AVEVA Simulation & Learning

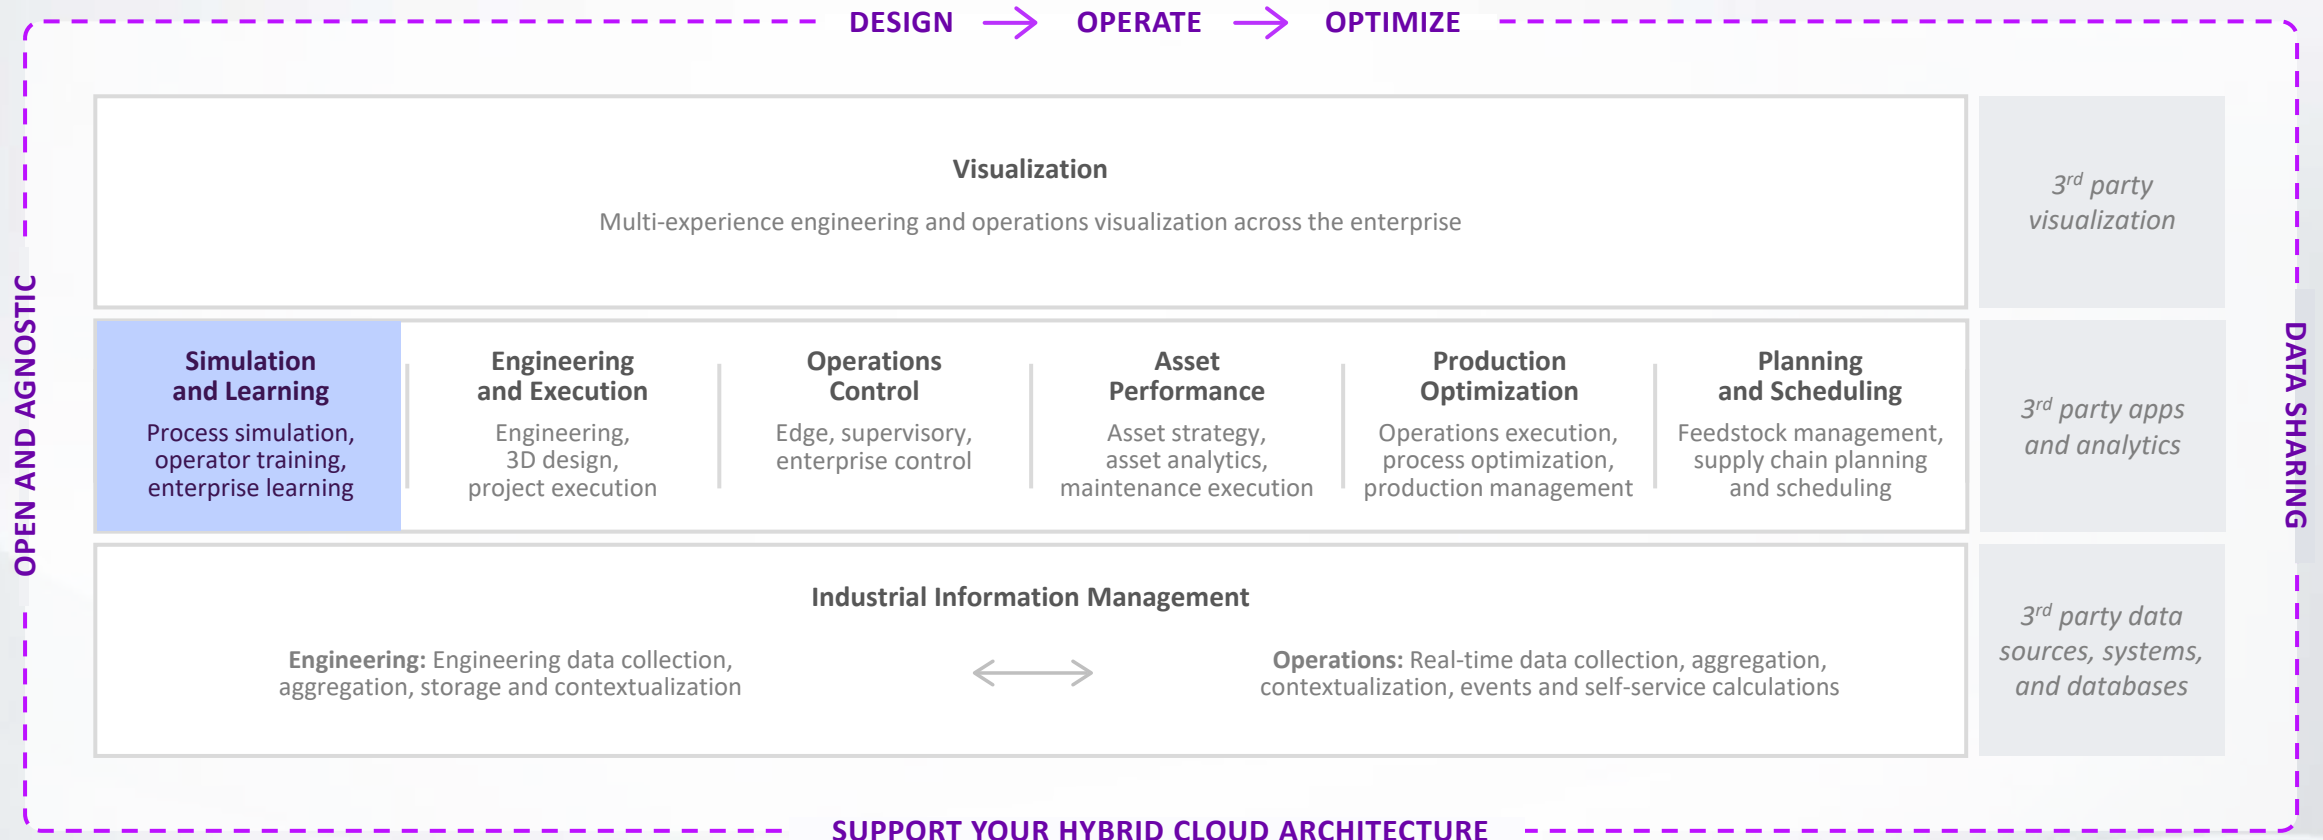

Portfolio Overview

Chloe Smith – Director of Product Management, Simulation & Learning

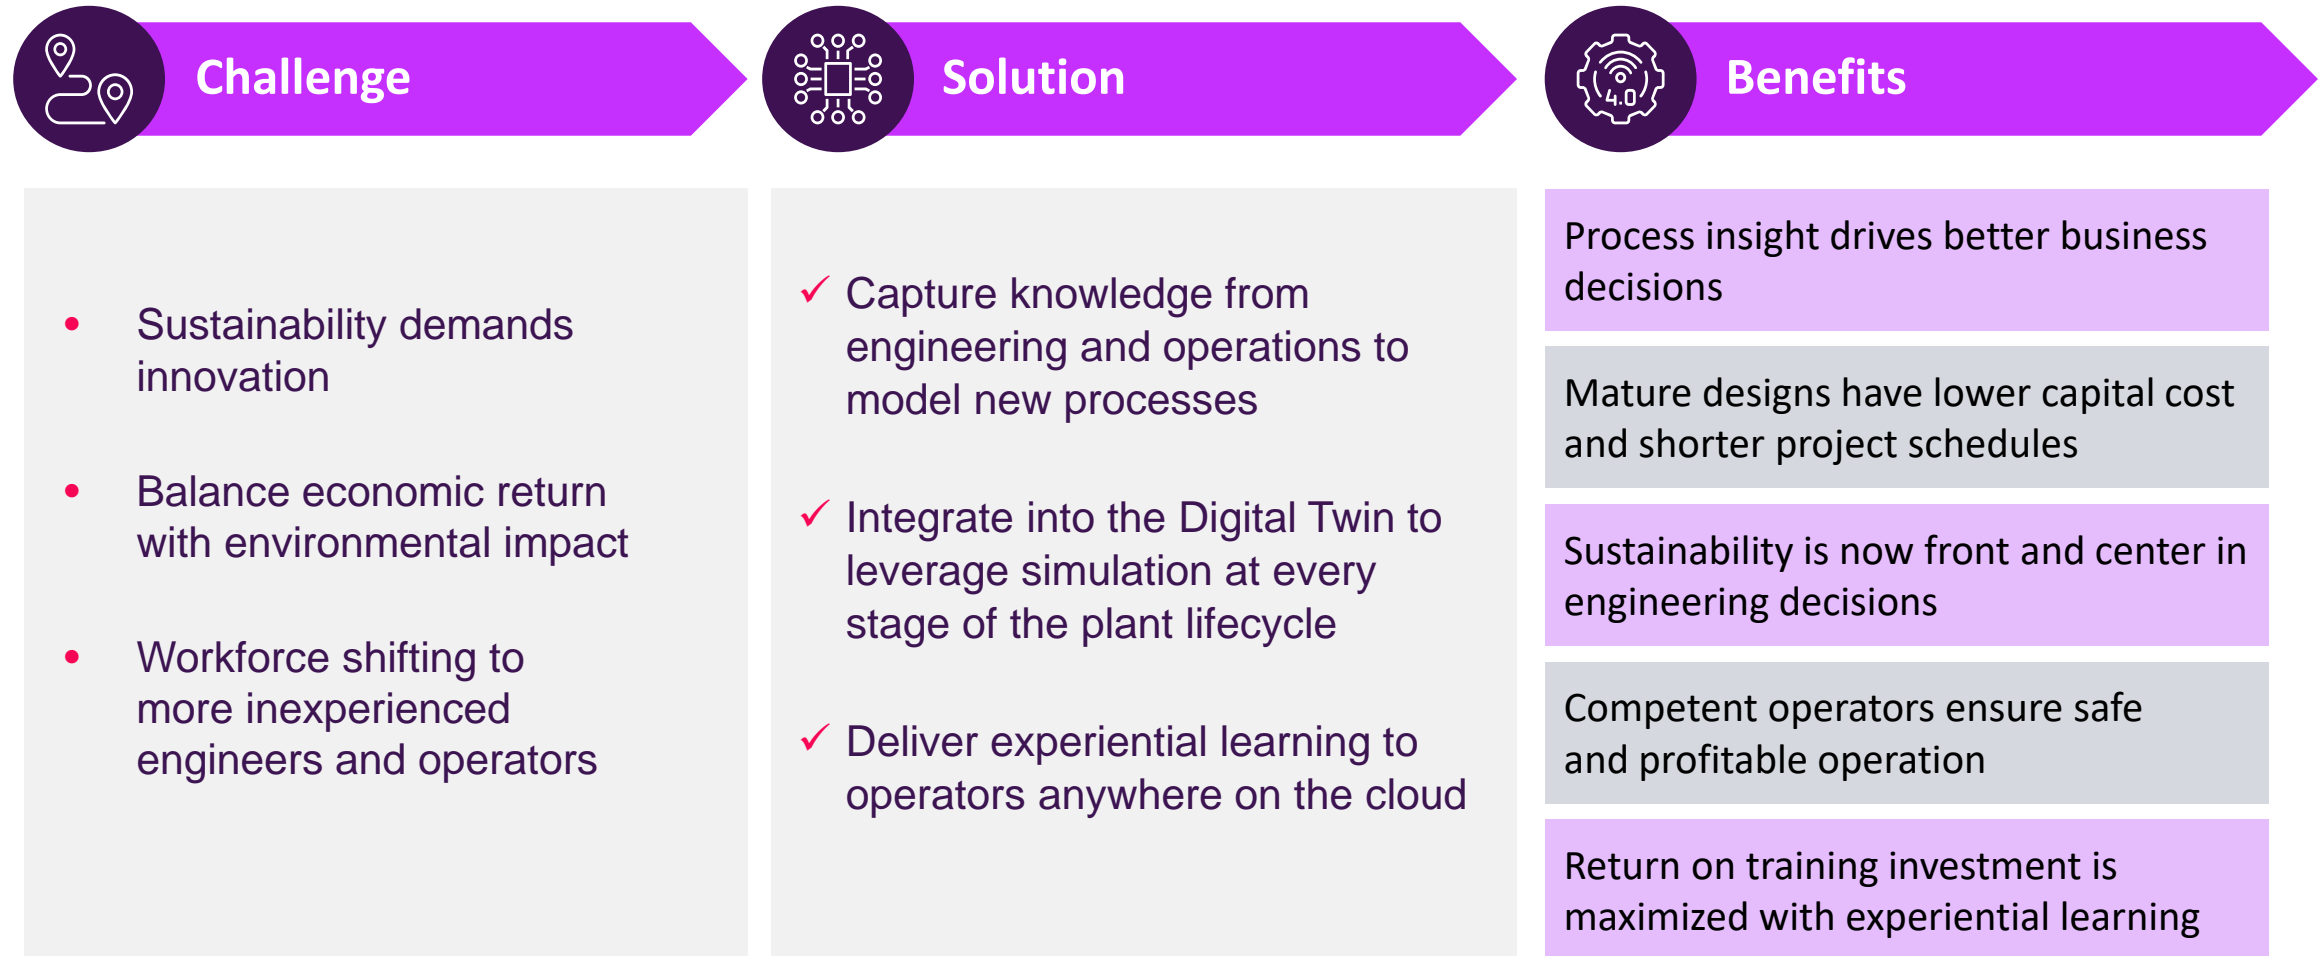

AVEVA

Delivering a complete digital thread, purpose-built for industry

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

AVEVA Simulation and Learning

Decades of expertise

AVEVA has over 50 years' experience in developing leading process simulation software

80% of refining capacity in the world has been designed with AVEVA PRO/II Simulation

AVEVA is the only company to have developed a next generation simulation platform

