# Ever more efficient – AVEVA's Engineering Portfolio Roadmap

Julien de Beer – Vice President, Engineering & Design, AVEVA

**AVEVA**

# Top Challenges for Owners and EPC in Project Delivery

## Top 5 challenges that prevented owner-operators from digitally enabling their most recently completed capital projects

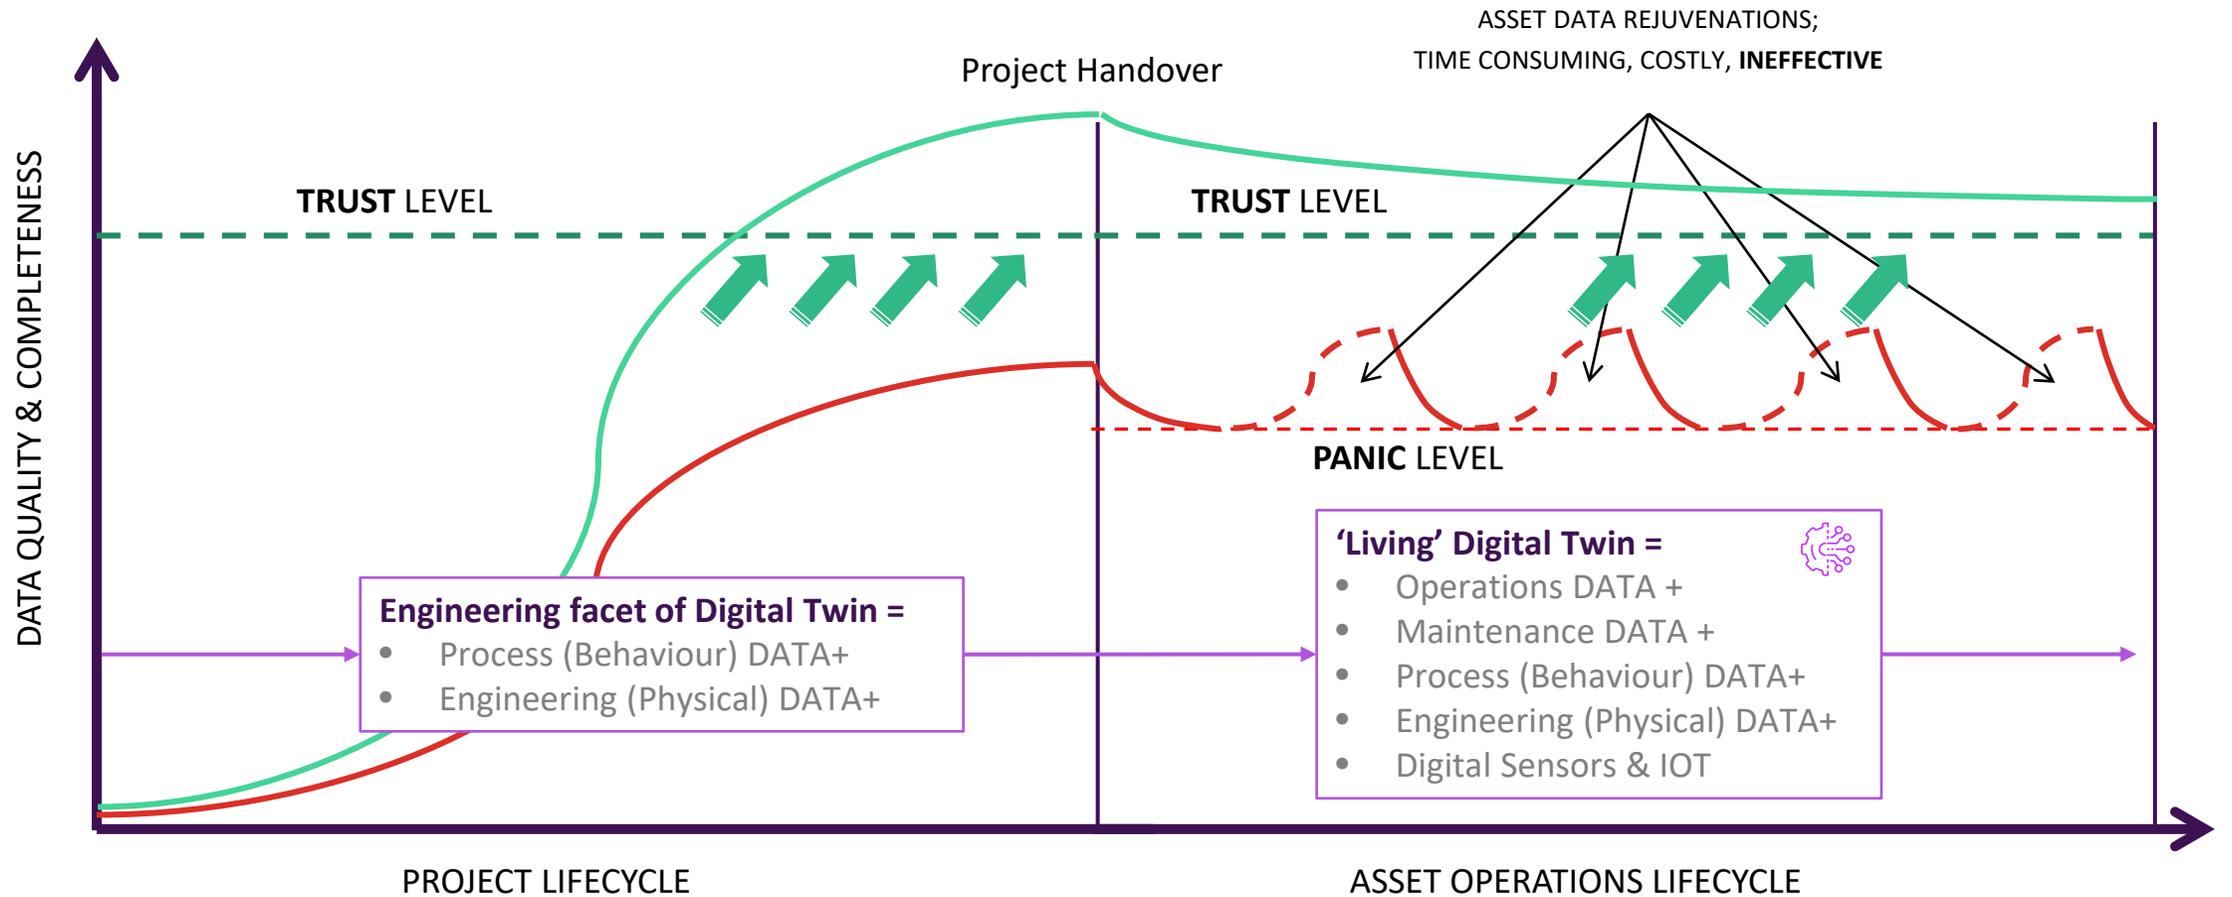

- 1 Limited interest and patience within on-ground project teams to drive data-driven digital decision making
- 2 Absence of a strategy and skills to build and deploy actionable insights with digital technologies
- 3 Siloed teams within and across project stakeholders
- 4 Poor understanding of how available data can be deployed for generating critical and tactical business insights
- 5 Inability of a stakeholder-driven strategy to execute shared incentive or collaborative contracting across the project value chain

**Sustainability**  
 Energy Transition  
 Carbon Reduction  
 Resilient Plant / Infrastructure

## Top challenge faced by EPCs while executing the most recently completed capital project (by project stages)

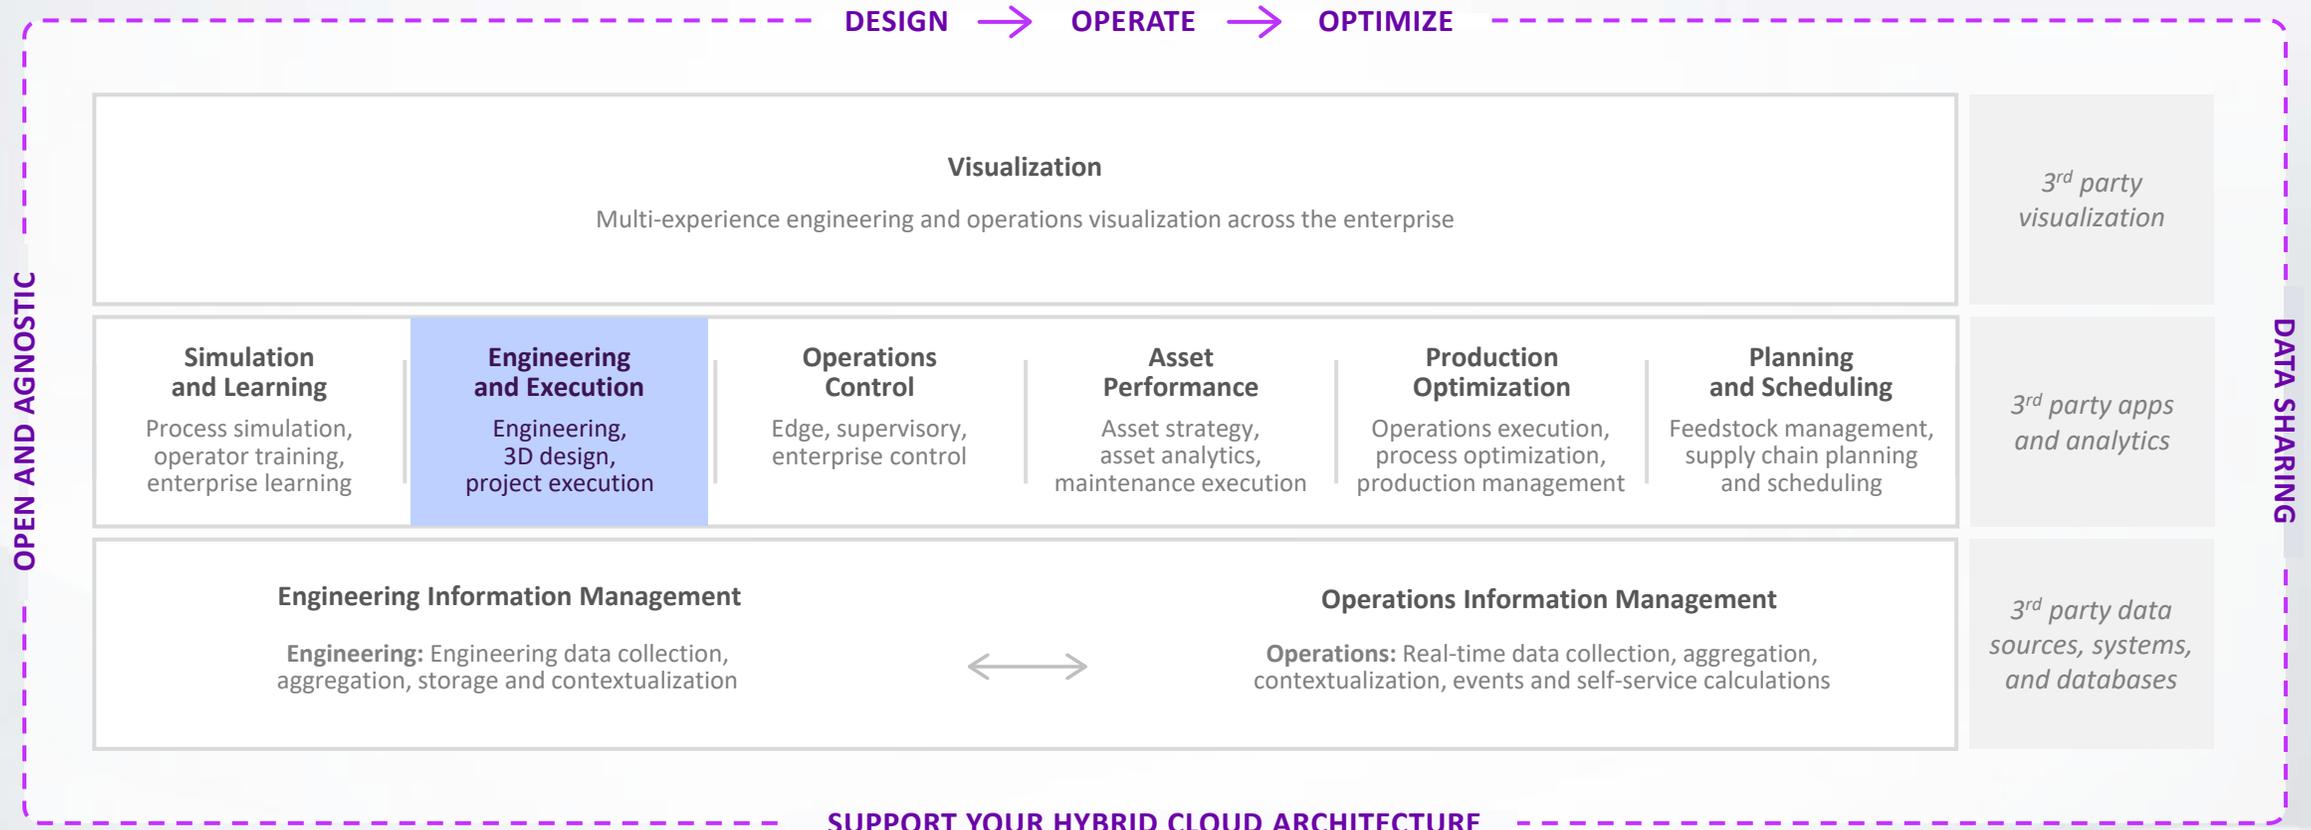

<b>Business Development</b>	Challenges creating accurate schedule, cost and benefit estimates
<b>Project &amp; Contract Management</b>	Inability to integrate sustainability agenda with project partners
<b>Design &amp; Engineering</b>	Managing engineering change impacts across project supply chain
<b>Procurement</b>	Fabrication facility equipment availability issues
<b>Fabrication</b>	Absence of a stakeholder-driven strategy to execute data-driven digital transformation across the project value chain
<b>Construction &amp; Commissioning</b>	Limited ability to monitor productivity and verify time monitoring
<b>Handover to Operations</b>	Manually intensive process to manage data exchange, validation, and loading into operational systems
<b>Operations &amp; Maintenance</b>	Lack of feedback of asset performance back to design and engineering

