

Solutions  
for human  
progress

NOVEMBER 2022

---

# The Journey to Integrated Operations

Rodolfo Pino - Head of Advanced Analytics SQM

David Rojas - Data Scientist SQM

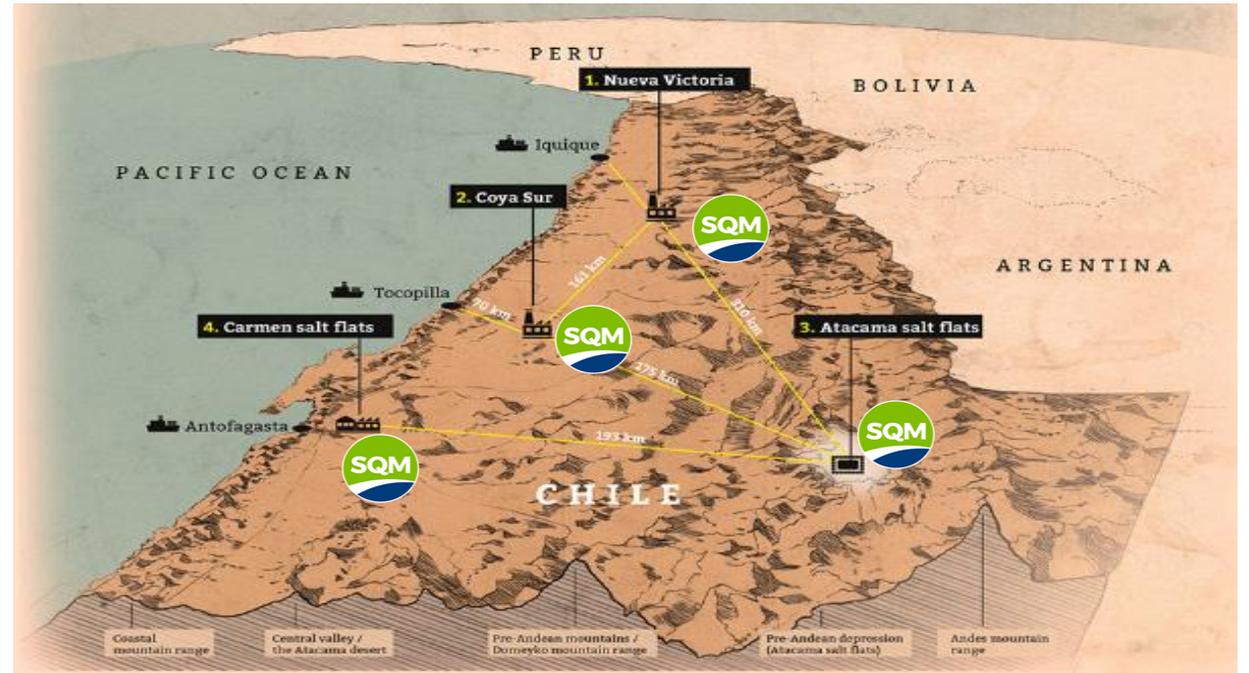

Luis Yacher - Managing Director of CONTAC

**AVEVA**

Solutions for human progress

SQM is a mining company operating in northern Chile. It is present in strategic industries for sustainable development such as health, food industry, technology, and the clean energies that move the world.

# Lithium process from raw material to export all world

***Salar de Atacama***

***Chemical Plant***

Lithium carbonate and Lithium hydroxide production processes.

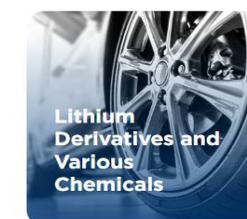

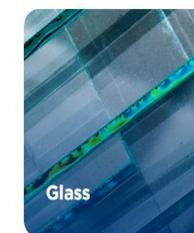

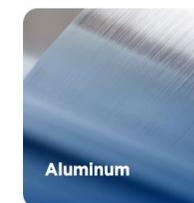

Located in Antofagasta, about 300 km. far from Salar de Atacama.