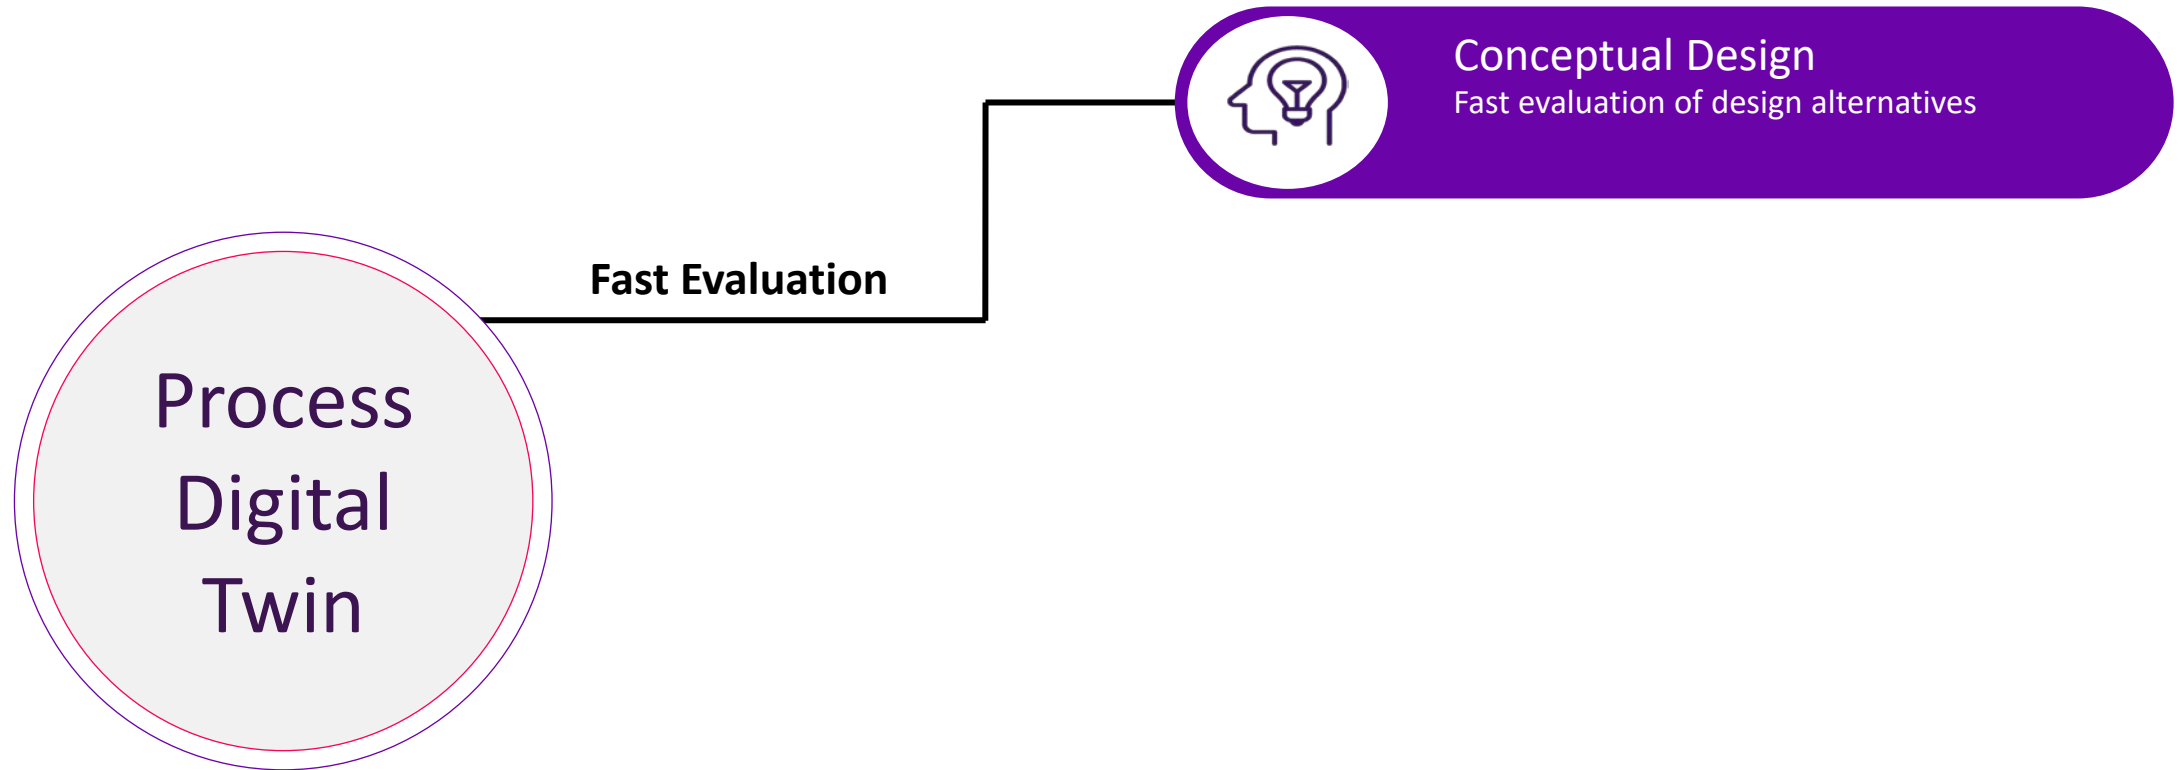

Complete end-to-end offering from Design to Operations

Improved business decisions throughout the process lifecycle

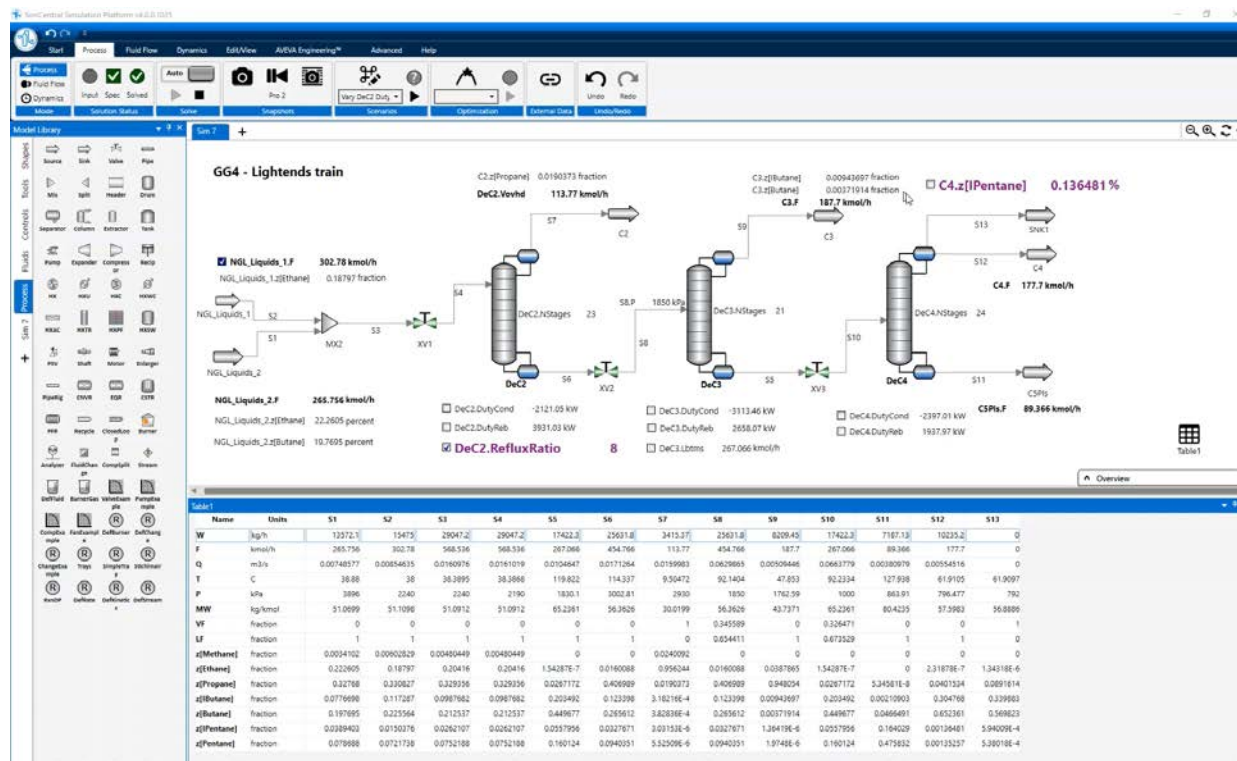

Improved business decisions throughout the process lifecycle

Agile process development

Conceptual Design
Fast evaluation of design alternatives

Highly interactive,
flexible and easy to
use interface

Steady state,
hydraulics and
