# Braskem unifies data to leverage innovation and a data driven culture

Naími Mattos Nassiffe Souza

**AVEVA**

# Presenter's Introduction

---

Naími Souza is an Automation Engineer with Braskem and responsible for industrial historians and MES layer solutions on all Braskem industrial sites. Naími holds a Bachelor's degree in Electrical Engineering and an MBA in Project Management.

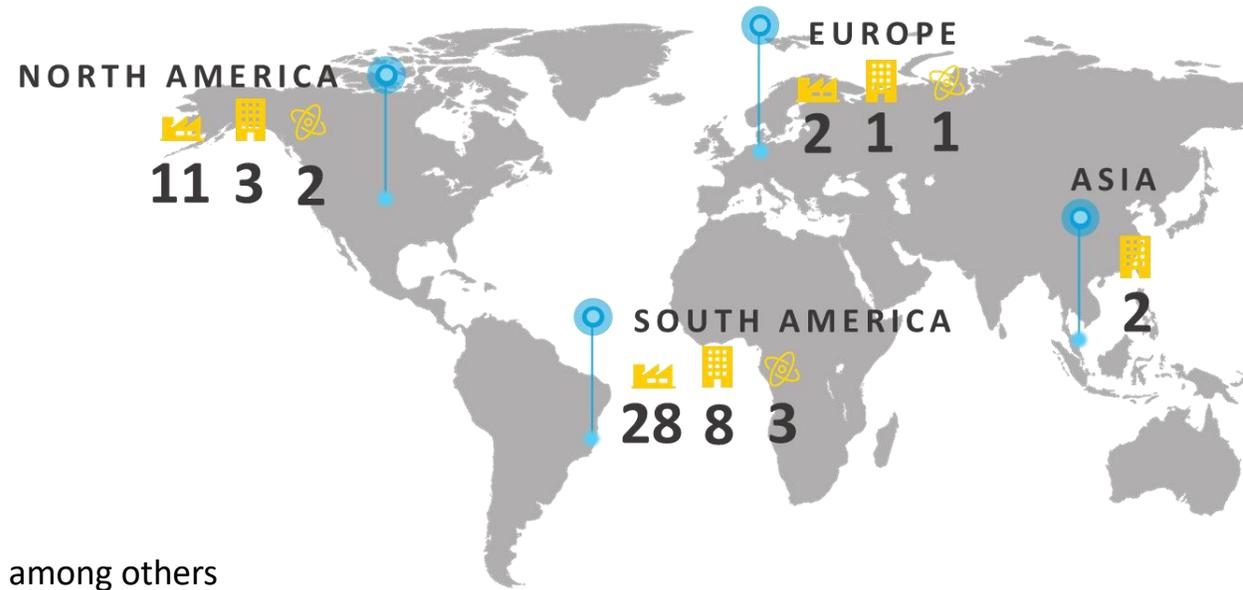

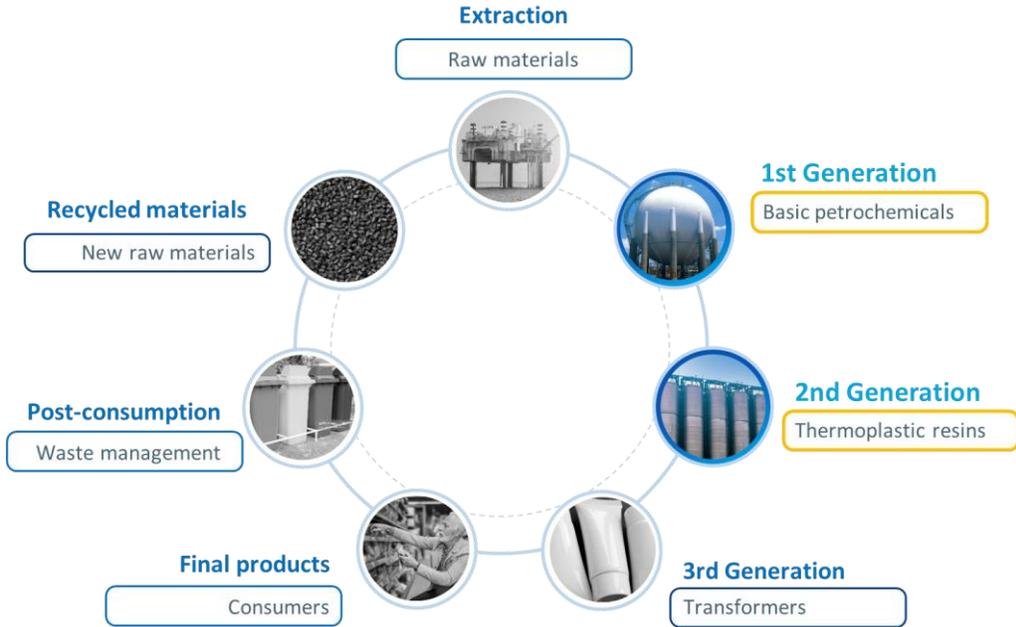

---

# ABOUT BRASKEM

**AVEVA**

# BRASKEM IS A GLOBAL PETROCHEMICAL INDUSTRY

Basic chemical inputs, such as ethylene, propylene, butadiene, benzene, among others

