

AVEVA and The PI System

Because we're better together!

AVEVA

A large offshore oil rig is illuminated at night, with its complex network of pipes, walkways, and structural beams clearly visible against the dark sky and water. The rig's lights create a strong reflection on the dark surface of the ocean.

Unlocking real-time data and operations insights

Achieve **ROI now** and accelerate time-to-value for **digital transformation**

AVEVA

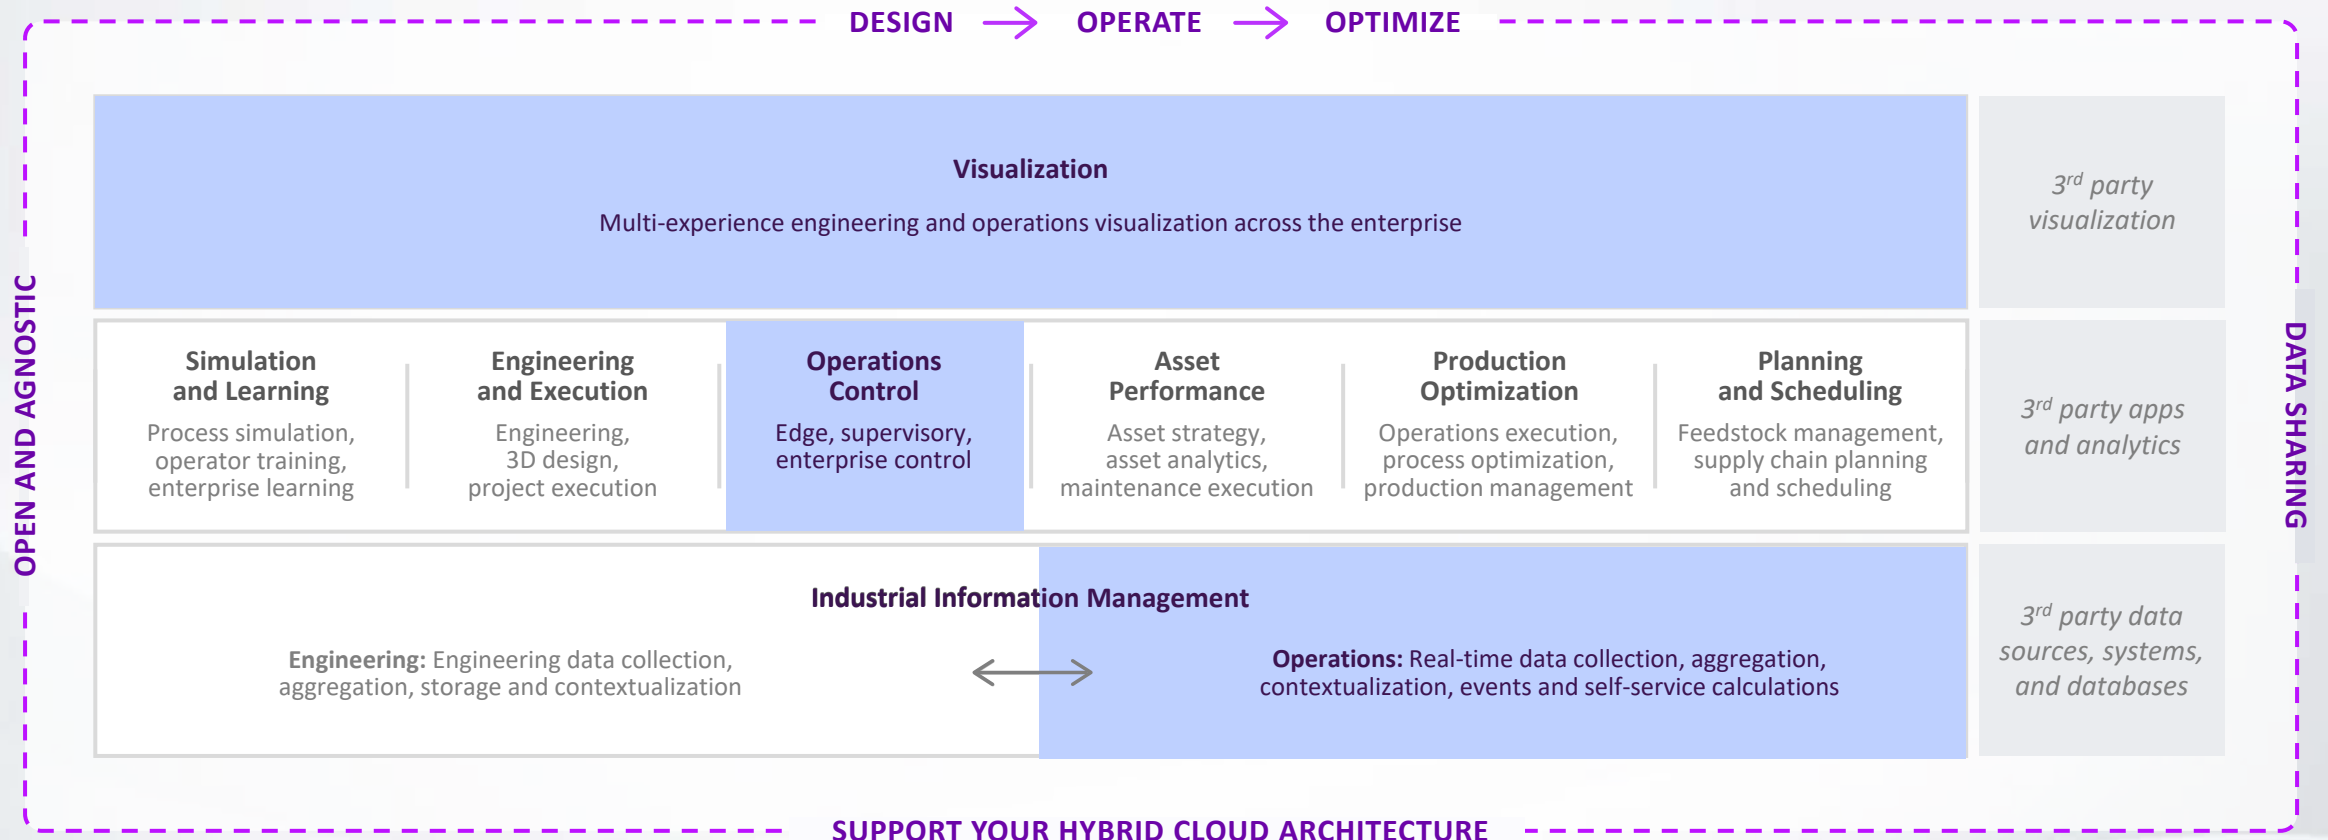