# Delivering the Digital Twin: Unified Data from CAPEX into OPEX

# Delivering a complete digital thread, purpose-built for industry

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

20%+ TIC savings

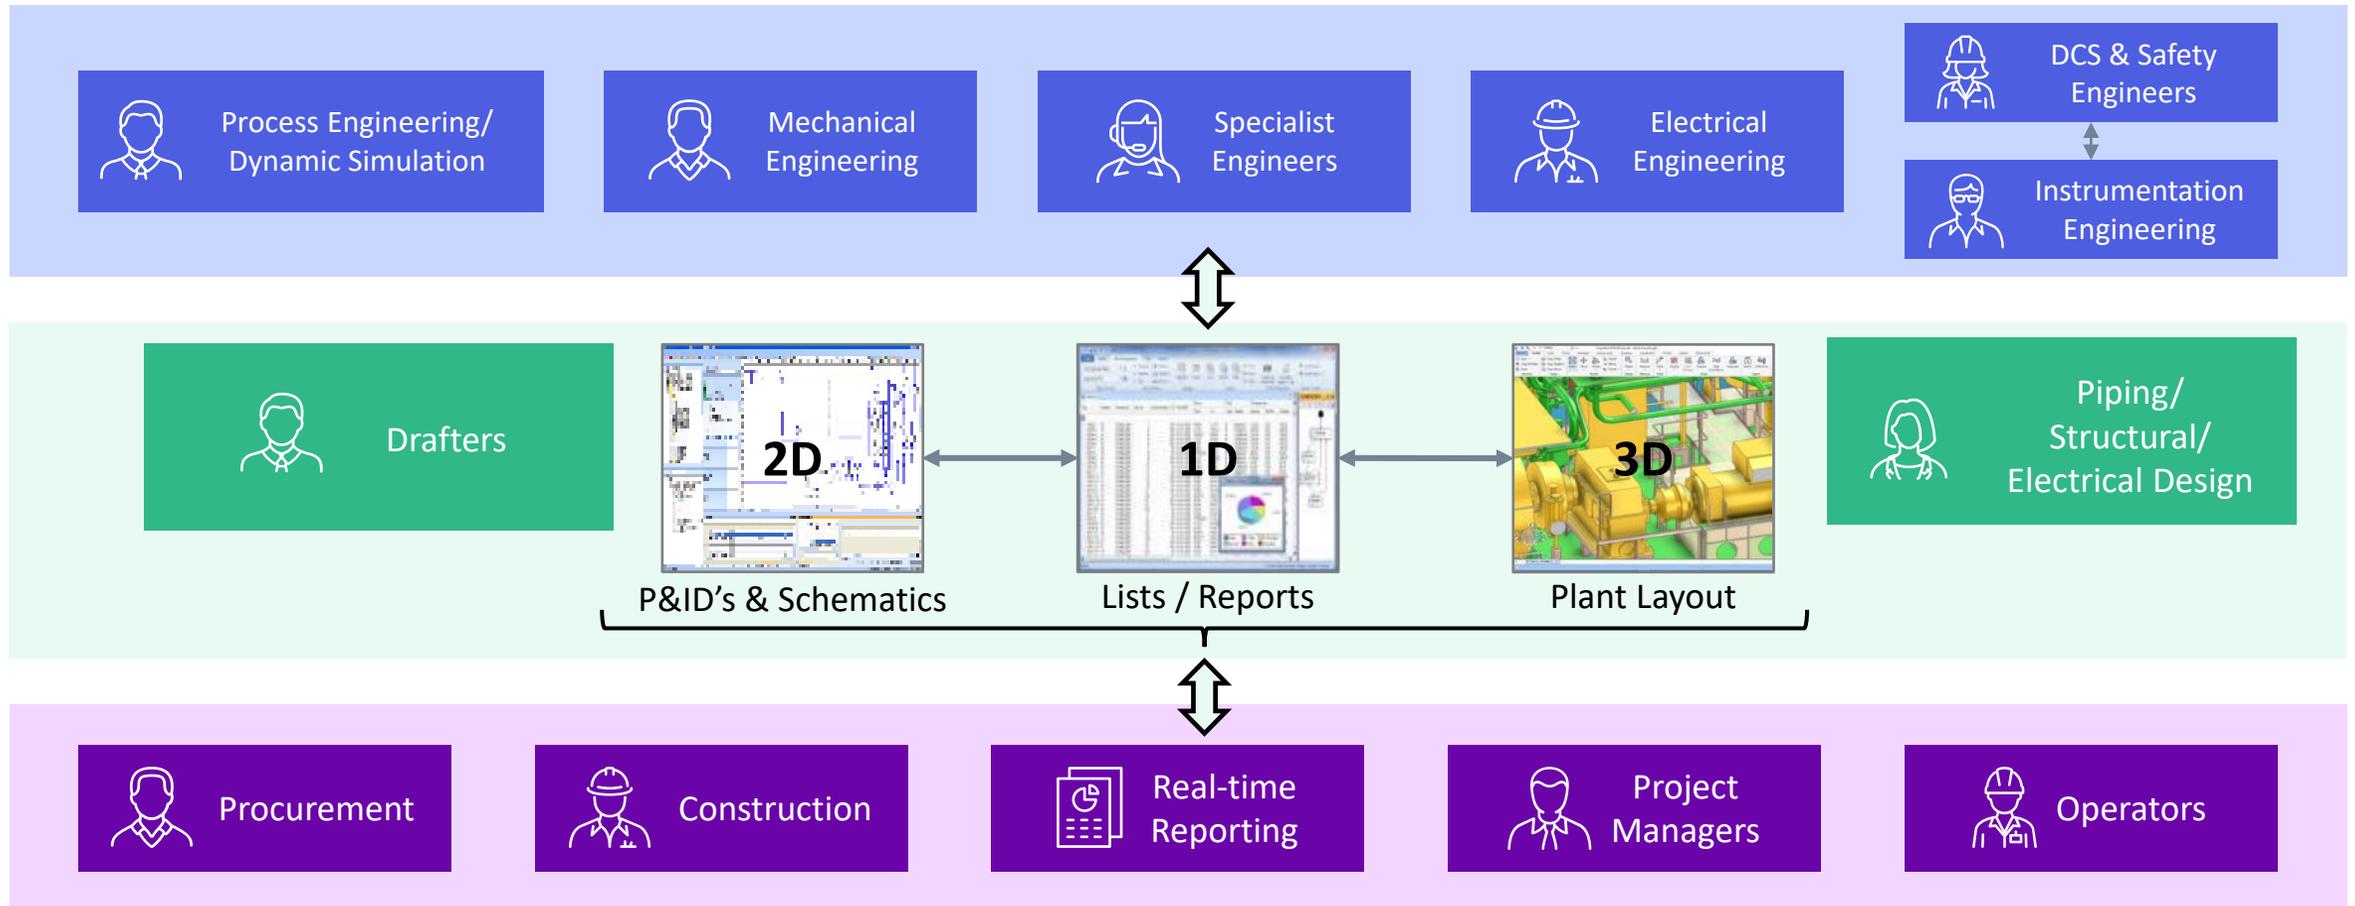

# Unified Engineering & Design

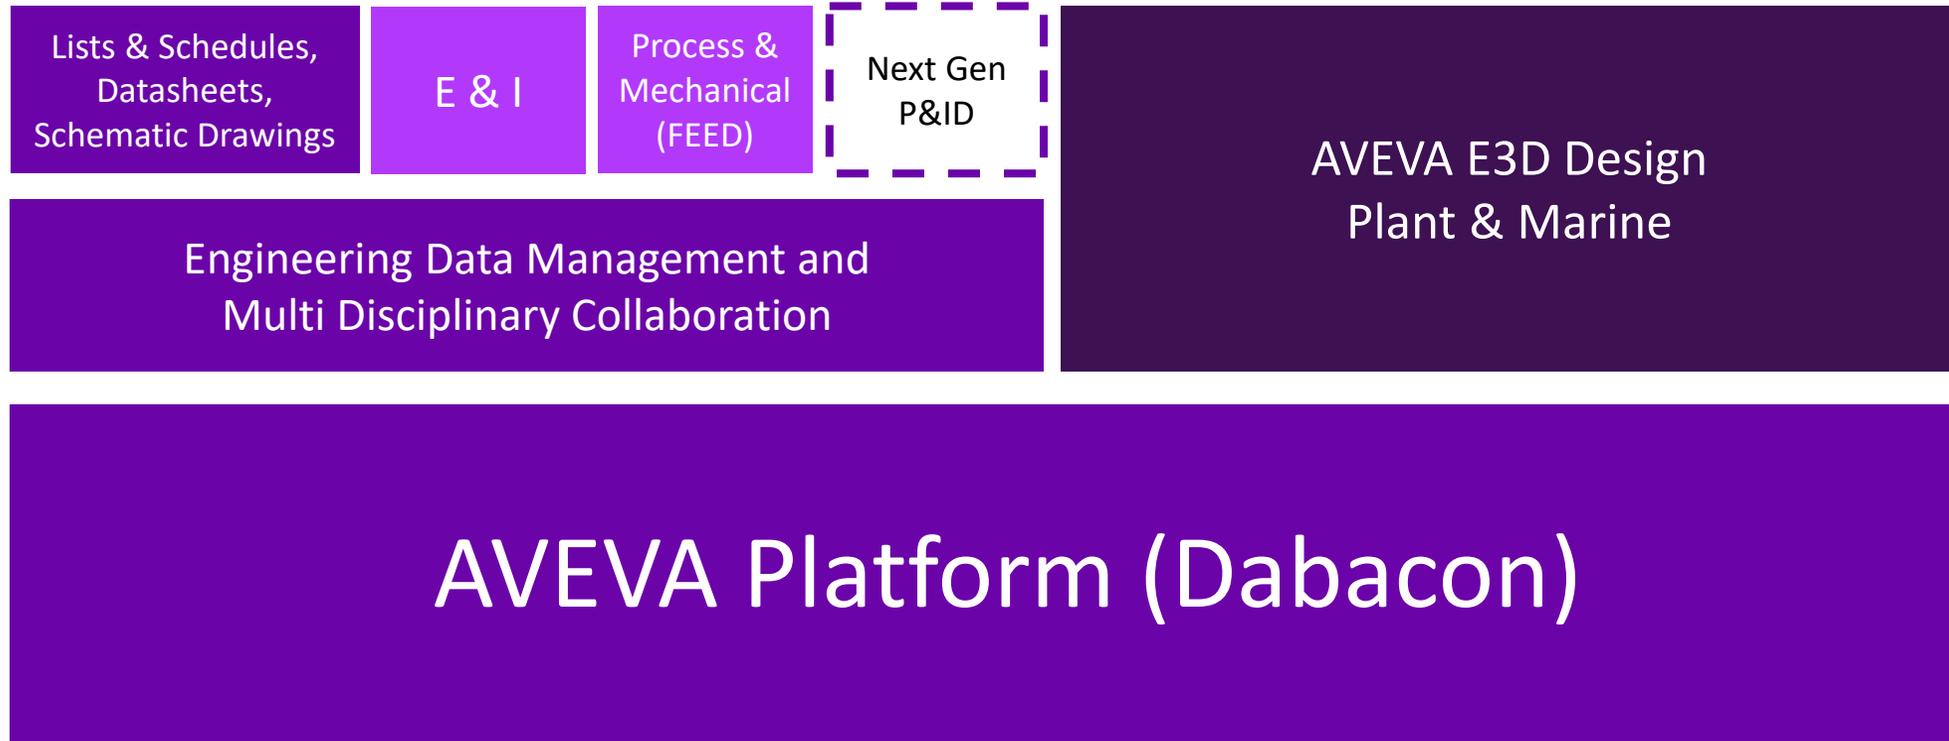

**AVEVA**

# AVEVA Unified Engineering

1D, 2D, 3D multi-discipline engineering and design in a single, common database

# Single Authoring platform approach

# Unified Engineering Evolution – ‘Connecting’ On-prem to Cloud

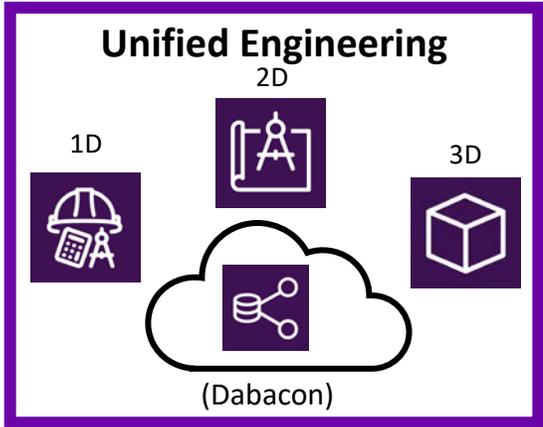

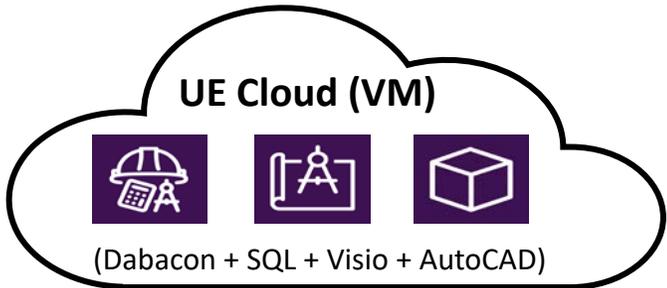

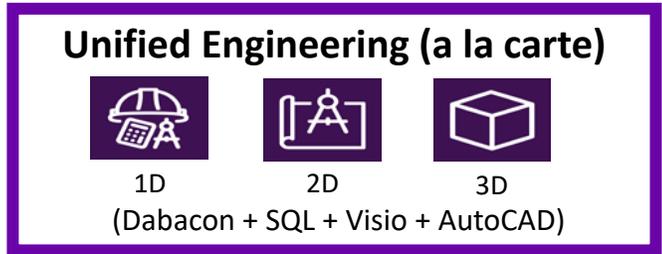

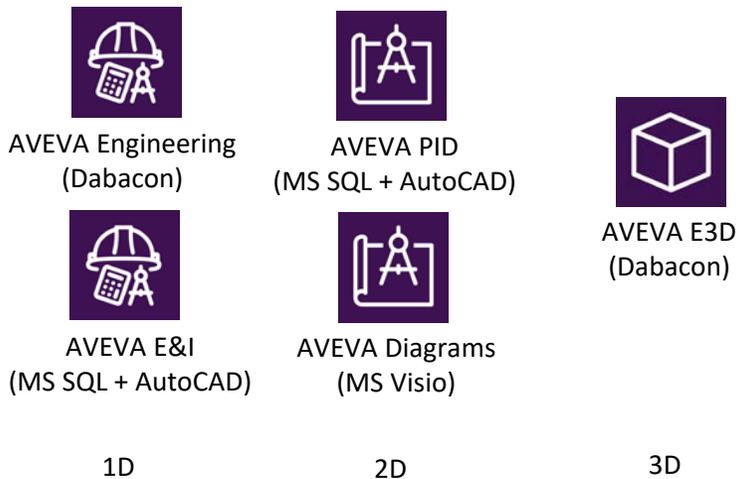

## Products

## Suite

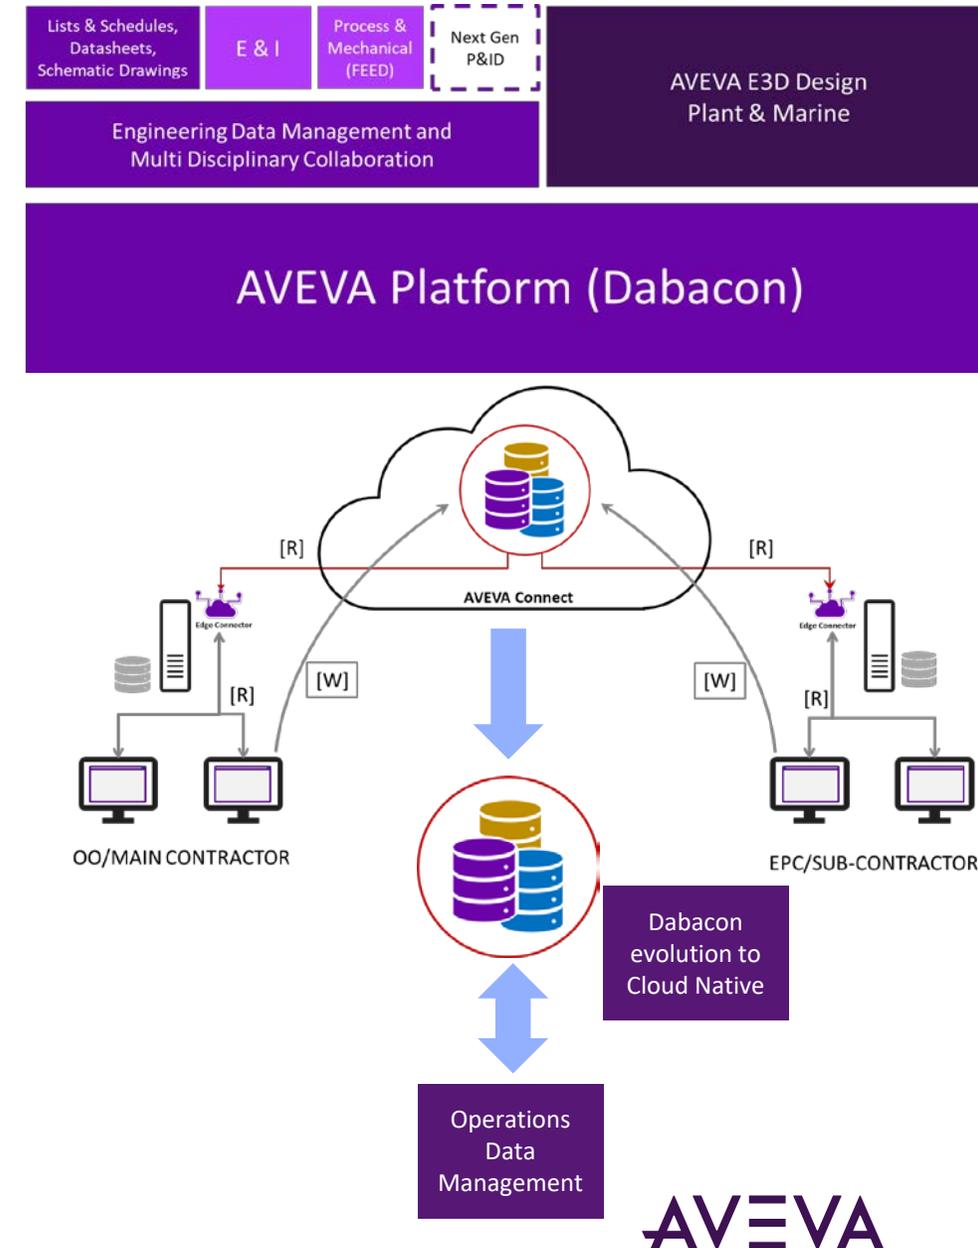

## Hybrid

# AVEVA Unified Engineering Roadmap

- All Authoring Solutions on Dabacon
  - Electrical and Instrumentation
  - Next Generation P&ID
- Cloud UE Enhancements / Connect Evolution
  - Appstream vs AWS Workspaces – Enable Cloud UE Option in greater number of Regions and supporting Data Residency in countries
- Integration Enhancements
  - Secure File Share
  - AVEVA Engineering Integration Service (AEIS) Evolution of Data source to Data Source
  - REST API for applications & Corporate standardized Integration Central Cloud Data Management (Spectrum) – AVEVA E3D Design (Q1 2023)
- Hybrid Common Cloud Offer for Multi-site, Multi-region, Multi-organizations
  - Phased Release with 3D first, 1D/2D added in Q4 2023
  - Offer access from on-prem or cloud

