# AVEVA Enterprise SCADA Innovations and Roadmap

Doug Warren, VP Midstream Business

**AVEVA**

# O&G Pipeline Industry Imperatives

## Industry Drivers & AVEVA Differentiation

### Public safety and environmental regulations

Most highly distributed, highly available solution with defense-in-depth security layers

Proven Control Room Management applications to enable regulatory compliance

### Operations optimization

Proven Liquids & Gas applications for safety, efficiency, and optimization

### Reduced Total Cost of Ownership

Multi-year program to attack TCO and simplify upgrades

## Growing / New Imperatives

### Security ++

Industry leading security to support the most stringent standards and regulations

### Industrial Transformation

Intelligent Midstream: Unmatched portfolio to deliver integrated Edge to Enterprise solutions

### Sustainability

Helping customers achieve sustainability goals is core to AVEVA's mission

# Intelligent Midstream

Combining the world's most trusted pipeline management system with the world's leading information management solution

## Enterprise Pipeline Management

### Global leader in Pipeline Management for 35+ years

- Deep domain knowledge
- 35% global market share in Midstream SCADA software \*
- 1 + miles of pipe
- 60% of U.S. Oil and Gas Pipeline Movement Supported
- 30 / 40 US Liquids Pipelines trust AVEVA

## OSIsoft's PI System

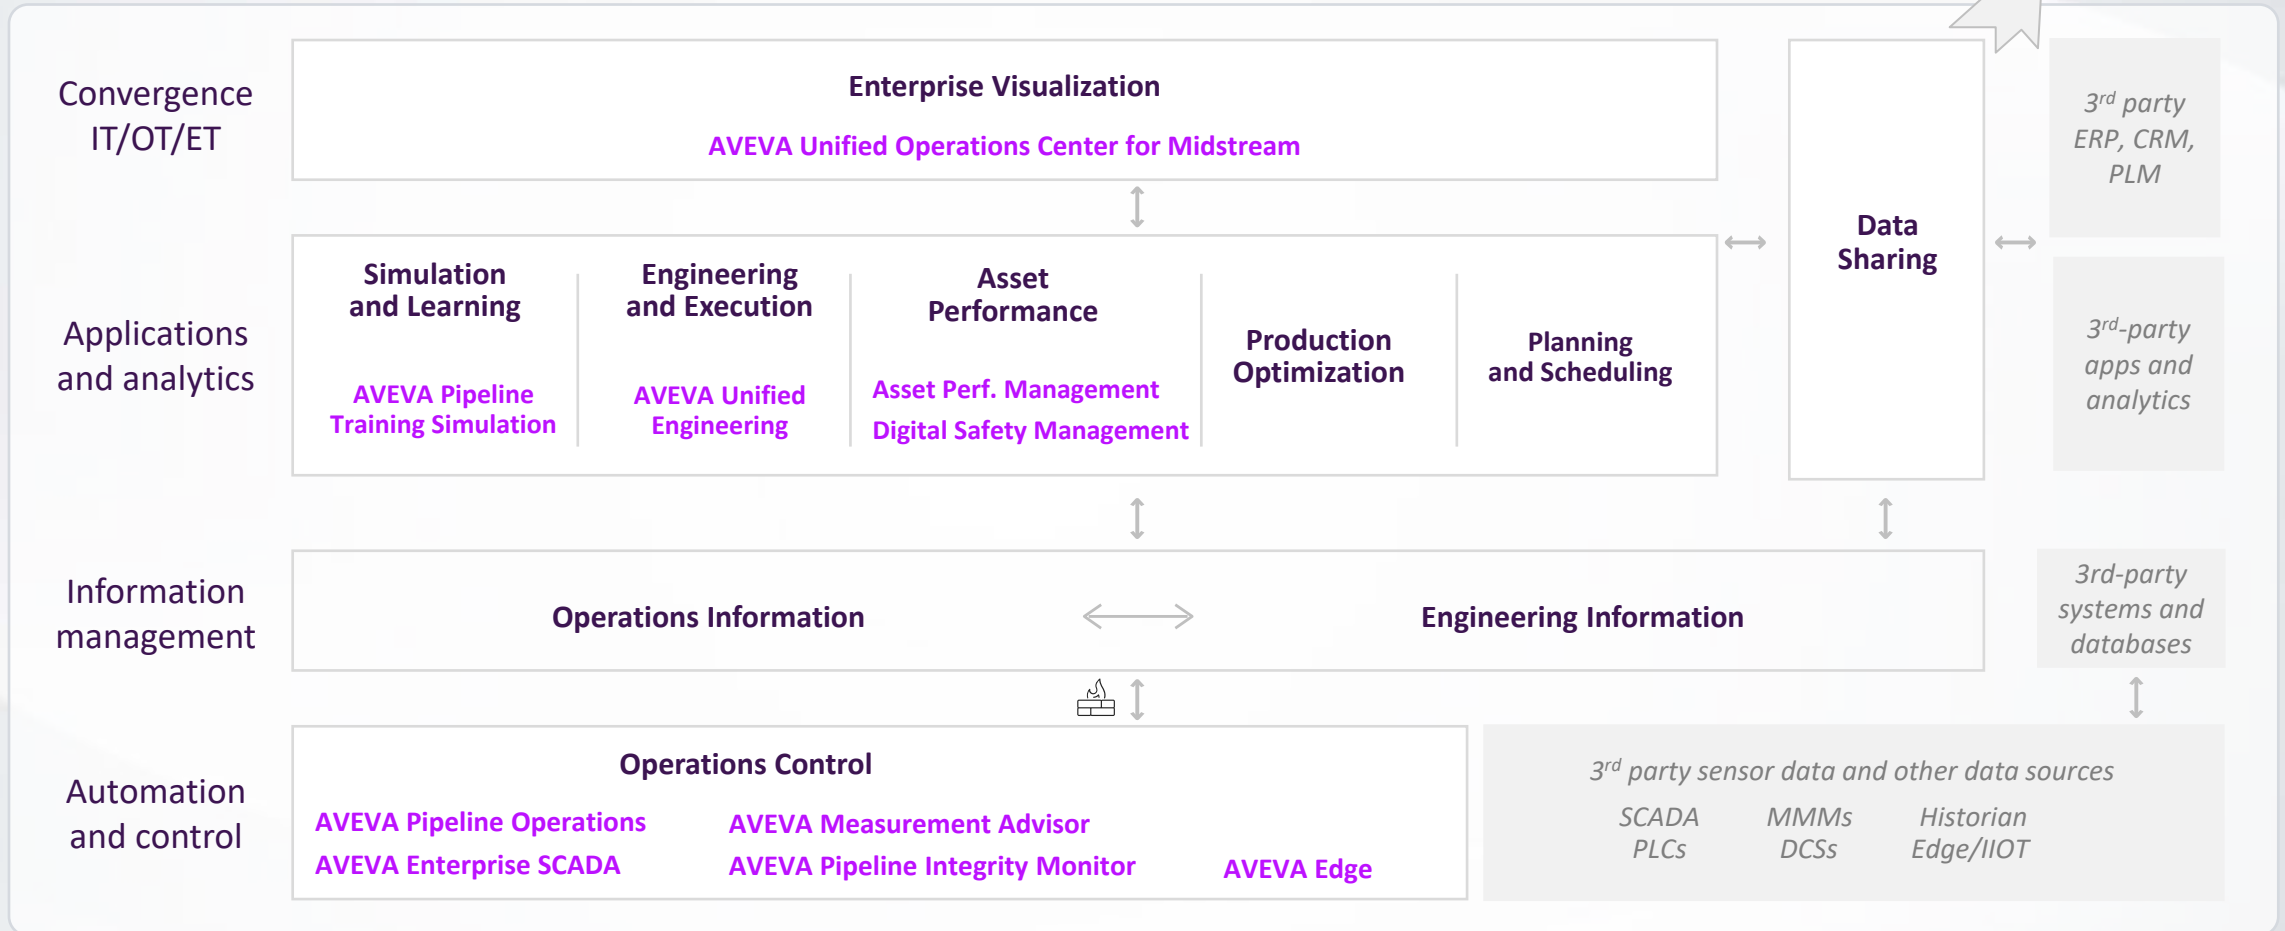

### Industrial information management industry standard for 25+ years

- 15 of the top 20 global Midstream companies rely on PI System
- 70% of daily oil and gas production is facilitated by the PI System
- Foundational data strategy component for 85% of the largest integrated O&G companies