Delivering a complete digital thread, purpose-built for industry

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

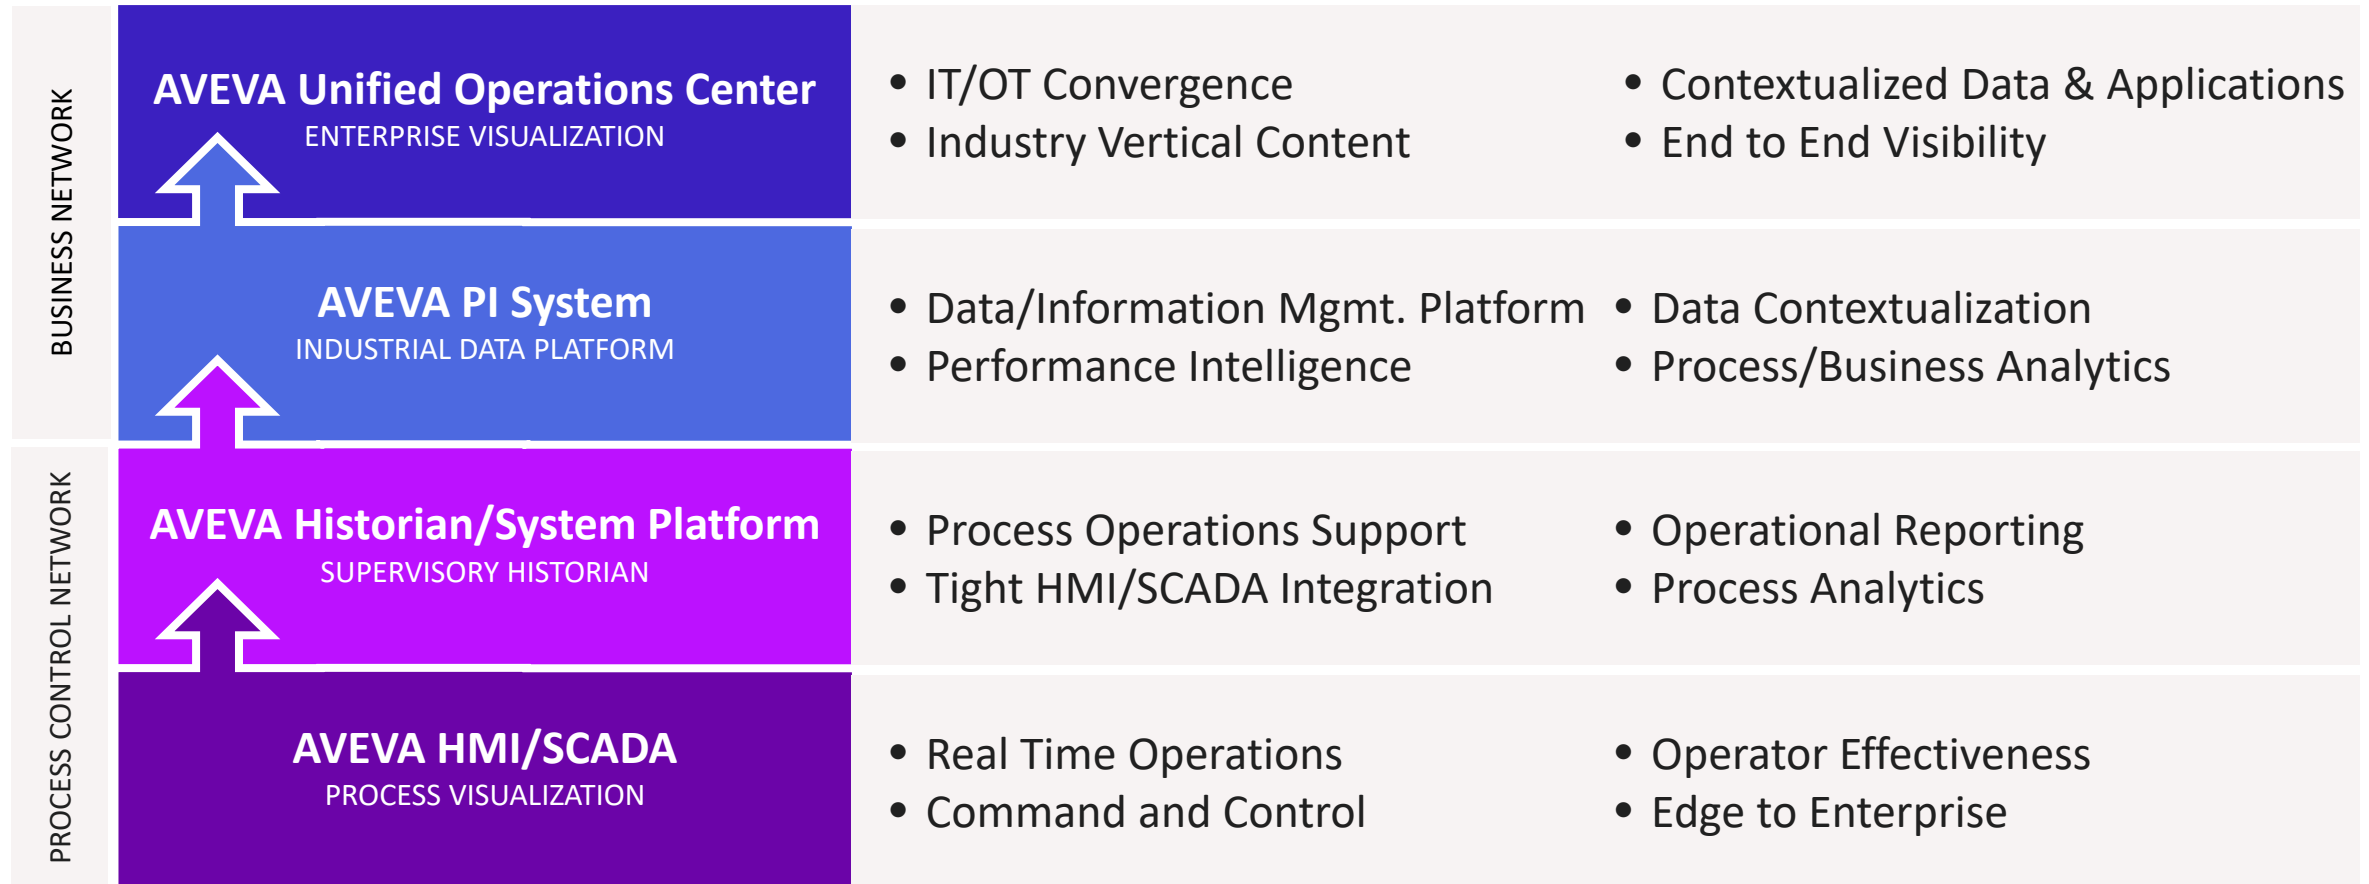

Operations Control Integration

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

AVEVA Monitoring & Control Integration with PI System

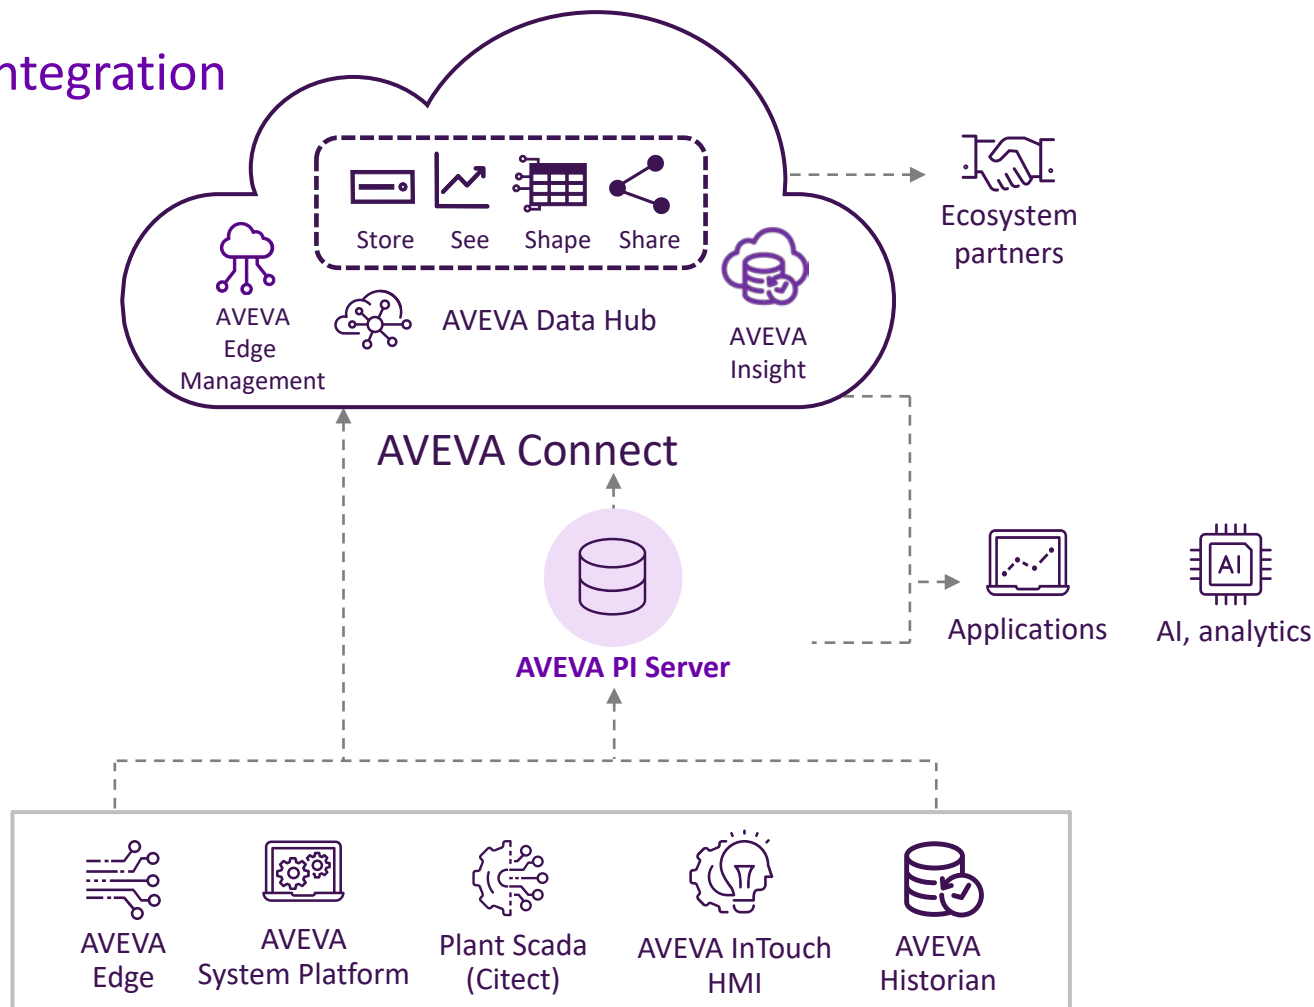

Distinct Operational Roles

Better together: AVEVA PI Server & Operations Control