***Tocopilla Port***

The refined product is shipped worldwide from the port of Tocopilla, north Antofagasta

# Main Lithium applications

# SQM LITHIUM IN NUMBERS

An aerial view shows the brine pools and processing areas of the Soquimich (SQM) lithium mine on the Atacama salt flat in the Atacama desert of northern Chile, January 10, 2013. REUTERS/Ivan Alvarado/File Photo

 <b>97.4%</b> of the energy used in the lithium production process is solar	 <b>300</b> environmental monitoring points we deploy from the core of the Salar de Atacama to our operation	 <b>5.256 \$ MUS</b> is the total investment value that we deliver to the communities through the Corfo Contract	 <b>180.000</b> metric tons of Lithium Carbonate will be our production capacity in 2023
 <b>50%</b> reduction of brine we will experience in 2030	 <b>2030</b> will be the year in which the lithium production process will be carbon neutral	 <b>99%</b> of operation count the ports from where we export our products to the 5 continents	 <b>16.7%</b> of the staff are women; figure that doubles the national average of the Chilean mining industry

SQM Lithium market share	19%
Sales (Mton)	12.3

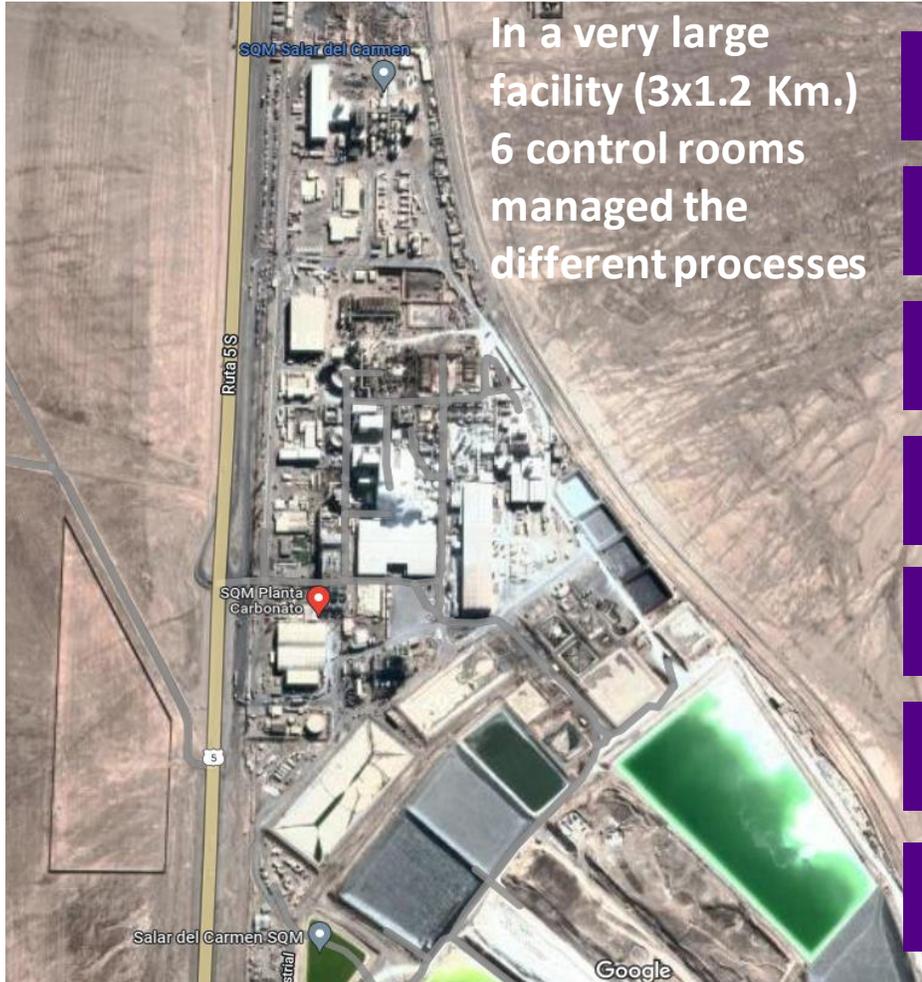

---

# The Journey to Integrated Operations

**AVEVA**

# Initial situation

In a very large facility (3x1.2 Km.) 6 control rooms managed the different processes