# Intelligent Midstream

Accelerating digital transformation in Midstream

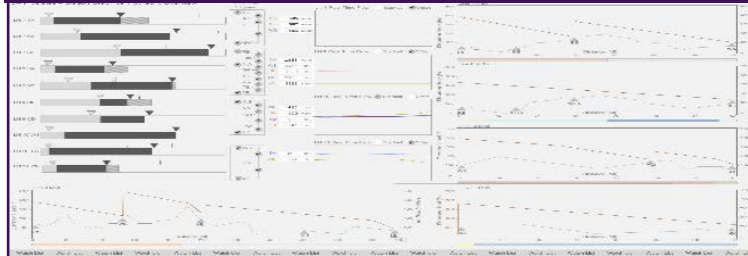

# Platformed and Modernized SCADA

## Modernized SCADA / Lower TCO

- Re-architected for upgradability and simplified deployment
  - 60%+ deployment hour decrease
- World class quality and reliability
- Performance for the world's largest pipelines
- New comprehensive extensibility
- OPC UA and MQTT Sparkplug B

## Advanced Control Room Management

- Built over many years with industry
- Situational awareness, safety, & regulatory compliance
- Out of the box ASM / API-1165 compliant displays
- Industry leading alarm handling
- High performance trending

## Industry Leading Cybersecurity

- “Baked In” from the beginning
- ISASecure SDLA and ISO 270001 certified
- Defense in-depth focus
- Hardened Reference Architecture
- U.S. TSA Security Directives compliance assistance

# Trusted Advanced Pipeline Applications

## Modernized Pipeline Applications

- Productized 30+ years of functionality
- Expanded leak detection methods
- Pipeline Training Simulator
  - Comprehensive Unified Learning solution
  - Options to meet every training need
- Comprehensive Measurement solutions
  - Measurement Analyst efficiency
  - Cloud (coming soon)

## Augmented Intelligence & Automated Operations

- Automatically detect and avoid unsafe operating conditions
- Predictive and Lookahead gas apps
- Enhanced leak detection analytics and visualization
- No code / low code automated operations
- AI & Simulation driven optimization