Optimize your operations with tighter integration

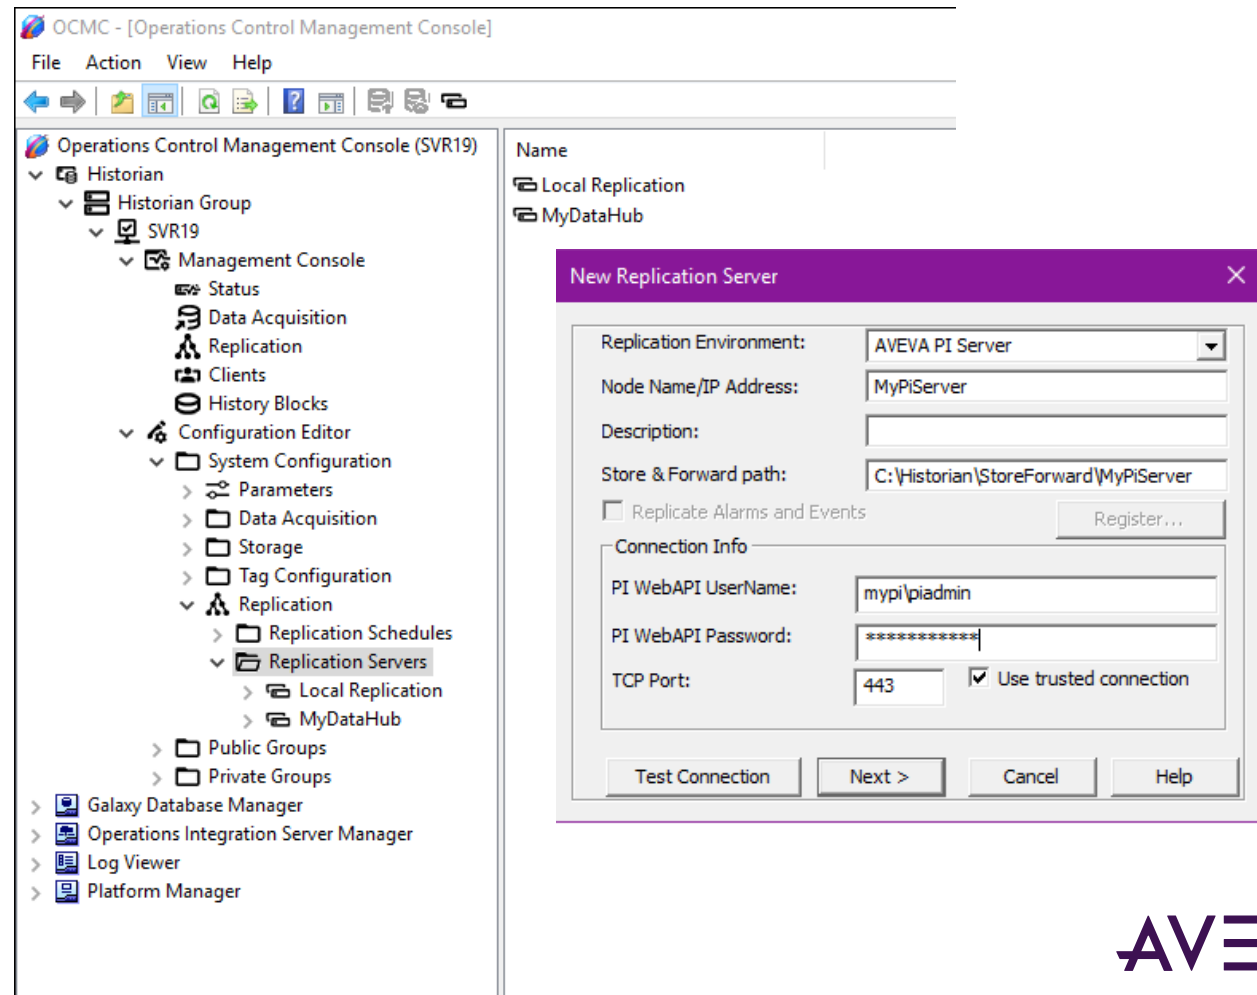

- **Data integrity:** ensuring granularity, accuracy, reliability and context
- **Enterprise-wide:** delivering secure and efficient data transfer, agility and scalability
- **Unified solutions:** proving better integration while maintaining neutrality and boosting sustainability

Better together: AVEVA PI Server & Operations Control

Optimize your operations with tighter integration

- **Data integrity:** ensuring granularity, accuracy, reliability and context
- **Enterprise-wide:** delivering secure and efficient data transfer, agility and scalability
- **Unified solutions:** proving better integration while maintaining neutrality and boosting sustainability

AVEVA Predictive Analytics

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

Industry Challenges

“\$200 billion lost in annual revenue across the Energy industry due to operational efficiency”