## Plants

Lithium Hydroxide Plant  
Processes to obtain LiOH

Carbonate Plant  
Calcium and Magnesium Purification

Carbonate  
Drying and compaction

Carbonate Plant  
Carbonation Processes

SX  
Solution Refining

PRS Plant  
Industrial Water Processes

Salar of Atacama  
Lithium Extraction Wells, Plant Sulfates

- Maintenance Team
- Reliability Team
- Process Eng. Team

& Data analytics Team

- Plant Managers
- Operation Manager

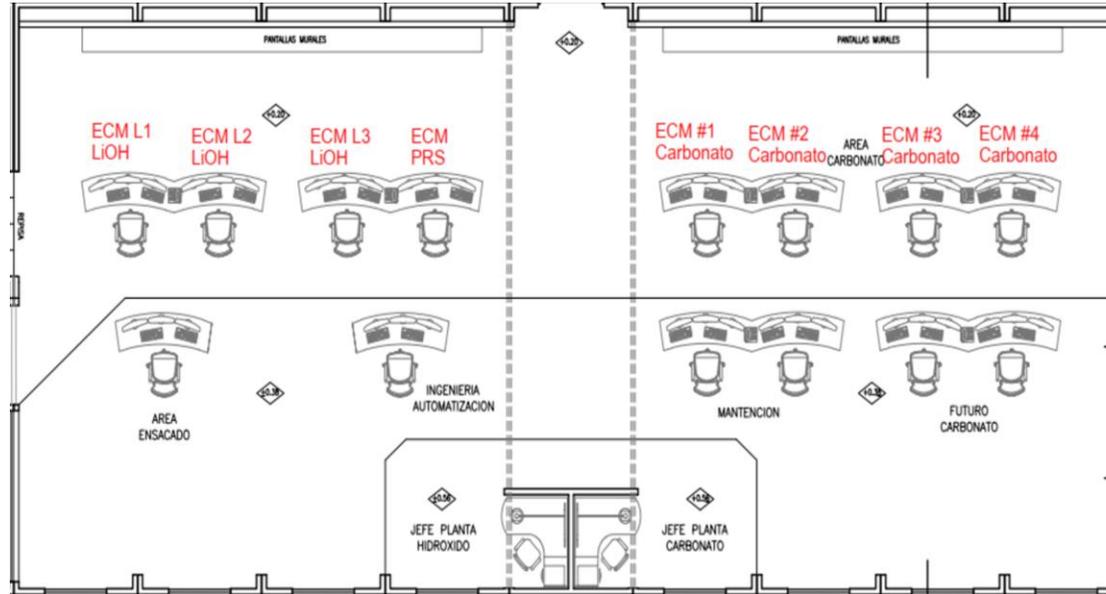

# The IOC Project infrastructure

## Operator Consoles centralization

Virtualization of Control System Servers

OT network upgrade

Standardization of operator consoles

## Operation center designed for coordination and collaboration

Workspaces for the support activities: maintenance, process engineering, planning, process control & automation