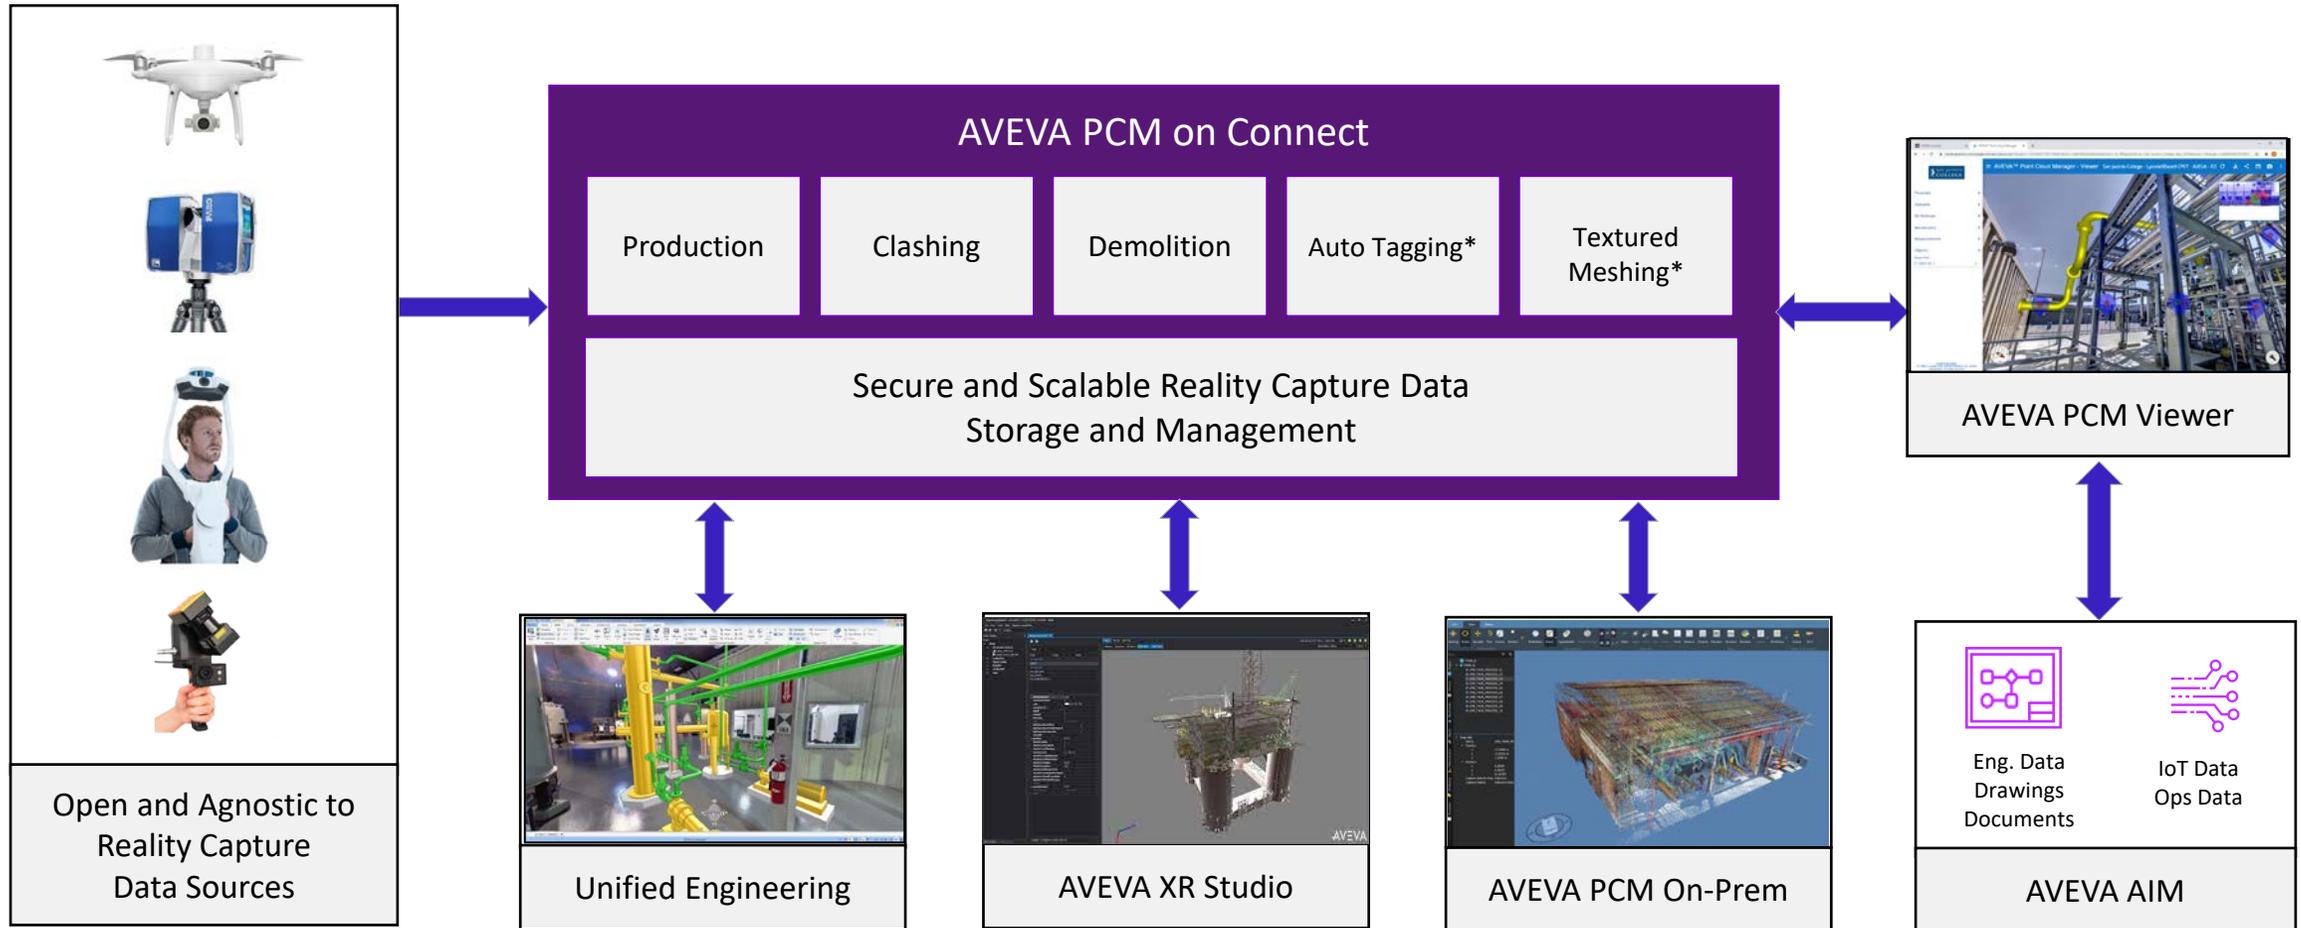

---

# Point Cloud Manager

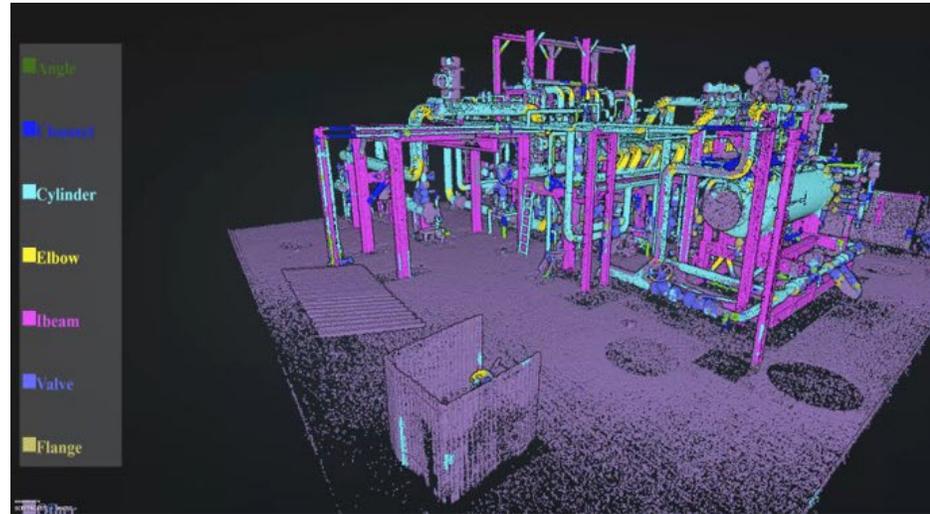

# AVEVA PCM Mission: To deliver a platform that puts 3D reality capture data at the heart of the AVEVA Digital Twin

# AVEVA's vision for Intelligent Pointcloud

- Automated classification and tagging of objects identified in 3D point clouds captured from laser scanning an asset - to intelligently unlock the content of 3D data
- Achieved through “Artificial Intelligence as a Service” which will trawl through Point Cloud data
- Eradicates the pain of manually locating and tagging key items such as vessels, pumps, pipes, valves, etc.

---

# Project Execution

# NextGen AVEVA Project Execution through partnership

## Current Solutions

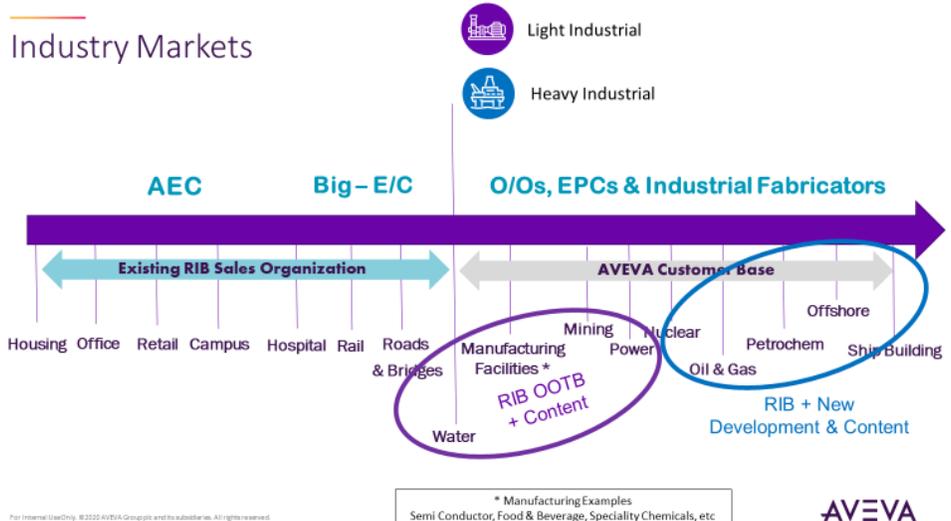

- Enterprise Resource Management (ERM)
- Contract Risk Management (CRM)
- Construction Planning (AWP) : ERM
- RIB MTWO for Light Industrial
  - Cost Estimation
  - Project Controls
  - Model & Data Management

## Coming Soon!

- ERM: Materials Control – Track & Trace, Insights
- Contract Risk Management: Smart Analytics, Workflow enhancement
- Construction Planning (AWP): ERM + control tower
- RIB MTWO for Heavy Industrial
  - Cost Estimation and Project Controls
  - Estimation integrated with AVEVA Simulation solutions
  - Dashboarding & Connected Worker
  - Integrated with AVEVA Solutions