Maintenance
Optimization

70%

Operators are unaware of
when to replace, upgrade or
maintain assets ³

Asset
Failures

82%

82% of asset failures are
random¹

Unscheduled
Downtime Avoidance

\$260K

Average cost of industrial asset
downtime/hour ²

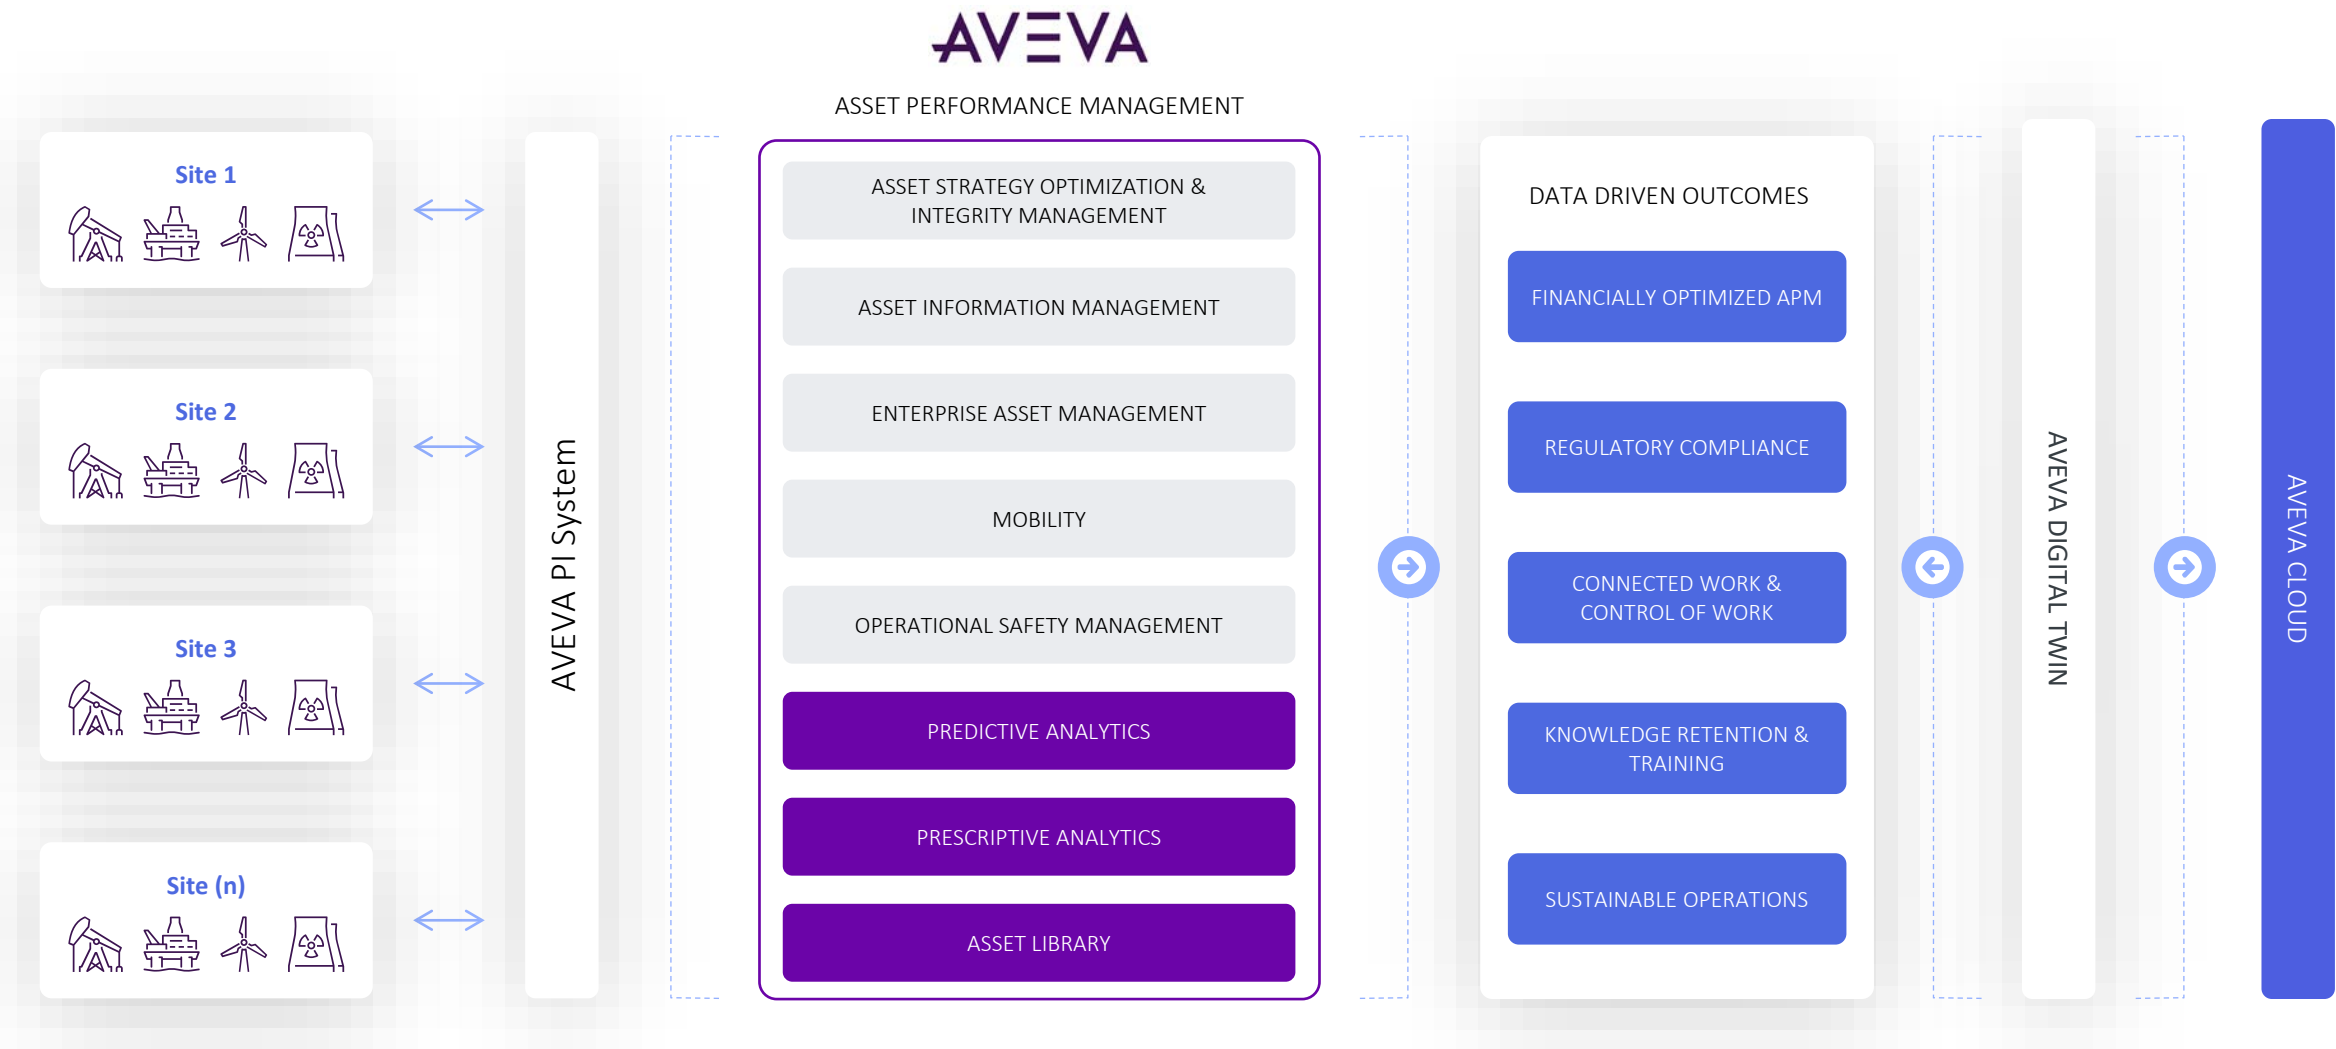

Safety Risk
Management

**Major Accident
Hazards**

Failure to address major
accident hazards leads to
injury, loss of profits and
reputational damage

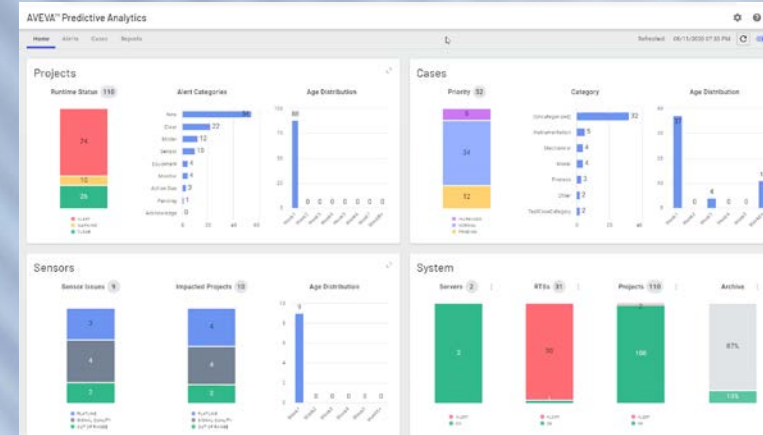