Workspaces for Plant Managers

Located at the same building used by the Operation Managers and SME Teams

Lithium Hydroxide Plant  
Processes to obtain LiOH

Carbonate Plant  
Calcium and Magnesium Purification

First Semester  
2023

SX  
Solution Refining

Carbonate Plant  
Carbonation Processes

Carbonate  
Drying and compaction

PRS Plant  
Industrial Water Processes

In progress,  
December  
2022

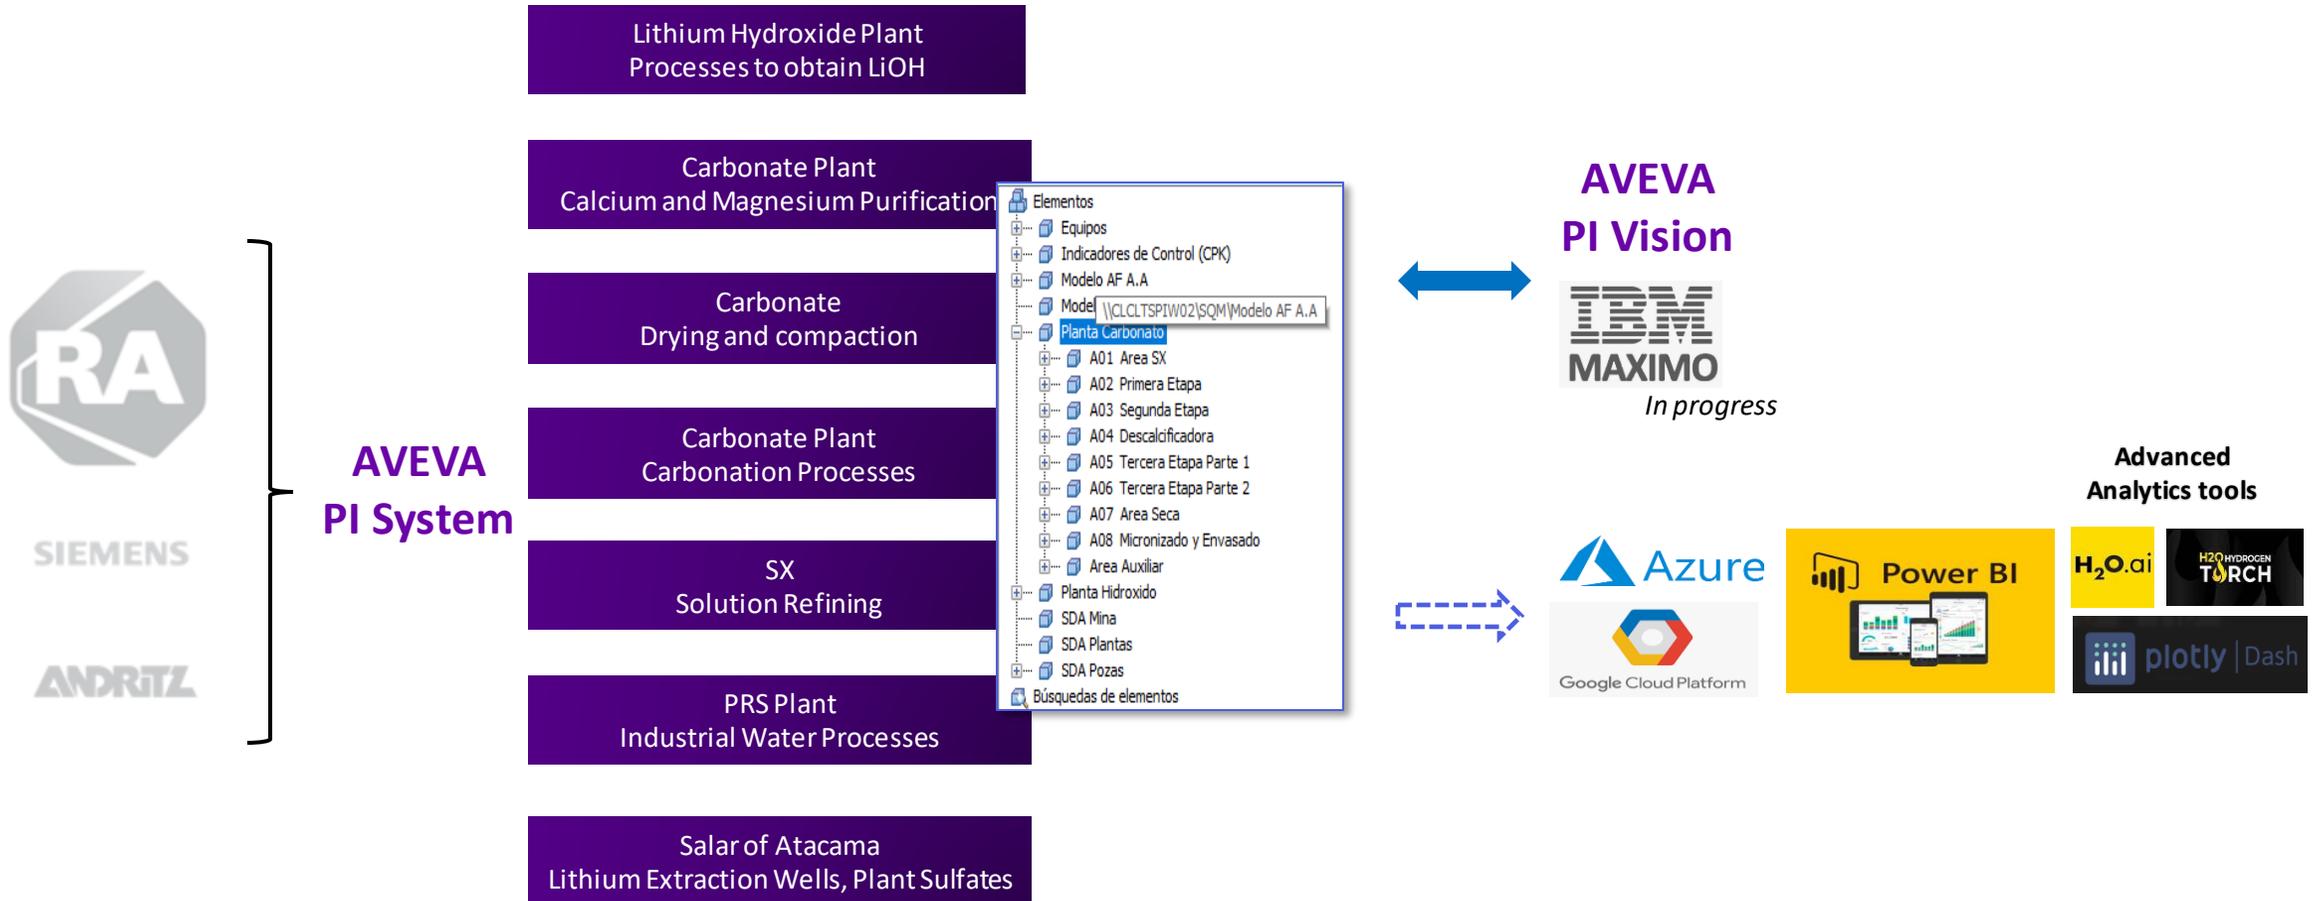

Salar of Atacama  
Lithium Extraction Wells, Plant Sulfates

AVEVA

# The IOC Project, Operational Data Infrastructure

# Integrated Operations, key concepts and goals...in 2 slides

## Focus on

- Value chain optimization

Make overall OEE real

By enabling the close coordination of processes and support activities: programming, reliability, process engineering, LTO

- Real time Operation Management

Enabling each person of the organization a 360° awareness, as close to Real Time as possible

Of its scope of duties  
How its actions may affect others  
How others may affect its goals

Perceive its current situation  
Understand its current situation  
Project the impact of its actions

## Integrated Operations, key concepts and goals ...in 2 slides

- Information is delivered timely, in context and related to “action”
- Information focused on “value interfaces”, meaning the organizational links between operators and between operators and the support teams that are closely related with the overall optimization: short term programming, reliability and process engineering
- Information systems enable new organizational schemas, like re-locating and/or co-locating current duties/roles

# Addressing the quick wins & short term road map

## Workshop

A WorkShop was conducted at the plant site with the participation of Operators, Plant Managers, Process Engineers, Maintenance Team, Data Analytics Team

