Intelligent Liquid Pipelines & Terminal Operations

Attaining synergy value from the Integration of AVEVA Enterprise SCADA and the AVEVA™ PI System™

Steven Textor

Process Engineer, Enbridge Liquid Pipelines

AVEVA

Enbridge at-a-Glance

The Evolution of the PI System & Enterprise SCADA Integration

Intelligent Pipeline Use Cases:

- Use of PI AF Templates & PI Vision for Enhanced Visualization
- Flow path Analytics

Perspectives on best practices & Lessons learned

Outline

Enbridge at-a-Glance

Enbridge is North America's leading energy infrastructure company

Liquids Pipelines

- ~28,661 km/17,809 mi of pipe
- Moving 3 million barrels/day

30%

of crude oil produced in North America

Natural Gas Pipelines

- 118,763* km/73,796* mi of pipe
- Moving 25.7 Bcf/day

20%

of the natural gas consumed in the U.S.

Natural Gas Utilities

- 3.9 million retail customers
- Serving 670+ communities

75%

of Ontario residents' energy needs delivered

Renewable Power

- 45+ renewable power facilities
- 2,174 MW generating capacity

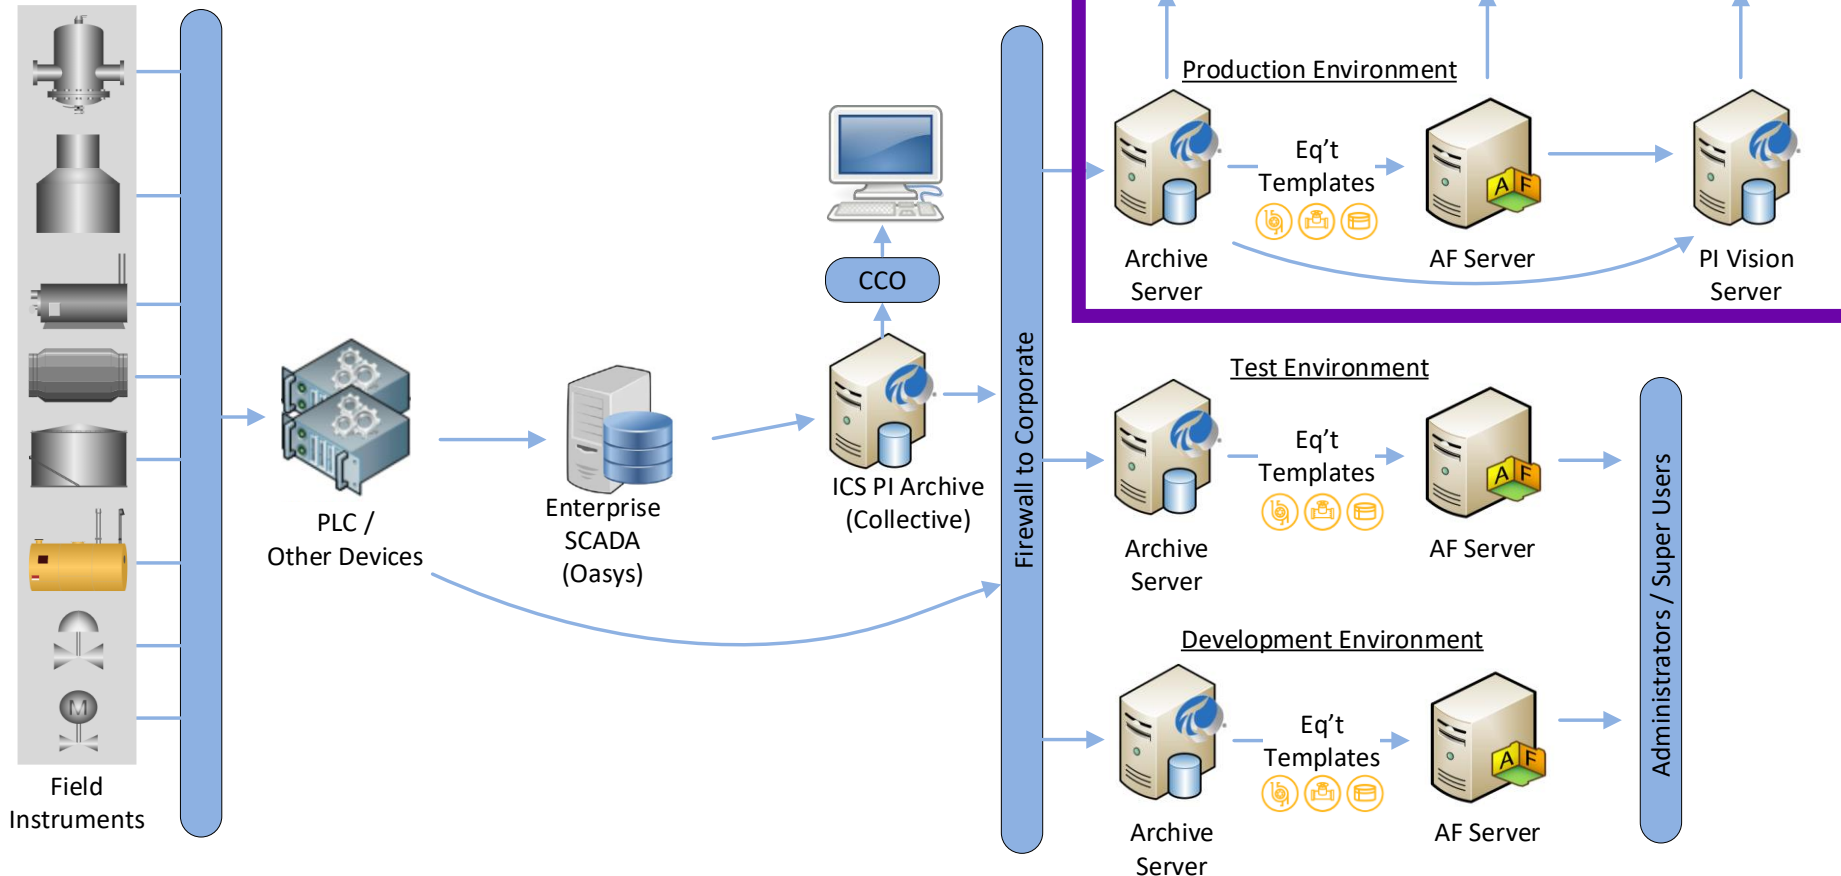

966,000

homes powered by our assets

* Includes DCP Midstream assets

The Base - 2018 / 2019 +

A System Built for Security

PI System & Enterprise SCADA Details

Heavy use of PI AF & PI Vision Templates with Enterprise SCADA Integration

Enterprise SCADA

- **Consoles:**
 - 37
- **Telemetered Points:**
 - 440,000+
- **Field Devices:**
 - 3,000+
- **Poll Cycle:**
 - 5 seconds
- **Pipeline Operations Liquids**
 - Pipeline Objects: 54,000+
 - Automation Objects: 83,000+

PI System

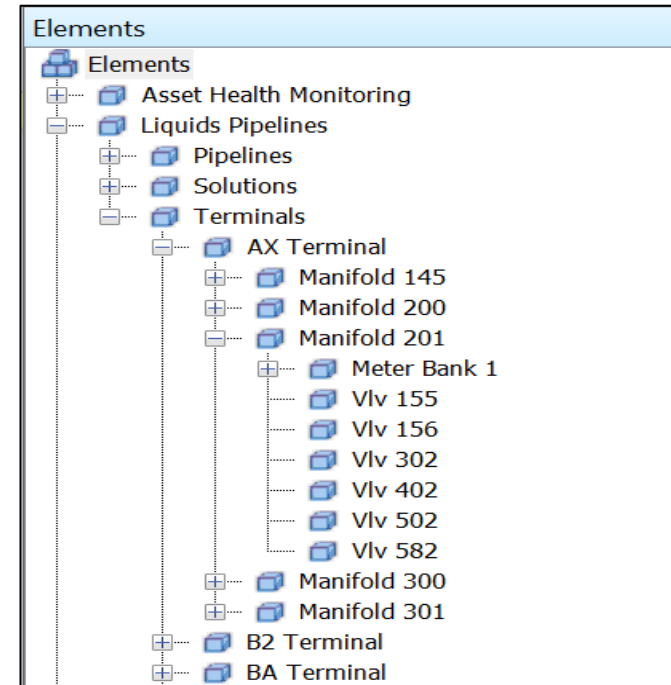

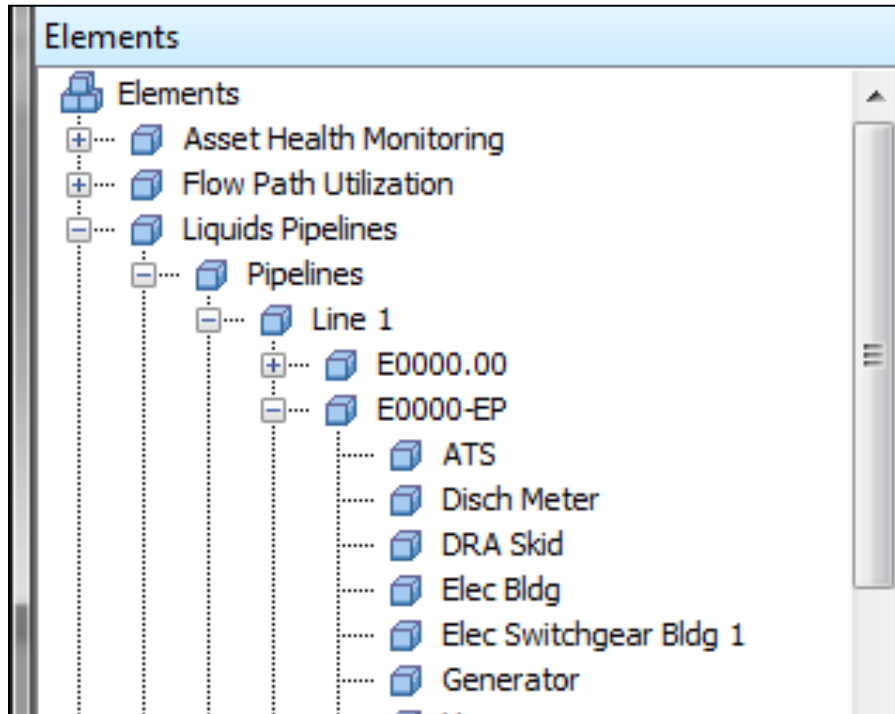

- **# Servers:**
 - 14 servers in Production
 - (4 archive servers, 2 AF servers, 5 interface servers, 3 PI Vision servers)
- **# PI Tags:**
 - 700,000 and growing fast
- **# AF Elements:**
 - 96K Elements,
 - 550K Attributes,
 - 125K Analyses
- **# of AF Templates:**
 - 8 Event Frame templates,
 - 50 Element templates

