

OCTOBER 25, 2023

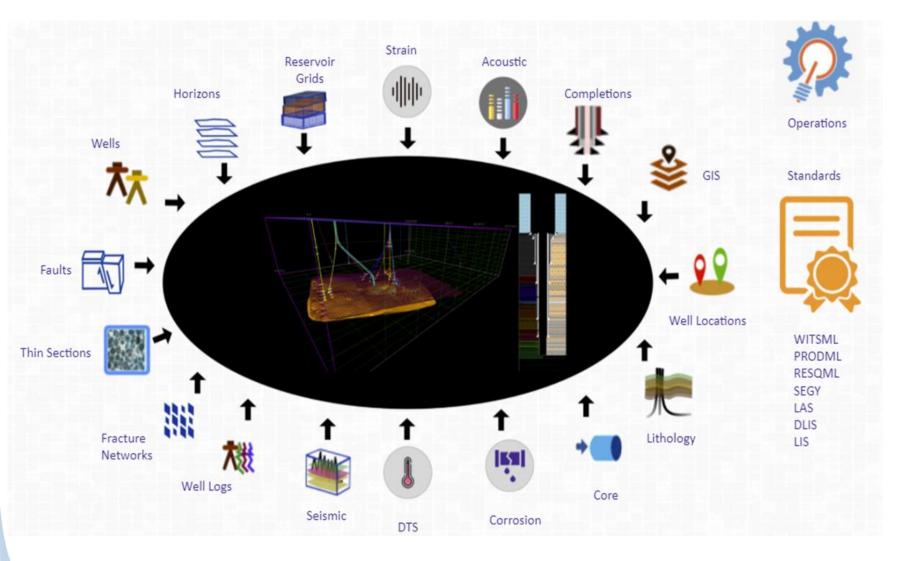

Enriching OSDU Energy Standards with Edge Analytics, FogLAMP, and AVEVA Data Hub

Sashi Gunturu

CEO, Petrabytes

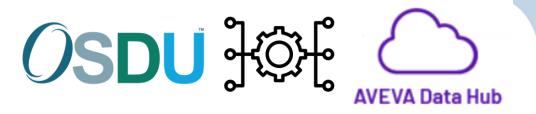

Open Subsurface Data Universe

- Data Standards for Upstream Energy Datasets
- Expanding to Other Energy Sources
- OSDU is Cloud Agnostic

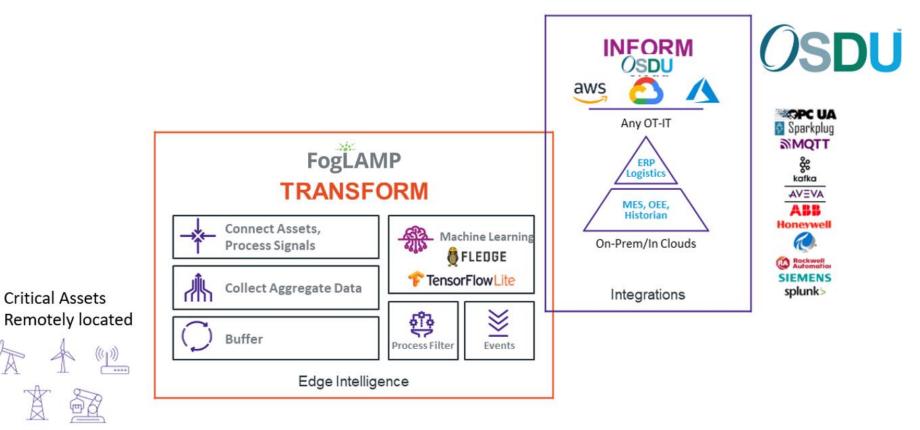

- OSDU Platform is currently supporting Exploration Drilling and Production Domain. Operators want to analyse OSDU data with real time Operational data.
- O ADH provides a centralized repository for all operational data and continuously updated in real time.
- © Extensive APIs for IO into ADH. Seamless integration into OSDU
- OSDU Integration with ADH enables
 - Complete Operational insights
 - Predictive Maintenance of Drilling and Production Assets