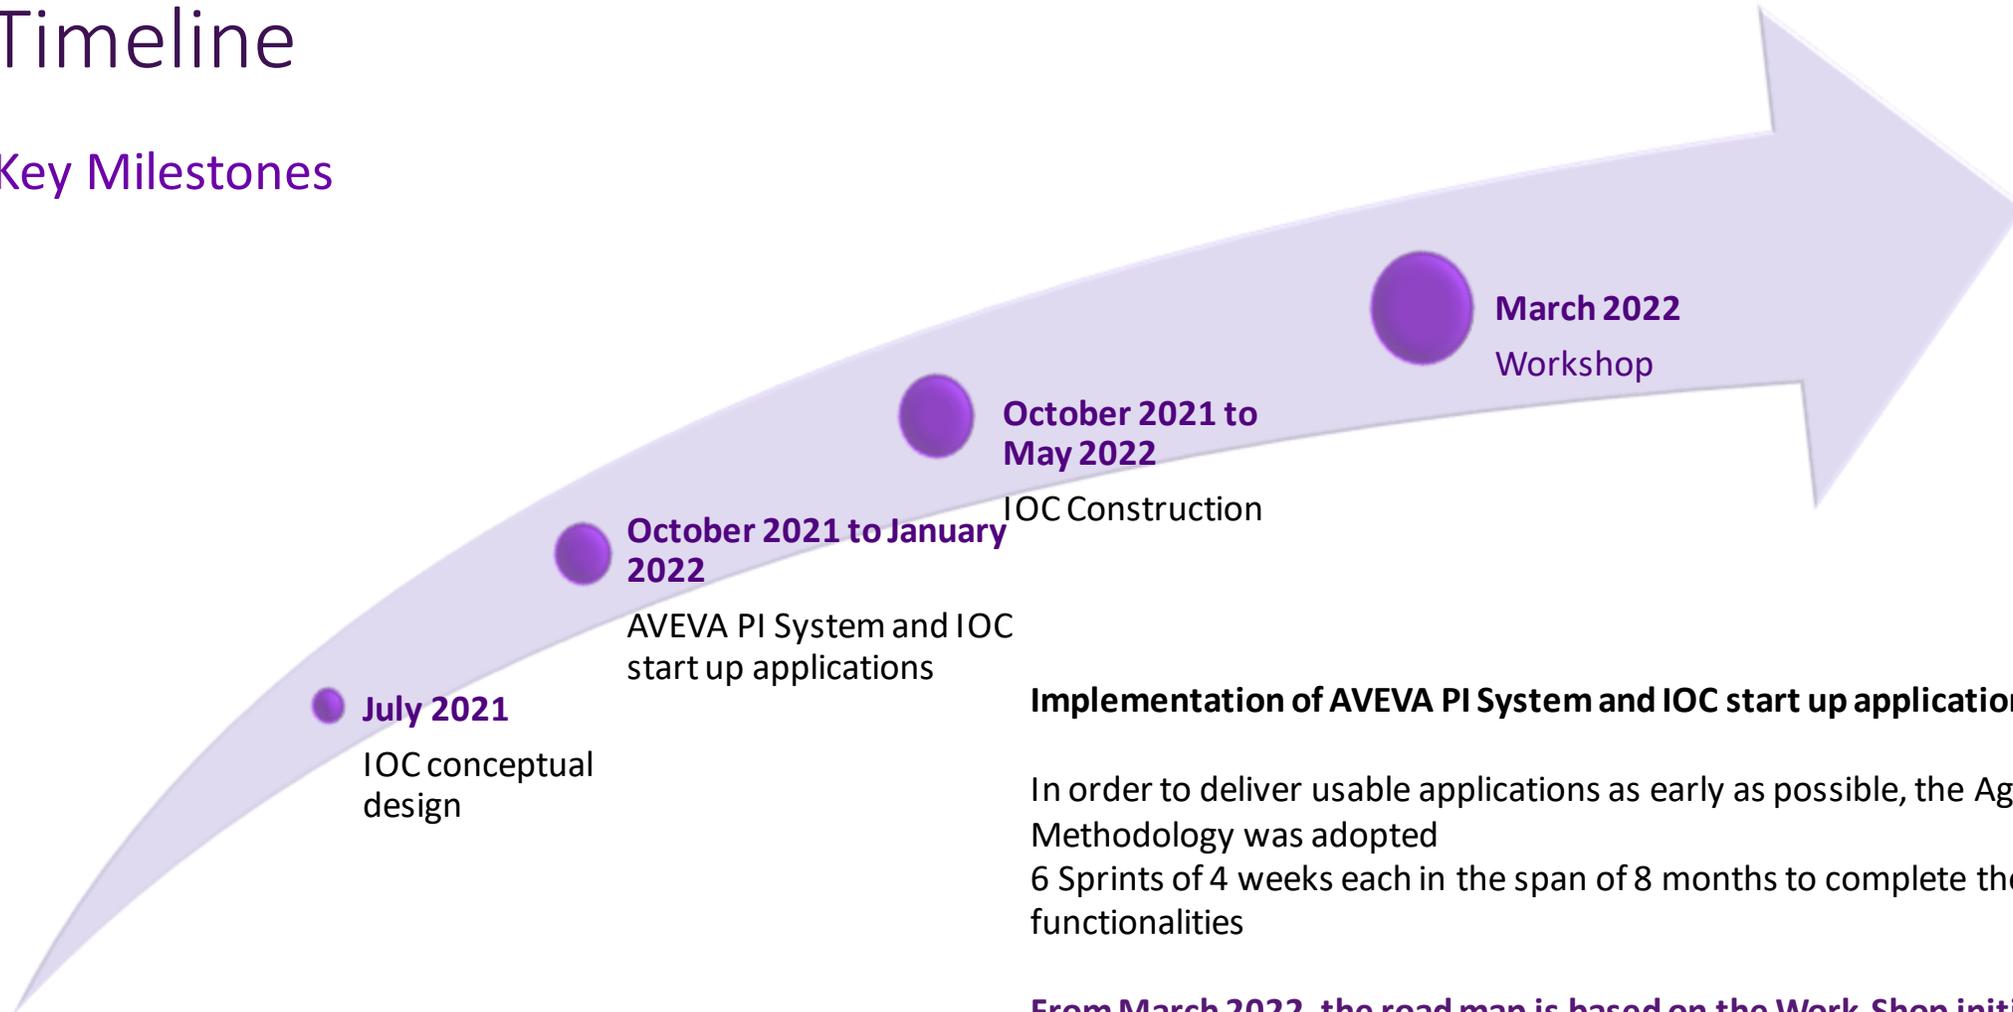

81 value initiatives were collected

A second workshop was conducted, with the IOC key members, where the initiatives were prioritized, considering its implementation difficulties and value impact