Configuring PI AF Strategically

Pipeline and Terminal Hierarchies

Traditional Asset Hierarchy

- Based on Corporate Maintenance System Hierarchy for location and equipment type

Use of PI AF Templates & PI Vision Linked to Enterprise SCADA for Enhanced Visualization

The screenshot displays the AVEVA PI Vision interface for Line 55, Quincy. The interface is divided into several sections:

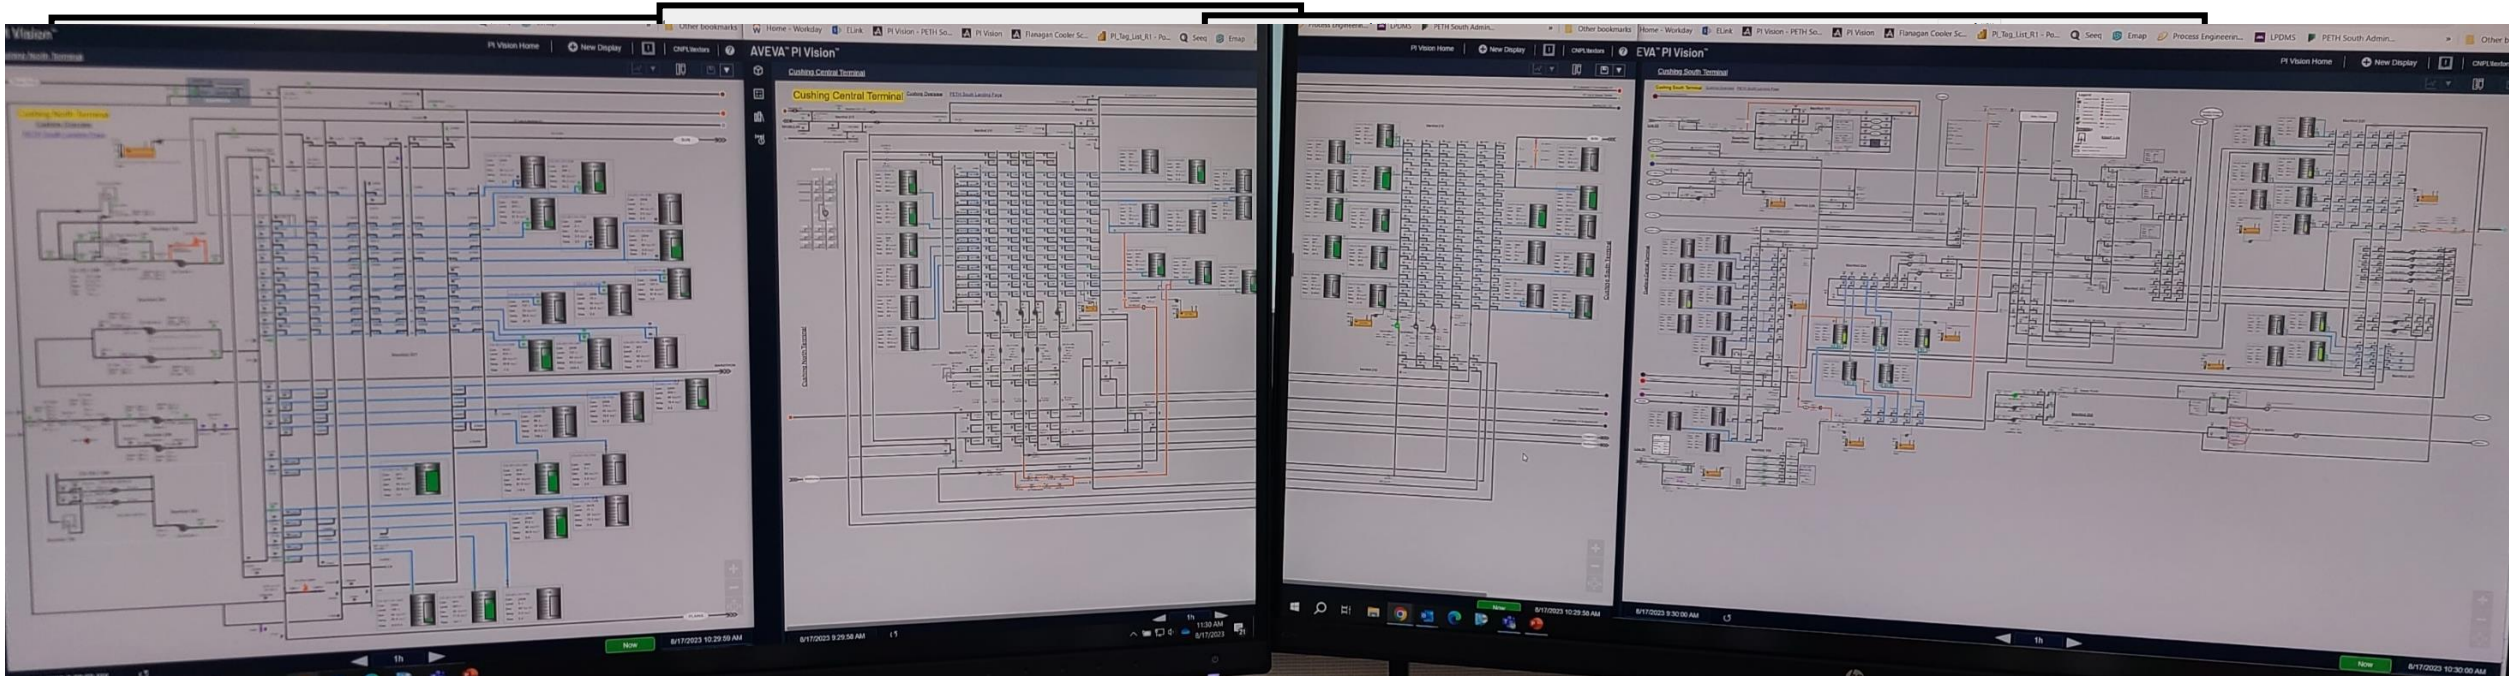

- Station Flow Rate:** A line graph showing flow rate over time.
- Temperatures:** A line graph showing temperature levels.
- PCV Information:** A line graph showing PCV levels.
- Power:** A line graph showing power consumption.
- Suction Pressures:** A line graph showing suction pressures for various pumps.
- Casing Pressures:** A line graph showing casing pressures.
- QY-55-PCV:** A line graph showing PCV for the QY-55 unit.
- Discharge Pressures:** A line graph showing discharge pressures.
- Unit Information:** A section showing the status of four units (QY-55-U-1 to U-4) with 'ON' indicators.
- DRA:** A section showing DRA (Discharge Rate Alarm) status with a gauge and a '20.00' value.
- Sump Information:** A section showing sump status with a gauge and a '23.00' value.
- Variable Frequency Drive Speed:** A section showing VFD speed.
- Station Meter:** A line graph showing station meter readings.

Flowpath Analytics— Seeq Extended

View as if the only path!

