AVEVA

AVEVA Connect: Our industrial cloud platform

Our industrial cloud platform is your digital transformation hub

- ✓ Transform faster
- ✓ Enable new ways of work
- ✓ Connect and collaborate
- ✓ One single source of truth
- ✓ Move from CapEx to OpEx
- ✓ Lower dependency on IT
- ✓ Always the latest and greatest features
- ✓ Easily scale up and down
- ✓ Built with security, resiliency, high-availability

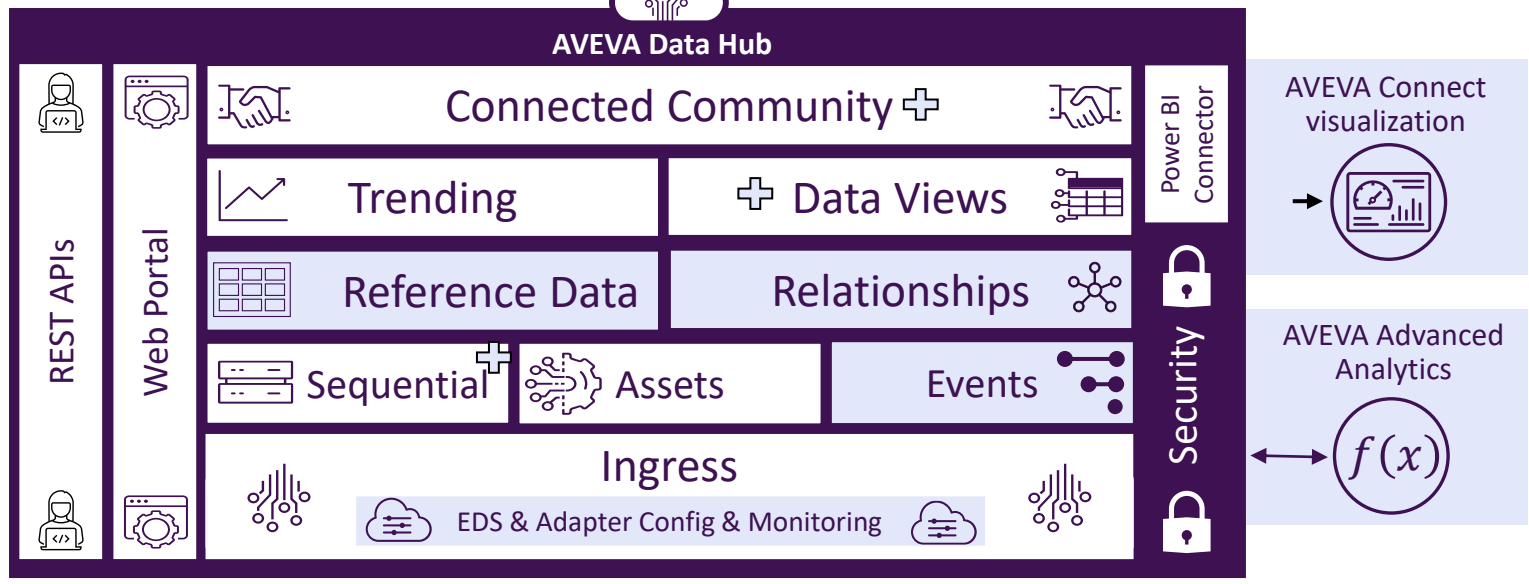

AVEVA Data Hub

A cloud-native industrial platform designed for aggregating, storing, enriching, accessing, analyzing, and securely sharing real-time operations data from historians, edge devices, and more

- Managed, secure, multi-tenant platform
- Operated & maintained by AVEVA
- High speed, scalable, elastic, & resilient
- Modern, secure REST APIs
- Built & deployed on Microsoft Azure

AVEVA Data Hub in 2023

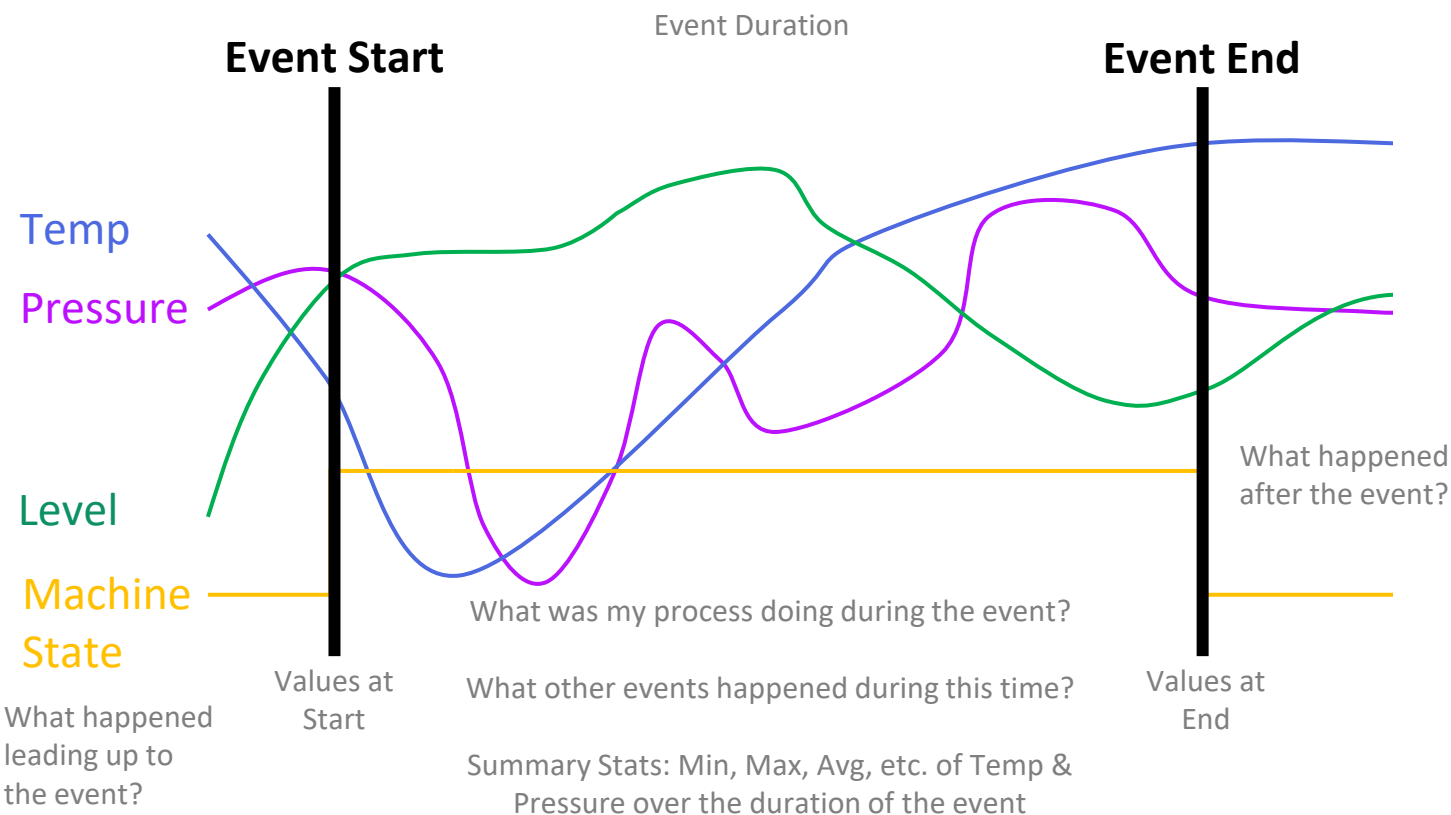

A cloud-native industrial platform designed for aggregating, storing, enriching, accessing, analyzing, and securely sharing real-time operations data from historians, edge devices, and more

