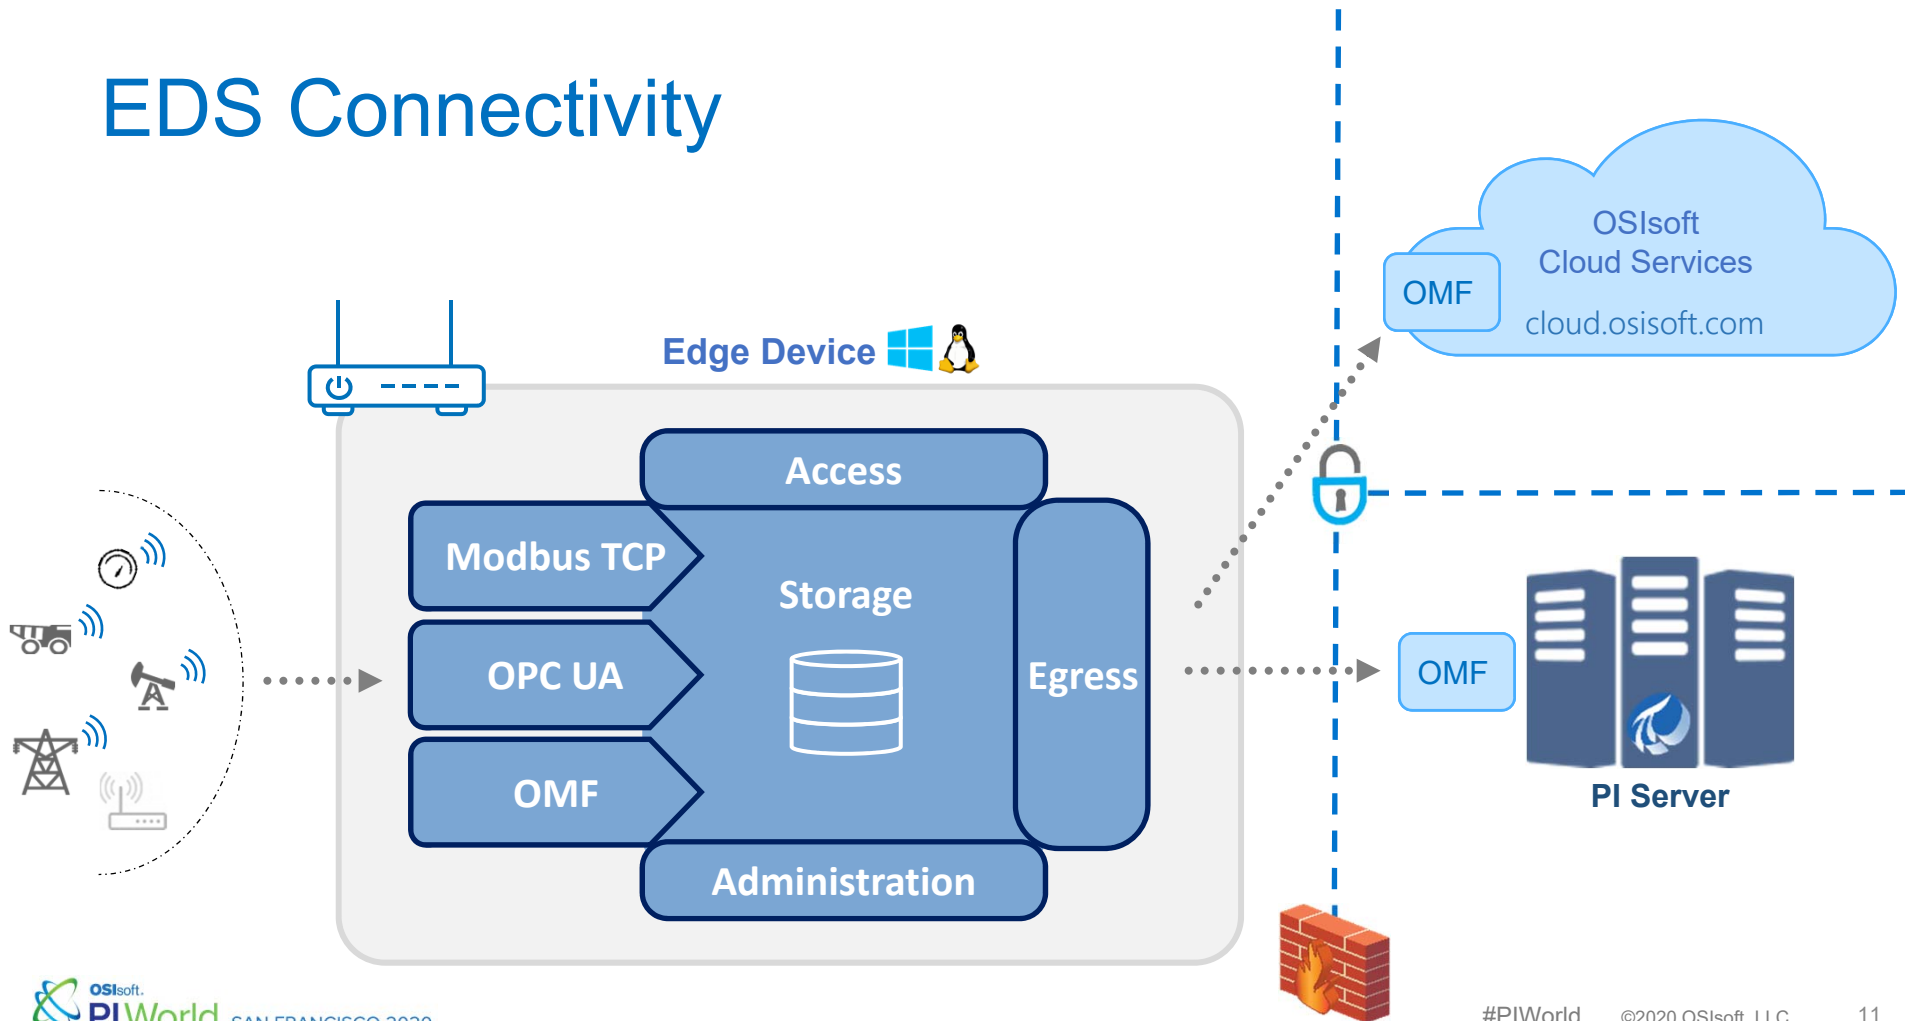

## Administration

- Simplified management
- Scalable installation and configuration

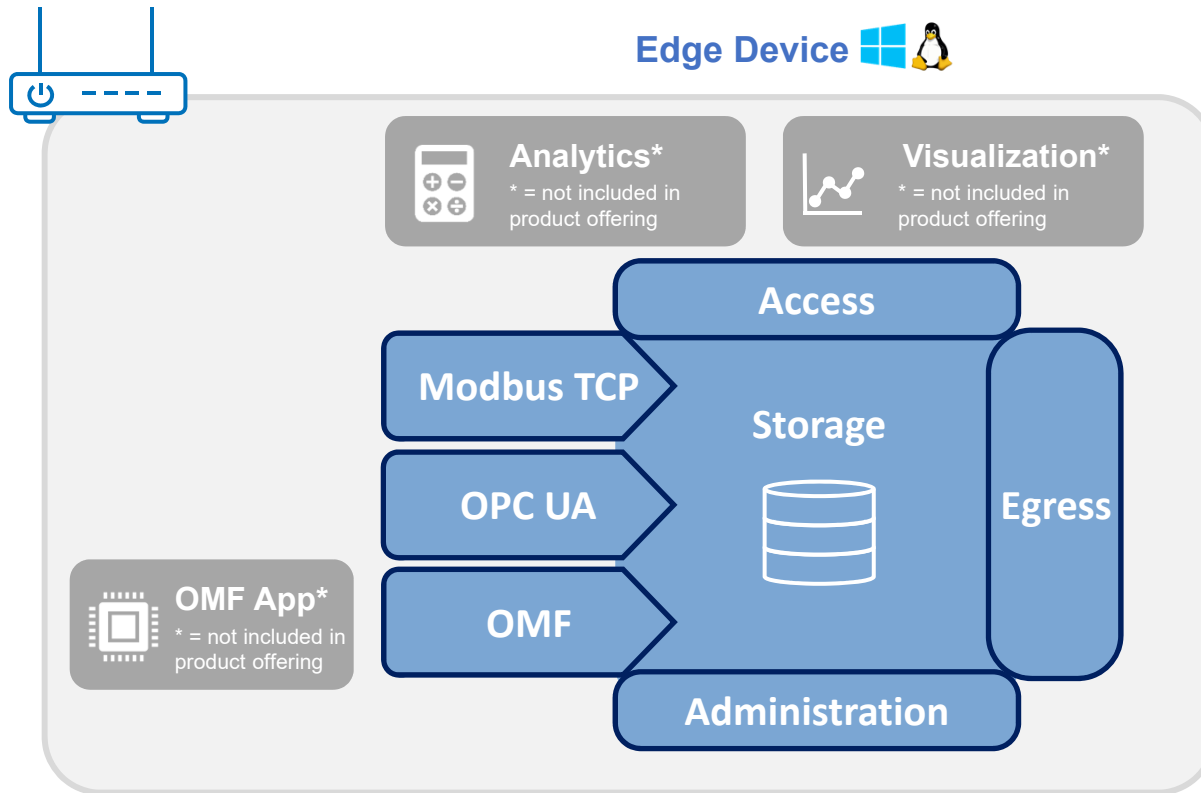

# EDS Hardware Compatibility

# EDS Connectivity

# EDS Application Development

# Hardware Specs and License Sizing

## Operating Systems:

- Linux Debian 9 or later
- Linux Ubuntu 16.04 or later
- Windows 10 IoT Enterprise
- Docker Container

## CPU:

- Intel x64, Linux & Windows
- ARM 32, Linux & Windows
- ARM 64, Linux

- Solid State Drive (SSD) recommended for data storage
- Maximum data collection frequency = 60 Hz

## SMALL

- License: up to 50 data streams or 50 events / sec
- Hardware: e.g. 1 core CPU, 0.5GB RAM

## MEDIUM

- License: up to 500 data streams or 500 events / sec
- Hardware: e.g. 2 core CPU, 2GB RAM