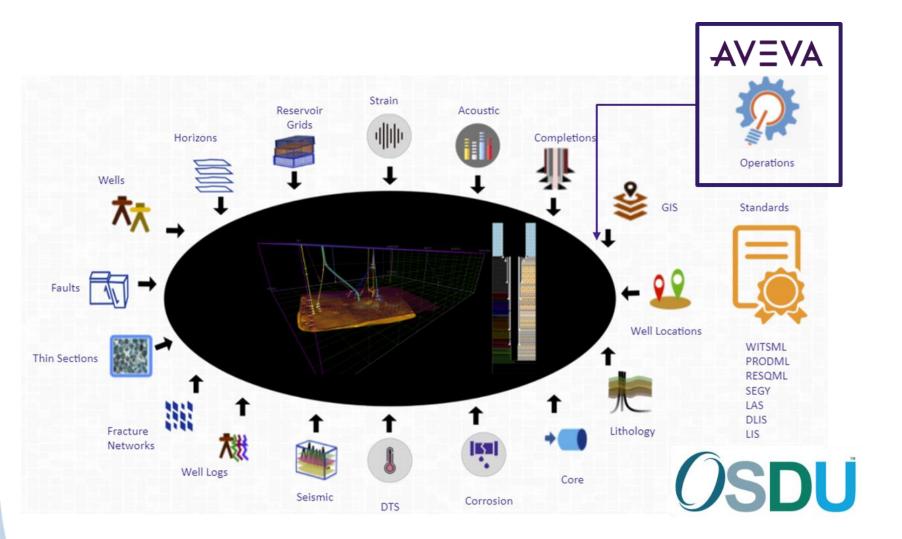

Enhanced Business Value - Edge Integration

- Solution Fledge brings in real time data with variety of protocols
- © Enables Edge Intelligence
- © Support Drilling & Production, Process Control Domain

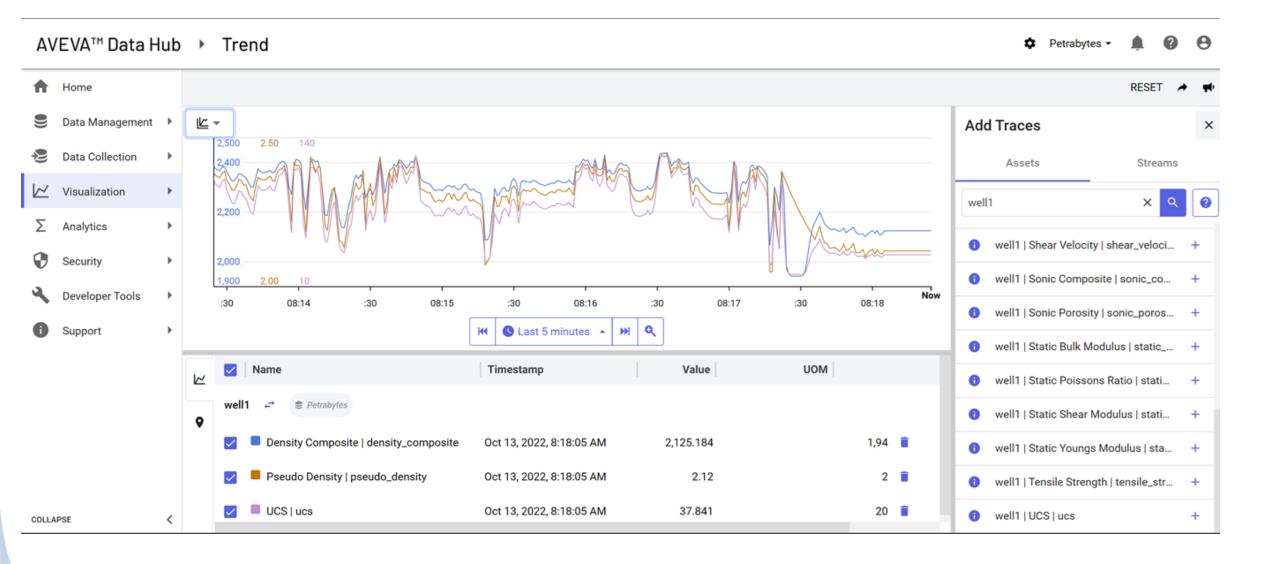

Enhanced Value with ADH Integration

- ADH brings in Operational Data
- ADH enables Operations Insights
- Cloud Architecture and ADH
 APIs enables easy Integration