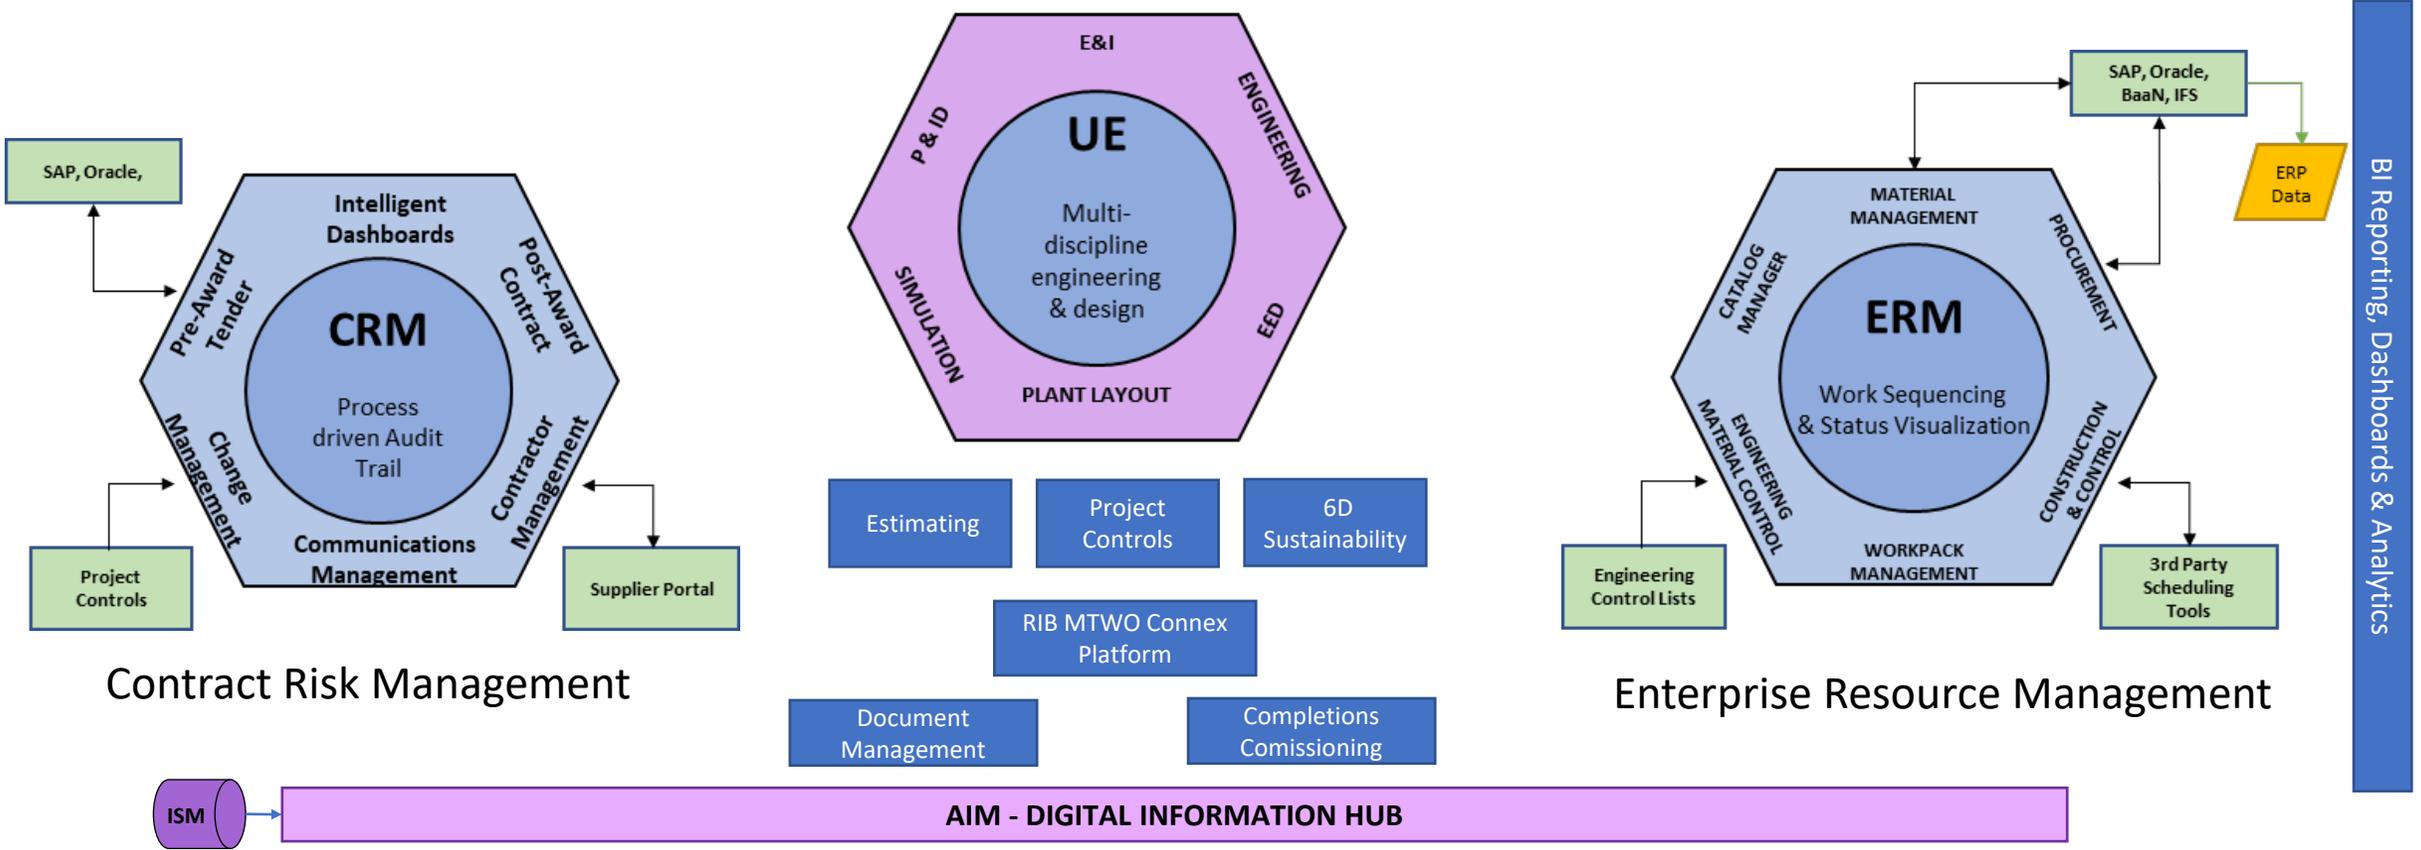

## NextGen UPE (Future Roadmap)

- Enterprise Resource Management: NextGen +
- Contract Risk Management: NextGen +
- Construction Planning (AWP): VCM + AI
- RIB MTWO:
  - Cost Estimation and Project Controls
  - Estimation integrated with AVEVA Simulation solutions
  - Dashboarding & Connected Worker
  - Integrated with AVEVA Solutions
- Completions, Commissioning and WP Execution
- Inspections (Weld and Flange Management)
- Material / Asset Track & Trace
- Document Management

# AVEVA Project Execution Solutions

Sustainability (Total Carbon Footprint Monitoring)

Contract Risk Management

Enterprise Resource Management

**VISION** Deliver a fully capability set of project delivery applications that are integrated to the AVEVA digital platform that support our customers' ability to drive project value (25% TIC), delivery assurance and sustainability