## LARGE

- License: up to 3,000 data streams or 3,000 events / sec
- Hardware: e.g. 4 core CPU, 4GB RAM

SM

MD

LG

# Emerging Data Patterns

## Less Critical Assets

Previously cost prohibitive, but possible with IoT

## Mobile Assets

Moving in and out of connectivity

## Edge Analytics

Enables local decision making

## Increased Revenue

New business models and service offerings

# EDS Lighthouse Asset Examples

# OSIsoft Edge Data Store – Roadmap

## Developing Now

### Additional Data Connectivity

More inbound data connectivity options using OSIsoft Adapters

### Remote Management

Installation, configuration and administration from a remote, centralized location

## Considering Next

### Additional Data Connectivity

More inbound data connectivity options

## Researching Future

### Calculations

### Trending Experience

### Stream Metadata

Last Updated: 2020-03

Roadmap themes: [Manageable Systems](#) | [Seamless Infrastructure](#) | [Increased Value & Scope of Data](#)

# OSIsoft Lighthouse Program

A hands on engagement that provides the participant with early access to unreleased OSIsoft software to help solve an identified business or operational problem and provides OSIsoft with valuable feedback on this software

# OSIsoft Adapters

OSIsoft  
Adapters

Assets/  
Devices

Cross Platform

Lightweight Footprint

Ready Off-The-Shelf

- Windows and Linux device interoperability
- Robust data collection (Data Buffering)
- Scalable architecture
- Connectivity to Edge Data Store, PI Server and OSIsoft Cloud Services
- Sold, and Supported by OSIsoft