A short term road map was prepared, considering 50 of the original 81 ideas

# Timeline

## Key Milestones

**July 2021**

IOC conceptual design

**October 2021 to January 2022**

AVEVA PI System and IOC start up applications

**October 2021 to May 2022**

IOC Construction

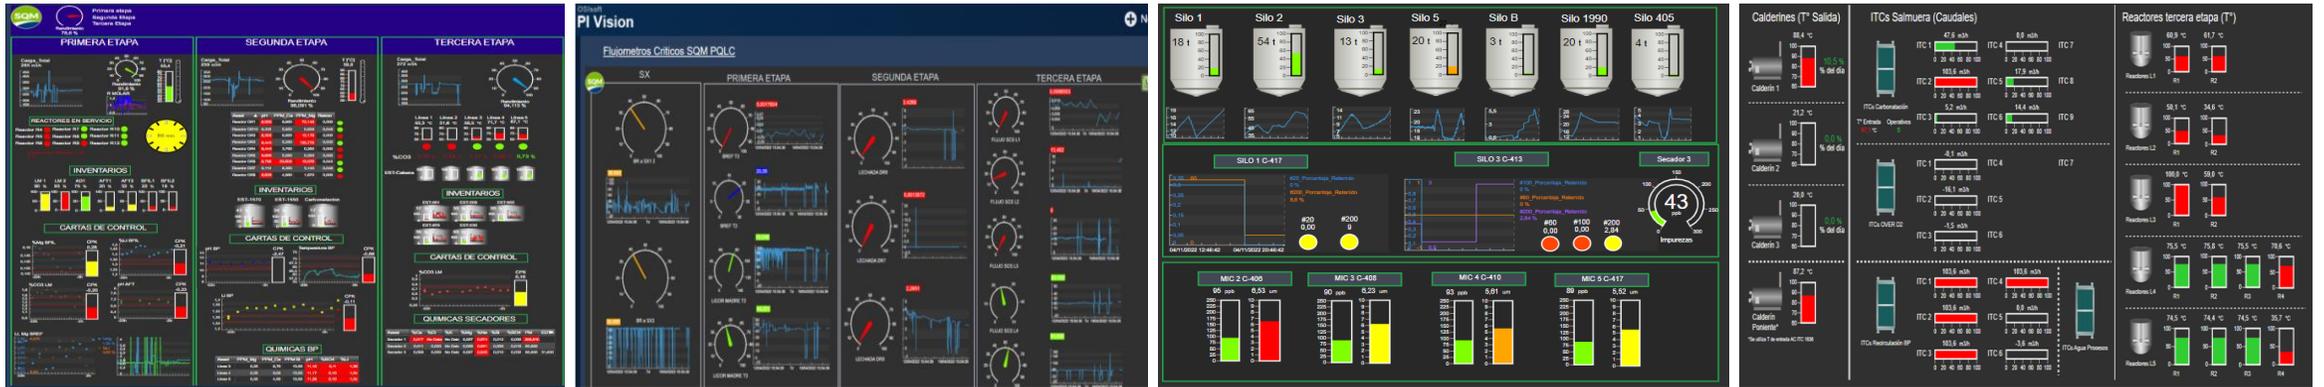

**March 2022**  
Workshop

### **Implementation of AVEVA PI System and IOC start up applications**

In order to deliver usable applications as early as possible, the Agile Scrum Methodology was adopted  
6 Sprints of 4 weeks each in the span of 8 months to complete the first set of IOC functionalities

**From March 2022, the road map is based on the Work-Shop initiatives. 20 from 81 are now completed and 10 are in progress, 51 are planned for 2023/2024**

# The Quick Wins & AVEAV PI System

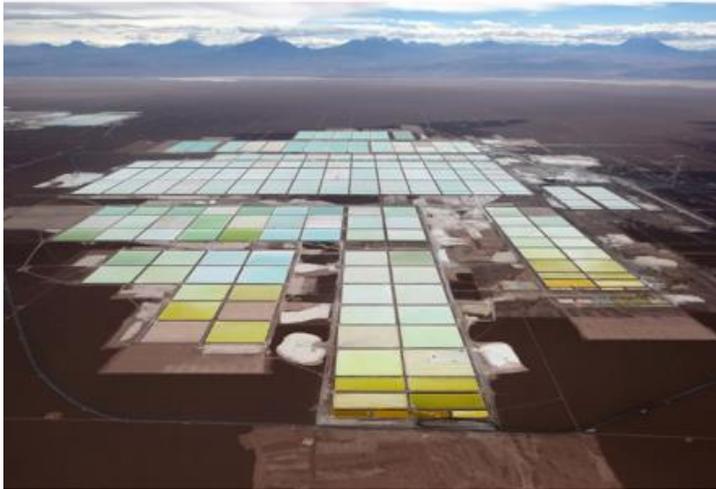

- Situational awareness dashboards
- Early warnings of process deviations
- Control charts for process monitoring
- Critical instrumentation monitoring
- Critical asset monitoring
- Integrated Reporting
- IBM Maximo Integration ( in progress)

*Advanced analytics online  
“advisor” for boilers & process  
reactors optimization*

#### ABOUT AVEVA

AVEVA is a global leader in industrial software, sparking ingenuity to drive responsible use of the world's resources. The company's secure industrial cloud platform and applications enable businesses to harness the power of their information and improve collaboration with customers, suppliers and partners.

Over 20,000 enterprises in over 100 countries rely on AVEVA to help them deliver life's essentials: safe and reliable energy, food, medicines, infrastructure and more. By connecting people with trusted information and AI-enriched insights, AVEVA enables teams to engineer efficiently and optimize operations, driving growth and sustainability.

Named as one of the world's most innovative companies, AVEVA supports customers with open solutions and the expertise of more than 6,400 employees, 5,000 partners and 5,700 certified developers. With operations around the globe, we are headquartered in Cambridge, UK and listed on the London Stock Exchange's FTSE 100.