# What's New: No Code / Low Code Automated Operations

## Simplified & flexible automation

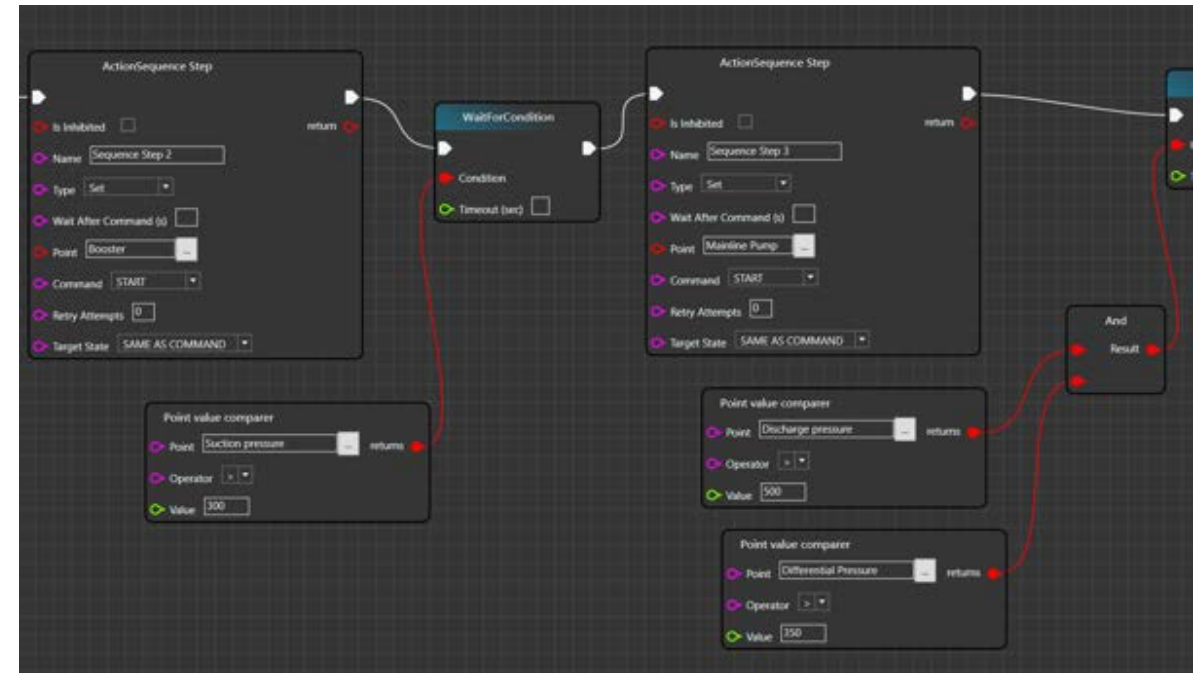

- Graphical coding environment
- Pipeline shutdown, pump startup, automated procedures...

## “Nodes” specific to pipeline automation

- Specific SCADA commands
- Timed and condition-based wait options
- Conditional logic to control execution path

## Designed for Mission Critical Systems

- High Availability & Disaster Recovery features

Easy drag and drop interface

EXAMPLE USE CASES

---

# Intelligent Midstream solutions that deliver results

Rapid return on investment scalable across your organization

**AVEVA**

# Intelligent Midstream

Asset Health

Process Optimization

Energy Efficiency

Regulatory Compliance

Quality Tracking

Carbon Emissions

Safety & Security

Energy Efficiency

## Example Use Cases

- Energy optimization
- Carbon footprint tracking and minimization
- Gas Quality Tracking
- Compressor modeling and optimization
- Look-ahead and what-if simulation
- DRA optimization
- Pump efficiency
- Batch tracking / landing
- Swing operation optimization
- Product compatibility checking
- Pipeline startup and shutdown
- Hydraulic optimization
- Schedule optimization