# Connect and Visualize – AVEVA's Engineering Information Management roadmap

Rick Standish – Vice President, Engineering Information Management, AVEVA

**AVEVA**

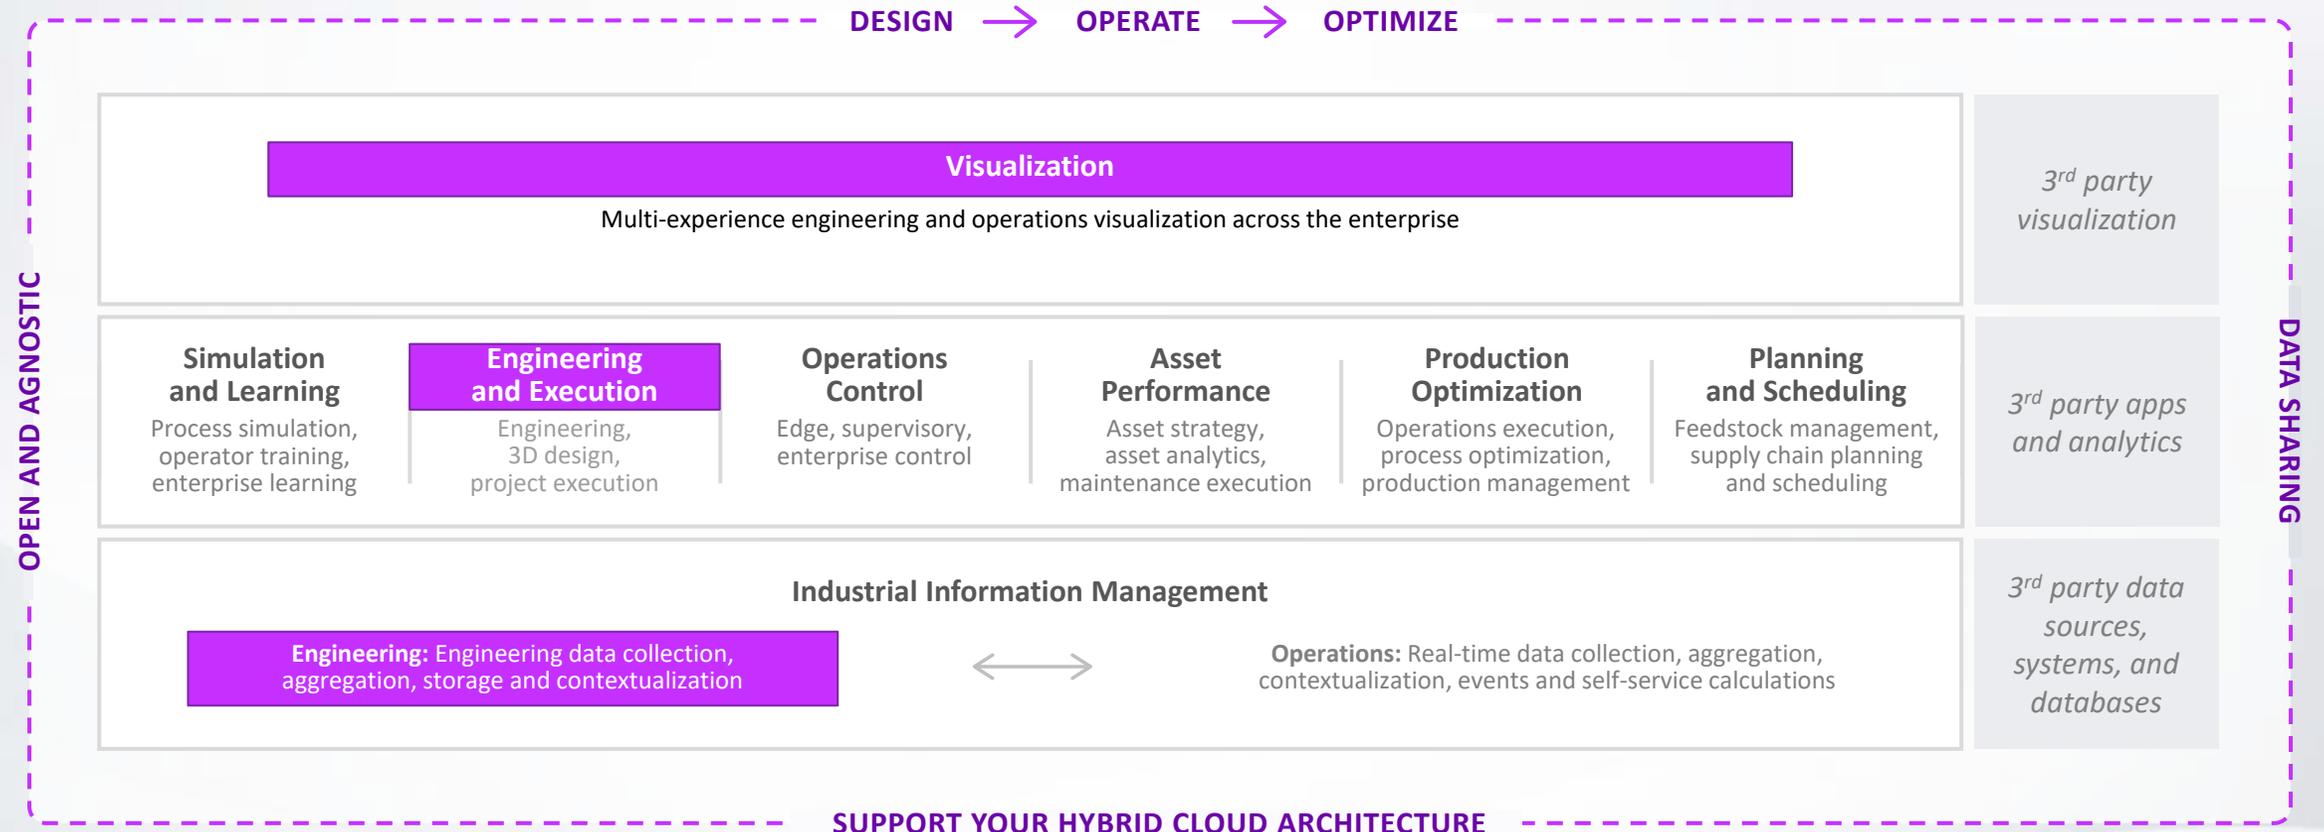

# Delivering a complete digital thread, purpose-built for industry

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

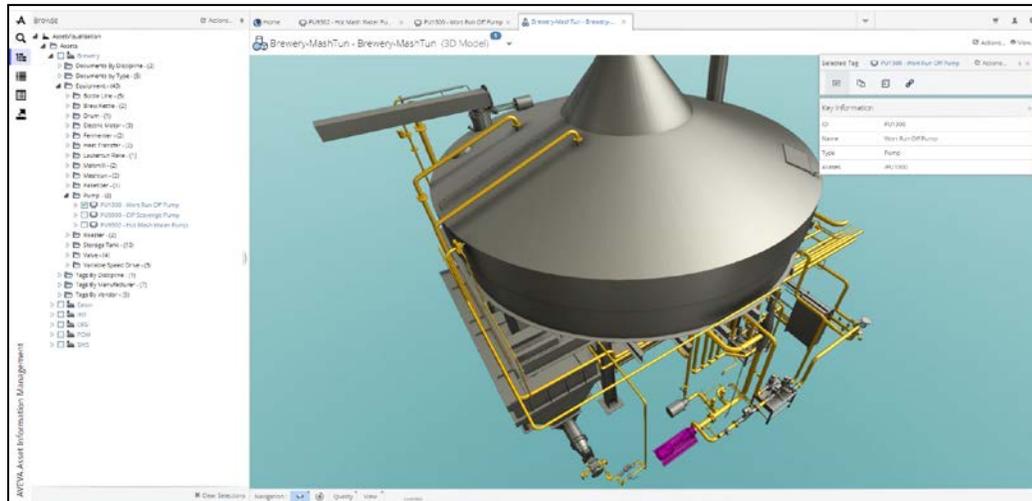

# Delivering a complete digital thread, purpose-built for industry

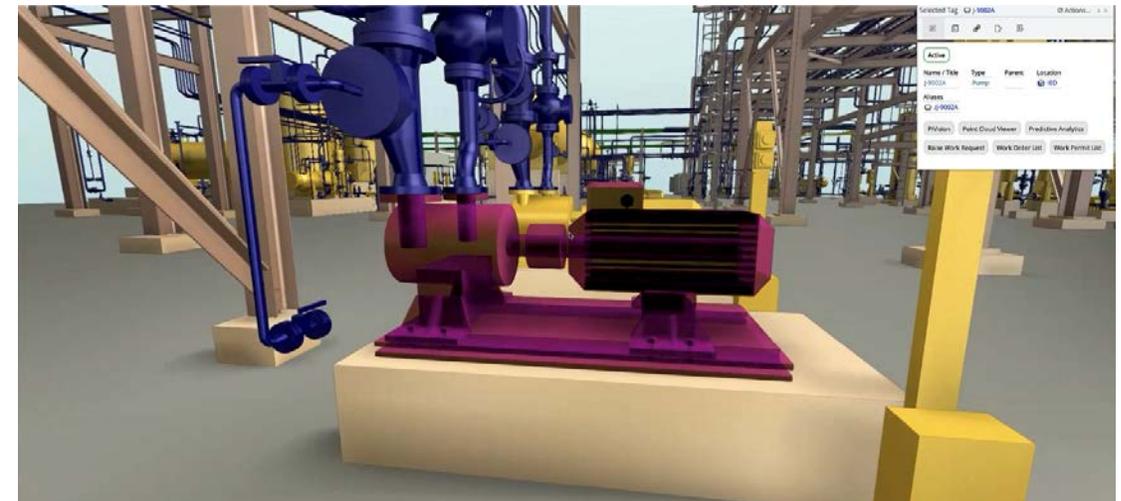

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

# AVEVA Asset Information Management Roadmap

Redefining Asset Insights

Scaling Visualization

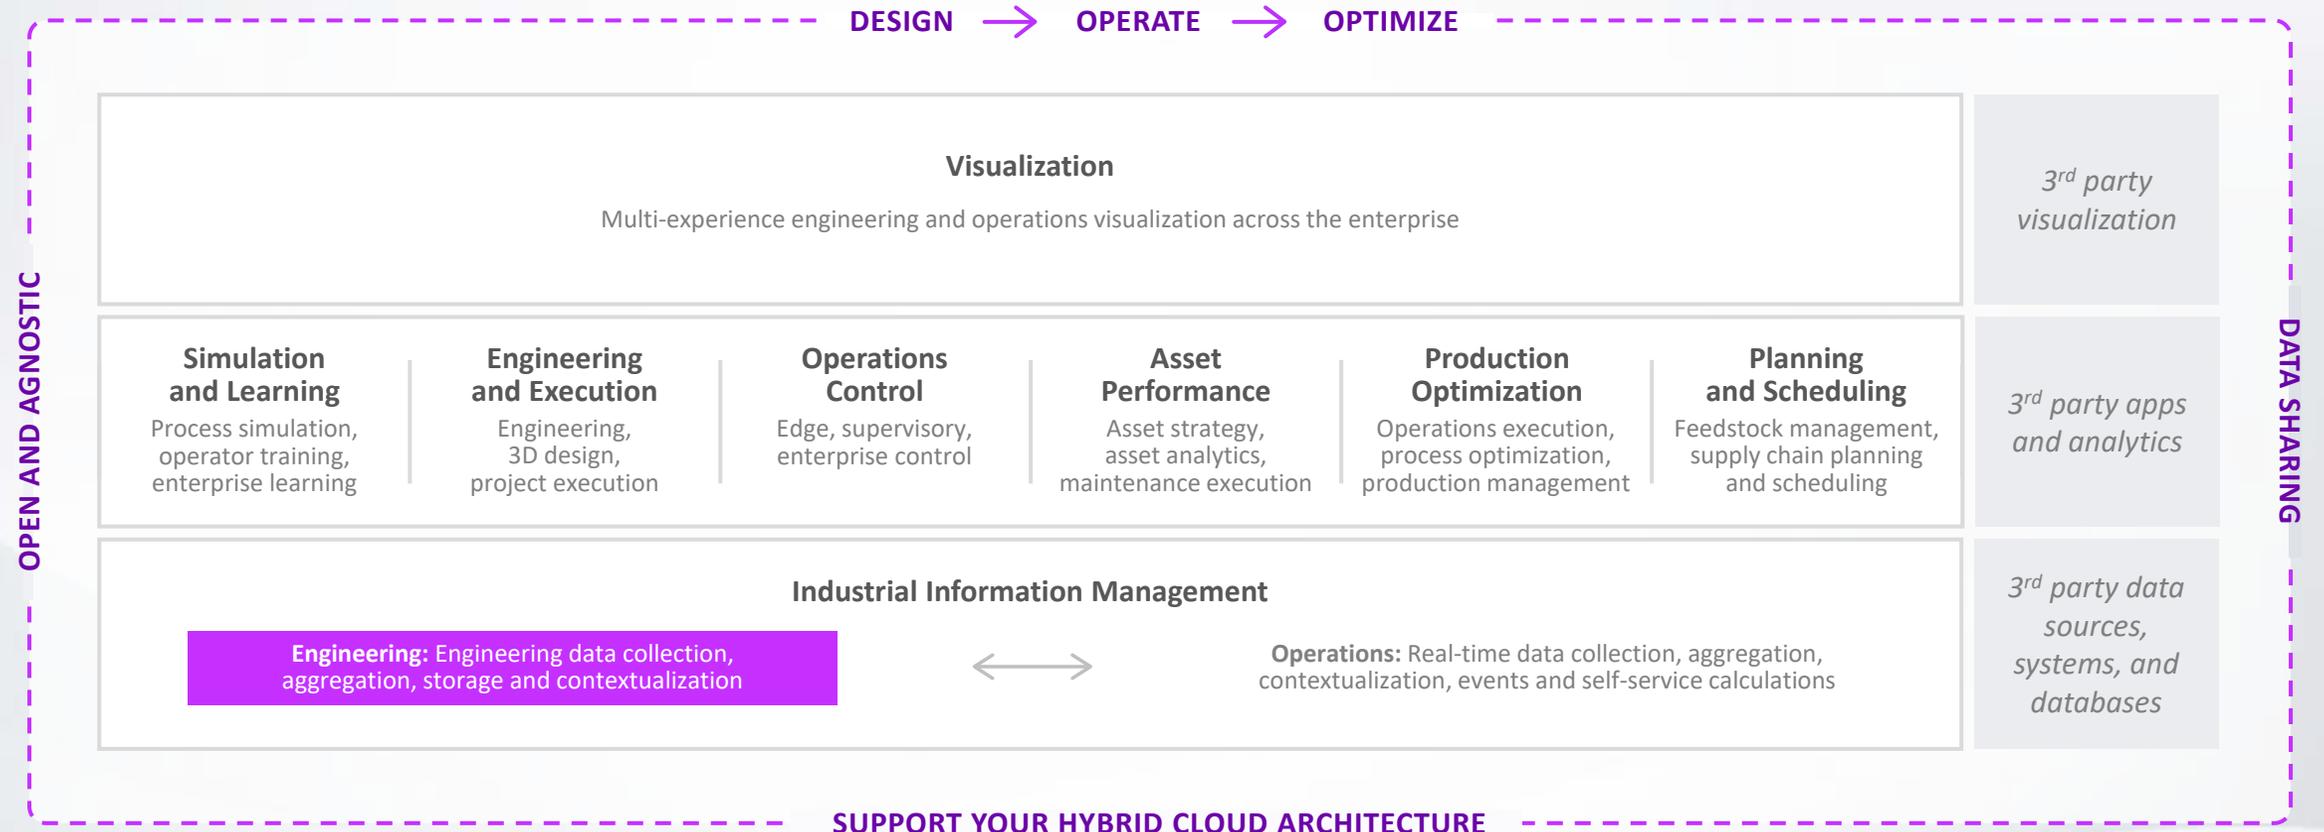

**AVEVA**

Partnering for the Asset Lifecycle

# Delivering a complete digital thread, purpose-built for industry

Accelerate time to value with flexible, scalable, and trusted industrial hybrid SaaS solutions

# The Digital Twin : Information mastery across the asset lifecycle

A unified data platform for better and faster decision-making combining both the engineering and operational data segments of industrial information.

## Data Aggregation

Aggregate and align information from multiple sources to create a single source of truth for a given piece of data

## Data in Context

1D/2D/3D contextual enrichment of information to improve the quality and speed of decisions

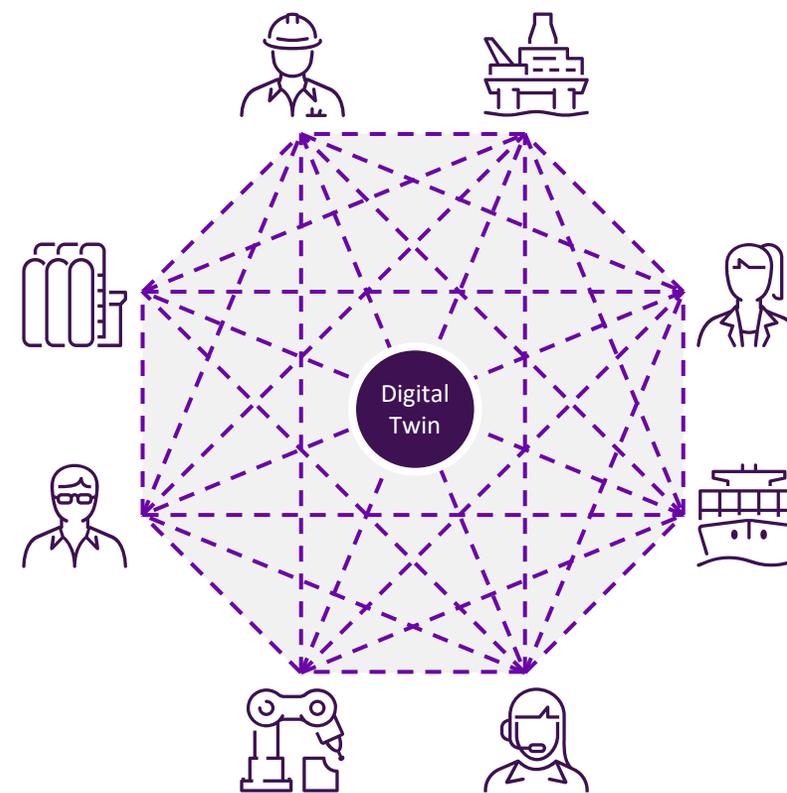

## Data Management

Configuration, change management, approval and baselining of engineering data and requirements.