- Managed, secure, multi-tenant platform
- Operated & maintained by AVEVA
- High speed, scalable, elastic, & resilient
- Modern, secure REST APIs
- Built & deployed on Microsoft Azure

Supported Regions
 West US (California)
 North Europe (Ireland)
 Australia East (New South Wales)

Events capture meaningful industrial context & observations

Which events are occurring most frequently on this asset (by count or cumulative duration)?

Find all the times when _____ happened over the past month on my wind turbines.

Overlay the temperature for my last 30 batches for my product 'Super Drug'.

Utilities Startups & Shutdowns Peak vs. Off-peak Power GADS Reporting	Metals & Mining Downtime / Reason Codes Anode Tracking Material Transfers	Oil & Gas Specific Crude Runs Catalyst Change Outs Well Testing

Event & Production Data Context in AVEVA Data Hub

Enterprise Connected AVEVA MES

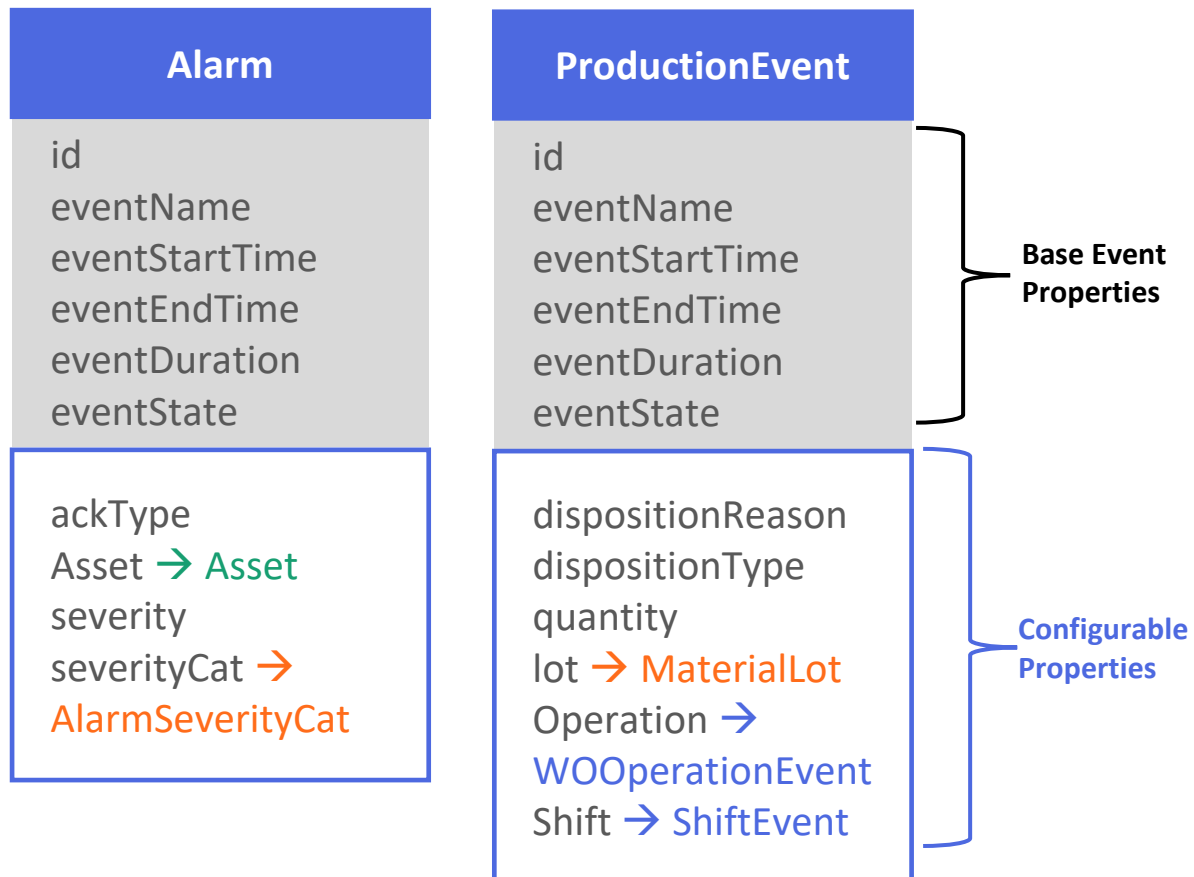

- **Egress & API**
 - *AVEVA Connect visualization services*: Visualization & Reporting for AVEVA MES
 - Rich GraphQL API for accessing events & related events, reference data, and assets.
 - GraphQL Explorer UI for building complex queries easily
- **Enrichment**
 - *AVEVA Advanced Analytics*: creation of events from process data, inclusion of events in analytics & machine learning, visualization of events
- **Storage**
 - Flexible schema for modeling & storing industrial events & reference data
 - Capture complex relationships between events, reference data, and assets
 - Events leveraging scale of the cloud
- **Ingress**
 - Rich API for ingressing event data from other applications & event sources
 - Out of the box connectivity for AVEVA MES