Real-Time Data Drilling Data Aggregation in ADH

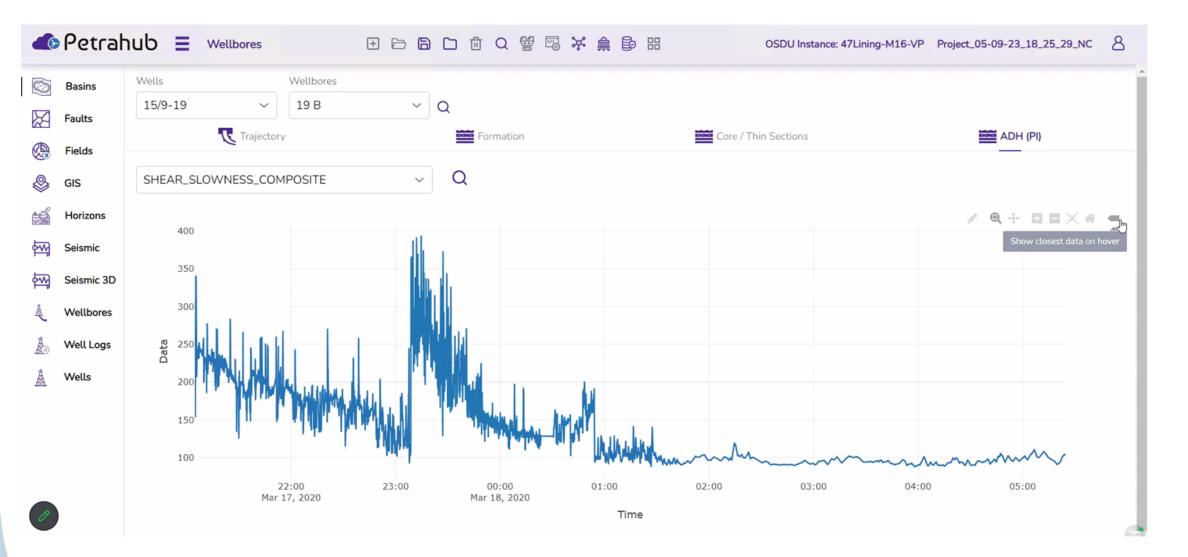

Example of Streaming Drilling Data - Metadata

PetraHub Energy EDM Platform - Query data from ADH

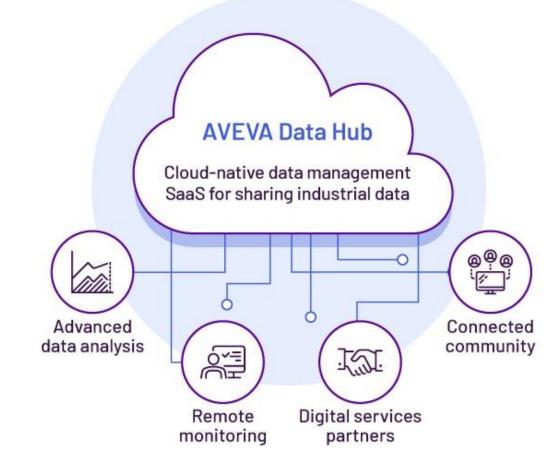

Data Federation - Contextual Analysis OSDU Data with ADH

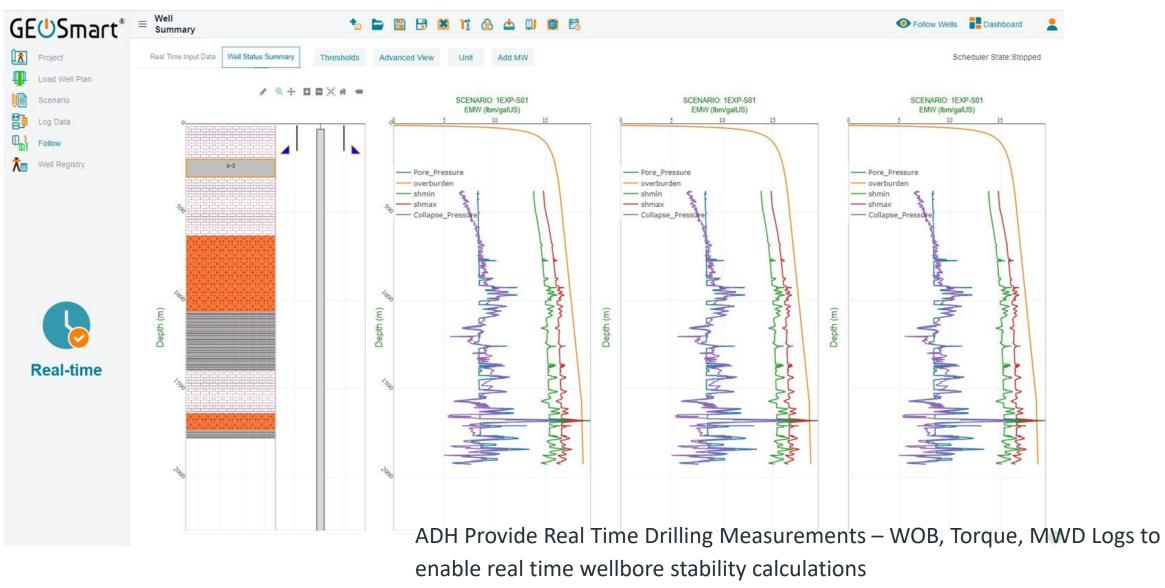