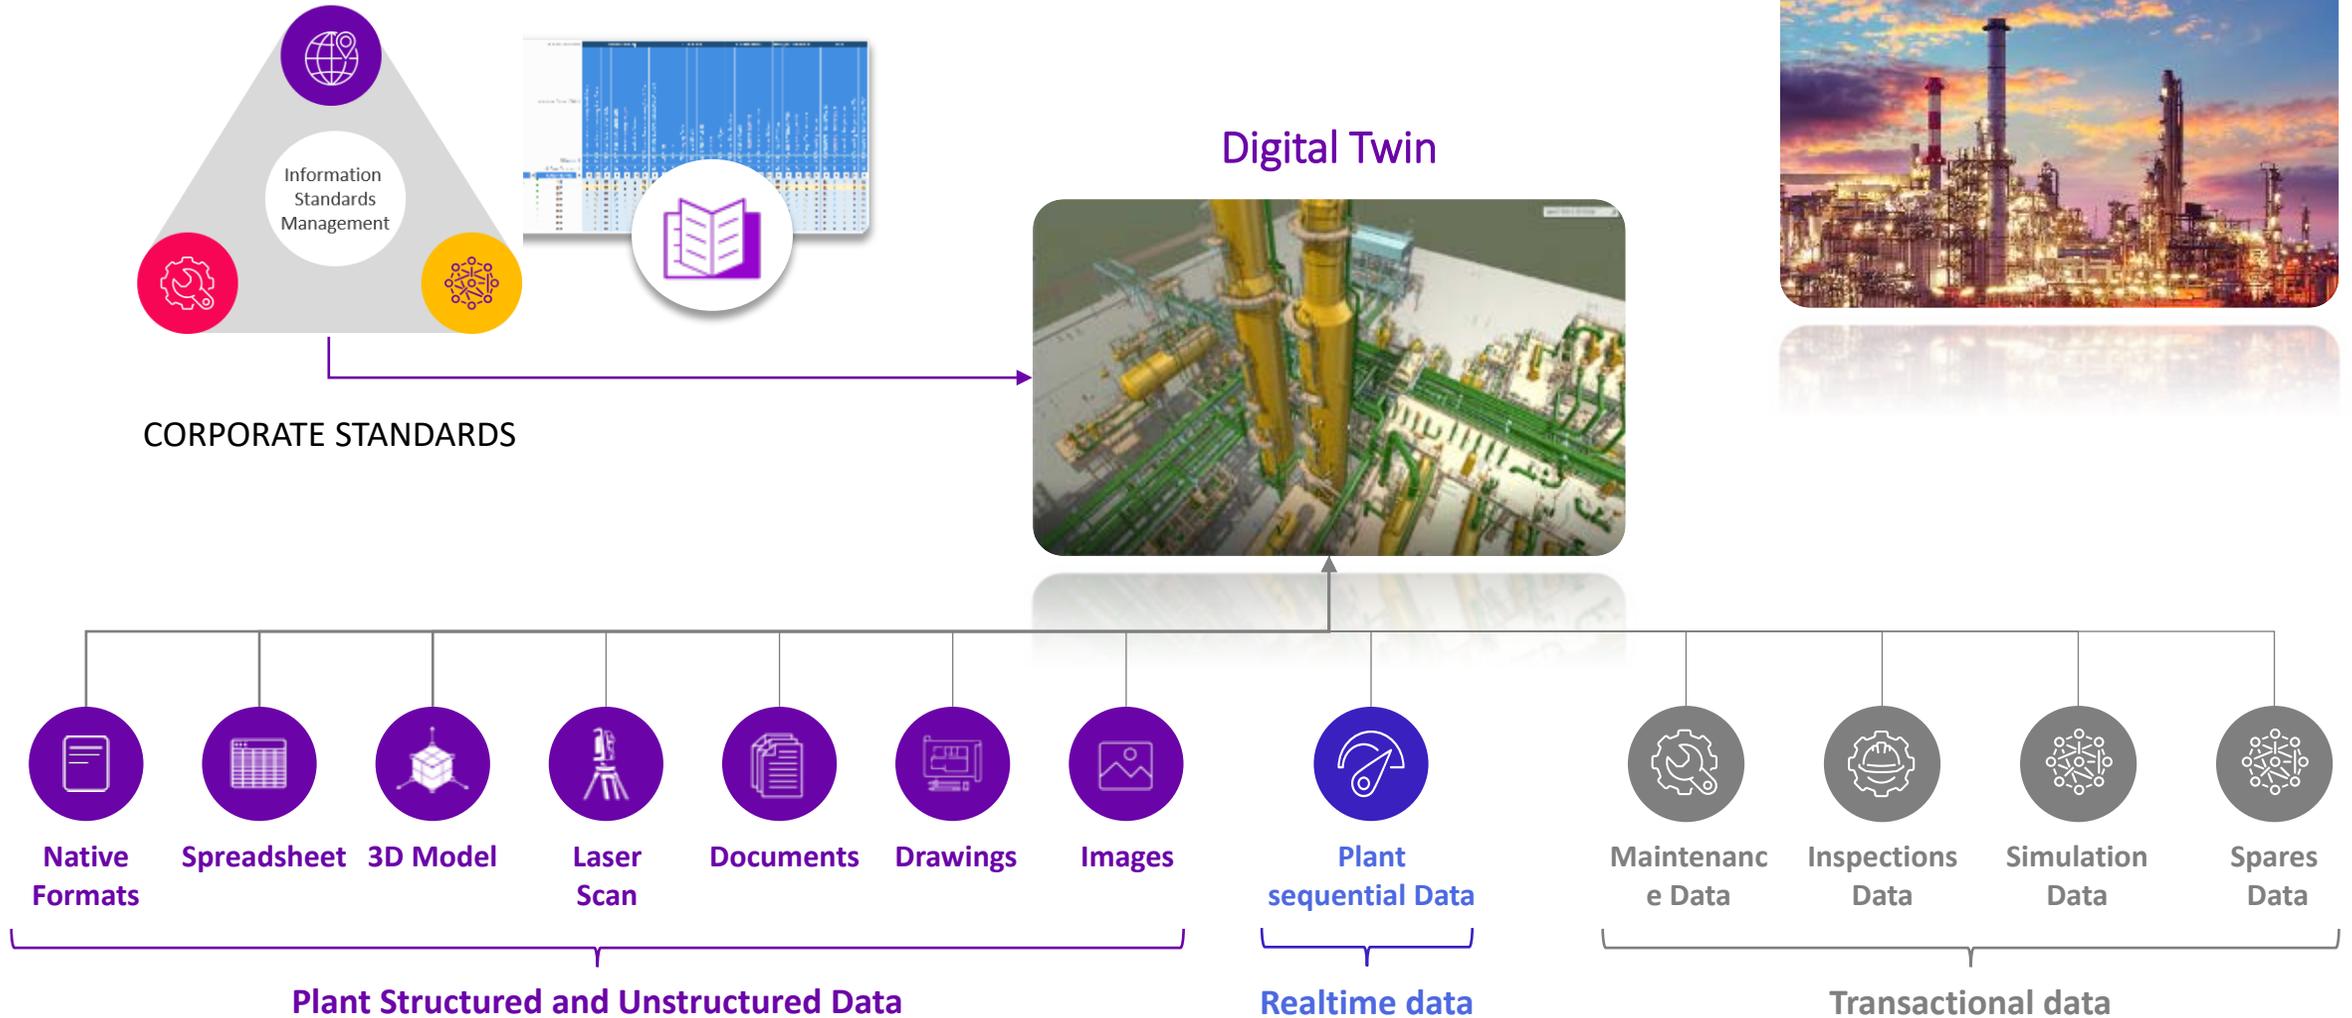

## Data Sharing

Democratize access to information for internal and external stakeholders (OEMs, Partners, etc.)

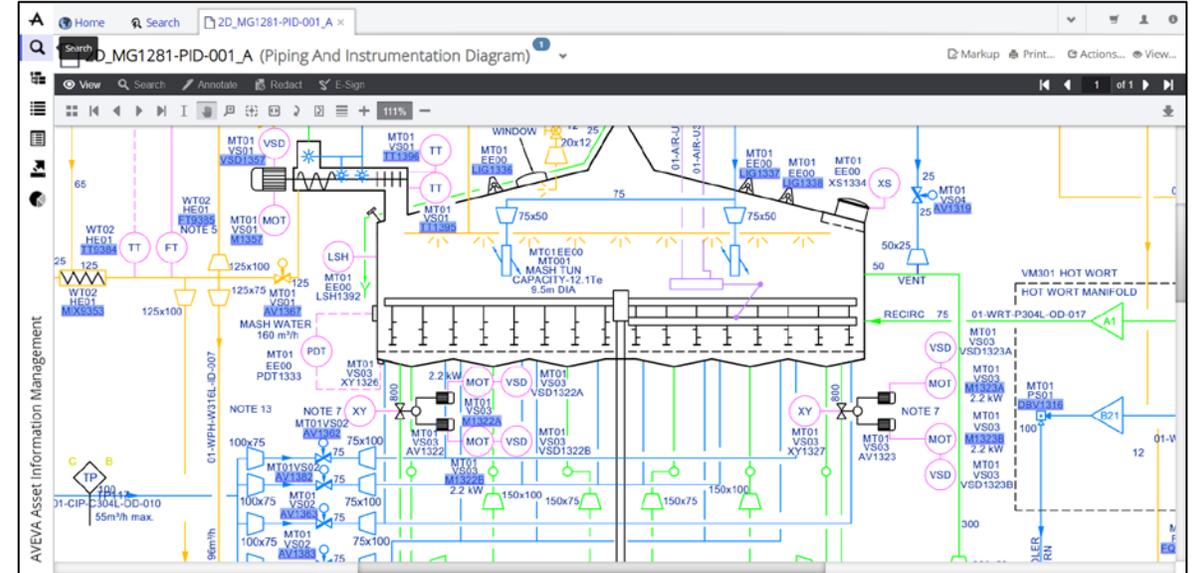

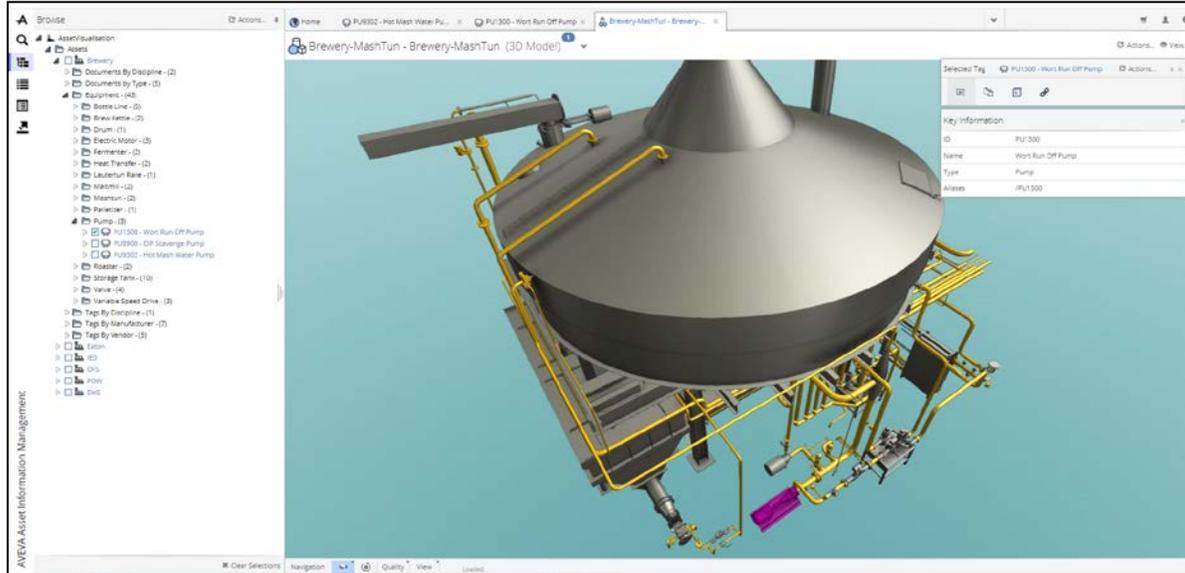

## UNIFICATION OF DATA IN THE DIGITAL TWIN

# Bringing the Digital Twin To Life

# AVEVA Asset Information Management - Advanced

Eliminate data silos with all information available in one place

Improve safety and compliance with quick access to critical information

Gain the insights necessary for informed, good decision making

Save time and effort on finding and validating information

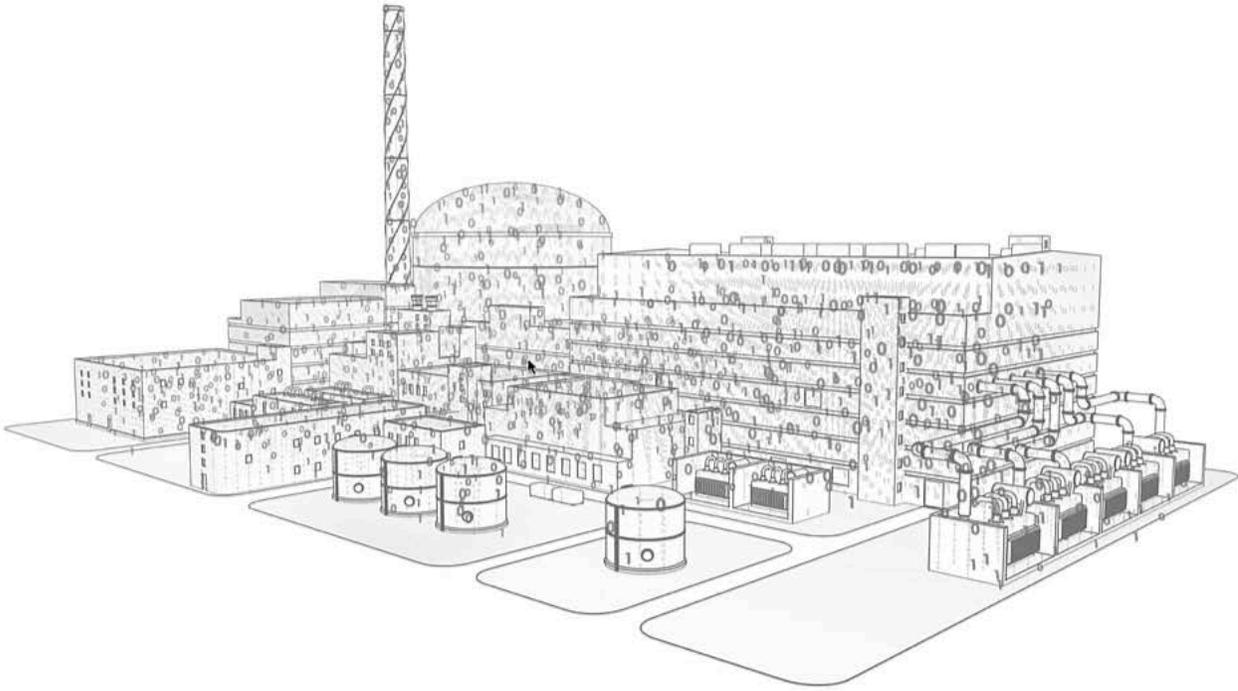

Empower teams to collaborate with a 360° view of data

Reduce costs and time to value with a cloud solution

# AVEVA Asset Information Management™ 5.1.9 *The Future of Engineering Information Management*

Powerful and effective  
Information Management for  
Engineering and Operations

## Collect

Bring together information in multiple formats and from various source systems to create a complete cross-reference index with links to, and associations between, all items in the digital asset.