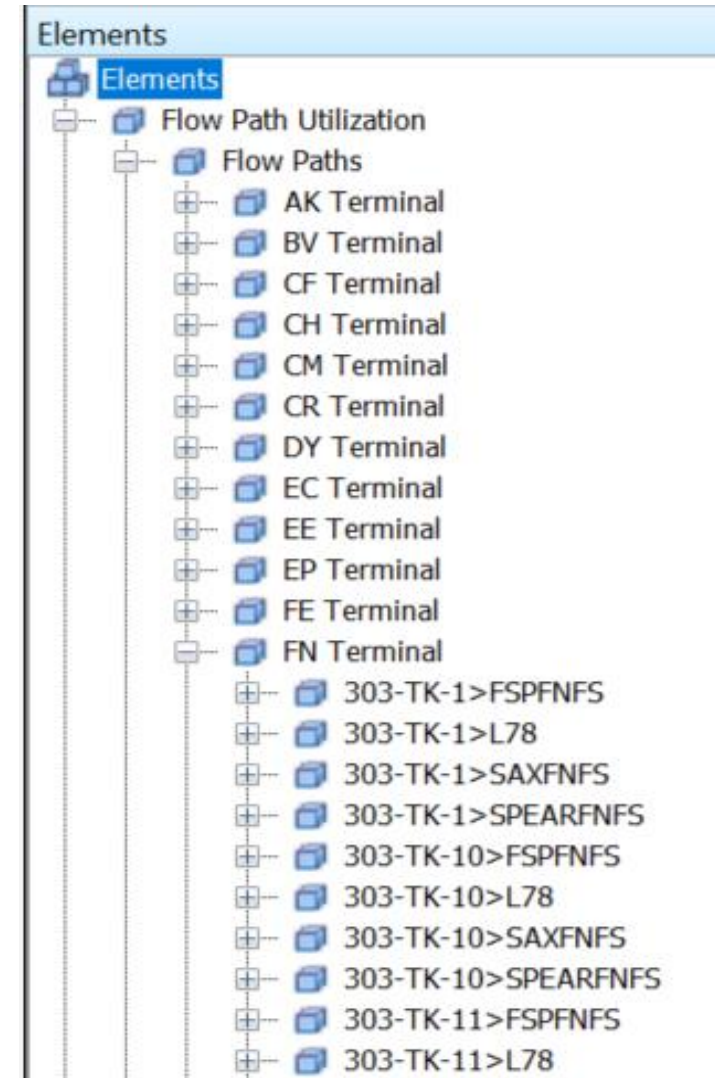

Flowpath Analytics

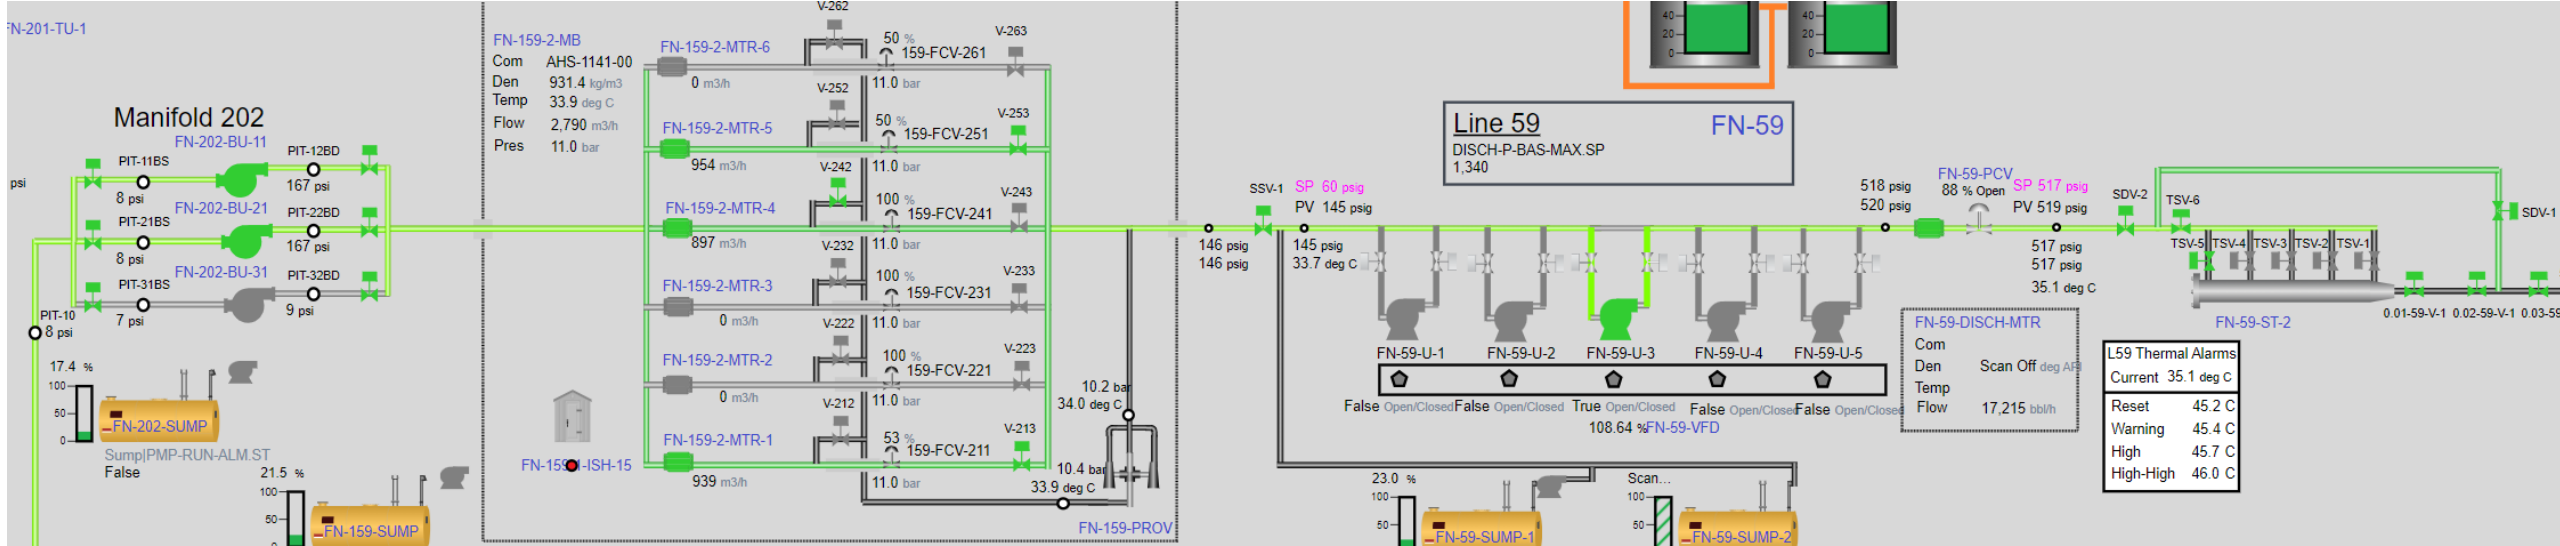

Asset Hierarchy – Based on Injection and Delivery Flow Paths

- Based on approved flow Paths through a terminal
- Provides a filter for Operating Data
- Works well with Seeq Functionality

But What If? – Flow Paths!