Production focuses on polyethylene (PE), polypropylene (PP) and polyvinyl chloride (PVC) thermoplastic resins

Largest thermoplastic resins production in the Americas

Largest polypropylene production in the USA

INDUSTRIAL UNITS  
 OFFICES  
 INNOVATION CENTERS

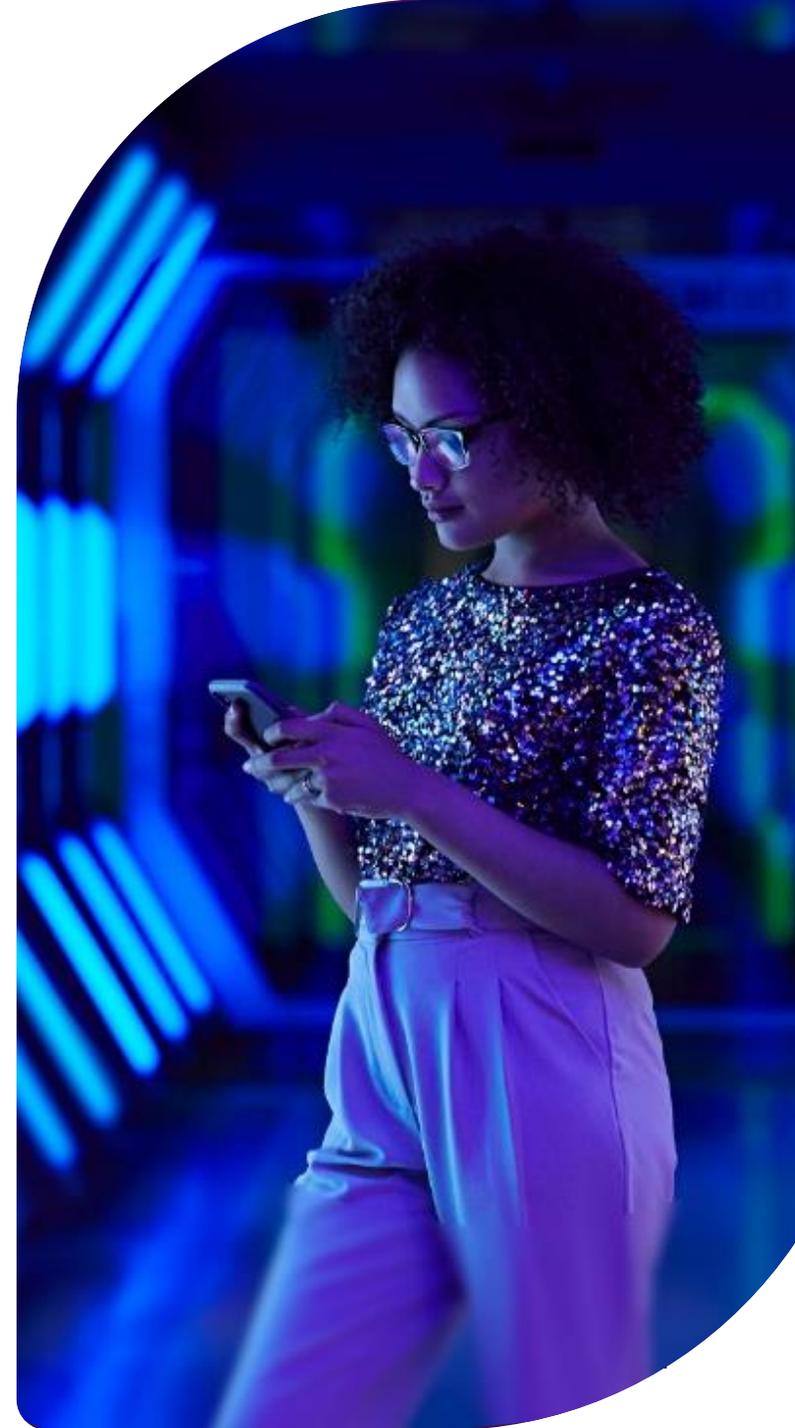

# THE DIGITAL TRANSFORMATION DRIVES US

Braskem has engaged in applying digital technologies to develop strategic portions of our business, leverage our performance and reshape the way we work.

- ▶ VALUE GENERATION FOR PEOPLE
- ▶ ACCELERATION OF TRANSFORMING DIGITAL INITIATIVES
- ▶ LINK WITH THE EXTERNAL INNOVATION ECOSYSTEM
- ▶ DIGITAL SKILLS TO WORK TO NEW METHODS
- ▶ CREATION OF NEW BUSINESS MODELS
- ▶ INFRASTRUCTURE EXPANSION FOR DIGITAL SUSTAINABILITY AND INDUSTRIAL SYSTEMS.