Edge & ADH Integration with Real Time Data Ingestion Platform

Use Cases - Upstream & Midstream

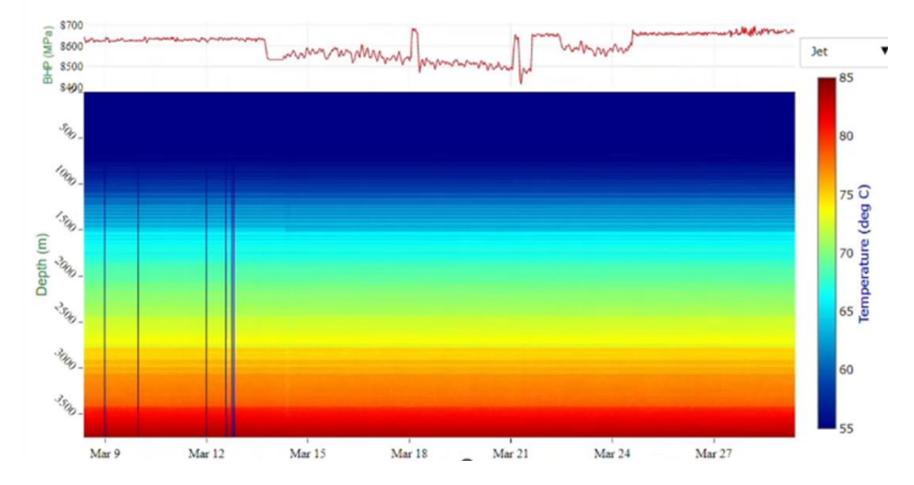

Mitigation Drilling Risks with Failure Predictions

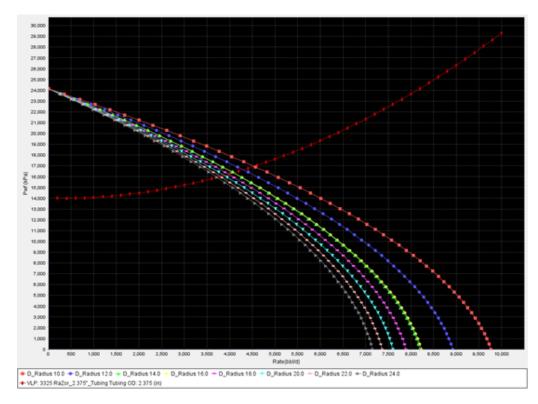

Real-Time Bottom Hole Sensor Data with Fiber Optic Sensing Data (Distributed Temperature Sensing)