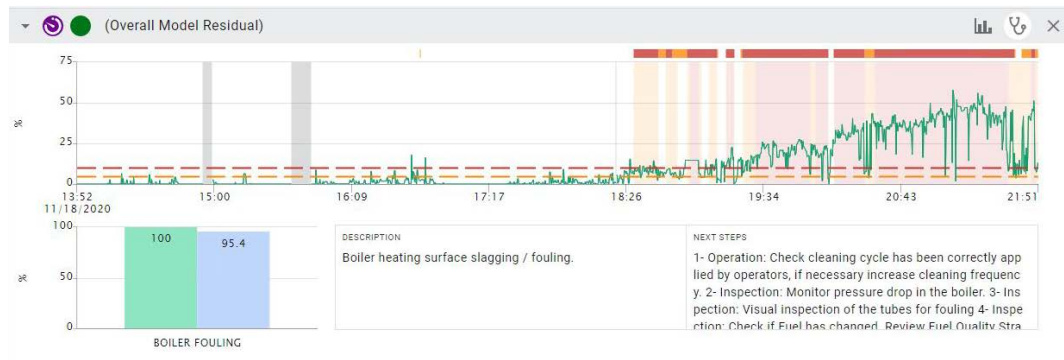

AVEVA PI System + AVEVA APM – the Complete Picture

AVEVA Predictive Analytics

Anomaly detection for business-critical equipment.

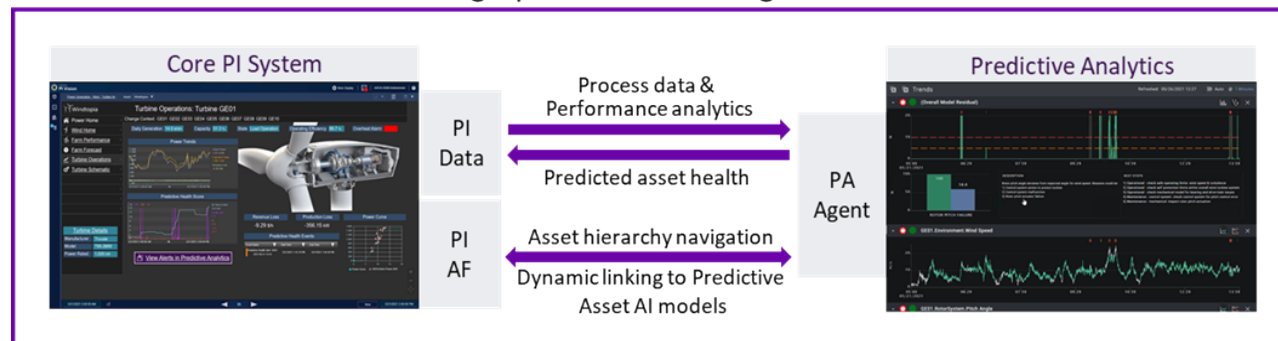

- Advanced pattern recognition with sensors contribution, failure modes and prescriptive actions for reliable troubleshooting.
- Advanced Alert and Case Management for Knowledge capture and Reporting.
- Data playback capability for testing models.
- Templates for scale-up configuration/deployment.