## IMPORTANT FIGURES:

# HOW AVEVA SUPPORTED OUR DIGITAL TRANSFORMATION BY IMPROVING OUR DATA INFRASTRUCTURE

AVEVA

# How we used AVEVA PI System to enable industrial data integration and leverage a data driven culture

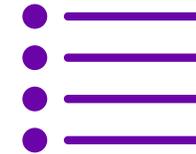

## Challenge

- Provide a solution that allows the centralization of industrial data from all of Braskem's business units and meet the demands of integration with the various digital transformation initiatives

## Solution

- Deployed AVEVA PI System technology including a central PI Data Server, PI AF, PI Vision and PI Integrator for BA as an enabler infrastructure for cloud based digital solutions and to increase data visibility across the organization

## Benefits

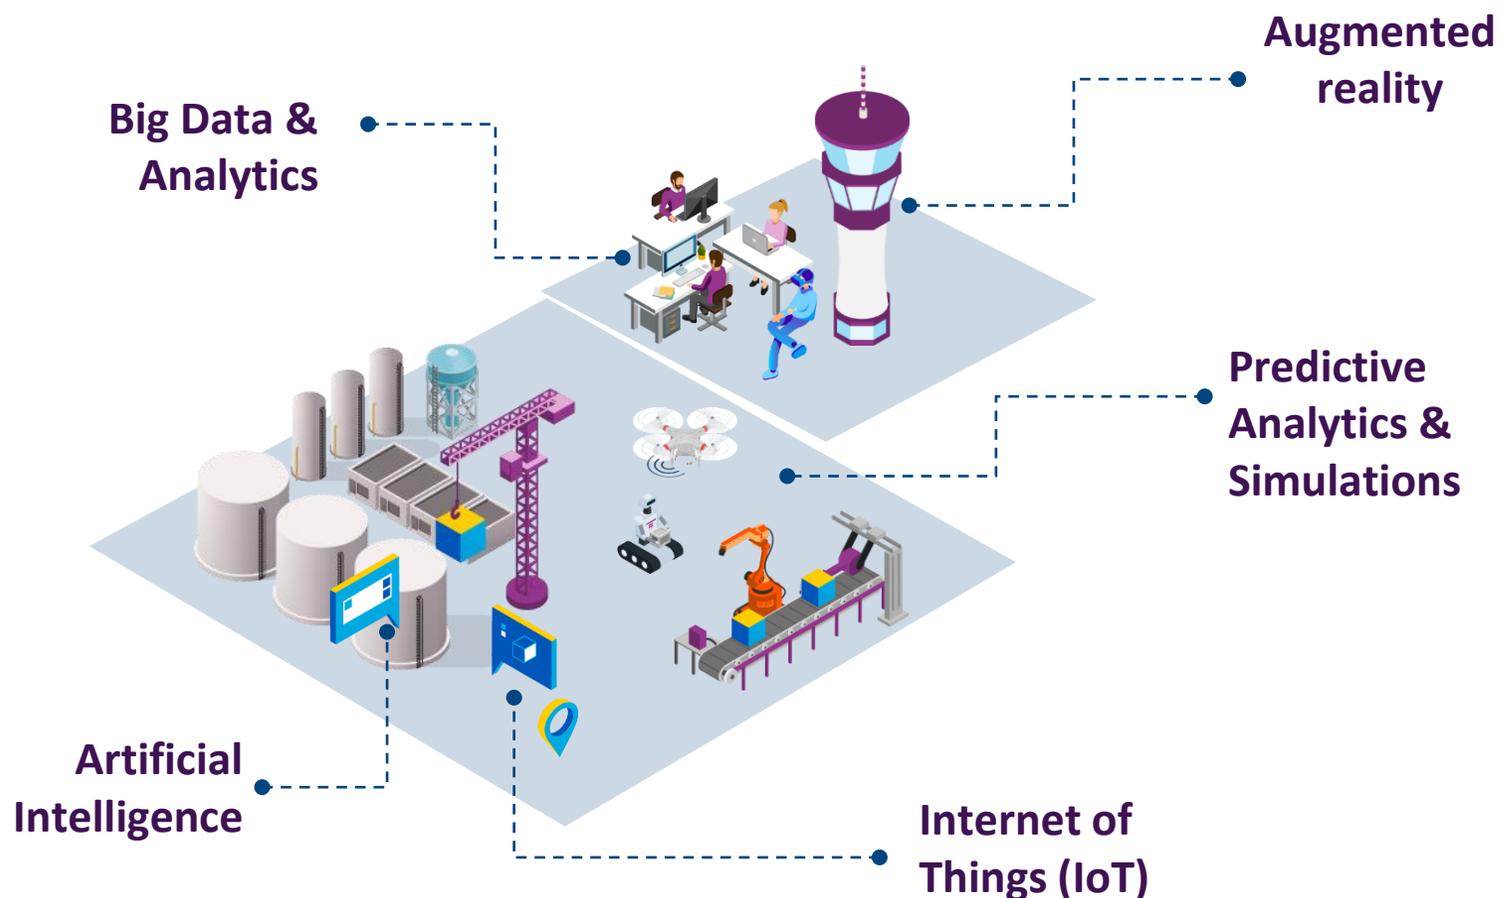

- Accelerated data driven projects/solutions implementation (with significant captures), increased team productivity, allows monitoring and data insights on a corporate level