EXAMPLE USE CASE

---

# Energy optimization and decreased carbon footprint

Using reinforcement learning and AI

# Energy Optimization and Lower Emissions

## Lower costs and decreased carbon footprint

### Challenge

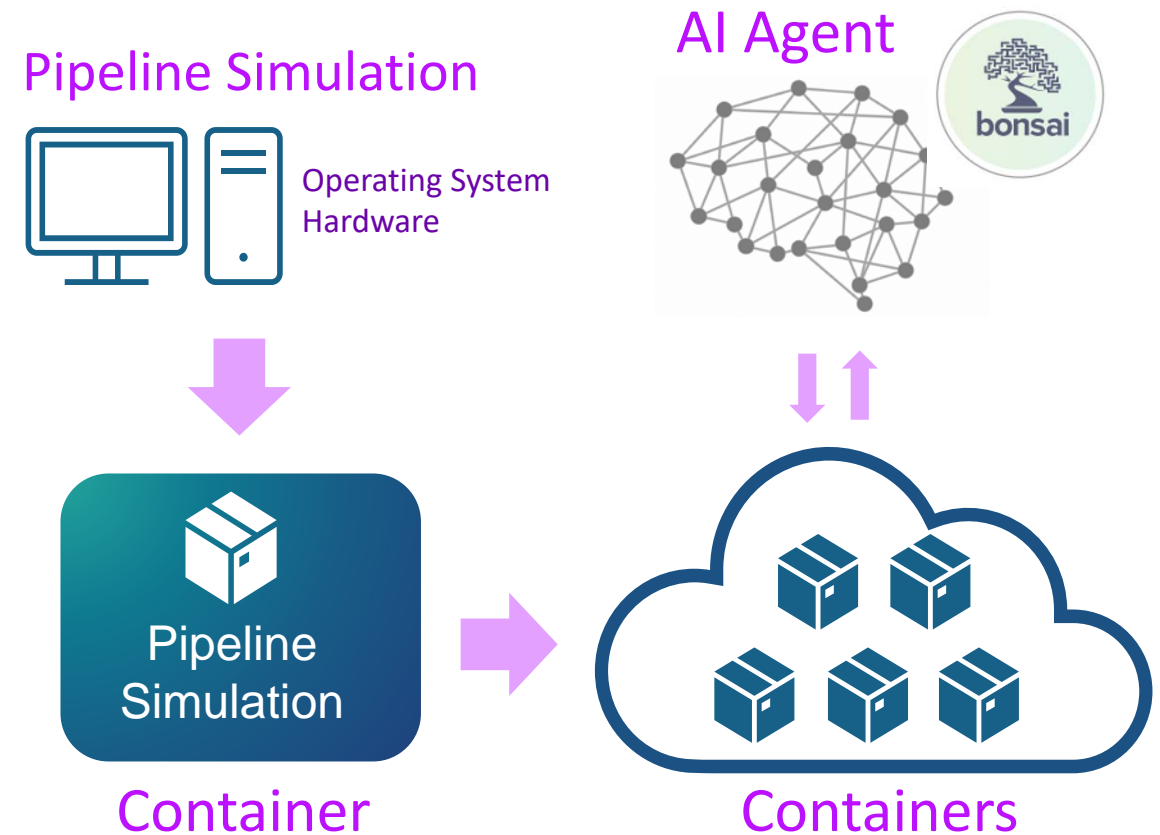

- Incorporate energy utilization and carbon emissions in daily operating decisions to decrease costs and carbon emissions
- Energy is the #1 cost of most pipelines; Rising year over year
- Ambitious greenhouse gas reduction targets to meet

### Solution

- AVEVA Pipeline Simulation, Microsoft Bonsai AI, AVEVA Connect, AVEVA Enterprise SCADA
- Machine Learning algorithm tuned with simulation and live data to accurately model and optimize power consumption and emissions
- Operator provided with optimal equipment line up and DRA injection rates for current operating conditions and objectives

### Results

- 14% reduction in power consumption
- Reduced DRA costs
- Opportunity to decrease \$52MM/year -> \$45MM/year

Notes

# Intelligent Midstream

## Additional reinforcement learning and AI use cases

- Optimize  Trained to optimize energy use, emissions, throughput, or cost
- Operate  Trained to automate pipeline operations such as startup, shutdown, and batched operations
- Advise  Provide real time alerts and recommendations to the Operator
- Train  Used for Operator training and qualification scenarios

EXAMPLE USE CASE

---

# Agile decision making to seize a revenue opportunity

AVEVA

# Capacity Optimization to Deliver Additional Volume

## Challenge

- Spot opportunity to deliver 30 Mbbls additional volume
- Evaluate capacity across multiple pipeline systems
- Quickly analyze power, DRA, and re-allocation options to deliver more volume