Predictive Analytics and PI System

From proven integration patterns towards a native integration

High-performance Integration

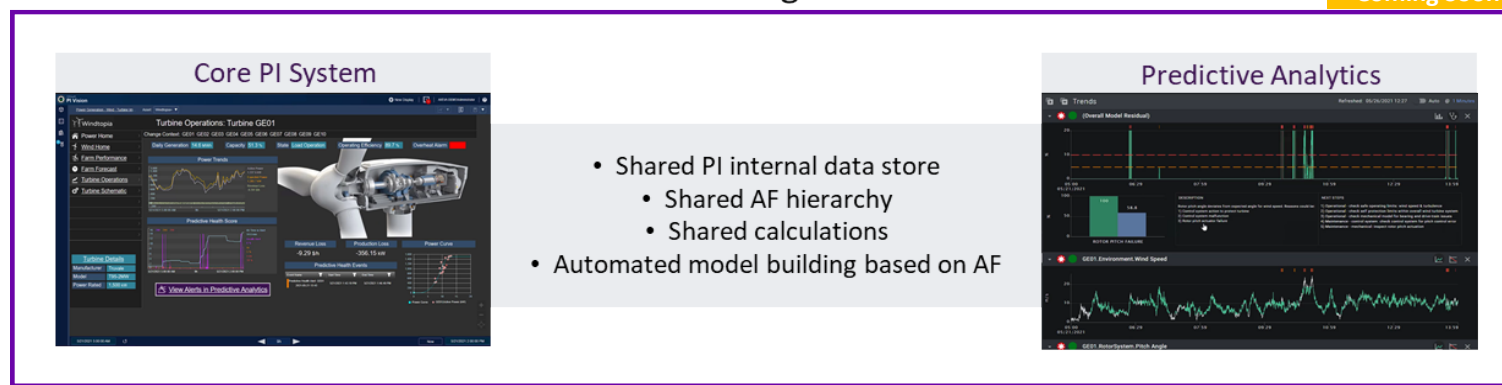

(High-availability through AF SDK)

Native Integration

Coming Soon

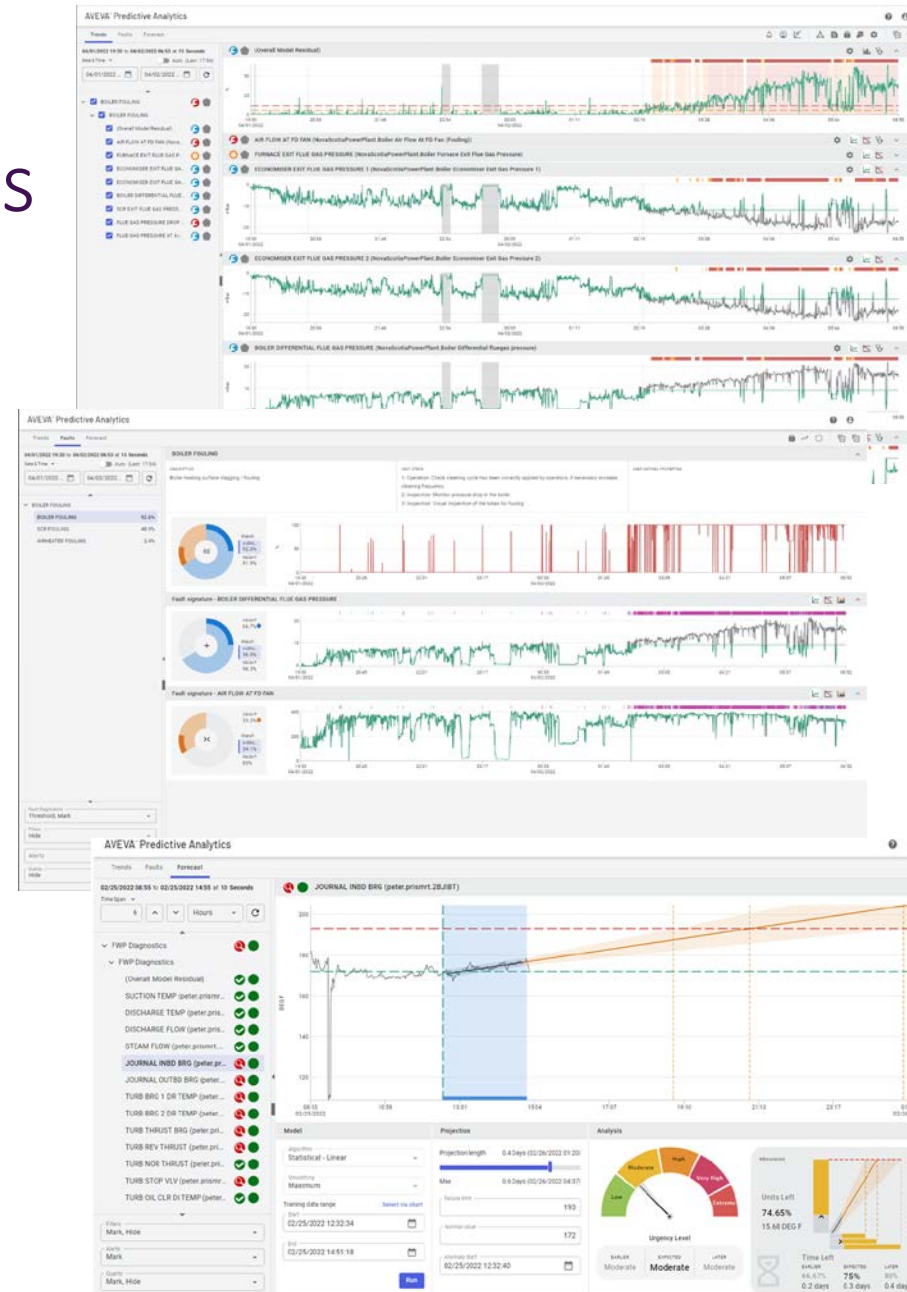

Best-in-class anomaly analysis

An anomaly was detected!
OK, but what are the next steps?