---

# CHALLENGES

**AVEVA**

# NEW CHALLENGES BROUGHT BY INDUSTRY 4.0 AND DATA DRIVEN CULTURE

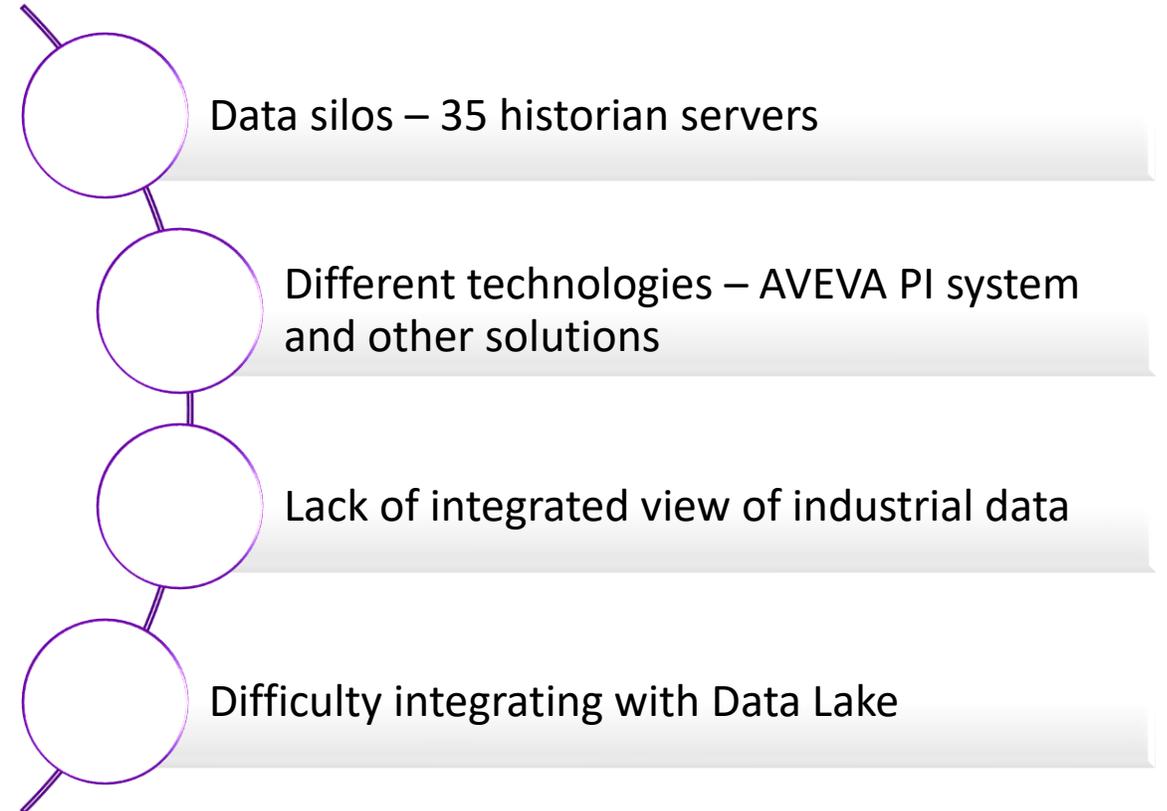

## DATA

- Single source of truth (reliable data)
- Availability
- Taxonomy, contextualization
- Security, access and data protection