dynamic simulation

Open and easy model
writing

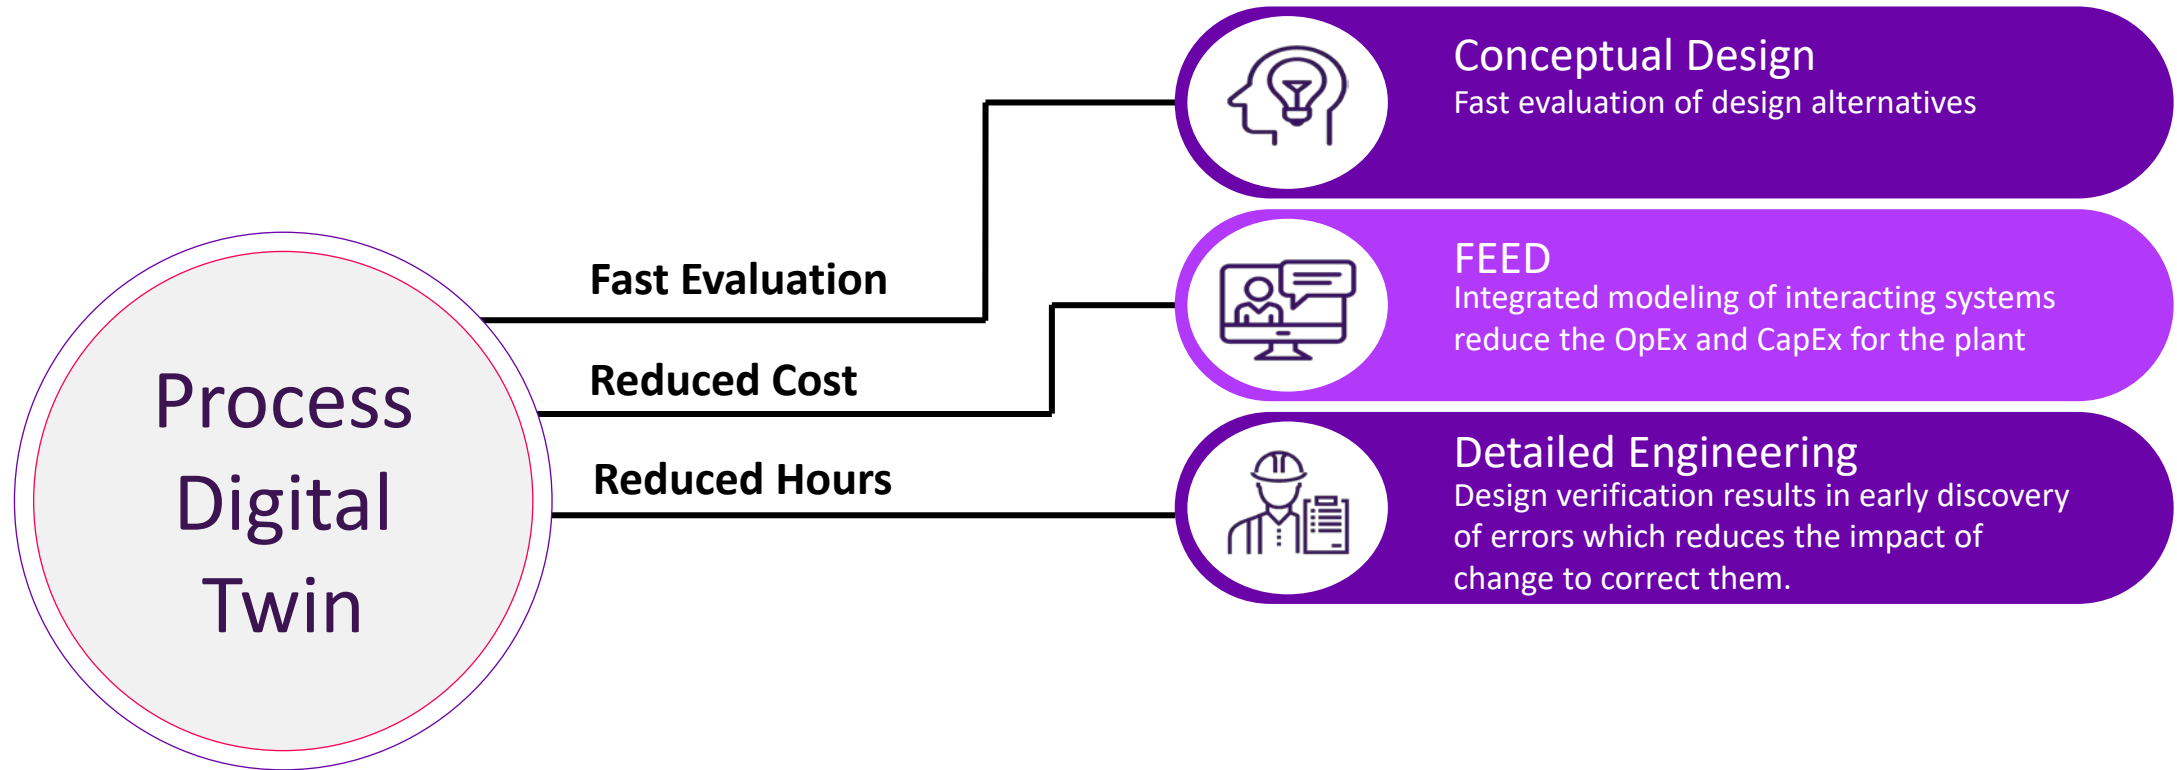

Equation oriented
solver

Speed

Power

AVEVA

Improved business decisions throughout the process lifecycle

Improved engineering workflow and efficiency

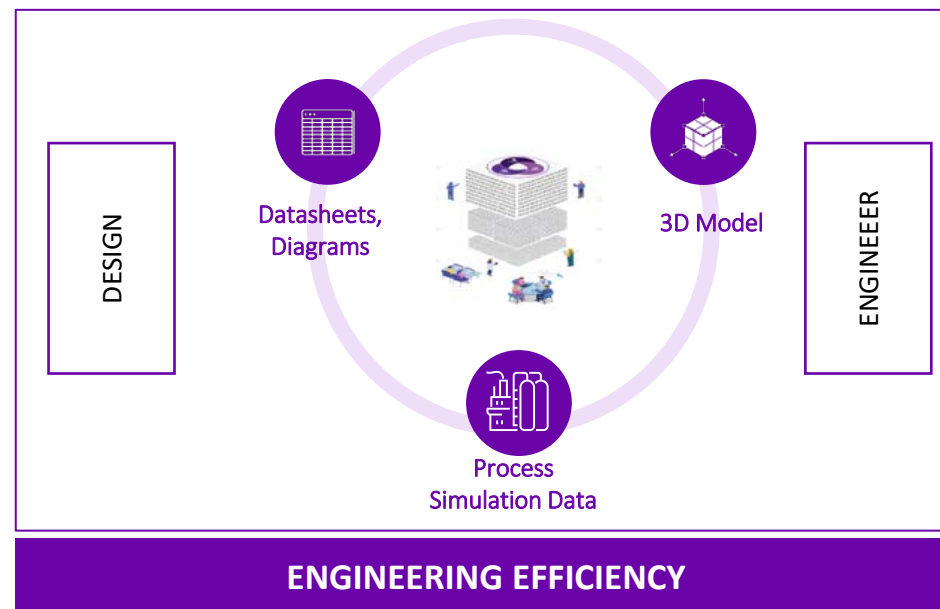

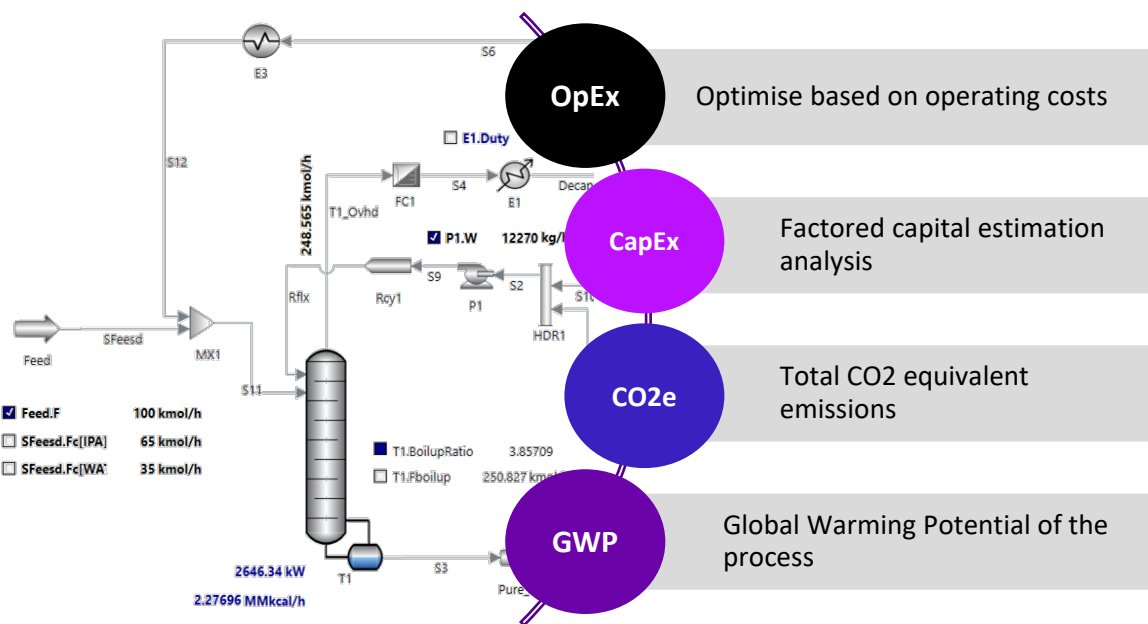

FEED

Integrated modeling of interacting systems reduce the OpEx and CapEx for the plant