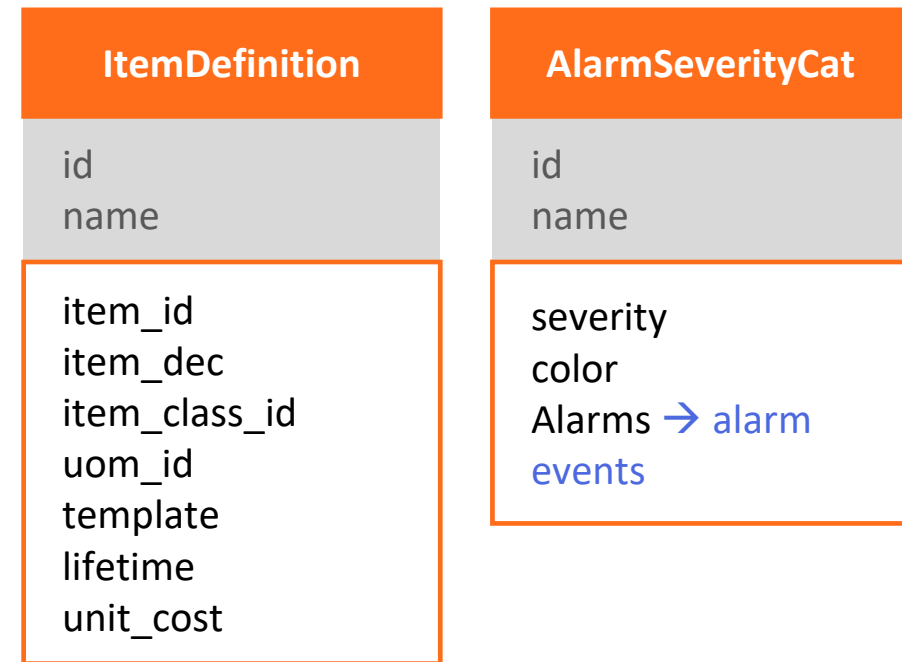

Flexible schema for modeling Events & Reference Data

AVEVA Data Hub Events & Reference Data

Event Types – definitions for domain specific events

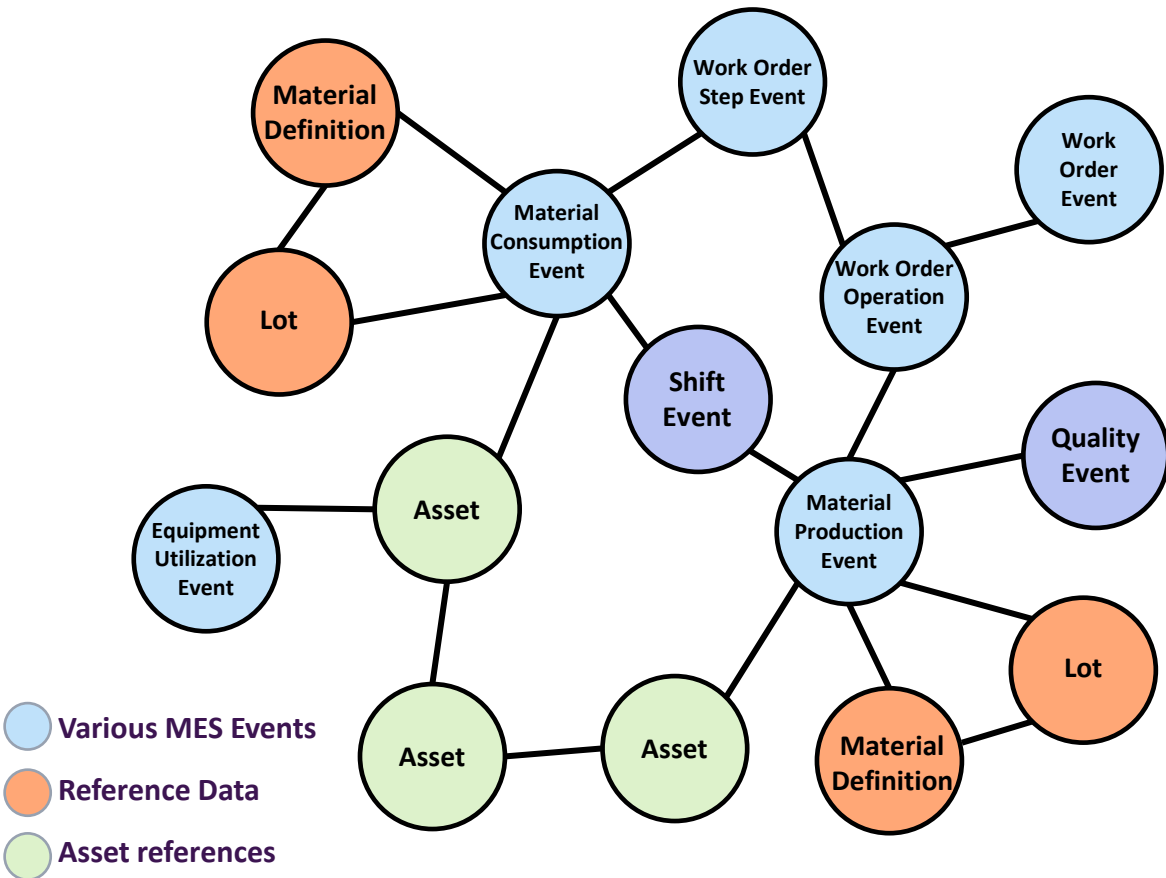

Reference Data Types – definitions for additional context

Capturing industrial relationships between events, ref data, & assets

AVEVA Data Hub Events & Reference Data

• Flexible Relationships

- Any Event property can reference *another event* or *reference data* or *asset* or *[future entity]* in the graph
- More flexibility: Model the unique relationships in your data

```

Richer query language to interact with the connected industrial data

AVEVA Data Hub Events & Reference Data

- **GraphQL – Richer Query Language to interact with the data**
- Rich GraphQL API Console
- Retrieve specific properties from related data in one query by navigating the relationships between entities

The screenshot displays the AVEVA Data Hub GraphQL Console (Preview) interface. The console is divided into several sections:

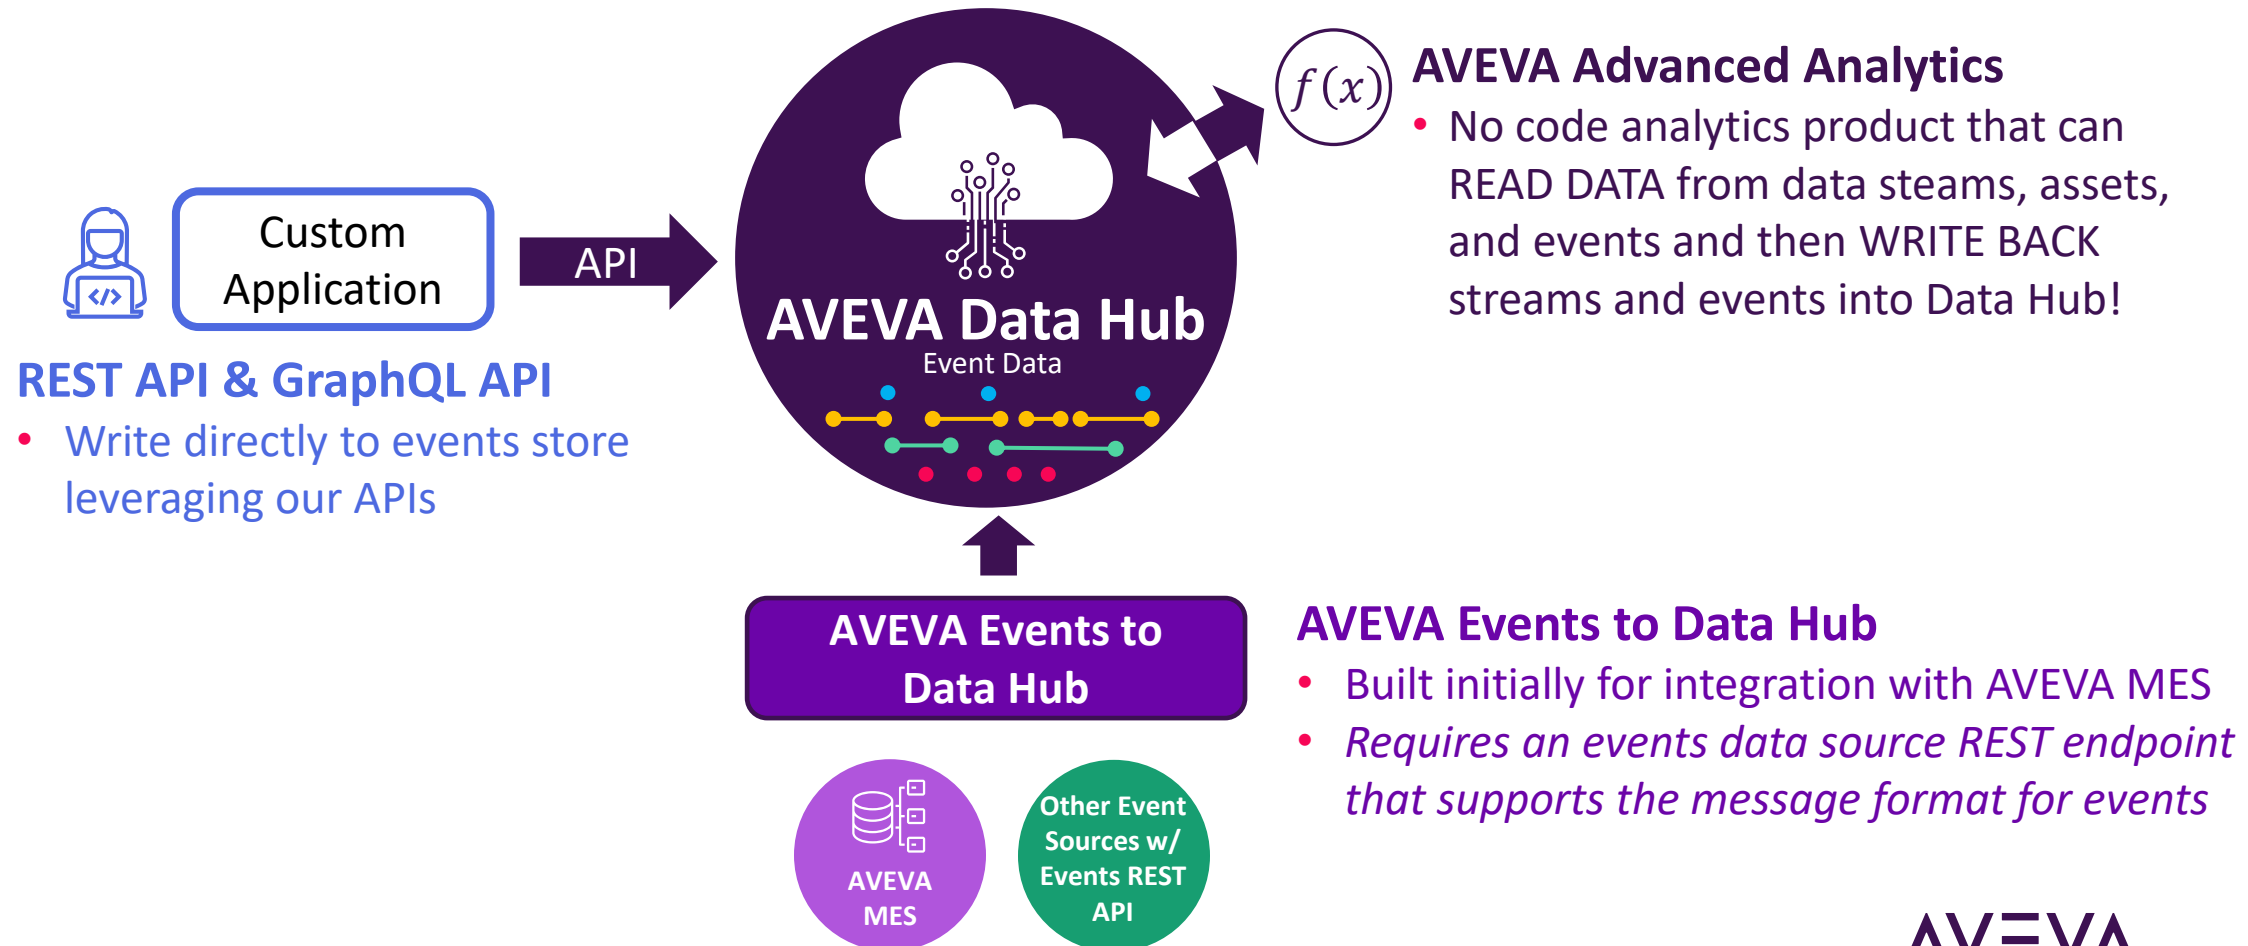

- GraphQL Explorer:** Shows a query for `queryProductionEvent: [ProductionEvent!]` with various filters and options. The `continuation` field is set to `String`. The `id` field is checked, and the `eventStartTime`, `eventEndTime`, `eventDuration`, `eventState`, `dispositionReason`, and `dispositionType` fields are also checked. The `lot` field is set to `MaterialLot`, and the `operation` field is set to `WOOperationEvent`. The `quantity` field is checked.