## INFRASTRUCTURE

- Connectivity
- Cybersecurity
- Data infrastructure and governance

# BRASKEM'S PIMS STRUCTURE BEFORE CENTRAL PIMS

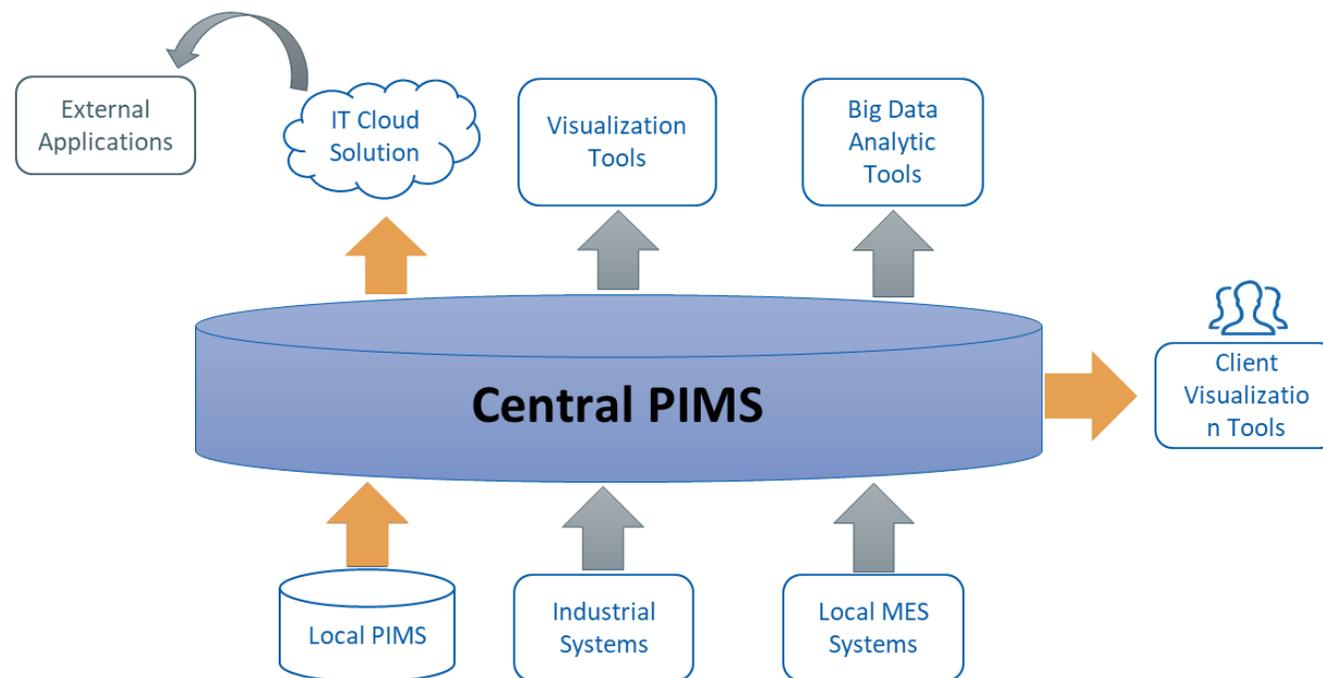

# SOLUTION

**AVEVA**

# BUILDING DATA INFRASTRUCTURE WITH AVEVA PI SYSTEM

Make industrial data available in a **safe, centralized and structured** way for the demands of Braskem's Digital Transformation, in a **Global** scope.