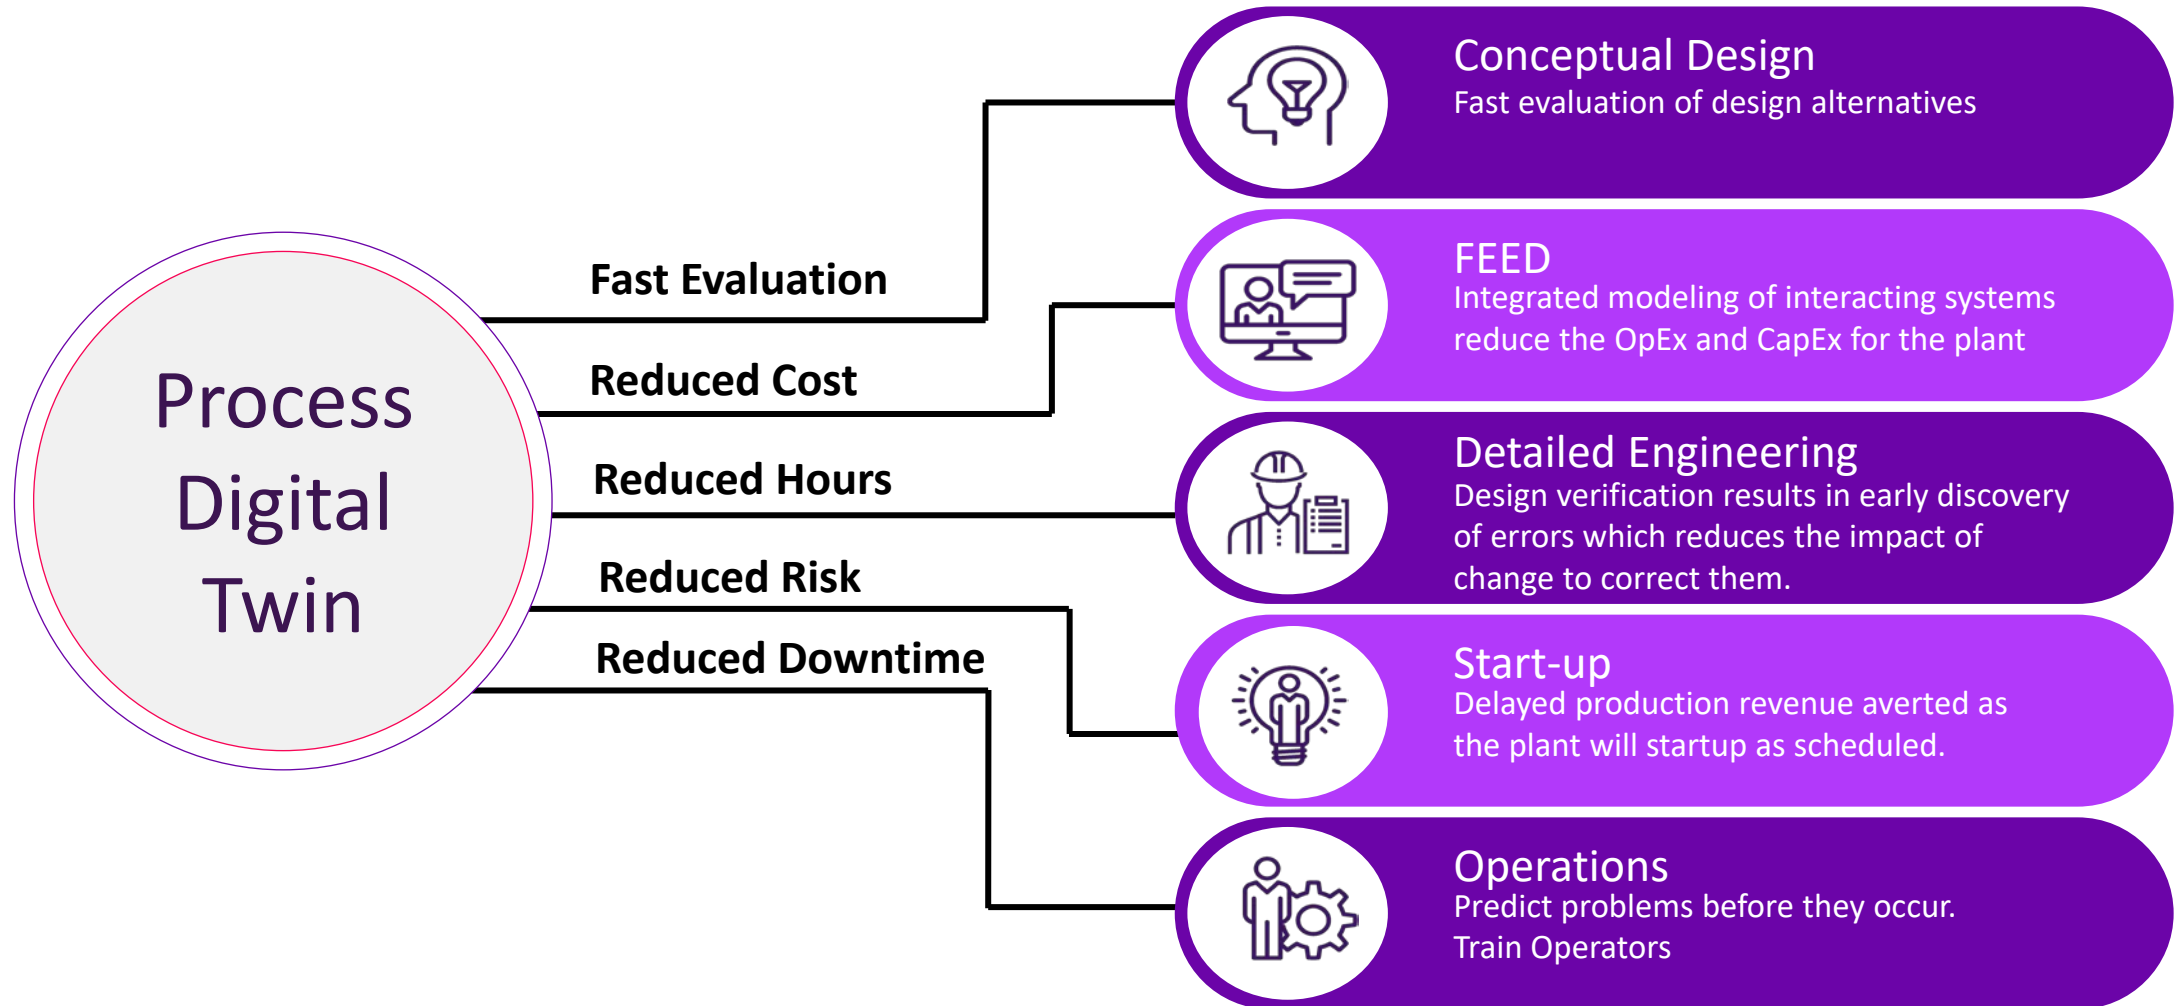

Detailed Engineering

Design verification results in early discovery of errors which reduces the impact of change to correct them.

Improved business decisions throughout the process lifecycle

Streamline start up and shutdown

Start-up

Delayed production revenue averted as the plant will startup as scheduled