## Solution

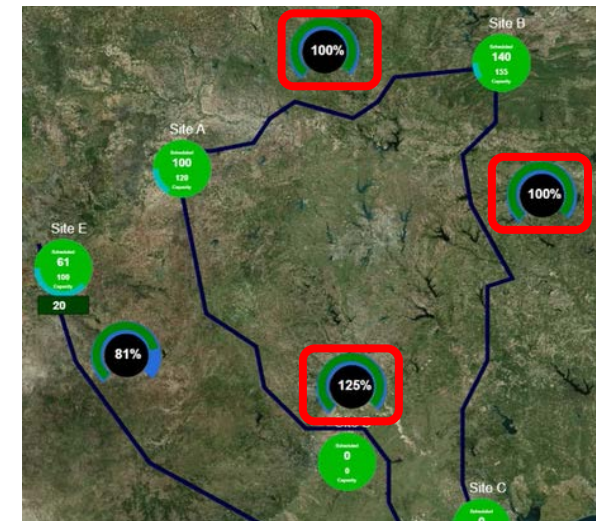

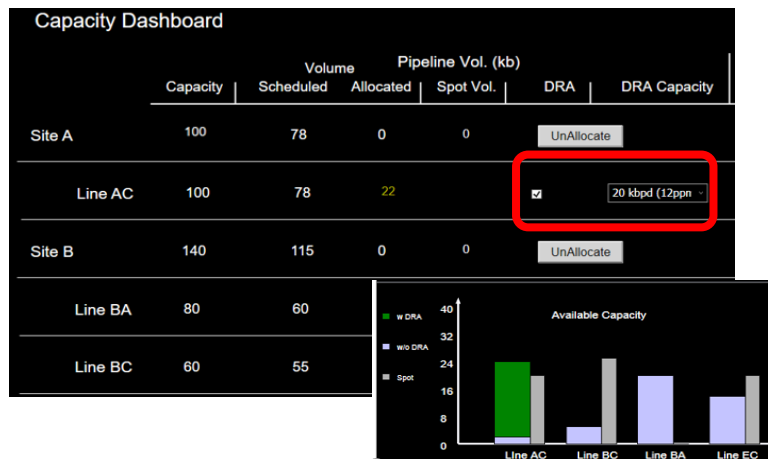

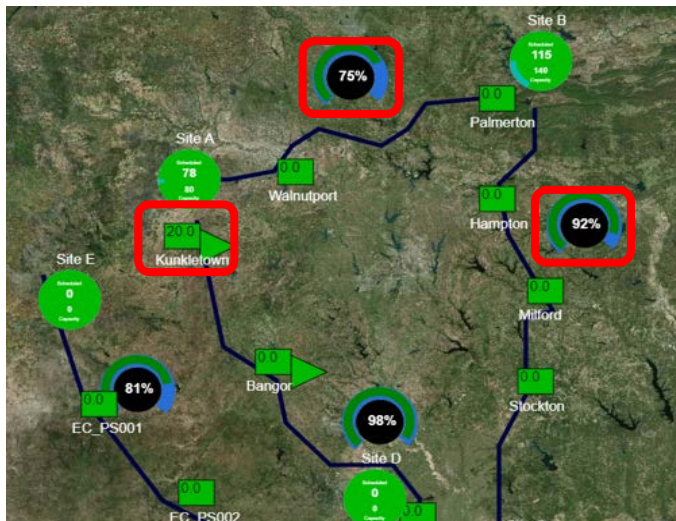

- AVEVA Unified Operations Center, PI System, Pipeline Simulation, 3rd-party power optimization
- Increase capacity through DRA, re-allocate volumes across systems, and manage storage to deliver the additional 30 Mbbls

## Results

- Incremental revenue
- Improved service levels
- Increased asset utilization

# Capacity Optimization to Deliver Additional Volume

- Easily see capacity, storage, and DRA utilization across systems
- Drill down for increasing detail
- Pinpoint bottlenecks and opportunities across systems

- Check and lock in DRA scenario on A-C
  - In AVEVA Pipeline Simulation or 3<sup>rd</sup>-party tool
- Quickly evaluate Re-allocation options across systems
- Target can be achieved
  - Increase A-C capacity with DRA
  - Split incremental volumes between B-A and B-C

- Submit new nominations across systems
- Lock in new DRA and re-allocation plan
- Decision made in hours vs. days
  - Eliminate manual data gathering and difficult cross group communication challenges

#### ABOUT AVEVA

AVEVA is a global leader in industrial software, driving digital transformation and sustainability. By connecting the power of information and artificial intelligence with human insight, AVEVA enables teams to use their data to unlock new value. We call this Performance Intelligence. AVEVA's comprehensive portfolio enables more than 20,000 industrial enterprises to engineer smarter, operate better and drive sustainable efficiency. AVEVA supports customers through a trusted ecosystem that includes 5,500 partners and 5,700 certified developers around the world. The company is headquartered in Cambridge, UK, with over 6,500 employees and 90 offices in over 40 countries.