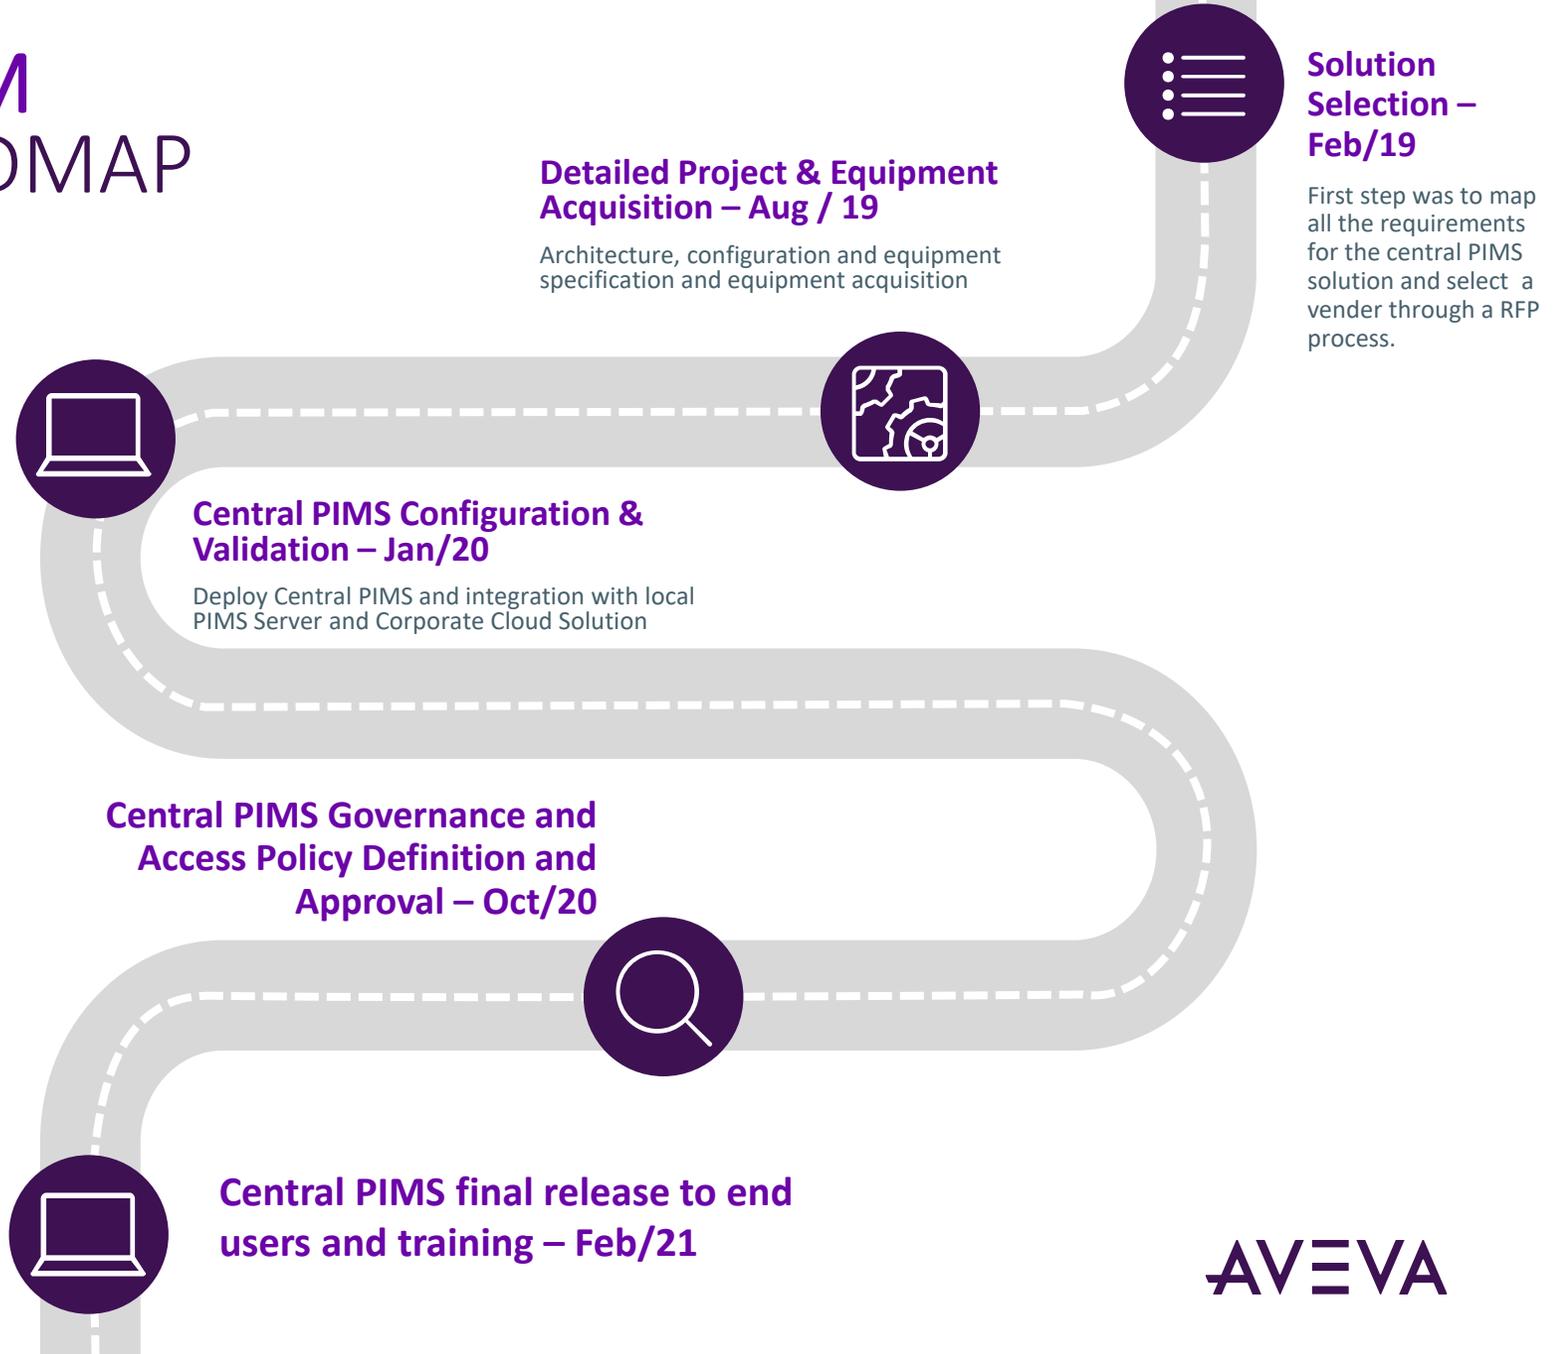

- Central Server integrated with 35 regional servers
- Secure integration with enterprise cloud solution using PI Integrator for BA
- Scalable architecture to include new data sources and technologies
- Data hierarchy on the central server, enabling contextualization, data Aggregation and asset modeling

# CENTRAL AVEVA PI SYSTEM IMPLEMENTATION ROADMAP

## Challenges

- Access policy approval on a corporate level;
- Support from specialists from the different business areas in order to structure and contextualize data;

# BENEFITS

**AVEVA**

# CENTRAL AVEVA PI SYSTEM MAIN BENEFITS

## Data centralization and greater visibility

Data Centralization from sites in: Brazil, Mexico, USA and Germany, in line with safe remote access practices and considering an approved access and data security governance. It became the main industrial data source for corporate solutions: Predictive Maintenance, Control Towers, Carbon Inventory, Environmental Agents Monitoring.

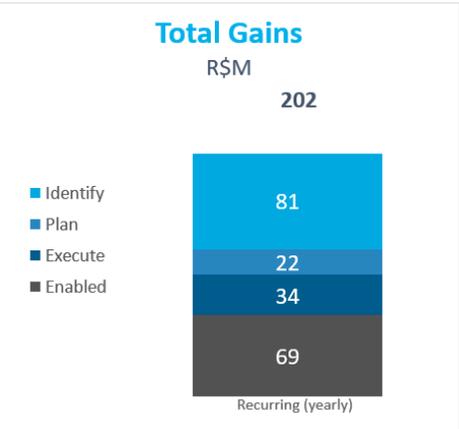

## Agility in implementing new initiatives and reliable data infrastructure

It allows the deployment of scalable solutions for different business units in a simplified way: MVP → Proves Value → Roll out