- Validation of startup and shutdown procedures
- Uncovering of potential hazards
- Virtual commissioning

Dynamic process
simulations

Replicated
interfaces

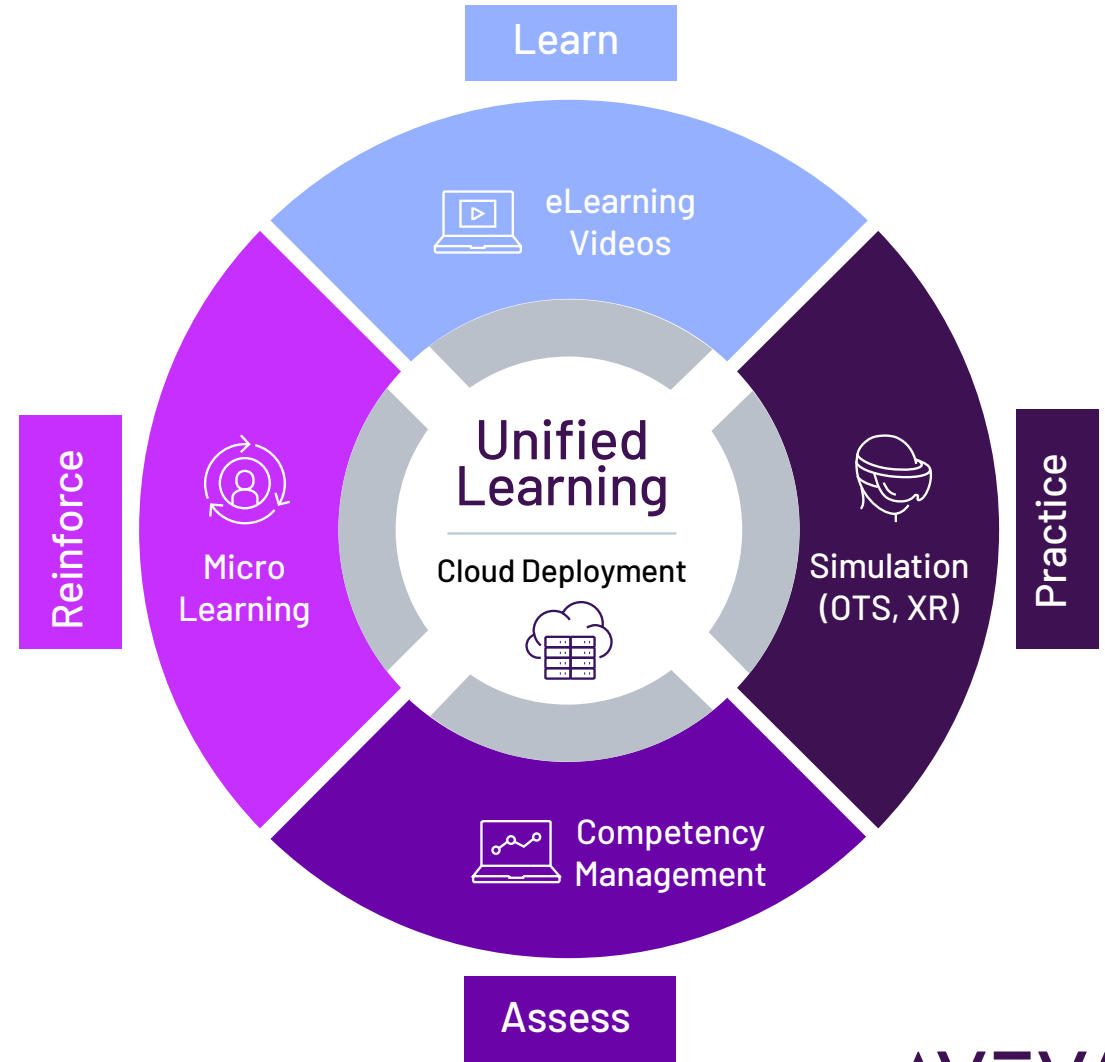

Emulated control
systems

Train plant workforce for sustainable operations

Use high fidelity simulation, virtual reality and experiential learning to train operators to:

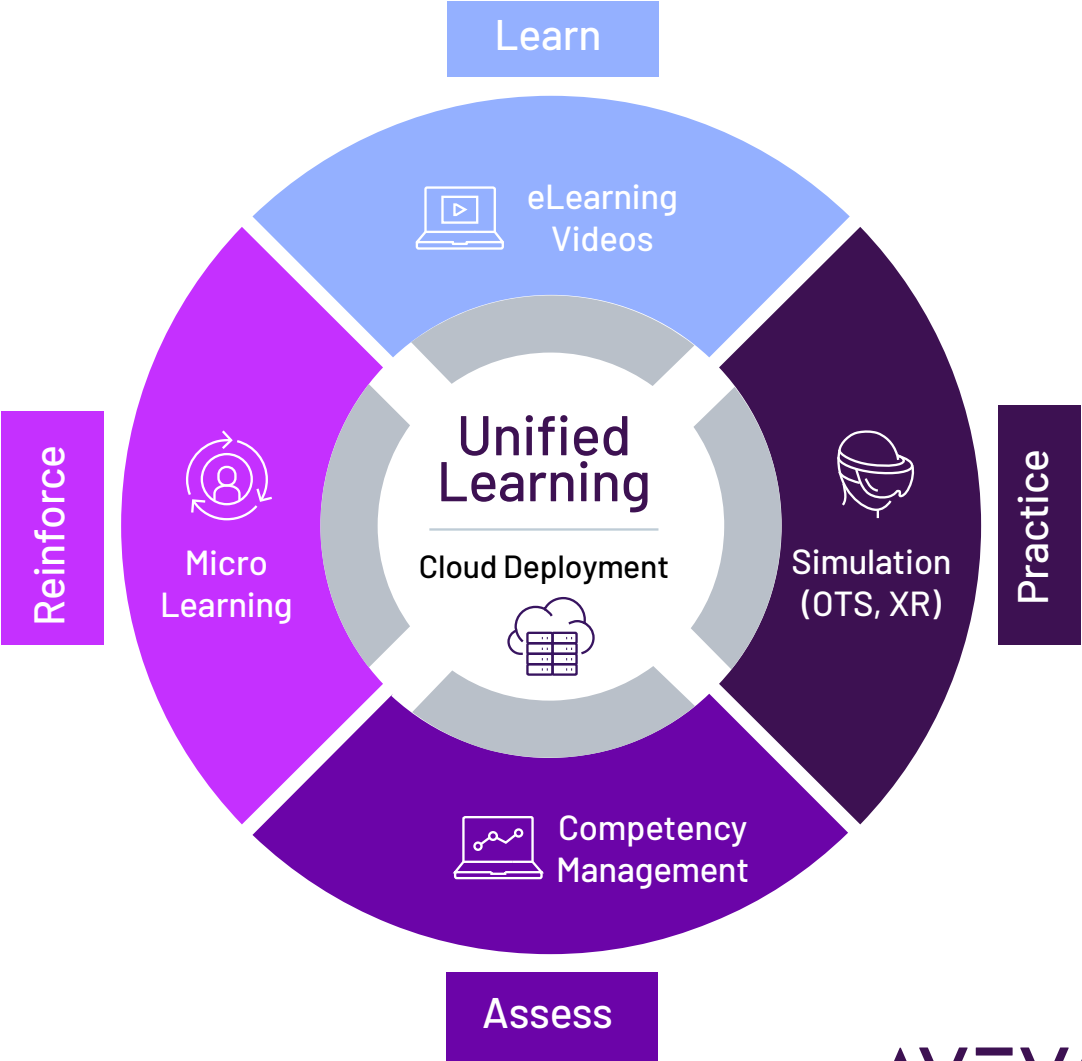

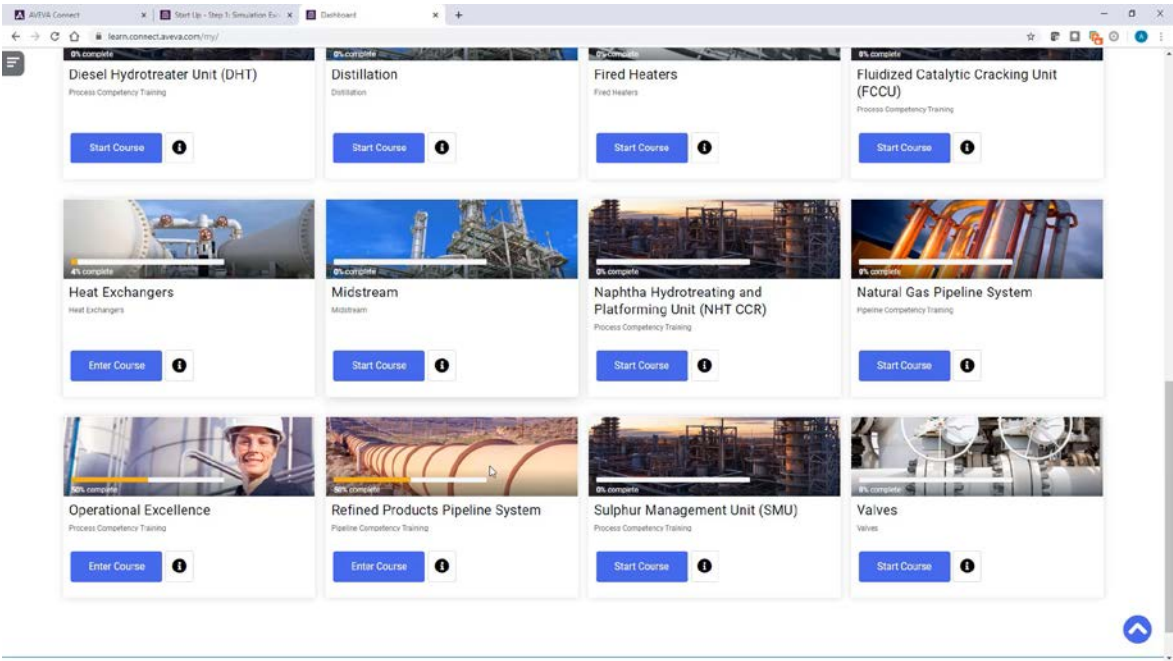

- Identify emergencies and mitigate risks
- Prevent leakages and emissions that might cause damage to the environment
- Avoid major accidents

Train plant workforce for sustainable operations

Operations
Predict problems before they occur
Train Operators

TotalEnergies

TotalEnergies uses AVEVA's cloud-based training to safely simulate dangerous environments

Training programs reduced in length from several weeks to a few hours

The cloud-based training provides access from anywhere and at any time

Train operators how to cope with dangerous incidents that are otherwise difficult to practice

Solution: AVEVA Operator Training Simulators

"It was key to combine AVEVA's proven leadership in OTS training with the secure operational agility of a cloud-based platform. This has never been more important than today when global lockdowns force many teams to operate remotely."