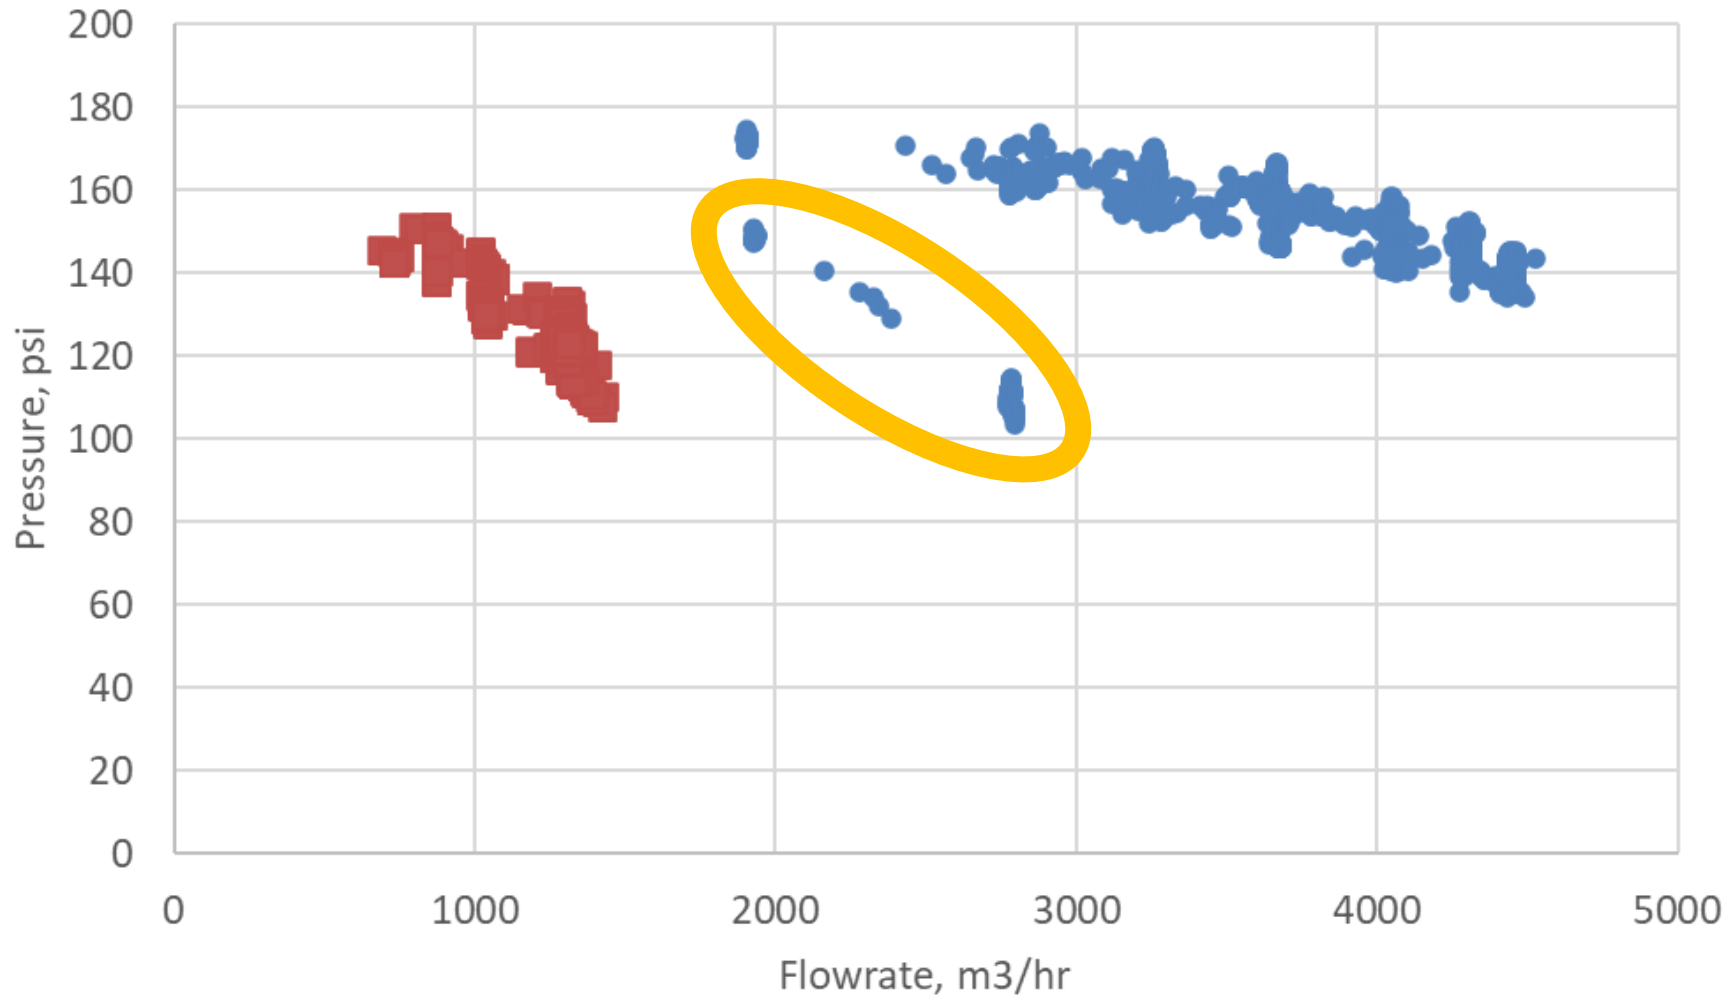

- Instant Flow Path Knowledge
 - Quick Operational Evaluations
 - Longer term efficiency monitoring
- Knowing how much equipment is being used:
 - Facility Integrity
 - Asset Monitoring

But What If? – Flow Paths!