DTS Integration with Aveva Data Hub

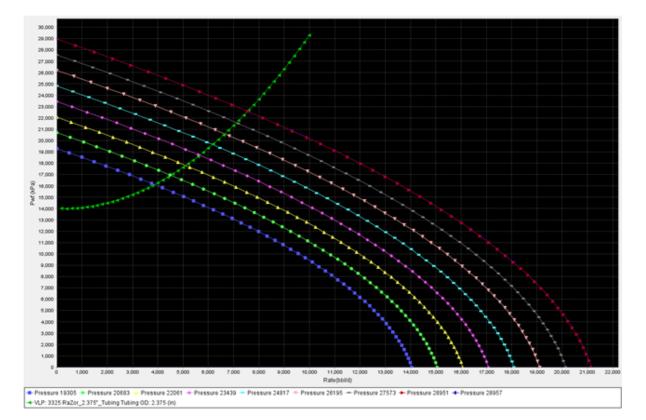

DTS

Prediction of Optimal Completion Design Integration of Real-Time Data from ADH (OSI PI Data BHP, BHT etc.)

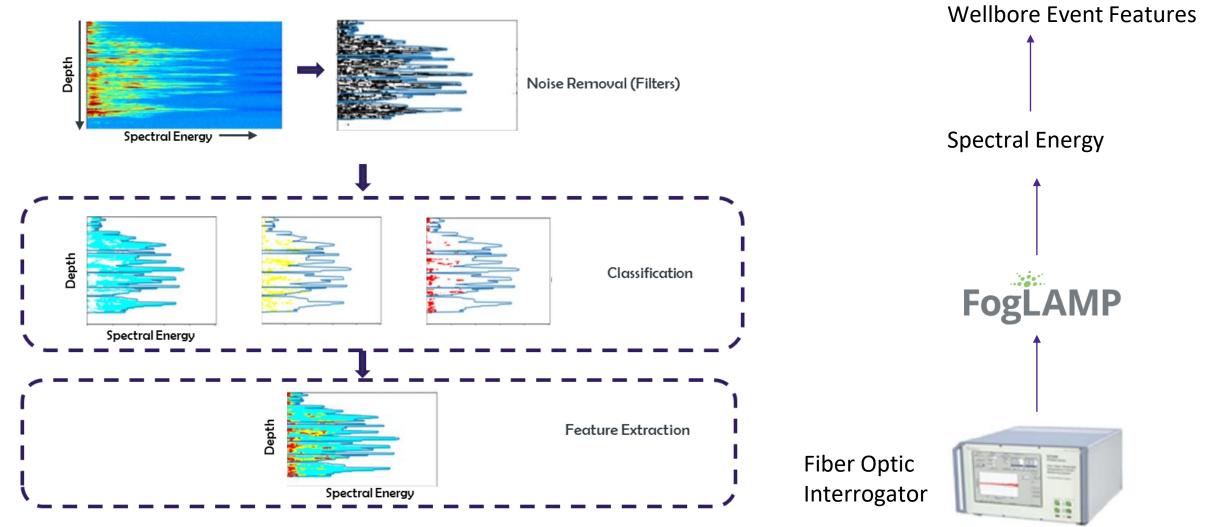

Static Model

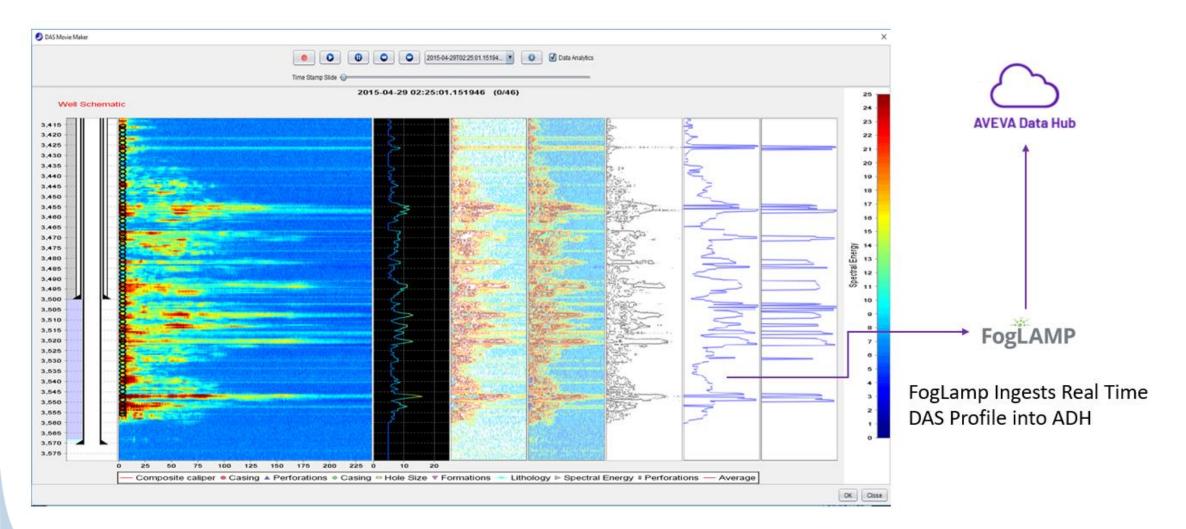

Updated Reservoir Flow with Real Time BHP, BHT from ADH

Distributed Acoustic Sensing - Machine Learning on the Edge

Production Surveillance, Frac monitoring, Asset Monitoring

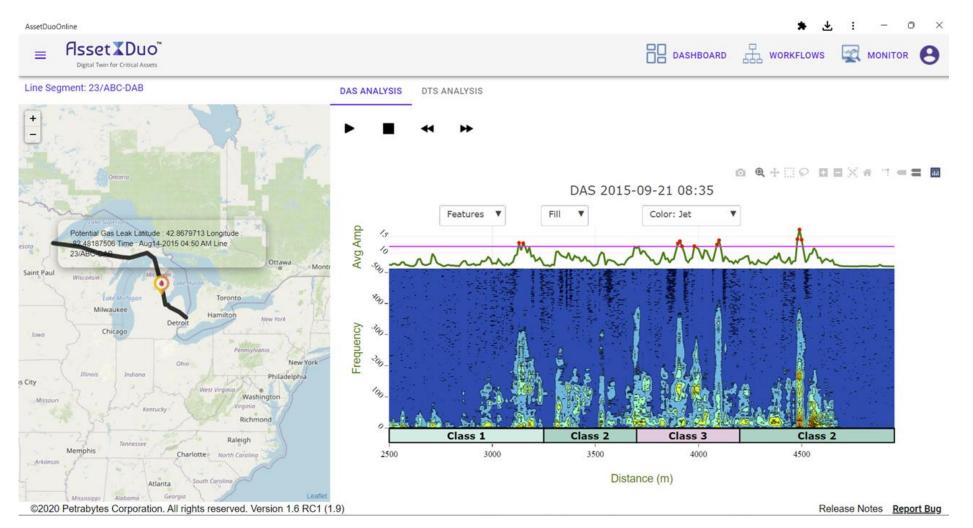

Distributed Acoustic Sensing - Processing on Fledge and aggregation in ADH

Production Surveillance, Frac monitoring, Asset Monitoring

Pipeline Monitoring with DAS (Acoustic Sensing)

FogLamp ingests Real Time DAS profile into ADH to detect events on pipelines with continuous monitoring

This presentation may include predictions, estimates, intentions, beliefs and other statements that are or may be construed as being forward-looking. While these forward-looking statements represent our current judgment on what the future holds, they are subject to risks and uncertainties that could result in actual outcomes differing materially from those projected in these statements. No statement contained herein constitutes a commitment by AVEVA to perform any particular action or to deliver any particular product or product features. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this presentation.

The Company shall not be obliged to disclose any revision to these forward-looking statements to reflect events or circumstances occurring after the date on which they are made or to reflect the occurrence of future events.

ABOUT AVEVA

AVEVA is a world leader in industrial software, providing engineering and operational solutions across multiple industries, including oil and gas, chemical, pharmaceutical, power and utilities, marine, renewables, and food and beverage. Our agnostic and open architecture helps organizations design, build, operate, maintain and optimize the complete lifecycle of complex industrial assets, from production plants and offshore platforms to manufactured consumer goods.

Over 20,000 enterprises in over 100 countries rely on AVEVA to help them deliver life's essentials: safe and reliable energy, food, medicines, infrastructure and more. By connecting people with trusted information and AI-enriched insights, AVEVA enables teams to engineer efficiently and optimize operations, driving growth and sustainability.

Named as one of the world's most innovative companies, AVEVA supports customers with open solutions and the expertise of more than 6,400 employees, 5,000 partners and 5,700 certified developers. The company is headquartered in Cambridge, UK.