- Request:** Shows the GraphQL query being executed, including the `queryProductionEvent` query and the `lot` and `operation` sub-queries.
- Response:** Shows the JSON response returned by the GraphQL API, including the `data` object and the `events` array.
- Variables:** Shows the variables used in the query, which are currently empty.

The response shows a list of production events, each with associated lot and operation information. The response is structured as follows:

```
{
  "data": {
    "events": [
      {
        "queryProductionEvent": [
          {
            "eventStartTime": "2022-02-21T04:45:00Z",
            "id": "pe_0021",
            "eventEndTime": null,
            "eventDuration": "574.09:18:49.5455849",
            "eventState": "ACTIVE",
            "dispositionReason": "Very Good Product",
            "dispositionType": "GOOD",
            "lot": {
              "id": "lot_0001"
            },
            "operation": {
              "eventStartTime": "2022-02-15T04:30:00Z",
              "id": "oper_0021",
              "eventEndTime": null
            },
            "quantity": 3
          },
          {
            "eventStartTime": "2022-02-25T05:11:00Z",
            "id": "pe_0022",
            "eventEndTime": null,
            "eventDuration": "570.08:52:49.5455448",
            "eventState": "ACTIVE",
            "dispositionReason": "Very Bad Product",
            "dispositionType": "WASTE",
            "lot": {
              "id": "lot_0001"
            },
            "operation": {
              "eventStartTime": "2022-02-15T04:30:00Z",