## Locate

Provide fast and powerful search capabilities which, combined with its knowledge of tag and document associations, delivers efficient and effective location of information required for decision making.

## Discover

Automatically extract and maintain tag to tag, tag to document, and document to document relationships. Exploiting this interconnectivity, it provides efficient navigation of the digital assets and aids in the discovery of new insights in your information.

## View

Deliver high-quality web-based visualisation of tag data, documents, drawings, 3D models and laser scans. Automatic creation of hotspots and hyperlinks provides additional intelligence for easy identification and navigation of tags.

## Report

Improve project and operational compliance by aggregating project and asset data to report on the quality, consistency, and completeness of your information.

Democratize access to information for internal and external stakeholders (OEMs, Partners, etc.)

# AVEVA Announces a Strategic Licensing Partnership with Aras

A unified data platform for better and faster decision-making combining both the engineering and operational data segments of industrial information.

## Data Aggregation

Aggregate and align information from multiple sources to create a single source of truth for a given piece of data

## Data in Context

1D/2D/3D contextual enrichment of information to improve the quality and speed of decisions

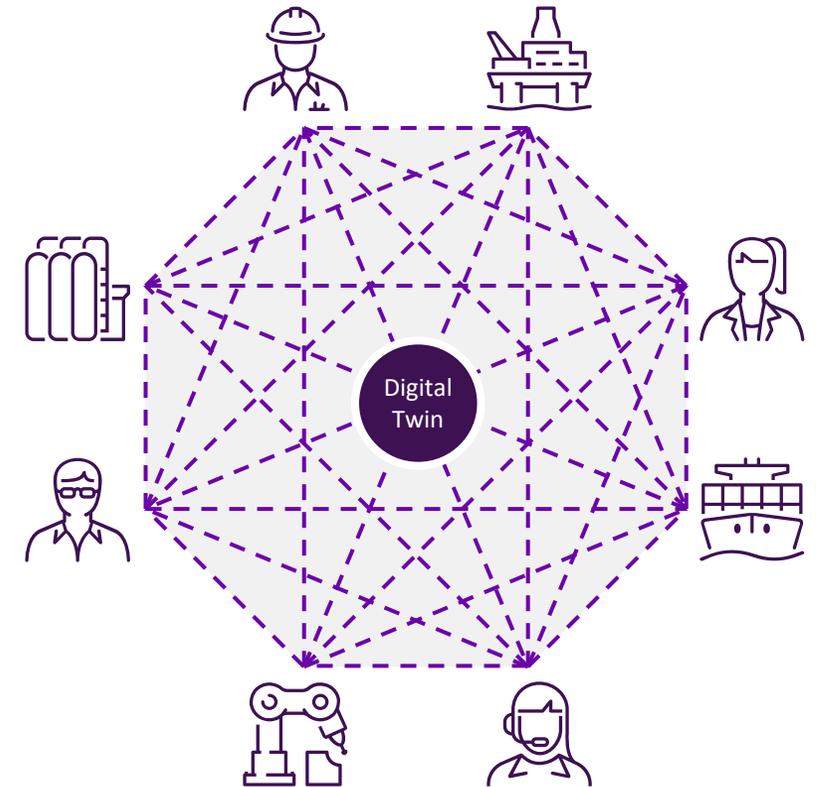

Configuration, change management, approval and baselining of engineering data and requirements.

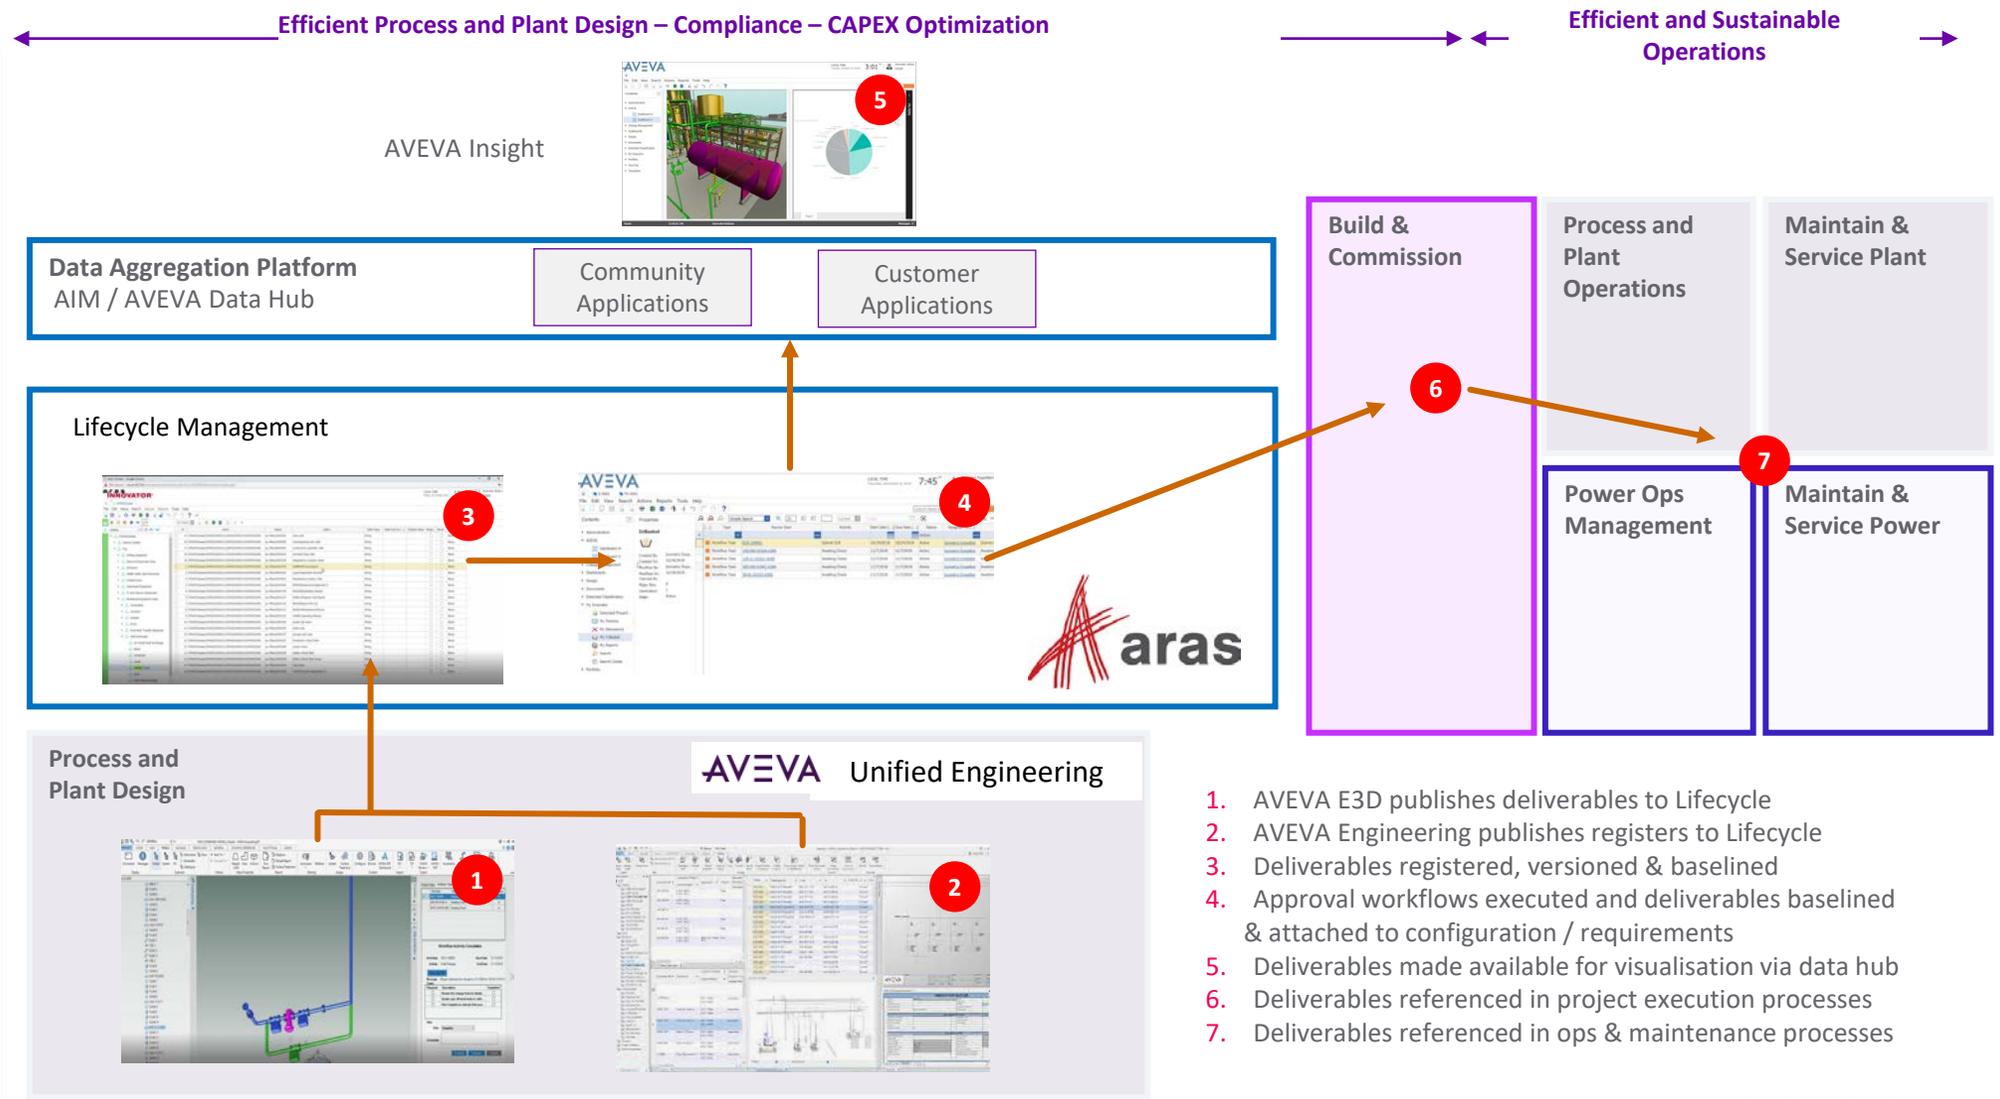

## Data Sharing

Democratize access to information for internal and external stakeholders (OEMs, Partners, etc.)

## UNIFICATION OF DATA IN THE DIGITAL TWIN

# Joint Value Proposition Example: System of Record for the Engineering Digital Twin (Aras – AVEVA)

## Customer Problems to solve

Engineering system of record for the AVEVA Digital Twin

Change and workflow management for Engineering data

Data compliance and quality verification for Engineering Handover

Requirements and configuration management for regulated industries (e.g. Nuclear)

Sister ship and serial management for the marine industries

Product lifecycle management for highly complex ETO products

Visualization and community sharing of verified data for the extended supply chain

1. AVEVA E3D publishes deliverables to Lifecycle
2. AVEVA Engineering publishes registers to Lifecycle
3. Deliverables registered, versioned & baselined
4. Approval workflows executed and deliverables baselined & attached to configuration / requirements
5. Deliverables made available for visualisation via data hub
6. Deliverables referenced in project execution processes
7. Deliverables referenced in ops & maintenance processes

#### ABOUT AVEVA

AVEVA is a global leader in industrial software, sparking ingenuity to drive responsible use of the world's resources. The company's secure industrial cloud platform and applications enable businesses to harness the power of their information and improve collaboration with customers, suppliers and partners.

Over 20,000 enterprises in over 100 countries rely on AVEVA to help them deliver life's essentials: safe and reliable energy, food, medicines, infrastructure and more. By connecting people with trusted information and AI-enriched insights, AVEVA enables teams to engineer efficiently and optimize operations, driving growth and sustainability.

Named as one of the world's most innovative companies, AVEVA supports customers with open solutions and the expertise of more than 6,400 employees, 5,000 partners and 5,700 certified developers. With operations around the globe, we are headquartered in Cambridge, UK and listed on the London Stock Exchange's FTSE 100.