# Adapter Capabilities (initial release)

## Data Transfer

- PI Servers, OCS and EDS
- Data filters

## Inbound Data

- Common industrial protocols

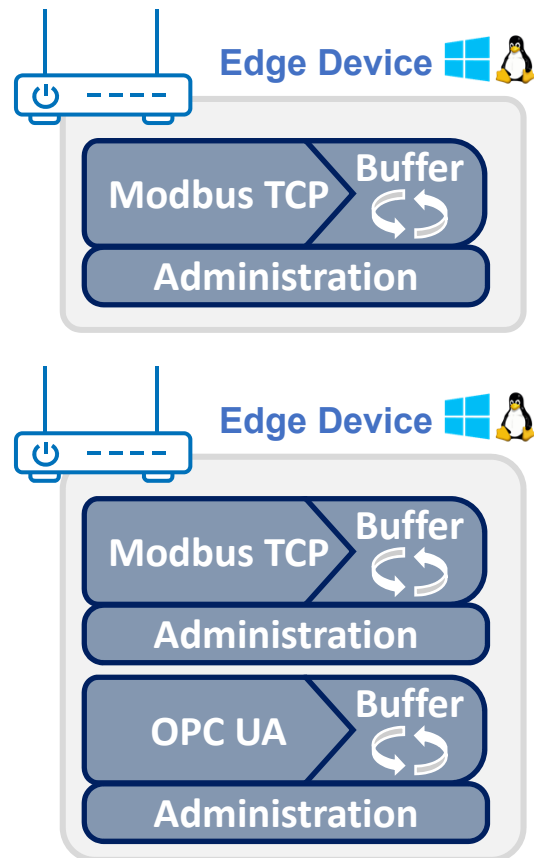

## Buffering

- Overcome network and system disruptions

## Administration

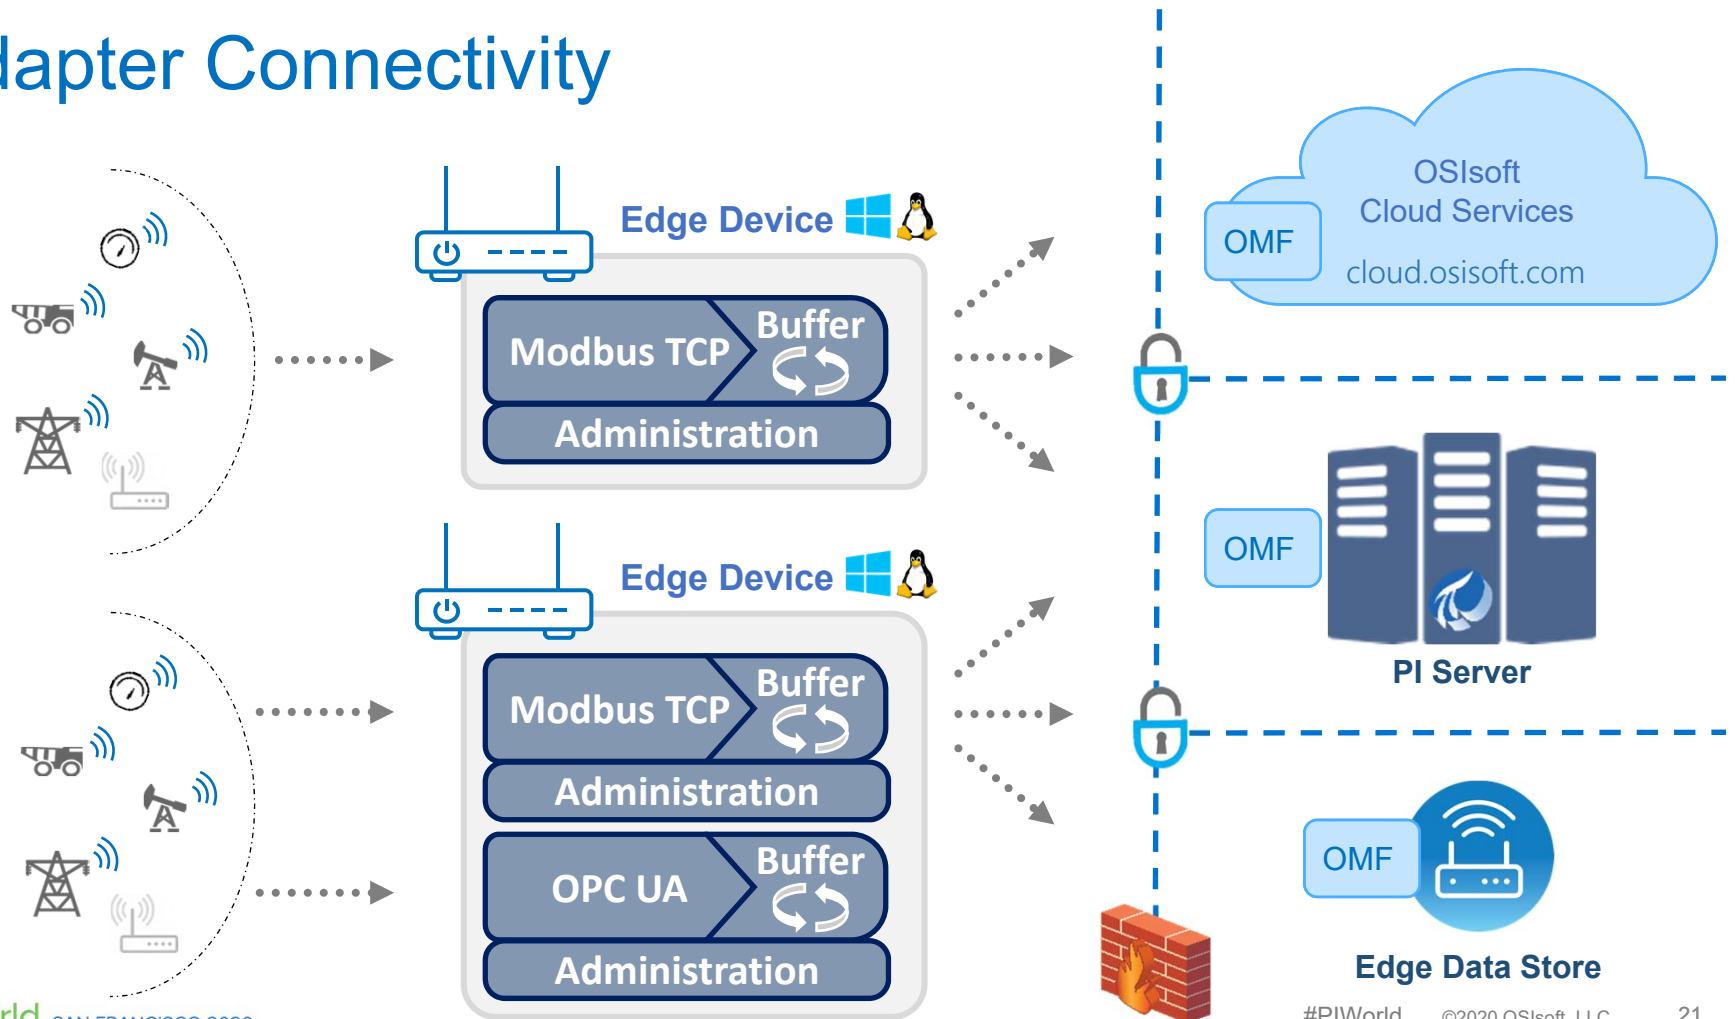

- Simplified management
- Scalable installation and configuration

# Adapter Hardware Compatibility

# Adapter Connectivity

# OSIsoft Adapter – Roadmap

(integrated in the Connectivity Roadmap)

## Developing Now

### Lightweight & Flexible

Optimized for operation on low powered, lightweight Windows and Linux devices.

### Real-time Connectivity

Modbus TCP, OPC UA, DNP3, BACnet.

### Multiple Destinations

Data transfer to EDS, PI and/or OCS.

## Considering Next

### Remote Management

Installation, configuration and administration from a centralized location.

### Additional Connectivity

More data source connectivity options.

### Failover

Robust data collection and transfer.