Tank 15 to Spearhead/FSP BU Discharge Pressure

Conclusion

Best Practices and Lessons Learned

Imparting Wisdom

Best Practices

- Get the Base Correct
 - Good PI AF Structure
 - Consistent Tagging & Governance
 - Proper Engineering Units
- Plan out PI AF Templates as early as possible
- Make it easy to find the information
- Integrate AVEVA eSCADA & the PI System – significant synergy value

Lessons learned

- Visualization need to be simple but include all the appropriate info.
- Maintenance of PI Vision Screens is not as onerous as you would think.
- Engineers want different information than a control room.

Intelligent Liquid Pipeline & Terminal Operations

AVEVA eSCADA and the AVEVA PI System – Better Together by Enabling Synergy Value and Intelligence

Challenge

- Finding information
- Seeing the pipeline and terminal systems as a whole – many SCADA screens to navigate
- Reactive & cumbersome troubleshooting
- Seeing flow paths in real time & retroactively to troubleshooting
- Reactive vs proactive, exception-based operations
- Enabling remote SME support

Solution

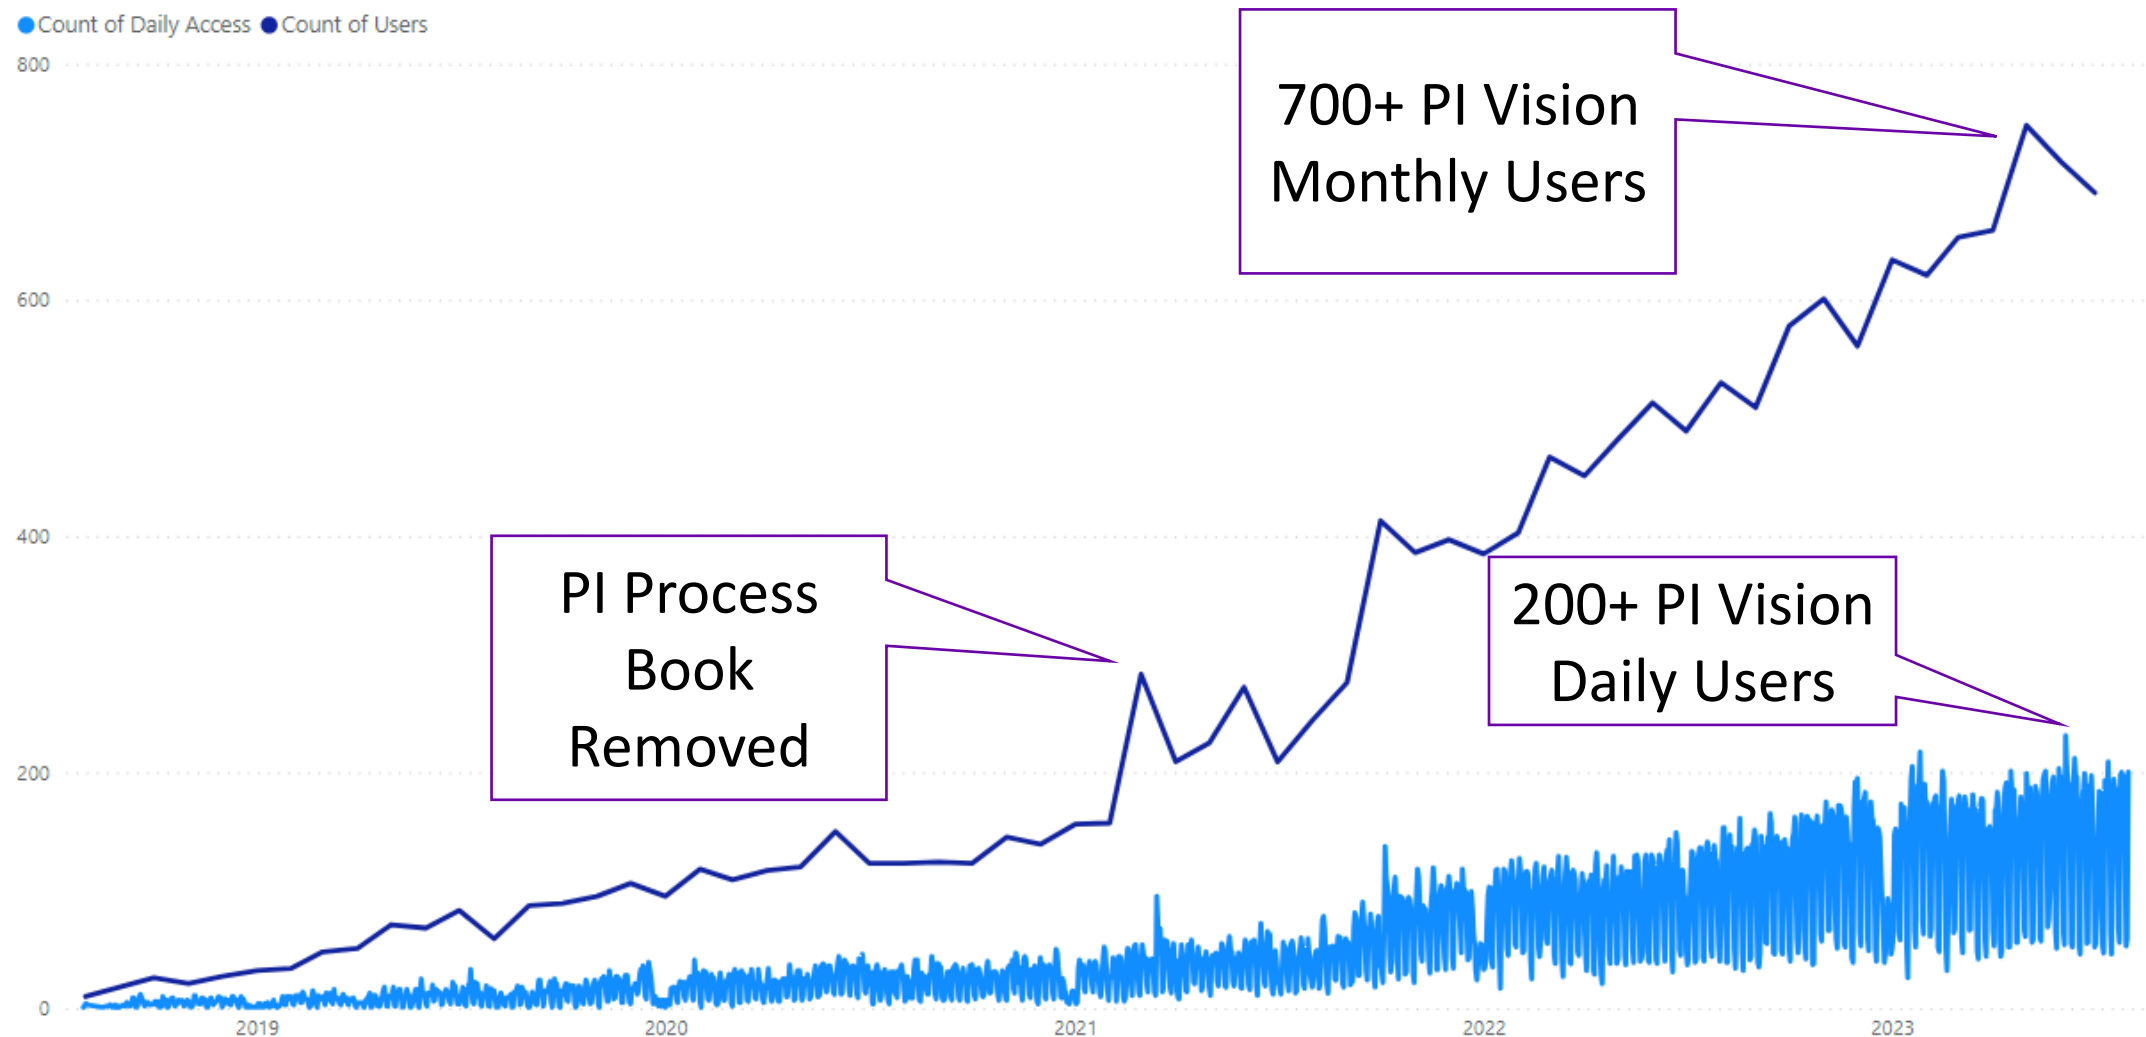

- Integrated the AVEVA eSCADA and PI System to capture synergy value
- Configured PI AF in both a standards and linear hierarchy using templates
- Configured PI Vision displays to provide system views and to easily find information
- Configured PI Event Frames for proactive identification of issues & enhanced troubleshooting
- Started the journey to developing overlay PI System based applications like pump efficiency, cavitation avoidance, etc.

Benefits

- Significant improvement in SME effectiveness and efficiency
- Improved flow path visibility and associated analytics in support of FBI
- Move to proactive, exception based intelligent liquid pipeline & terminal operations
- Ability to capture and share knowledge and best practices

The Result of Easy to Find Process Information!

ABOUT AVEVA

AVEVA is a world leader in industrial software, providing engineering and operational solutions across multiple industries, including oil and gas, chemical, pharmaceutical, power and utilities, marine, renewables, and food and beverage. Our agnostic and open architecture helps organizations design, build, operate, maintain and optimize the complete lifecycle of complex industrial assets, from production plants and offshore platforms to manufactured consumer goods.

Over 20,000 enterprises in over 100 countries rely on AVEVA to help them deliver life's essentials: safe and reliable energy, food, medicines, infrastructure and more. By connecting people with trusted information and AI-enriched insights, AVEVA enables teams to engineer efficiently and optimize operations, driving growth and sustainability.

Named as one of the world's most innovative companies, AVEVA supports customers with open solutions and the expertise of more than 6,400 employees, 5,000 partners and 5,700 certified developers. The company is headquartered in Cambridge, UK.