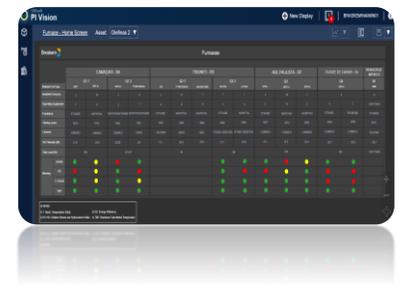

## Full Potential and Captures from initiatives that use Central AVEVA PI System as infrastructure

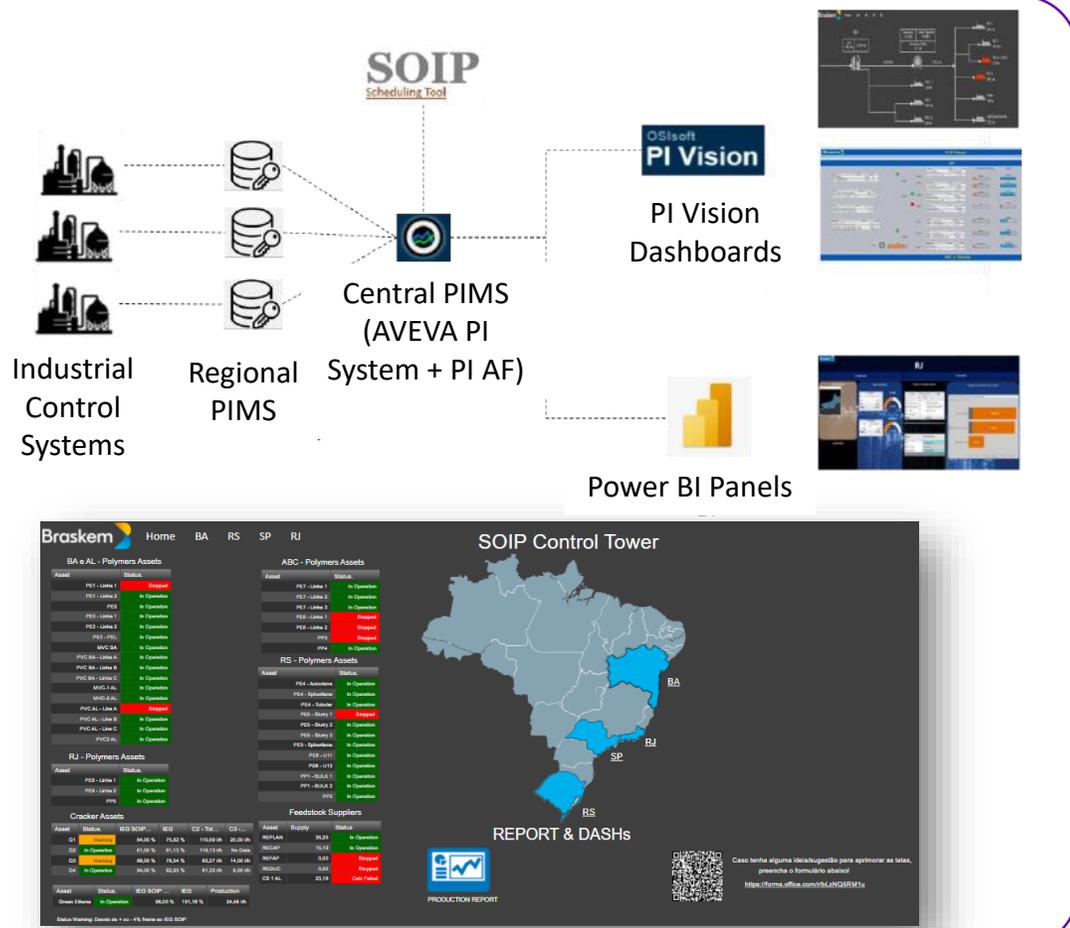

## Team Productivity

Taxonomy, creating a structured/ contextualized database and defining corporate standards. Users can have access to the right information in a faster and easier way.

# Use case 1: SOIP Control Tower Brazil achieves significant team productivity gains and promotes greater integration between 1st and 2nd generation using Central AVEVA PI SYSTEM