Meriam Chebre, Competences Program Manager, Total

AVEVA

AI-driven predictive asset optimization

Combine engineering knowledge and machine learning for operational insight

Equipment Asset
Sensor Data

PI System

AVEVA Predictive
Analytics

- Bearings
- Vibrations

AVEVA Process
Simulation

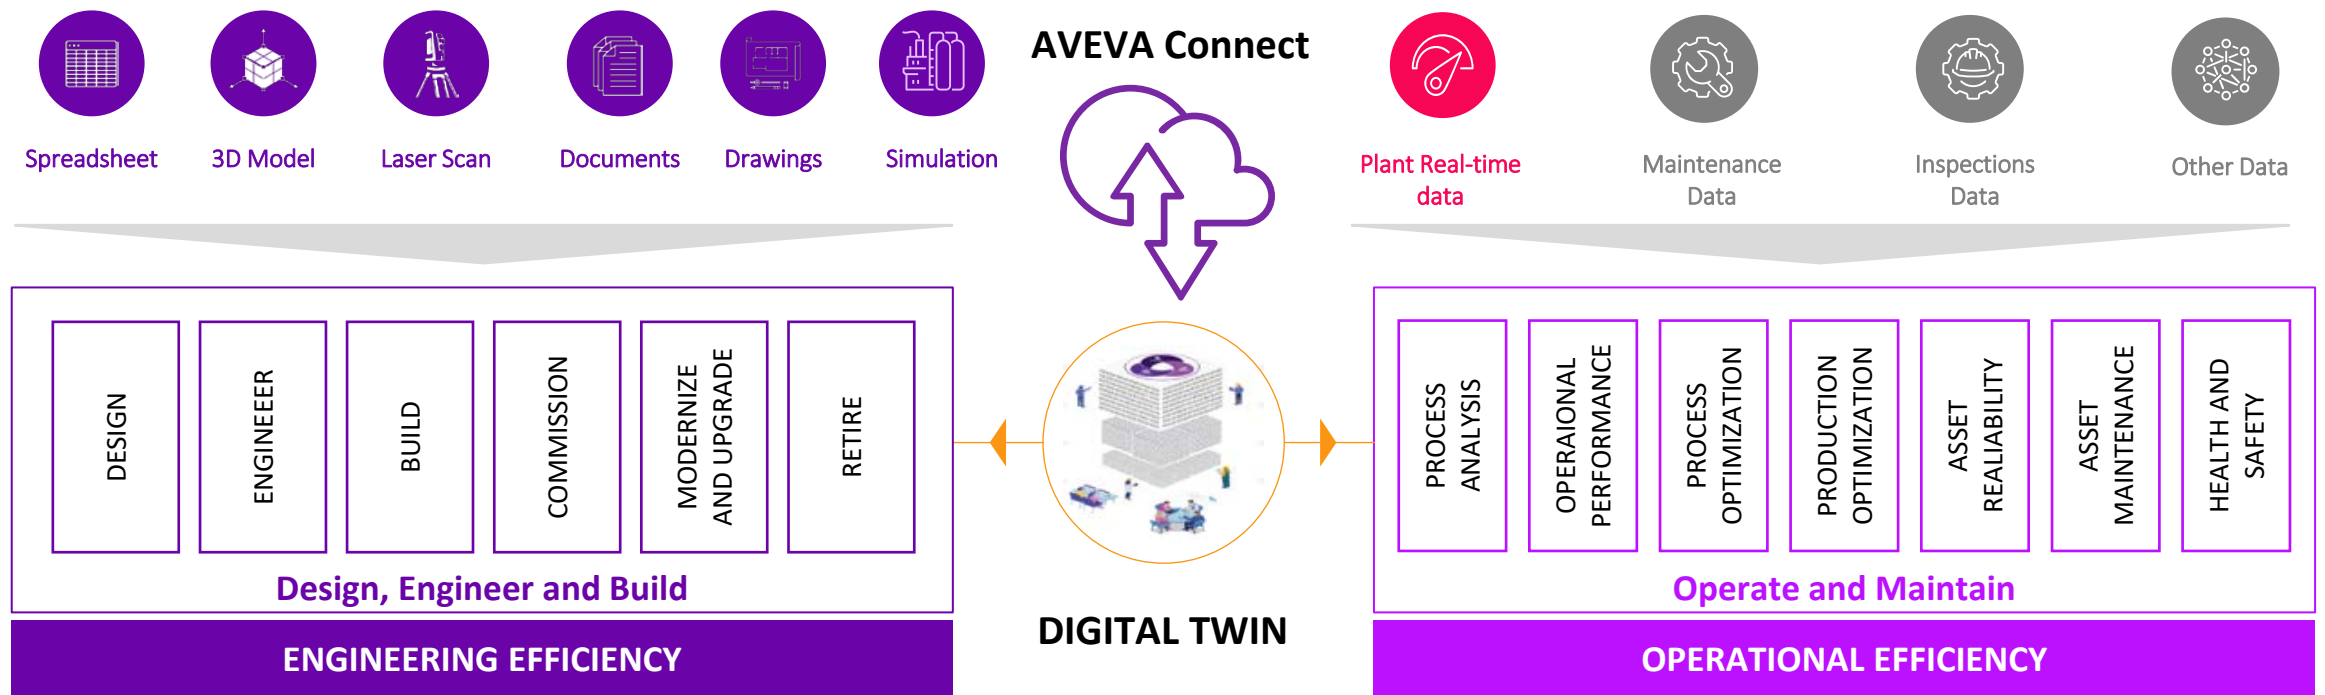

- Pump NPSH
- Efficiency
- Compressor Head
- HX Fouling
- Instruments

Dashboards

- Time to Failure
- Remaining Useful Life Estimation (RULE)
- Prescriptive Analytics
- Performance Analysis
- Impact Analysis
- Process Optimization
- Early Warning Notification System

360°
View of
Risk

Faster and more trusted decision making with the creation of a digital thread

Sustainability through Process Simulation

An integrated platform to design and optimize sustainable processes

Accelerate the engineering cycle to design sustainable processes and plants at the speed the market demands

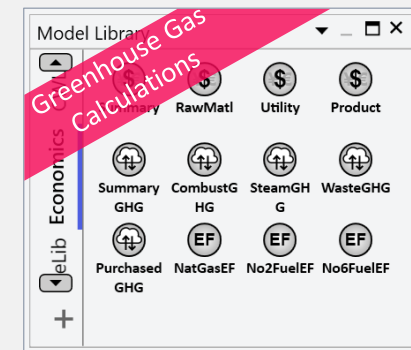

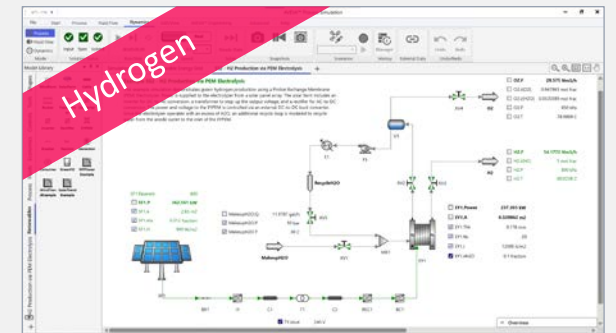

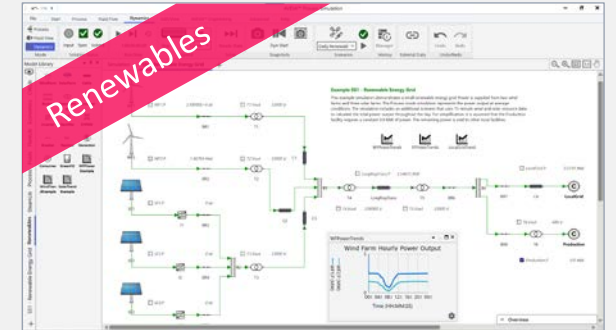

Design processes that will meet net zero targets with dynamic renewable power and hydrogen systems

Collaborate across disciplines to explore all dimensions of a potential design and quantify the impact on sustainability, feasibility, and profitability

AVEVA Process Simulation

Bring agility to the entire process lifecycle of design, simulation, training, and operations to deliver the process side of the Digital Twin.

As one of the world's largest polymer manufacturers, Covestro is entirely committed to the Circular Economy

AVEVA™ Process Simulation cuts inefficiencies in process design, engineering, and simulation

Covestro can make new, bio-based processes as reliable and profitable as the processes they've been optimizing for decades

AVEVA

Accelerate digital transformation of process industries

Leading the path to a sustainable future

1

**Lifecycle modeling: from
Concept to Operations**

2

**Improved Engineering
workflow**

3

**Sustainable process design
and operations**

Thank you

ABOUT AVEVA

AVEVA is a global leader in industrial software, driving digital transformation and sustainability. By connecting the power of information and artificial intelligence with human insight, AVEVA enables teams to use their data to unlock new value. We call this Performance Intelligence. AVEVA's comprehensive portfolio enables more than 20,000 industrial enterprises to engineer smarter, operate better and drive sustainable efficiency. AVEVA supports customers through a trusted ecosystem that includes 5,500 partners and 5,700 certified developers around the world. The company is headquartered in Cambridge, UK, with over 6,500 employees and 90 offices in over 40 countries.