            },
            "quantity": 3
          }
        ]
      }
    ]
  }
}
```

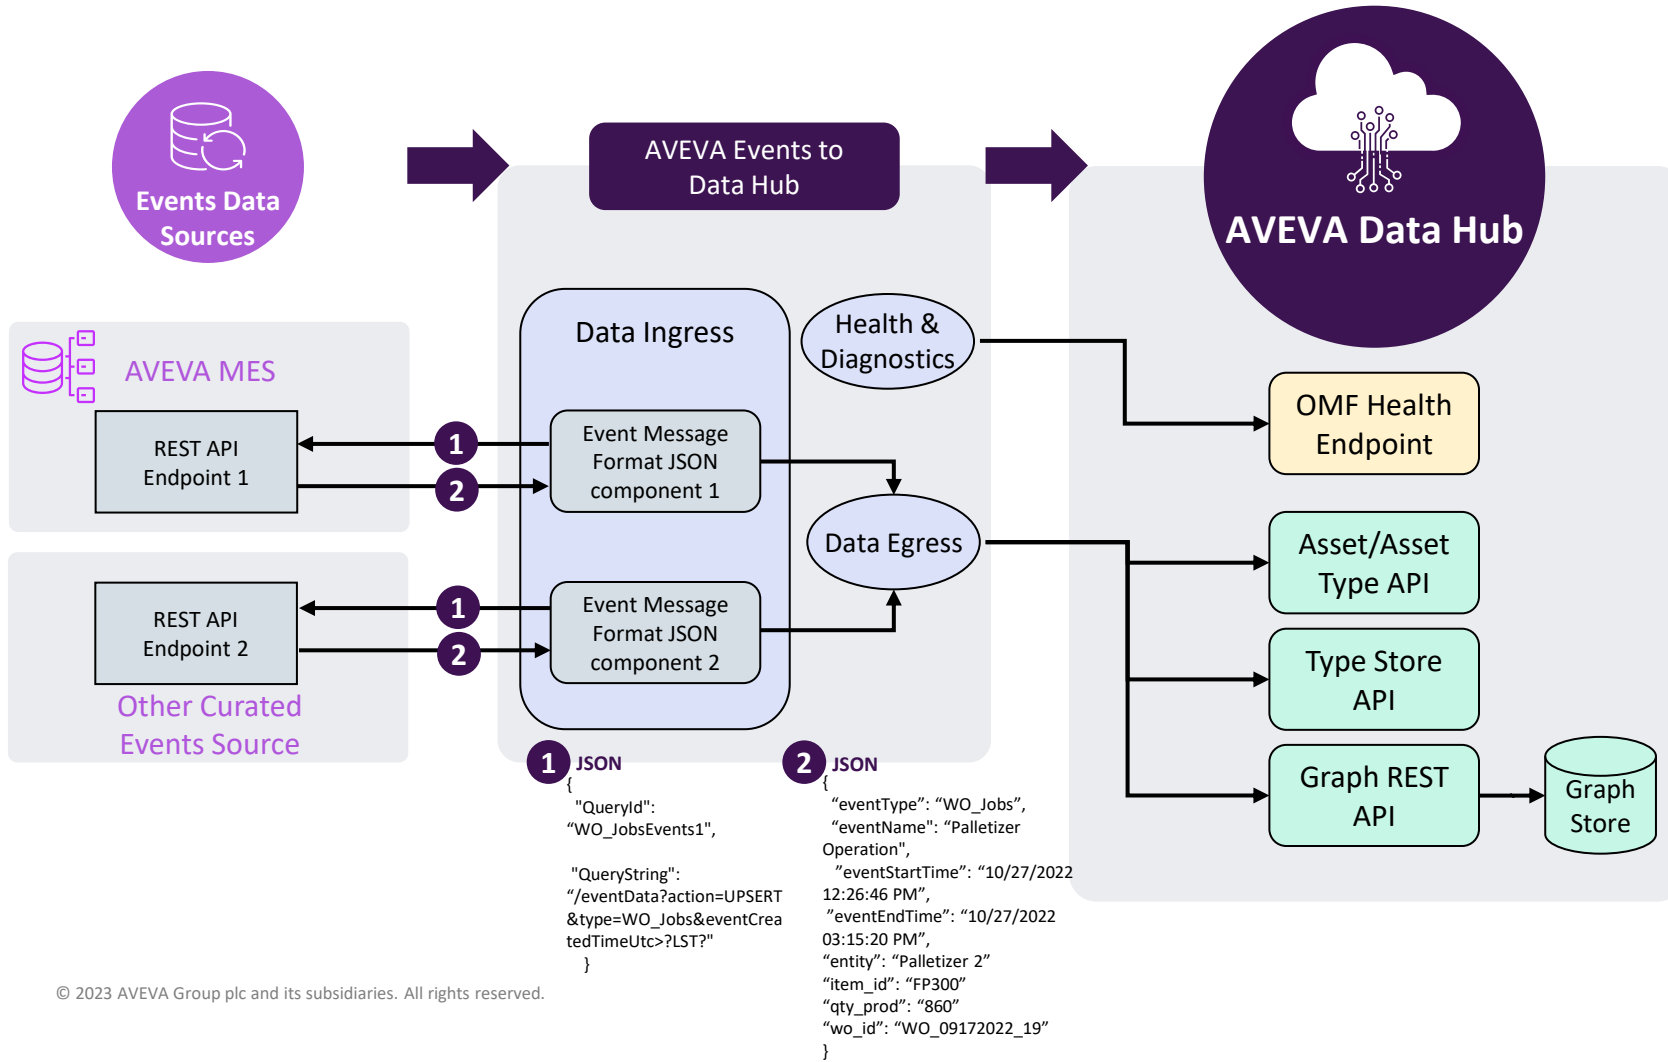

Ingressing Events

Multiple ways to ingest events into AVEVA Data Hub (more to come in future)

AVEVA Events to Data Hub

Built initially for AVEVA MES & supports sources with REST endpoint

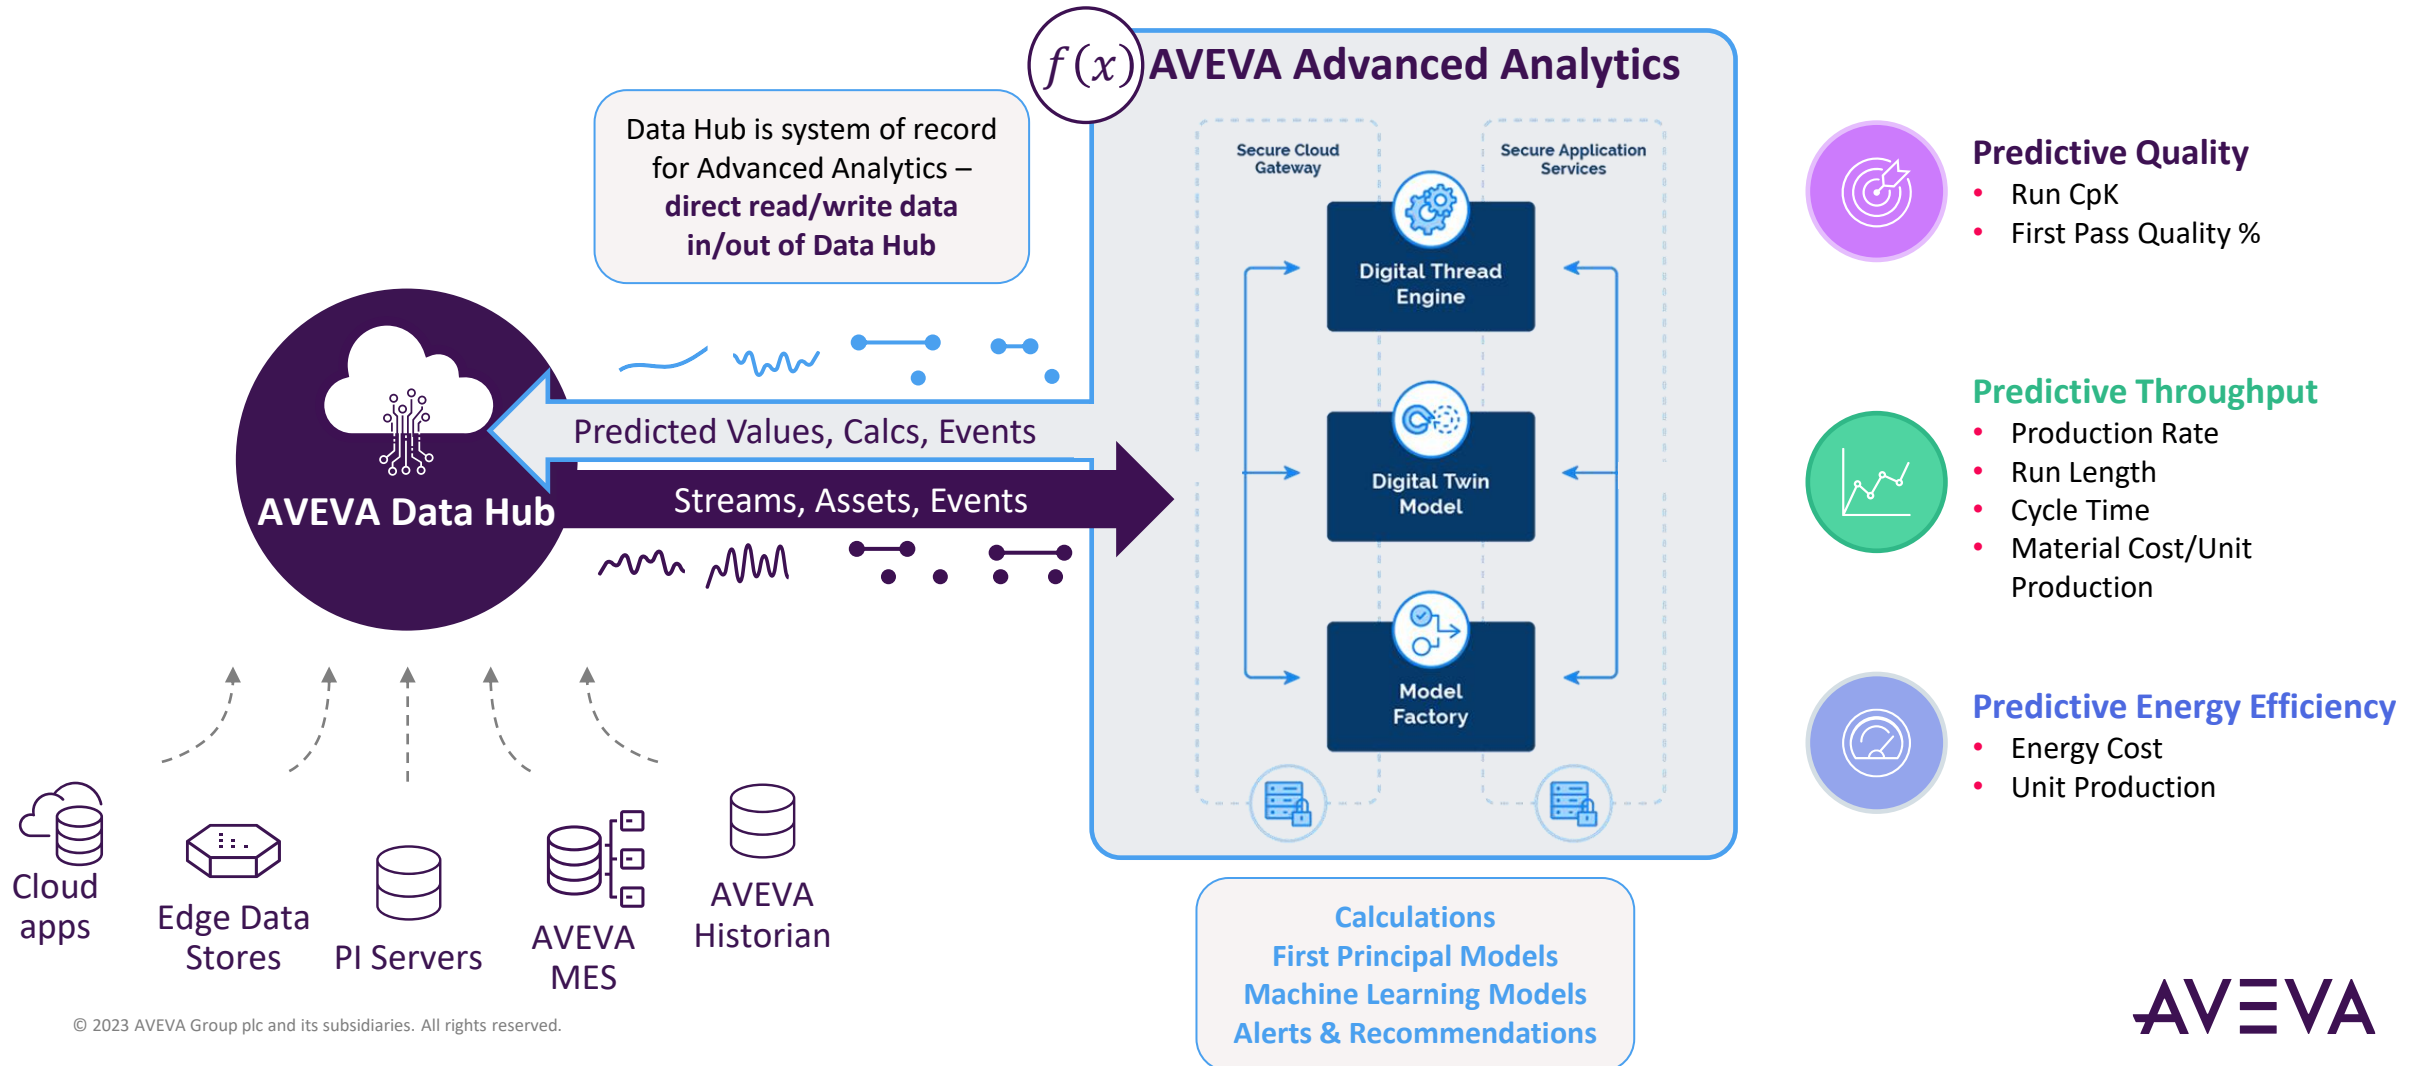

AVEVA Events to Data Hub

- Requires a data source REST endpoint that supports the message format for events
- Polls a data source for event types & data on schedules
- Creates Assets/Types, Event/Types, Reference Data/Types, Enumerations in AVEVA Data Hub
- Buffers data on disconnection
- Supports history recovery
- Health & diagnostics info

AVEVA Advanced Analytics

Combine your existing data with ML-enabled applications for faster and smarter decisions

MES enterprise production performance reporting with AVEVA “connected MES”

MES Production Performance Analysis

Single Asset Scenarios:

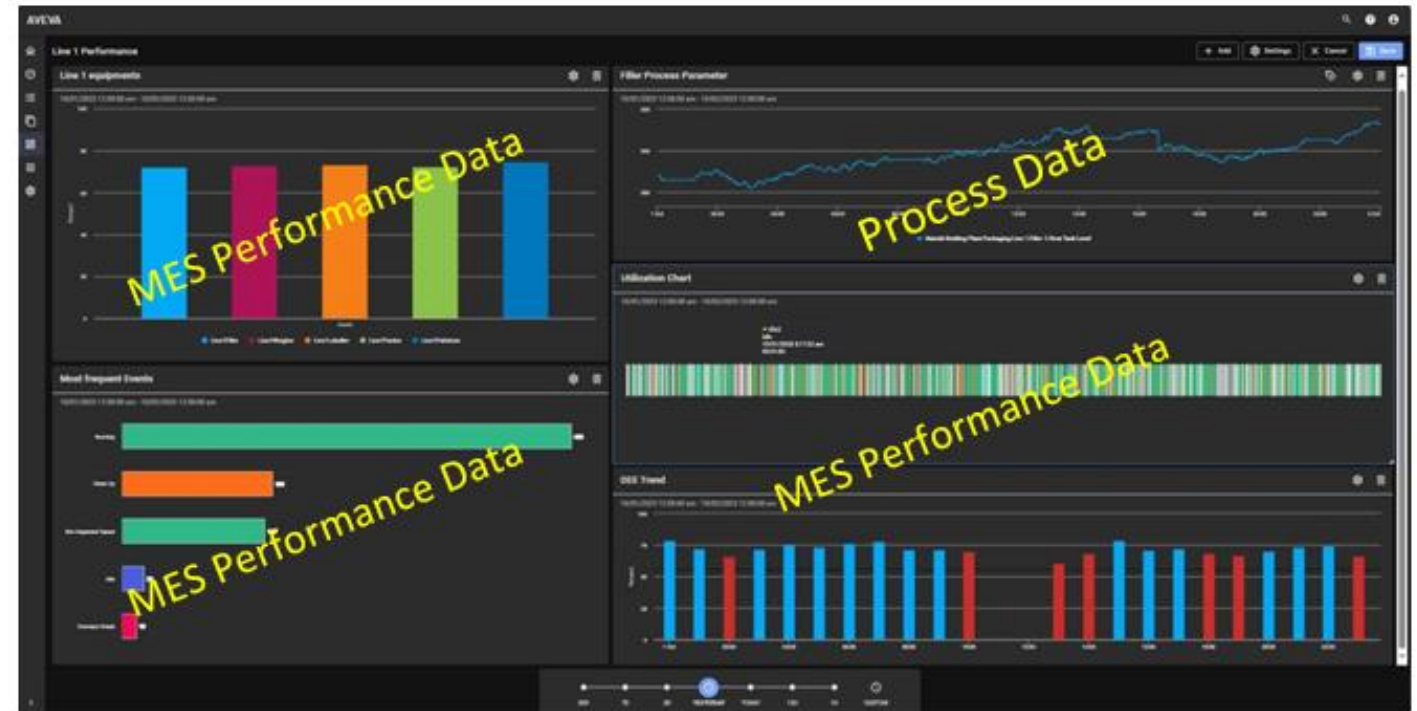

- OEE KPIs (*)
- OEE KPIs by Product/by Shift (*)
- OEE KPIs Trend (*)
- OEE KPI Details (*)
- Production Summary
- Production Trend
- Utilization Status
- Utilization Summary
- Utilization Trend
- Utilization Timeline/Gantt
- Utilization Time Summary
- Utilization Time Summary by Product/by Shift
- Utilization Details

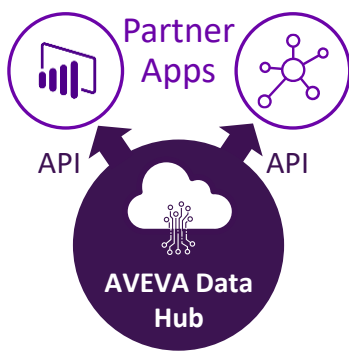

Multi-Asset Comparison Scenarios:

- OEE KPI (*)
- Downtime Summary
- MTTR/MTBF Summary

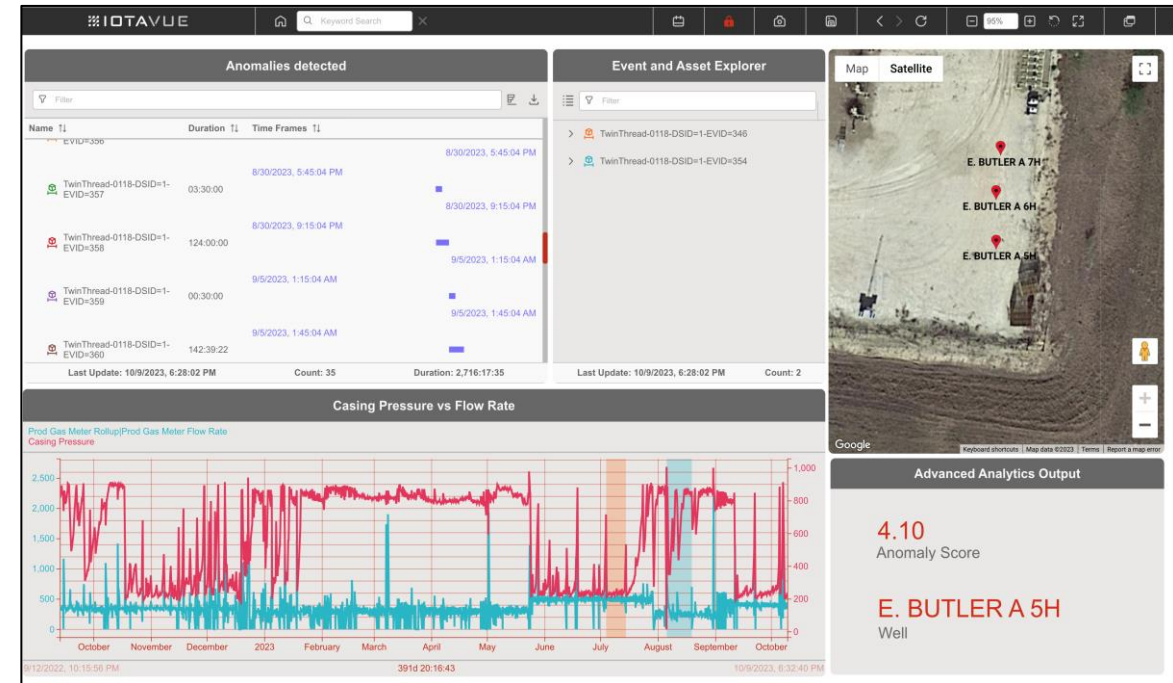

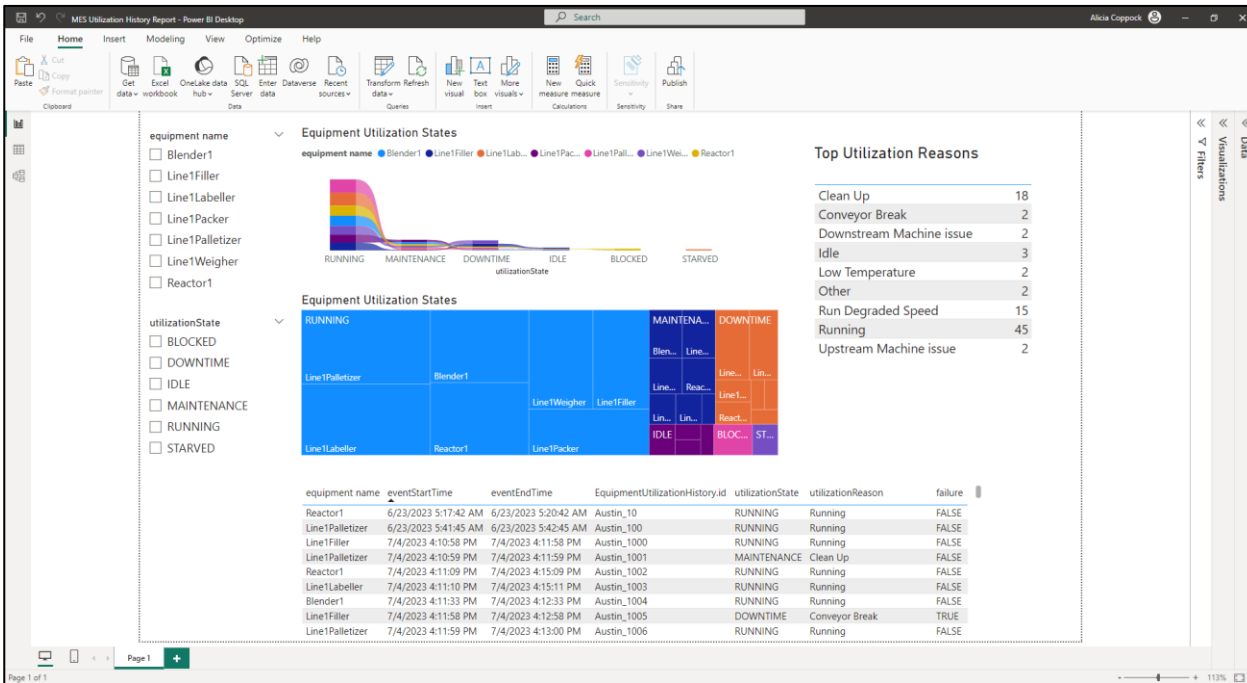

(*) OEE KPIs includes OEE, Availability, Performance & Quality

Latest Service Updates

AVEVA™ Data Hub has a new look!

Sep 30, 2021, 12:43:57 PM

On September 30th, 2021, users will find an improved look and feel when they log in to the AVEVA™ Data Hub customer portal. To be more specific, some notable changes include:

- Colors are used a little more intentionally to draw users to the primary actions within the portal.