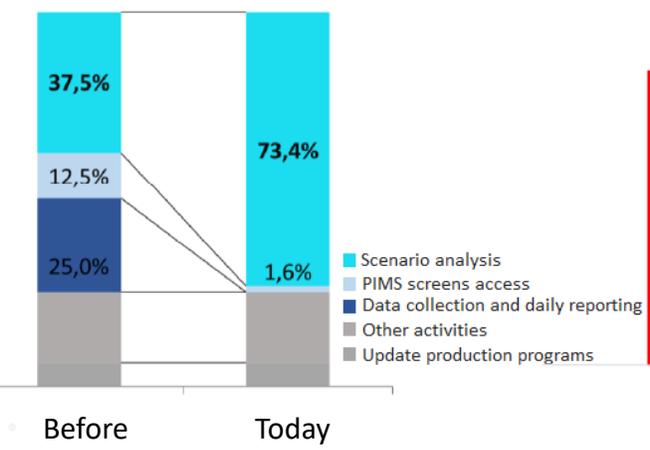

## Solution

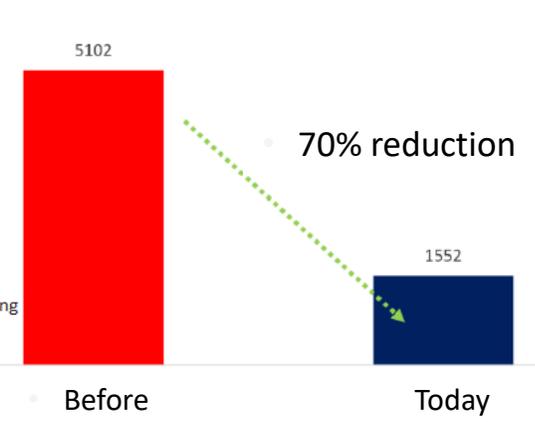

## Benefits

“The day-to-day **productivity gain** resulting from the improvements of this initiative allowed a **96% increase** in the time dedicated to **high value-added activities** (scenarios analysis for decision making), by reducing the time dedicated to manual information gathering, database queries, as well as the elimination of manual generation of the daily report.”

### Daily productivity gain

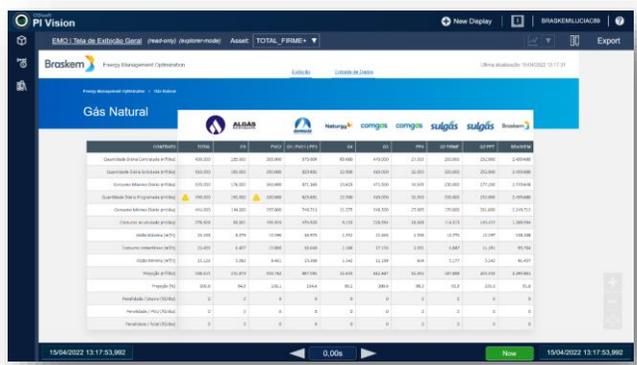

### Estimated annual impact in hours

# Use case 2: Energy Management Optimization initiative uses central AVEVA PI System to capture value by reducing payment of penalties

## Solution

“Our initiative that optimizes the gas management helps the energy area to react **quickly** and **effectively** to the constant **changes** in consumption scenarios for this energy source, **centralizing** information and enabling the **reduction** of penalty costs”

- Daily monitoring
- Real-time consumption data
- Online penalty calculation

## Benefits

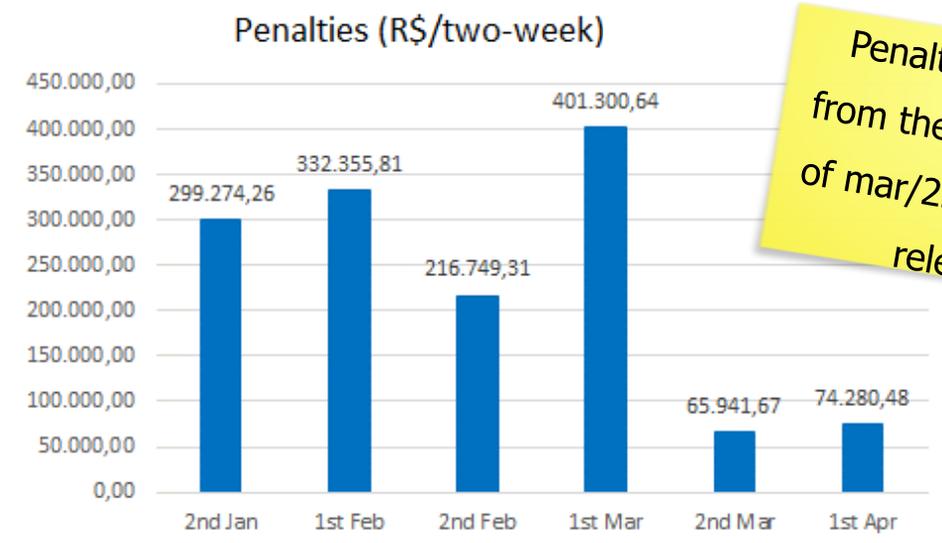

**3 MONTHS**  
Time

**R\$4M/year**  
Enabled Value

**R\$345K**  
Captured Value

Penalty reduction from the second half of mar/22 after EMO release!

---

# CONCLUSION

---

## Next Steps

- Increase number of users and initiatives on Central PIMS;
- Leverage the added value of Central PIMS;
- Increasingly support the various areas of Braskem in making data-based decisions.

“Centralization of the industrial data and its integration with the business data are the key elements of a well-functioning data-driven architecture.”

Daniel Morales, corporate automation manager

#### ABOUT AVEVA

AVEVA is a global leader in industrial software, driving digital transformation and sustainability. By connecting the power of information and artificial intelligence with human insight, AVEVA enables teams to use their data to unlock new value. We call this Performance Intelligence. AVEVA's comprehensive portfolio enables more than 20,000 industrial enterprises to engineer smarter, operate better and drive sustainable efficiency. AVEVA supports customers through a trusted ecosystem that includes 5,500 partners and 5,700 certified developers around the world. The company is headquartered in Cambridge, UK, with over 6,500 employees and 90 offices in over 40 countries.