## Researching Future

### Asset Metadata

### Additional Connectivity

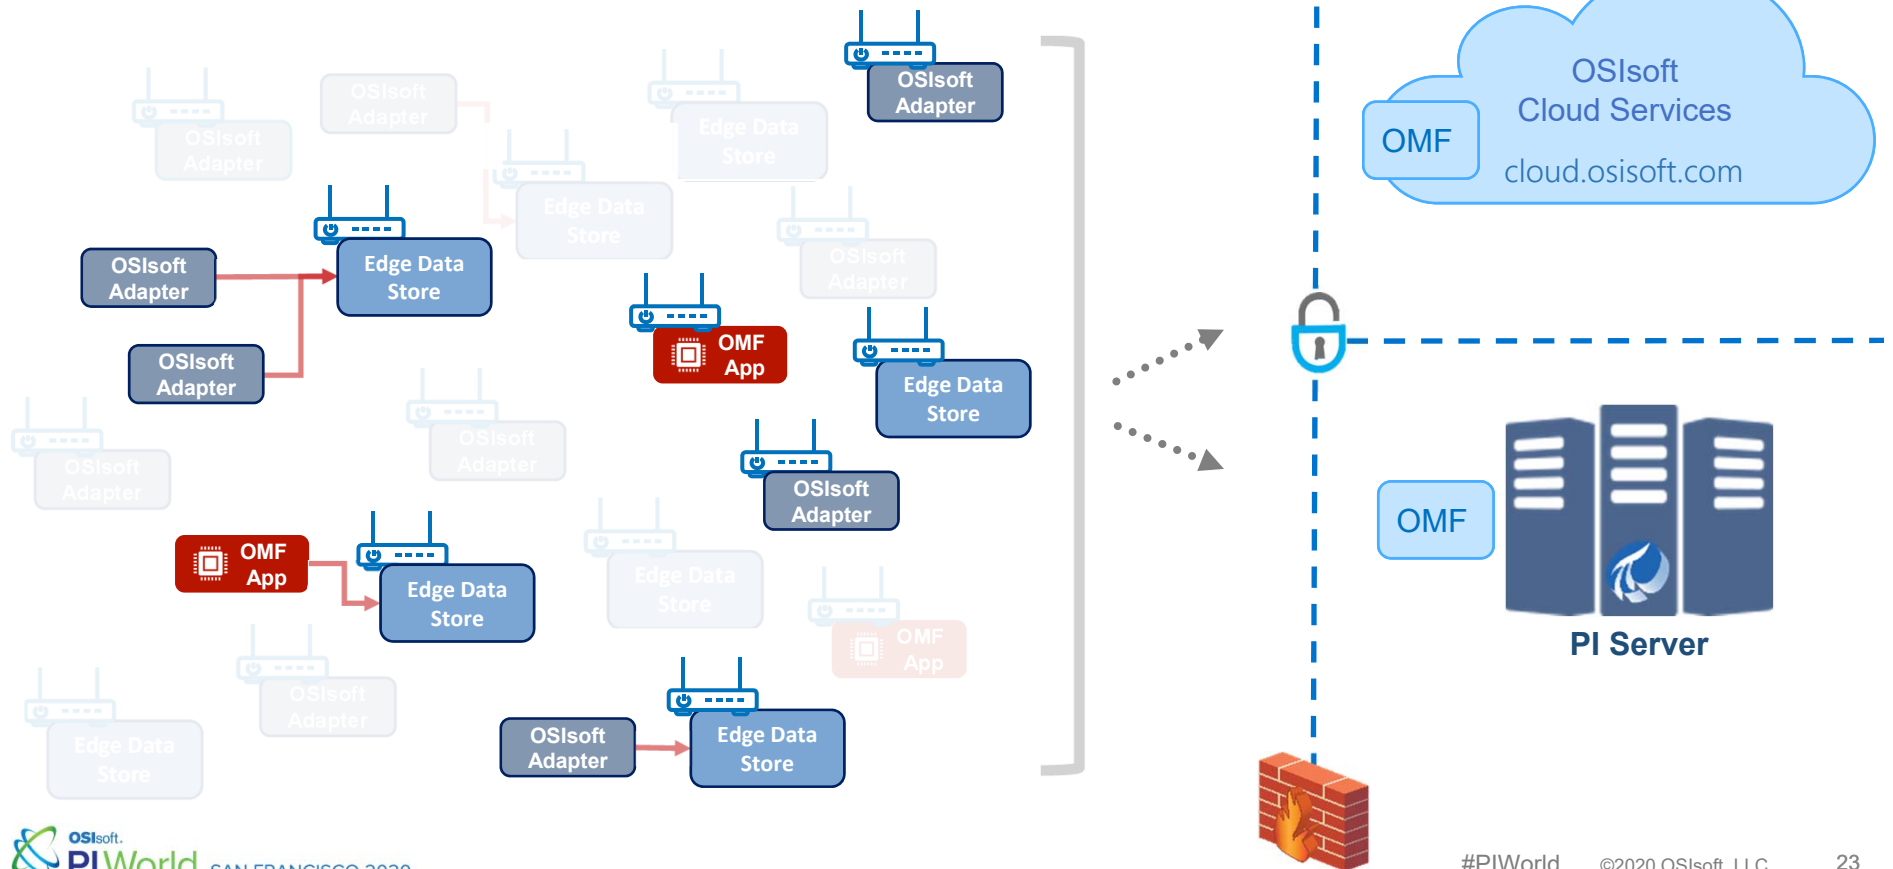

*Available now through the OSIsoft  
Adapter Lighthouse Program*

Roadmap themes: [Manageable Systems](#) | [Seamless Infrastructure](#) | [Increased Value & Scope of Data](#)

OSIsoft's Product Roadmap is for INFORMATIONAL PURPOSES ONLY and is SUBJECT TO CHANGE.