- The left navigation menu is more visually streamlined, showing only the categories of Data Hub's capabilities (e.g. visualization and analytics) and having the ability to collapse this menu to just icons.
- There is now a universal location for where users pick the

AVEVA Lighthouse Program

Join us in a Lighthouse Project to prove & shape the value of new technology for your business scenarios!

- **AVEVA provides:**

- AVEVA pre-released software
- Installation & configuration support
- Technical R&D support
- Program management

- **Participating customer provides:**

- Viable scenario
- Resources to use AVEVA pre-released software for your scenario
- Product feedback on use of software for scenario
- Willingness to document a success story and participate in a future AVEVA public presentation

Email us at lighthouse@aveva.com to engage with our team!

ABOUT AVEVA

AVEVA is a world leader in industrial software, providing engineering and operational solutions across multiple industries, including oil and gas, chemical, pharmaceutical, power and utilities, marine, renewables, and food and beverage. Our agnostic and open architecture helps organizations design, build, operate, maintain and optimize the complete lifecycle of complex industrial assets, from production plants and offshore platforms to manufactured consumer goods.

Over 20,000 enterprises in over 100 countries rely on AVEVA to help them deliver life's essentials: safe and reliable energy, food, medicines, infrastructure and more. By connecting people with trusted information and AI-enriched insights, AVEVA enables teams to engineer efficiently and optimize operations, driving growth and sustainability.

Named as one of the world's most innovative companies, AVEVA supports customers with open solutions and the expertise of more than 6,400 employees, 5,000 partners and 5,700 certified developers. The company is headquartered in Cambridge, UK.