- Overall anomaly score trending
- Individual sensor deviations trending
- Sensor contribution score to anomaly
- Diagnostics based on sensor deviation signature
- Ranking of potential faults
- Fault match trending
- Prescriptive guidance on inspections to perform
- Forecasting of sensors

Which sensors
are contributing
to the anomaly?

What are the
potential faults
and related
inspections?

What is the
urgency level
before
breakpoint?

AVEVA Predictive Analytics Benefits

Off the shelf solution: no programming or data science knowledge required. Model building is a point and click operation.

Unparalleled breadth and depth of analyses with a proven approach.

Prescriptive actions provide guidance, reduce uncertainty and errors.

Operationalize AI at scale by leveraging templates and deploying models in minutes instead of weeks or months.

Achieve Asset Excellence

100s

of Millions Saved in Early
Warning Catches

30%

Reduction in Maintenance
Costs

25%

Improvement in Workforce
Efficiency

Reduction in Unplanned
Downtime

Experience Matters - Mature APM Install Base

Air Liquide

Air Liquide uses AVEVA for SIO Predict digital transformation program

Artificial Intelligence based predictive analytics for early warning notification and diagnosis of equipment and process problems

BASF

BASF uses AVEVA for digital transformation initiative

Artificial Intelligence based predictive analytics for early warning notification and diagnosis of equipment and process problems and augmented reality

EDF

EDF uses AVEVA for centralized predictive asset health and performance monitoring of power production assets

Artificial Intelligence based predictive analytics for early warning notification and diagnosis of equipment and process problems

Total

Total uses AVEVA for centralized predictive asset health and performance monitoring of assets

Artificial Intelligence based predictive analytics for early warning notification and diagnosis of equipment and process problems

Duke Energy

Duke Energy uses AVEVA for predictive fleet asset health and performance monitoring

Enabling \$100's millions saving
Early warning identification and diagnosis of equipment problems – improved reliability and performance

ADNOC

Abu Dhabi National Oil Company (ADNOC) implemented the Panorama Command Center

Enabling \$100's millions saving per year

Improved visibility for faster decision making

AVEVA

Check out these great presentations!

Underscoring the value and driving into the details

Today:

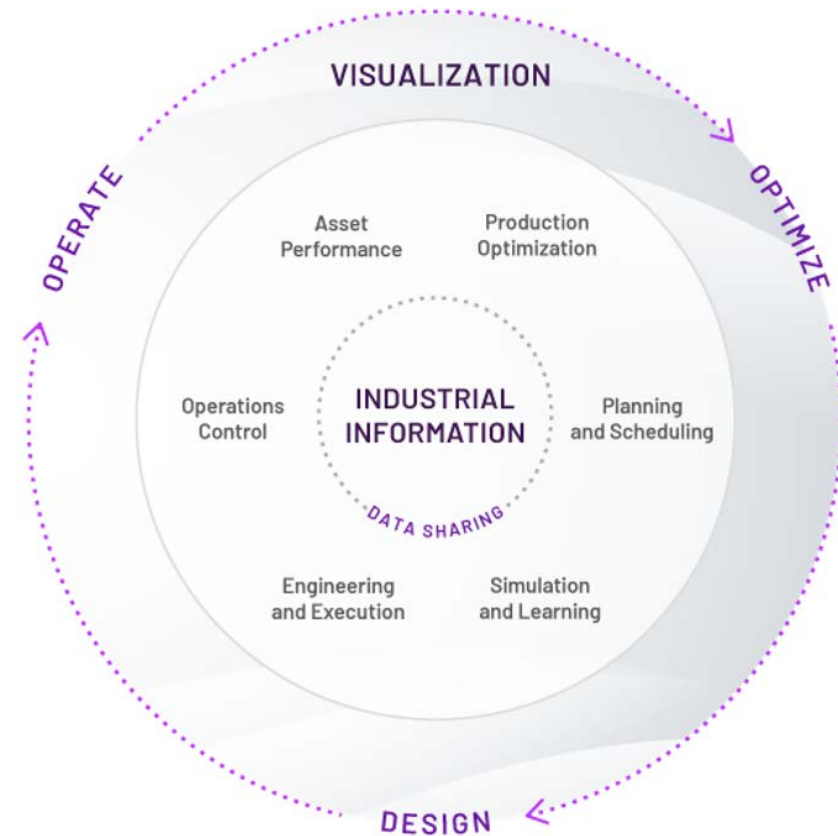

- Enterprise Visualization, A Step Change in Operational Awareness (Recording available soon!)

Wednesday:

- How SCG Chemicals' Digital Reliability Platform harnesses AI-infused APM to prevent unplanned downtime
- How AF is becoming an essential cornerstone to leverage multiple streams of Air Liquide SIO programs
- Increasing reliability of Pulp and Paper operations with AVEVA Predictive Analytics and AVEVA PI System

Thursday:

- Asset Performance Tech Track
- The Winning Integrations Track on Thursday

Brian Bostwick

VP Portfolio Management, Operations Information Management

ABOUT AVEVA

AVEVA is a global leader in industrial software, driving digital transformation and sustainability. By connecting the power of information and artificial intelligence with human insight, AVEVA enables teams to use their data to unlock new value. We call this Performance Intelligence. AVEVA's comprehensive portfolio enables more than 20,000 industrial enterprises to engineer smarter, operate better and drive sustainable efficiency. AVEVA supports customers through a trusted ecosystem that includes 5,500 partners and 5,700 certified developers around the world. The company is headquartered in Cambridge, UK, with over 6,500 employees and 90 offices in over 40 countries.
