# Don't worry, it's all recorded!

All presentations will be available online two weeks after the event

The screenshot displays the 'Customer stories' section of a website. At the top, the heading 'Customer stories' is centered, followed by a sub-headline: 'The world's leading companies use the PI System to drive success in operational technology. Read our case studies to learn how they got results. Hear straight from customers in hundreds of presentations.' Below this is a search bar with the placeholder text 'search...' and a 'search' button. Underneath the search bar are two dropdown menus: 'I am interested in any' and 'asset types in All', with a third dropdown labeled 'industry' partially visible. Below the filters, the text 'Results 1-12 of 4,060 in 0.31 seconds' is shown. To the right of this text are four sorting options: 'CARD' (selected), 'LIST', 'RELEVANCE', and 'DATE'. The main content area features three case study cards. The first card is titled 'OIL AND GAS' and shows an image of an offshore oil rig; its headline is 'Tendeka uses real-time telemetry data to improve...'. The second card is titled 'POWER GENERATION' and shows wind turbines; its headline is 'EDF Renewables saves millions using the PI System'. The third card is titled 'FACILITIES AND INFRASTRUCTURE' and shows an interior view of a facility; its headline is 'How CosaTron uses AVEVA Data Hub, formerly OSsoft...'. The AVEVA logo is visible in the bottom right corner of the screenshot.
